Subject to subsequent revision, the following is the proposed list of volumes of the Linguistic Survey of India.

- Vol. I. Introductory.
- „ II. Mōn-Khmēr and Tai families.
- „ III. Part I. Tibeto-Burman languages of Tibet and North Assam.
 „ II. Bodo, Nāgā, and Kachin groups of the Tibeto-Burman languages.
 „ III. Kuki-Chin and Burma groups of the Tibeto-Burman languages.
- „ IV. Dravido-Munda languages.
- „ V. Indo-Aryan languages, Eastern group.
 Part I. Bengali and Assamese.
 „ II. Bihārī and Oṛiyā.
- „ VI. Indo-Aryan languages, Mediate group (Eastern Hindī).
- „ VII. Indo-Aryan languages, Southern group (Marāṭhī).
- „ VIII. Indo-Aryan languages, North-Western group (Sindhī, Lahndā, Kashmīrī, and the 'Non-Sanskritic' languages).
- „ IX. Indo-Aryan languages, Central group.
 Part I. Western Hindī and Panjābī.
 „ II. Rājasthānī and Gujarātī.
 „ III. Himalayan languages.
- „ X. Eranian family.
- „ XI. "Gipsy" languages and supplement.

(iii) Map of the Dialects of the Kachin Group of Tibeto-Burman Family	499

Map of the
LANGUAGES & DIALECTS OF THE BARA OR BODO
GROUP OF THE TIBETO-BURMAN FAMILY.

NOTE. The Boundaries are only approximate.
Bara is spoken by scattered families in the Sibsegur and
Lakimpur Districts. This cannot be shown in the
map.
For simplicity, only the Kach speakers of Gualpara
and the Garo of Garo are shown.
The southern part of the Lushai area is also inhabi-
ted by speakers of Bodo-Mech.
In the District of Jaintia, there are also found speakers of
Mech and/or Naga and Kach languages.

THE BĀRĀ OR BODO GROUP.¹

The generic name 'Bodo' was first applied by Hodgson to this group of languages. The exact sound is better represented by spelling it Bādā or Bārā. Bodo or Bārā is the name by which the Mech or Mes and the Kachārīs call themselves. Like other tribal names in Assam, the name probably once meant a male member of the tribe. In the closely allied Tipurā language *bārā(k)*, still means a 'man,' and a Kachārī or Mech will call himself a *Bārā-f'sā*, a son of Bārās, to distinguish him from *e.g.* a *Sim-sā*, that is, a Bhotiyā, or *Chin-f'sā*, a son of China. The Bārā folk who live to the west of the Kamrup district are called Mech by their Hindū neighbours. This word is probably a corruption of the Sanscrit '*Mlēcchha*,' which corresponds to the original meaning of our word 'Welsh,' *i.e.* foreigner, stranger. Those of the Bārā who live in and to the east of the district of Kamrup are called Kachārīs, pronounced *kosārī*, by Hindūs. It is said that the name Kachārī originated in the fact that, some 200 years ago, the Rājā of Hill Tipperah, when giving his daughter in marriage to the Rājā of Maibong in the present North Cachar, gave her as dowry the Surmā valley in what is now known as the district of Cachar. The inhabitants of North Cachar were the Dīmā-sā, whom the Assamese called Kachārīs. In process of time this name was extended to their Bārā kinsmen, who occupied the plains of Assam and North-East Bengal over an area practically coterminous with the ancient kingdom of the Kos (or Koch) kings of whom the Maharajah of Cooch Bihar and the Mangaldai Rajahs are the present representatives. This explanation has, of late, been objected to on the ground that the name of the district is, phonetically, *Kāchār* or *Kāsār*, with a long *ā* in the first syllable, and not *Kosār*. It has been suggested that the word *Kos-ārī* means the *Kos-ārūi*, the sons of the Kos, and that Hodgson might have called them, what some of the family still call themselves, namely, Koch or Kos.² The use of the word Koch to describe the Bārā race is, however, open to the objection that the name has acquired a specific use, namely, to describe a Bārā who has become converted to Hinduism, and his descendants, and the Koch are fast becoming (if they have not already become) a recognised Hindū caste. The derivation of *Kachārī* from *Kos-ārūi*, is, moreover, nothing but a hypothesis, and cannot, as yet, be proved by any historical facts. Till these are forthcoming, the traditional connexion of the word with Cachar, though not entirely satisfactory, must hold its ground.

The Bārā group, then, comprises the language spoken by the Bārā-f'sā (*i.e.*, the

¹ For the portion of the Linguistic Survey which deals with this group. I must take the first opportunity of gratefully acknowledging the assistance which I have received from Mr. J. D. Anderson, I.C.S. (Retd.). The whole section has been most carefully revised by him, and the greater part of the general introduction, besides nearly the whole of the important introduction to the Bārā language, is from his pen. It will also be seen that he has provided some valuable specimens in that form of speech. As occasion occurs I shall again and again have to draw attention to notes written by him for the survey of this group. It must, however, be understood that I am responsible for what follows, and any mistakes which may be noted should be attributed to me and not to him.

² *Āri* or *ārūi* is the patronymic commonly used by the Bārā people in naming their sects or clans.

Mech and Kachāris) and the cognate languages spoken by the other tribes shown in the following table :—

Name of Language.	NUMBER OF SPEAKERS IN		TOTAL.
	Assam.	Bengal.	
True Bārā (Kachāri and Mech)	247,520	25,011	272,531
Rābhā	31,370	...	31,370
Lālūng	40,160	...	40,160
Dimā-sā (or Hills Kachāri)	18,681	...	18,681
Gārō (or Māndē)	129,780	28,313	149,093
Tipurā	300	105,550	105,850
Chutiya	304	...	304
TOTAL	459,115	158,874	617,989

To this list must be added one more name, Morān. This was the language of a tribe now completely Hinduised, living in Sibsagar and Lakhimpur. A list of a few of the words of this language will be found elsewhere, and shows clearly its affinity to the Bārā group. But it must be remembered that the whole group has a tendency to become absorbed into the Aryan tongues of Bengal and Assam. Many of the people who speak these Bārā languages are bilingual, and can use Bengali or Assamese, as the case may be, as fluently and freely as their own language. If they become 'Hindū' and abjure roast pork and rice beer, they usually adopt the use of the Aryan tongue as their sole language. But even before this radical change is effected, Aryan influences alter their mode of speaking. The philological interest of this group of languages consists largely in the fact that they are agglutinative tongues which have learned inflexion by coming into contact with the speech of Aryan peoples. Thus, a Bārā living in Darrang can talk, not only Assamese and a rich idiomatic Bārā, made picturesque and vivid by the use of polysyllabic agglutinative verbs, but also an Aryanised Bārā which freely borrows the linguistic artifices of Aryan tongues, such as the use of the relative clause, of the passive voice, of adverbs, etc., and which almost wholly abjures the characteristic agglutinative verb that does the work of these more analytic devices of language. Unfortunately most of the following specimens belong to this latter class, but in dealing with Kachāri, the language of this group best known to Europeans, it has been possible to give specimens of both types.

The nature of the agglutinative verb will be fully explained in dealing with Kachāri. The specimens of the various members of the group will show in what manner each tribe has grafted a more or less complete system of inflexion on to its heretofore agglutinative verb.

It has been observed that these languages show a failure to realise the distinction between the verb and other parts of speech, a failure which is indeed common in nearly all isolating and agglutinating languages. This remark must not, however, be too strictly applied to the Bārā group of tongues. The agglutinative verb can be modified by the insertion of 'infixes' (examples of which will be given later on) and these infixes are a device by means of which the work of adverbs and adjectives is done, often with a very picturesque effect, lending itself to a vivid narrative style which can only be realised by hearing the stress and modulation used in dealing with long agglutinative verbs.

These languages have vocabularies which are evidently closely related, and their grammars have also a number of special points in common. To illustrate this, I here quote Mr. Gait's account of the salient peculiarities of the grammar of Bârâ or Plains Kachârî,¹ nearly all of which applies, *mutatis mutandis*, to the other languages of the group.

"The following short outline of Kachârî Grammar is given for comparison with that of other languages of the other group. In Kachârî inanimate objects have no gender; that of animate objects is denoted by a qualifying word placed after the noun, the particular word used varying according to the class of objects referred to. There are only two numbers, singular and plural, the former being sometimes made more emphatic by the addition of a word meaning 'one'; the latter is denoted by the postposition *jar* or *jā*. Case is denoted by affixes which are added to the nominative form, the only modification being the occasional insertion of an euphonic *i* between the stem and the termination. Adjectives sometimes precede, but usually follow, the noun they qualify, the case-ending in the latter alternative being attached to the adjective, and not to the noun. They undergo no change in termination to make them agree with the gender or number of the noun they qualify. The comparative is formed by adding some word meaning 'than' to the dative of the word with which the comparison is made, and *sin* to the adjective which immediately follows it. The superlative is formed in the same way, some word signifying 'all' being placed before the word compared.

The numerals only run up to ten, higher numbers being expressed by the use of the word *zakhai*, meaning 'a group of four.' Thus, fifteen is three groups of four, *plus* three. Different prefixes are used with numerals according to the class of noun referred to, *sā* being used for human beings, *mā* for irrational animals, *ging* for flat things, and so forth.

There are three personal pronouns which are used without distinction of gender, and are declined in the same way as nouns. Possession is denoted simply by the use of the genitive. There is no relative pronoun;² its place is usually supplied by the participle. Thus, *the man whom I saw yesterday has run away*, is expressed in Kachârî by *the yesterday seen man has run away*. There are interrogative and demonstrative pronouns which are declined in the usual way, except that the former seldom take the plural affix.

The imperative is the simplest form of the verb, the different tenses being denoted by affixes, which remain unchanged for all persons, numbers, and genders. Potentiality is expressed by the use of the infinitive with the auxiliary verb *hā-nū*, to be able. The past participle is frequently used as a noun, and in such cases is declined as such. The passive is formed by prefixing the past participle to the different tenses of the verb *zāanū*, to be, and the causative by conjugating *hū-nū*, to give, with the infinitive of the main verb. Negative verbs are formed by inserting *ā*³ between the stem and the termination, except in the imperative, when *dā* is prefixed to the stem. Adjectives are often conjugated like verbs, and verbs are frequently compounded with other verbs, the latter only being declined in such cases.

Adverbs are often separate words, but are also frequently formed from the corresponding adjective by adding *hūi* or *ūi*. Sometimes they are declined like nouns. The relations of space and position are expressed by postpositions. Conjunctions are very sparingly used, their place being largely taken by participles. *I saw and called him*, for instance, would be expressed as 'I seeing him called.'

It must be remembered that most of the following specimens have been prepared by natives who have, so to speak, looked at the pronunciation of the various languages through Assamese spectacles. Hence the systems of representing the vowel sounds are far from uniform, for in Assamese nothing can be more uncertain than the pronunciation of the vowels. It should be remembered that *a*, *o* (as in 'hot'), and even *ō*, may, in different specimens, represent the same sound. Again, some people represent the sound of *a* in 'father' by *ā*, and some by *a*. Similarly *ch* and *ch'* are usually pronounced as *s*. Some writers invariably mark a final *i* or *u* long, while others leave it unmarked. So far as I could, with certainty, I have endeavoured to reduce the whole to uniformity, but there are many cases which I have not ventured to touch. Exceptions to these remarks are the specimens of Bârâ supplied by Mr. Anderson and those in the same language from

¹ Report on the Census of Assam for 1891, p. 159.

² A borrowed relative, *zi*, is sometimes used.

³ Sometimes also *i* or *e*.

Darrang, most of the Gārō specimens, and that of Chutiya, all of which have been very carefully written according to the rules of pronunciation laid down in this section.

There is another point. In some of these languages aspirated consonants are not so common as appears at first sight. In writing them in the Bengali or Assamese character it is usual to write *kh*, *th*, and *ph* at the commencement of a syllable, instead of *k*, *t*, and *p*, respectively. How this came about will be found explained under the head of Gārō. In transliterating the following specimens, I have, in doubtful cases, let the aspiration stand, but in every case its presence should be viewed with suspicion. In dealing with languages hitherto unwritten it is impossible to obtain at once absolute accuracy.

Throughout all the languages of this group dental consonants are pronounced as semi-cerebrals, as in English.

The following note by Mr. J. D. Anderson on the mutual relationship of the languages forming the Bodo group will be read with interest:—

So far as the vocabulary of the specimens goes, Dimā-sā, Hojai and Tipurā are nearer the standard dialect than the others, and Chutiya is least like Bodo. But many words run through the whole group, and in some cases afford interesting phonetic changes. I give some instances:

English.	Bārā.	Rābhā.	Lālung.	Dimā-sā.	Hojai.	Gārō.	Tipurā.	Chutiya.
get	<i>man</i>	<i>mān</i>	<i>mān</i>	<i>mai</i>	<i>mai</i>	<i>mān</i>	<i>mān</i>	<i>nim</i>
give	<i>hū</i>	<i>rā</i>	<i>as</i>	<i>rī</i>	<i>rī</i>	...	<i>ru</i>	<i>re</i>

see	<i>nu</i> (or <i>nai</i>)	<i>nuk</i>	<i>nui</i>	<i>nai</i>	<i>nu</i>	<i>nī</i>	<i>nug</i>	...
kiss	<i>khudum</i>	<i>khutam</i>	...	<i>kadom</i>	<i>khudum</i>	...	<i>matām-su</i> apparently means 'smell-body'	...
put on clothes	<i>gān</i>	...	<i>gān</i>	<i>gai</i>	<i>keng</i>	<i>gān</i>	<i>kān</i>	...
again	<i>fīn</i>	...	<i>fensā</i>	<i>fīni</i>	<i>fī</i>	...
breathe	<i>thāng</i>	<i>kheng</i>	<i>thāng</i>	<i>tāng</i>	...	<i>tāng</i>
lose	<i>g^hmā</i>	<i>mī</i>	<i>kamāi</i>	<i>gama</i>	<i>kamī</i>	<i>gimā</i>	<i>kamī</i>	<i>kimāng</i>
ask	<i>sung</i>	<i>sing</i>	<i>sung</i>	<i>shing</i>	<i>sung</i>	<i>sing</i>	<i>sung</i>	<i>shī</i>

The words 'give,' 'seize,' and 'cloth' seem to show that Bodo is a degenerate member of the group and has softened its sounds.

BÂRÂ, BODO, OR PLAINS KACHĀRĪ.

The people who speak this language call themselves 'Bârâ' or 'Bârâ-fisâ', *i.e.*, sons of the Bârâs. This word 'Bârâ' has been identified by the first English enquirers with their nationality, and is usually written 'Bodo.' They do not apply the name 'Kachārī' to themselves. The origin of that name is dealt with in the general introduction to the group.

The following account of the early history of the Kachārīs is taken from page 224 of Mr. Gait's Report on the Census of Assam for 1891 :—

"The first historical notice of the Kachārīs of which I am aware is found in the annals of the Ahom who debouched from the Patkoi in 1228 A.D., and found the country at its base in possession of the Morān and Borāhis, whom they at once subjugated. They next fought with the Chutiās, who occupied the north-east portion of the Brahmaputra valley, and then came into collision with the Kachārīs, whose country lay to the west. This was in 1458 A.D., when the Kachārī capital was probably still at Dimapur, from which place it was removed to Maibong in 1536 A.D., after a decisive victory had been gained by the Ahoms. The capital remained there for two centuries, when the attacks of the Rājā of Jaintia necessitated a further retreat to Khaspur in the plains of Cachar. These migrations were shared in only by the Rājā and a few of his followers. The great bulk of the Kachārīs remained behind, and became the subjects of the Ahoms in Upper Assam, and of the Koch kings lower down the valley."

In the general introduction to the Bodo Group I have quoted Mr. Gait's account of the typical peculiarities of the Bârâ language, and it is unnecessary to repeat them here.

The head-quarters of the Bârâ language are now the three central districts of the Assam Valley, *viz.*, Darrang, Nowgong, and Kamrup, but it extends westwards through Goalpara, Jalpaiguri, and Cooch Behar, in a slightly different form, under the name of Mech, pronounced Mes. The Meches deny all connexion with the Bodos, but there is little doubt that the tribes are identical. At any rate their language is one and the same, differing only in a few dialectic peculiarities.

The standard form of Bârâ may be taken as that of Darrang, which has the advantage of being illustrated in Mr. Endle's excellent little grammar. As such it is spoken with slight variations in the following districts and by the following number of people :—

Garō Hills	570 ¹
Goalpara	8,300
Kamrup	85,700
Darrang	63,000
Nowgong	14,200
Sibsagar	4,100
Lakhimpur	1,250
TOTAL														.	178,320

In Goalpara the language of most of the Bodos is called Mech, and only a few, principally those residing on the Kamrup border, have been returned as speaking Bârâ. The number of Mech speakers is, as will subsequently be seen, 93,911, so that the total number of speakers of Bârâ and Mech together, that is of what is practically one language, is 272,231.

What is called the Hills Dialect of Kachārī is spoken in the North Cachar Hills, and in a small tract in the South of Nowgong. This is commonly said to be a dialect of

¹ Returned as Bârâ.

Bârâ, or at least it is contended that the two are common dialects of one language. No doubt at one time these two speeches were identical, but in the course of centuries, they have developed on such different lines that I prefer to call Hills Kachârî, or, as it speakers call themselves, Dīmā-sā, (the language of) the people of the great river, a separate language of the Bodo Group. It certainly differs from Bârâ far more than does Gārō, which is universally admitted to the status of an independent language.

The following are the principal authorities on Bârâ and Mech. As there is so little difference between the two dialects I place the two lists of authorities in juxtaposition. Further information about Mech will be given on a subsequent page.¹

Grammar.—All the dialects of Bârâ borrow words freely from the Aryan languages, Bengali or Assamese, with which they are brought in immediate contact. Words so adopted frequently suffer considerable corruption in the process of borrowing. The principal modes in which the corruption takes place, are described by Mr. Endle on pp. 36 and 37 of his grammar.

I am indebted to Mr. J. D. Anderson for the following note on Bârâ Grammar :—

As has been said in the general introduction to the group, the Bârâ people use Bengali or Assamese (as the case may be) as easily as their own tongue. This has necessarily affected the use of the Bârâ language (as indeed it has, probably, affected Assamese and has, perhaps, introduced some of the linguistic peculiarities which differentiate it from Bengali). It has become possible to use Kachārī words almost as if they were Assamese words. An illustration of this is given in the statement of an accused person printed below. This was taken down in Assamese, and was subsequently rendered, as will be seen, word for word, into Kachārī. The result was intelligible, if not very idiomatic, Kachārī. There is also given one of Æsop's fables which also shows evident signs of having been translated from Assamese into Kachārī. Finally, there will be found a folk-tale or *khorāng*, and some nursery-rhymes and songs which more closely resemble the idiomatic speech of the people when most removed from Aryan influences. The most characteristic thing about these latter specimens is the idiomatic use of the agglutinative verb, the nature of which will now be roughly explained in a rapid analysis.

In the first place it will be well to make a list of the most common verbal roots.

These are :—

ālu, pain.

āgār, be loosed (v. *gār*).

bā, bear (on back).

bai, buy.

bai, break (neuter).

ban, tie up.

bān, bear (on shoulder).

bāt, cross (a river).

bāt-drum, } jump.

bāt-sum, }

baugār, forget (v. *gār*).

bet, burst, break (neuter).

bī, beg.

bīr, fly.

brāp, be angry.

bū, beat.

būhī, flow (of water).

būi, work.

būkhū, drag up (cf. *g'khū*).

lūng, speak.

būng, fill.

dai, weave.

dām, drum.

dūn, cut.

dung, be.

dāng, hold, feel, brandish.

dau, feed.

daugā, swim.

de, hit.

det, increase, grow (cf. *f'det*).

d'hon, extricate.

d'khāng, take out.

din, put, place.

d'thī, show (cf. *kh'thī*).

eo, clear (jungle) (cf. *kh'eo*).

e-fop, (lightly) bury (cf. *fop*).

f^ahām, mend (*i.e.* make good).
fān, sell.
farang, teach (v. *salang*).
fⁱdet, make big (cf. *det*).
fⁱsī, tear up.
fⁱsī, feed.
fⁱsī, make wet (cf. *sī*).
fīn, *fāfīn*, return.
fle, mix.
fop, bury.
frān, make dry (cf. *rān*).
fū, pluck.
fū, sow.
fudung, heat.
f^u-thū, causative of *thū*.
gā, good.
gā, tread on, thresh out paddy.
gā, cure (disease).
g^adā, cut up (meat, etc.).
g^agrum, feel about for.
gai, transplant.
g^akhū climb.
gamā, lose.
gān, wear (shawl, etc.).
gāng, thirst.
gāp, cry.
gāp-zrī, cry shrilly.
gau, hurt, shoot.
gār, loose, let go.
gele, play.
gⁱsīp, crow (of a cock).
gē, fear.
gnāng or *nāng*, be obliged, stick.
gnāng-lai, quarrel (v. *lai* in list of infixes).
gō, escape.
goblong, burst (neuter).
golai, mix.
grup, fit.
gum, herd.
gut, catch (fish).
hā, be able.
hā, cut, fell (crops, etc.).
hā, fall (of rain).
hā, ripen (of crops, fruit, etc.).

hā-khmā, conceal (v. *khmā* in list of infixes).
hām, be thin, ill.
hām, be good.
hāmā-su, sigh.
han, speak.
hāp, enter.
hā-sn, make water.
hat, frisk.
hogār, lose (v. *gār*).
hom, catch.
hor, be night.
hoṭ, give, send, throw.
hū, give.
hū-sin, give more, heap.
hū, drive.
hū, scrub.
hūng, strew.
khā, bind.
khāi, cut.
khām, roast.
khām,
khām, } do, make.
khāi, }
khāng, take (cf. *si-khāng*).
khāṭ, run.
khau, steal.
khau-khā, wear (turban, etc.).
kha-khāi, cause to fall (cf. *ga-glai*, to fall).
kheo, open, clear (cf. *eo*).
khep, seize, hold.
khī, dung.
khī-thā, speak.
khī-thī, show.
khūā, hear.
khūā-song, hear attentively.
khū, undo (clothes).
khūbui, throw.
khuglup, crouch.
khulum, worship.
khup, cover, hide.
khur, scratch.
khut, take off (*e.g.* pot off a fire).
lā, take.

<i>lā-bō</i> , bring.	<i>sang</i> , bark (of dog).
<i>lai</i> , draw (water, etc.).	<i>sang</i> , ask.
<i>lai</i> , <i>slai</i> , or <i>zlai</i> , exchange.	<i>se</i> , snatch.
<i>lā-khmā</i> , take secretly.	<i>s^hfai</i> , destroy.
<i>lāng</i> , walk, go.	<i>sen</i> , hang up.
<i>lāng</i> , take.	<i>set</i> , squeeze, press.
<i>lāng</i> , thirst (used with <i>dūi</i> , water).	<i>sī</i> , be wet.
<i>ling</i> , call.	<i>sī</i> , open.
<i>līt</i> , write.	<i>sī-khāng</i> , come out.
<i>lū</i> , build (houses, etc.).	<i>sī-khāng</i> , lift up.
<i>lubui</i> , wish.	<i>sī-mau</i> , shake.
<i>lung</i> , drink.	<i>sō</i> , come.
<i>m^ablip</i> , lighten (lightning).	<i>sō</i> , pound, bruise.
<i>man</i> , get, hold, meet, fit, ripen.	<i>song</i> , cook.
<i>mān</i> , creep.	<i>srāng</i> , dawn.
<i>mau</i> , labour.	<i>sū</i> , pain.
<i>megem</i> , ache.	<i>sū</i> , insert.
<i>meng</i> , be tired.	<i>sū</i> , <i>sū-srā</i> , clean.
<i>m'nī</i> , laugh.	<i>sū-gūm</i> , growl.
<i>mī-thī</i> , understand (cf. <i>khi-thī</i>).	<i>sūbā</i> , slap.
<i>nā</i> , roll.	<i>thā</i> , stay.
<i>nai</i> , watch, observe (cf. <i>ne</i> and <i>nu</i>).	<i>thāng</i> , go.
<i>namai</i> , wish, desire, begin.	<i>thāng</i> , live, breathe (<i>hāng</i> = breath).
<i>nāng</i> = <i>gnāng</i> .	<i>thāp</i> , be caught (v. <i>hāp</i>).
<i>ne</i> , watch, guard.	<i>thāt</i> , kill.
<i>nu</i> , see.	<i>thin</i> , send.
<i>nung</i> , think.	<i>thoi</i> , die (<i>thoi</i> = blood).
<i>oi</i> , plough.	<i>thrup</i> , sink.
<i>on</i> , pity, love.	<i>thu</i> , prod, goad, prick.
<i>on-khāt</i> , come out.	<i>thukui</i> , bathe (causative) (v. <i>dugui</i>).
<i>o^t</i> or <i>o^t</i> , bite (cf. <i>o^t</i> = fire).	<i>udu</i> , sleep.
<i>rai</i> , speak.	<i>udui</i> , be young.
<i>rān</i> , divide (v. <i>sān</i>).	<i>ukhui</i> , hunger.
<i>rān</i> , become dry (v. <i>f-rān</i>).	<i>zā</i> , break.
<i>rang</i> , be able.	<i>zā</i> , sit (cf. <i>sā</i>).
<i>rūgā</i> , bind (sheaves, etc.).	<i>zā</i> , become, be.
<i>sā</i> , sit (cf. <i>zā</i>).	<i>zā</i> , eat.
<i>sā</i> , set (trap).	<i>zap</i> , finish.
<i>sai</i> , sit (by fire).	<i>zau</i> , sift (rice, etc.).
<i>sai-khāng</i> , eviscerate.	<i>zau</i> , dig.
<i>sān-srī</i> , track (<i>srī</i> = silently).	<i>zen</i> , fit.
<i>sān</i> , count.	<i>zim</i> , wear (waistcloth).
<i>sau</i> , scrape.	<i>zingāsī</i> , lament.
<i>sau</i> , bruise.	<i>zīrā</i> , rest.
<i>sau</i> , hoe, dig.	<i>zu</i> , collect.
<i>sām</i> , soak.	<i>zū</i> , kick.
	<i>zom</i> , stand erect.

Now these roots (or some of them) can be agglutinated to one another and so form 'compound verbs.' I give some instances :

Dāng, *e.g.* *man-dāng*=feel.

Fai , <i>e.g.</i>	<i>lāng-</i> <i>zā-</i> <i>man-</i> <i>hũ-</i> <i>khi-thĩ-</i> <i>sō-</i>	} <i>fai</i> = come and	} take. become. get. give. show. arrive.
--------------------------	--	-------------------------	---

Fin , <i>e.g.</i>	<i>thāng-</i> <i>lābō-</i> <i>nai-</i>	} <i>fin</i> = { go bring look	} back.
--------------------------	--	--------------------------------------	---------

Hũ , <i>e.g.</i>	<i>zā-</i> <i>fān-</i> <i>lā-</i> <i>bān-</i> <i>hom-</i> <i>hoṭ-</i>	} <i>hũ</i> = give (or cause) to	} eat. sell. take. bear. seize. bite.
-------------------------	--	----------------------------------	--

Hoṭ , <i>e.g.</i>	<i>nu-</i> <i>khubui-</i> <i>khi-thā-</i> <i>ling-</i> <i>rai-</i> <i>hogār-</i> <i>bī-</i> <i>khi-thĩ-</i>	} <i>hoṭ</i> =	} see from far. throw away. speak out. shout loud. talk loud. give up. beg aloud. show from far.
--------------------------	--	----------------	---

Lai, zlai	<i>khām-</i> <i>gnāng-</i> <i>rai-</i> <i>zā-</i> <i>sōi-</i> <i>thāng-</i> <i>khai-</i> <i>gār-</i> <i>han-</i> <i>sūn-srī-</i> <i>brāp-</i> <i>m'ni-</i>	} <i>lai</i> =	} do together. stick together (<i>i.e.</i> fight). take to one another. eat together. sit by fire together. go together. bind each other. loose one another. speak with one another. creep together. be angry with one another. laugh together.
------------------	---	----------------	---

Nāng } *e.g.* { *hũ-nāng*=must give.
Gnāng } { *thāng-gnāng*=must go.

Nai, *e.g.* *lābō-nai*=bring and examine.

Sām, *e.g.* *sī-sām*=thoroughly soak.

Sō, *e.g.* *dān-sō*=wound by cutting.
oṭ-sō=wound by biting.

Thā, e.g. *thāp-thā*=be caught and stay.

hom-thā=seize and stay.

Thāt , e.g.	<i>bū-</i> <i>dān-</i> <i>sō-</i> <i>sū-</i> <i>gau-</i>	} <i>thāt</i> =kill by	} beating. cutting. pounding. piercing. shooting.

Zā , e.g.	<i>thoi-</i> <i>zā-</i> <i>oī-</i> <i>fop-</i>	} <i>zā</i> =become	} dead. sitting. bitten. bruised.

(This use of *Zā* is the basis of the Passive voice now found in Aryanised Kachāri.)

Zap , e.g.	<i>fān-</i> <i>bū-</i> <i>bū-thāt-</i>	} <i>zap</i> =finish	} selling. beating. killing.

But, besides these agglutinations which resemble what we call 'compound verbs,' there are others, the second (and subsequent) members of which are enclitic and have no independent existence. The exact meaning of these is not always easy to give in a list as they modify the meaning of the whole sentence and take the place of our adjectives and adverbs. I give some examples:

Brop, e.g. *gai-brop*=plant in a hurry.

Bū , <i>bān-</i> <i>on-khār-</i> <i>det-</i> <i>dīn-</i>	} <i>bū</i> =	} bear away. come clean out. get much bigger. put in.

Bai, expresses *continuous* action.

e.g. <i>bī-</i> <i>thā-</i> <i>zom-</i> <i>khulum-</i> <i>ba-brāp-</i> <i>namai-</i>	} <i>bai</i> =continue	} begging. staying. standing. worshipping. being angry. seeking.

Dop, e.g. *song-dop*=cook hastily.

Fā, expresses *contiguity*.

e.g. <i>thāng-</i> <i>namai-</i> <i>lāng-</i>	} <i>fā</i> =	} go seek take	} in company.

Frām, e.g. *thoi-frām*=all but die.

Fnāng is the causative of **Gnāng**.

e.g. *dān-fnāng*=compel to cut.

gā-fnāng=compel to tread.

Gru , e.g. <i>thoi-</i> <i>thìn-</i> <i>khām</i>	}	$gru = \begin{cases} \text{die} \\ \text{send} \\ \text{do} \end{cases}$	suddenly.

Hũi, expresses action at a distance.

e.g. <i>man-</i> <i>khi-thā-</i> <i>hāp-</i> <i>thā-</i> <i>dāng-</i> <i>dān-</i> <i>nu-</i>	}	$hũi = \text{go and}$	{ get. say. enter. stay. handle. cut. see.

Hāng=**Fram**, e.g. *thoi-hāng*=be nearly dead.

Māt (opposite of **thī**), e.g.

<i>fai-</i> <i>thāng-</i> <i>thoi-</i>	}	$māt = \text{really}$	{ come. go. die.

Khāng , e.g. <i>on-</i> <i>nai-</i> <i>manām-</i> <i>hamā-sū-</i> <i>bāt-</i>	}	$khāng =$	{ love much. observe well. smell strongly. draw <i>long</i> breath. cross (a river) and emerge on other side.

Khāmā, e.g. *thāng-khmā*=go secretly.

khā-khmā=bind secretly.

Khau, e.g. *gāb-* or *gāp-khau*=cry out suddenly.

Khrong, e.g. *gī-khrong*=be *very* much afraid.

Khrop, e.g. *khā-khrop*=bind fast.

Lāng is very common and useful, and indicates completeness or conclusion.

e.g. <i>bāt-</i> <i>hũ-</i> <i>udu-</i> <i>bũ-</i> <i>thoi-</i> <i>thìn-</i> <i>namai-</i> <i>khāt-</i> <i>gār-</i> <i>bīr-</i> <i>dikhāng-</i> <i>ũhī-</i> <i>zā-</i>	}	$lāng =$	{ cross <i>over</i> . give <i>away</i> . sleep <i>soundly</i> . beat <i>hard</i> . die <i>outright</i> . send <i>away</i> . seek <i>thoroughly</i> . run <i>away</i> . loose <i>quite</i> . fly <i>away</i> . lift <i>up</i> . flow <i>away</i> . eat <i>up</i> .

Sai takes the place of the adverb *sā-i-au*.

e.g. khā-sai = tie high up.

Su is intensitive.

<i>on-</i>	}	<i>su</i> =	{	love much.
<i>ukhūi-</i>				hunger greatly.
<i>m'nī-</i>				laugh heartily.

Slāp,—*e.g. hogār-slāp* = nearly let go.

Sin is the sign of the comparative.

<i>e.g. khep-</i>	}	<i>sin</i> =	{	grip harder.
<i>hū-</i>				make bigger (heap).
<i>gaglai-</i>				fall more heavily.
<i>zā-</i>				sit closer.

Si ,— <i>e.g. gaglai-</i>	}	<i>sī</i> = all but	{	fall.
<i>dān-</i>				cut.
<i>man-</i>				get.

Srā ,— <i>e.g. sū-</i>	}	<i>srā</i> =	{	clean well.
<i>man-</i>				get completely.

Thī implies pretence : (cf. *māt*).

<i>e.g. gāp-</i>	}	<i>thī</i> = pretend to	{	cry.
<i>zā-</i>				be.
<i>lom-zā-</i>				be ill.
<i>thoi-</i>				die.

Thrā is another (very common) intensitive.

<i>e.g. gai-</i>	}	<i>thrā</i> =	{	plant completely.
<i>gaglai-</i>				fall heavily.
<i>thoi-</i>				die outright.

But no mere list will give an adequate description of the use of these infixes. For several, of both classes, may be agglutinated together. I give some examples :

² ³ ¹ <i>gum-zāp-hū</i>	=	¹ allow ² to-herd-cattle ³ together.
³ ² ¹ <i>sūbā-khrāng-hoṭ</i>	=	¹ apply ² a-smart ³ slap.
³ ² ¹ <i>nai-bai-thā</i>	=	¹ stay ² continually ³ watching.
¹ ³ ² <i>uḍu-lāng-māt</i>	=	¹ go ² really ³ fast ¹ asleep.
³ ¹ ² <i>g^akhū-hū-lai</i>	=	¹ make ² each-in-turn ³ to-climb.
⁴ ³ ² ¹ <i>ne-bai-thā-thī</i>	=	¹ pretend ² to-stay (and) ³ to-continue ⁴ looking.
¹ ² ³ <i>khāt-thrā-lāng</i>	=	¹ run ² right ³ away.
² ³ ¹ <i>gnāng-khām-hū</i>	=	¹ cause necessity of-doing ; <i>i.e.</i> compel to do.
<i>nu- zā- hūi- nai- sūi- lā</i>		

see-become-motion-from-observe-much-take = go and take and see and observe carefully.

The root, compound or simple, is the imperative, the simplest form of the verb. Besides the infixes, some of which have been given above, there are three valuable suffixes, namely, *nǎ*, *sǎ* (or *sǎi*) and *bǎ*. These have a slightly intensitive effect, and *bǎ* indicates *additional* action, something like our 'also.'

It will be observed that in the specimens given below these agglutinations are sparingly used, in some cases hardly at all. This is due to the introduction of inflection and the free use of participial forms. It is obvious that the place of many of the enclitic infixes can be taken by adverbs.

There is an adverb in Kachārī, usually formed by adding the suffix *ǎi* to an adjective. The adjective itself is usually formed by prefixing *gʷ* to a (verbal or other) root. Thus *hām*, be well; *gʷhām*, good; *gʷhām-ǎi*, in a good manner. But the further process of deglutinisation will be best observed by considering the participial forms of the verb. These are—

(1) The active participle in *-nānǎi*: where several active roots in succession occur in an agglutination, a Bârâ accustomed to talk Assamese will substitute a whole series of active participles. Thus, in a folk-story I have found this expression :—

bī-khō hom-nānǎi lāng-nānǎi fop-nānǎi dīn-nānǎi fai-naisè.

him-to seiz-ing tak-ing bury-ing put-ting came.

This, in more idiomatic shape, would be—

bī-khō hom-lāng-fop-dīn-fai-naisè.

(2) The adverbial participle. This is formed, as the adverb is, by adding *ǎi* to the verbal root, and modifies the sense of the root much as an adverb does.

Thus, *āng thāng-ǎi thā-dang.*

I go-ing(ly) staying-am.

This is often used in a reduplicated form as a continuative. Thus,

āng thāngǎi thāngǎi thā-dang means, I keep going, I continue to go.

(3) The conditional or absolute participle in *bā*, which sometimes takes the place of a conditional clause and, more often, has the effect of the ablative absolute with participle in Latin. Thus, to take an example from the Latin grammar, we may render—

Cæsare venturo, Phosphore, diem redde.

Kaizār-ā fai-bā, Sān, funzā-nǎ hǎ.

It may be noticed that this participle has its own nominative or subject. Compare the Assamese-Bengali participle in *ilē*.

(4) The passive or relative participle in *nai*. This can be declined like a noun or used like an adjective, and is used as the basis of the passive form, which in this as in other hill languages, is rarely used. Thus *bu-nai zā* is 'become beat-en,' and this clumsy expression, by conjugating the verb *zā-nǎ* (to become), may be considered to form a passive voice. The relative use of this participle is very idiomatic and can be best understood by considering a few examples :—

Thus :—

gādā-i-au set-bā gākhīr¹ on-khāt-nai gāthā } means—
neck-on squeez-ing milk exud-ing boy }

a boy so babyish that if you squeeze his throat (mother's) milk exudes.

¹ Here and elsewhere putting a Bârâ word in Italics indicates that it is borrowed from Assamese or Bengali.

mi-khām	song-nai	hingzau	}	means a woman who can cook rice.
<i>rice</i>	<i>cook-er</i>	<i>woman</i>		
bī-fā	thoi-zā-nai	gāthā	}	a boy whose father is dead.
<i>father</i>	<i>dead-be-ing</i>	<i>boy</i>		
āng	fālāngī	khām-nŭ	}	means during my going to do trade.
<i>I</i>	<i>merchandise</i>	<i>do-to go-ing-in</i>		

The remaining inflexions, etc., of the Bārā language will be sufficiently well understood from the following tabular statement compiled from the Reverend Mr. Endle's excellent grammar of Kachārī.

BĀRĀ SKELETON GRAMMAR.

I.—PRONUNCIATION.—Pronounce *ā* as in 'pan,' and *āā* as a prolonged *ā*; *ā* is Mr. Endle's *ā*; *e* as in 'bed', *ē* an intermediate sound between *ē* and *e*; *ū*, — this is Mr. Endle's transcription though he prefers *ō*. He describes the pronunciation as follows. It bears some resemblance to *ā*, but is much more compressed. In uttering it the cheeks are drawn close to the jaws, the lips but slightly apart, and the tongue placed near the outer edge of the hard palate, the breath being allowed to escape slowly between the two latter organs with a semi-nasal intonation. The diphthong *au* is pronounced as the *ow* in 'how,' but *au* approximates *ō*: *ūi* fluctuates between a very short *oi* and *i*; it is apparently made up of the *ū* sound above described and *i*, the voice gliding rapidly over the former vowel and dwelling on the latter, the whole sound approximating to *i*; in the specimens this sound is often written *oi*; thus *mānsōi* instead of *mānsūi*. When a vowel is written above the line, as in *g^uzā*, red, it is pronounced as short as possible. Mr. Endle represents this by the sign ^u over a vowel, thus *gāzā*. These short vowels are often omitted. Thus, *gzā*, or *zlā* for *z^ulā*, male; *fsā* for *f^usā*, a child.

T and *d* are always semi-cerebral as in English, except in words borrowed direct from Sanskrit.

II.—NOUNS.—The Gender of animate nouns is denoted by suffixed words, e.g., in the case of human beings, *hōā*, male; *hūgzhāu*, female; in the case of birds, *z^ulā*, male, *zū*, female; and so on. I find *z^ulā* often also used in the case of human beings. The plural is formed by adding *fūr*, *far*, or *frā*. Cases are formed as follows:—

Sing.	
Nom.	<i>mānsūi</i> , a man.
Acc.	<i>mānsūi-khō</i> or <i>khāū</i> .
Instr. <i>-zang</i> .
Dat. <i>-nū</i> .
Abl. <i>-nī-frai</i> .
Gen. <i>-nī</i> or <i>-hā</i> .
Loc. <i>nī-āu</i> or <i>-āu</i> .
Plur.	
Nom.	<i>mānsūi-fūr</i> , <i>-far</i> , or <i>-frā</i> .
Acc.	<i>mānsūi-fūr-khō</i> , and so on.

Nouns ending in vowels often take *ā* in the nominative, which gives the force of the definite article. Thus *mānsūiā thoi-dang*, the man is dying. If the final vowel is *a* or *ā*, *i* is inserted and the two become *ai*. Thus *dāu-z^ulā*, a cock; *dāu-z^ulai-ā*, the cock. When the Loc. term. *āu* follows a vowel, *i* is also optionally inserted. Thus *nū-āu*, *nū-i-āu*, or *nū-nī-āu*, in a house. The genitive termination *hā* is chiefly used with animate nouns.

Adjectives are compared by suffixing *sāri* or *khri* to the dative of the word with which comparison is made, and adding *sin* to the adjective. Thus *bi āng-nū-khri g^uzāu-sin*, he is taller than I. So *boinū-sāri bi g^uzāu-sin*, he is taller than all; i.e., tallest. Most adjectives begin with the syllable *g^u*. They do not change for gender, and may either precede or follow the noun qualified. In the latter case, they, and not the noun, take the postposition of case.

III.—PRONOUNS.—The personal pronouns are:—

Sing.	Plur.
<i>āng</i> , I.	<i>zang</i> or <i>zang-fūr</i> , etc., we.
<i>nang</i> , thou.	<i>nang-sūr</i> , you.
<i>bī</i> , he, she, it.	<i>bī-sūr</i> , they.

The nominative singular may take *-ā*. Thus *āngā*. In other respects the declension is quite regular. The word *thāng* implies respect, as in *nang-thāng*, your Honour.

The relative pronoun is *zi* or *zai*, which is borrowed from Assamese.

The interrogative pronouns are *sūr*, who?; *mā*, what?; *bābe*, which (of several)?

The demonstrative pronouns are *bē*, this; *boi*, *boi-hā*, that; *bī*, that (remote). The plural is formed by adding *sūr* or *fūr*, etc. *Sūr* is principally used for human beings. *Gāgai* or *gaigai* is 'self.'

Pronominal prefixes of possession are commonly added to nouns expressing relationship.

Thus—

	Father.	Mother.	Eldest son.	Eldest daughter.
My	<i>āng-nī ā-fī</i> .	<i>āng-nī ā-i</i> .	<i>āng-nī ā-dī</i> .	<i>āng-nī ā-bī</i> .
Your	<i>nang-nī nang-fī</i> or <i>nam-fā</i> .	<i>nang-nī nam-mā</i> .	<i>nang-nī nang-dā</i> .	<i>nang-nī nang-bā</i> .
His	<i>bī-nī bī-fī</i> .	<i>bī-nī bī-mā</i> .	<i>bī-nī bī-dā</i> .	<i>bī-nī bī-bā</i> .

IV.—VERBS.—The Verbs substantive are *dang-a*, is; *dang-man*, was. The negative forms are *gũĩ* and *nũng*, it is not; *gũĩ-li-ā* is more emphatic. *Nũng-gō*, negative form *nũng-ā*, is 'it is necessary.' *Gũng* means 'possessed of,' as in *bē thākā gũng*, he owns money.

As in other Bodo languages, verbs do not change for number or person, both of which are indicated by the subject. The only sign of inflexion is that the letter *i* is inserted between a root ending in a vowel and a termination commencing with one. Thus, *thāng-ũ*, go; but *nu-i-ũ*, see, present tense. The following is the formation of the various tenses :—

Present.	<i>āng nu-i-ũ</i> , I see. First person also <i>āng nu-ni</i> .
Pres. def.	„ <i>nu-dang</i> , I am seeing.
Imperfect.	„ „ <i>-dang-man</i> , I was seeing.
Past.	„ „ <i>-bai</i> , I saw.
Pluperf.	„ „ <i>-nai</i> , or <i>nu-dang-man</i> , I had seen, I saw a long time ago. Sometimes <i>nai-sè</i> is used. As <i>nu-nai-sè</i> , I saw (in narrative). <i>Sè</i> is the same as <i>sũi</i> , lower down, and has a completive force.
Future.	„ „ <i>-gan</i> , I shall see.
Fut. immediate.	„ „ <i>-si-gan</i> or <i>nu-nũ-sũi</i> , I shall see soon.
Imperative.	„ <i>nu</i> , see; <i>nu-thang</i> , let him see.
Subjunctive	„ <i>nu-blā</i> or <i>nu-blā</i> , if I see or had seen.
Infinitive.	<i>nu-nũ</i> , to see.
Participles.	<i>nu-ni</i> , seeing; <i>nu-nā-nũi</i> , having seen; (termination sometimes <i>ni-nũi</i> , as <i>fai-ni-nũi</i> , having come. <i>Nũi</i> is sometimes written <i>noi</i> , as in the first specimen). <i>nu-nai</i> , seen. <i>nu-ũi</i> , while seeing.
Agent.	<i>nu-grā</i> or <i>nu-nai</i> , a seer.

Causal verbs are formed by conjugating *hũ-nũ*, to give, with the infinitive of the principal verb. Thus *nu-nũ hũ-nũ*, to give, or cause, to see; *āng nu-nũ hũ-i-ũ*, I cause to see. They are also made by the prefix *f'*, as in *det-nũ*, to grow; *f'let-nũ*, to make big. Compare the similar use of the Mikir *pe*.

The Passive is formed by conjugating *zāu-nũ*, to be, become, with the past participle of the principal verb. Thus *āng u-nai zāu-i-ũ*, I am seen.

The Negative verb is thus conjugated. Its typical syllable is *ā* :—

Pres, *nu-ā*.

Imperfect, *nu-ā-khũi-man*.

Past, *nu-ā-khũi-nũ* or *nu-ā-man*.

Plup., *nu-ā-khũi-sè*

Fut., *nu-ā*.

Imperat., 2, *dā nu*; 3, *dā nu-thang*.

Subj., *nu-ā-bā* or *-blā*.

Part. pres., *nu-ĩ*, not seeing.

past, *nu-ā-lābā*, not having seen.

„ *nu-e*, not seen.

Intensive particles or infixes are added to the root between it and the tense suffix; e.g. *bār bār-dang*, the wind is blowing; *bār bār-sũ-dang*, the wind is blowing strongly. Other similar particles are *khāng*, *zap*, and *thrá*. See, however, the preceding pages.

[No. I.]

TIBETO-BURMAN FAMILY. BÂRÂ OR BODO GROUP.

BÂRÂ, BODO, OR PLAINS KACHÂRĪ.

(The Revd. Russell Payne, 1899.)

(DISTRICT DARRANG.)

Note.—Vernacular words in Italics are borrowed from Assamese, in a more or less corrupted form.

 bī-ni-khai zang rang-zā-nā-nōi phūzū-nai-ā g^ahām.'
him-of-for we having-made-merry rejoicing (is-)good.'

The following four specimens are from the pen of Mr. J. D. Anderson, and illustrate the two different styles of speaking Bârâ.

The first is the statement of an accused person translated from Assamese. In order to show how the Assamese idiom has been followed, the original version in that language is also given in italics with which the Bârâ version agrees word for word. The second is a fable which bears evident signs of translation from the same language. Finally there are a folk-tale and some folk songs in genuine agglutinative Bârâ.

FREE TRANSLATION OF THE FOREGOING.

What do you wish to say?

On Tuesday I went to school. At two o'clock the master gave me leave to come home. After coming home, and having my meal, I went to Nandi's to read. I went at three o'clock. There I read for an hour-and-a-half. At half past four, while I was reading, I heard my sister Paramesvari's voice. (She said), '*Mohārānir dohai!* You must not seize my pregnant sister by the hair.' On hearing this, I came out. I saw that Kunti had Gilāsi by the hair, and Paramesvari had Ilāsi by hers. Mosai taking a ruler in his hand, pulled Gilāsi away, and seized and assaulted Kunti. With his left hand he held Kunti's hand, and with his right hand he applied the ruler (to her). Kunti suddenly fell down. Then Madhu came and seizing Kunti's hair gave her a slap. I went up and said, 'Old man, this is grossly unjust. These two girls are your daughters-in-law. You do not beat them; why beat my sisters. Of course you can beat both your son's wives and my sisters too if you like. But it would be better to put a stop to the fight.' When I said this he hit me with the fist on the chest. When he hit me, I was all of a tremble. Just then I heard my father's voice; saying, 'Do not beat my pregnant daughter!' On his saying this, Mosai struck my father and knocked him down. After that Madhu struck him a blow. And then Kāmesvar came up with a big bamboo. I began to be afraid. My father is an old man, and was trembling from the two blows he had received. Then Kāmesvar struck him; and Madhu went and got a bamboo. Seeing that it was a matter of life and death, I picked up a bamboo at the place where the fight was going on, and thinking he was going to beat my father, I struck Madhu once. Whether it hit him on the head or elsewhere, I cannot say, but he fell down and I picked up my father.

The next specimen provided by Mr. Anderson is Æsop's fable of the False Friend. It bears manifest traces of having been translated from Assamese, but is more agglutinative than the preceding.

The acute accent marks the emphatic syllable in each word.

[No. 3.]

FREE TRANSLATION.

Two men were great friends. They vowed to one another not to desert each other in any trouble. One day, as they were going somewhere, they came into a forest. On the road a bear met them. Of the two, one could climb trees, the other could not. When the bear chased them, the first climbed high into a tree, the other, being helpless, crouched on the ground and held his breath. The bear came and smelt him hard, and finding him without breath left him. The man on the tree asked, 'My friend, when the bear smelt you so hard, what did he say?' The other replied, "'Don't make friends with such as he'" was what he said.'

The next specimen provided by Mr. Anderson is a folk-tale in genuine agglutinative Bārā. With the aid of the list of agglutinative particles on pp. 10 and ff., no difficulty will be found in following the interlinear translation.

FREE TRANSLATION OF THE FOREGOING.

There was once an old man and an old woman, who had nothing to eat or drink. So they set a fish-trap, and any fish they caught they exchanged for paddy and so got rice to eat. One night, instead of fish, the trap became full of toads, and the old man rose before cock-crow and, lifting it up, found it very heavy. Greatly pleased, he hoisted it on to his back and waddled home. Then he woke up his old

¹ t euphonic for z.| ² lă-nũ-nũĩ = bearing on back, finding burdensome.

woman and said to her, 'old woman, old woman, not up yet? The day has dawned. So the old woman came out and blew up the fire in the yard, and the two squatted over it together. The old man said, 'we are lucky to-day. The trap is brimful of fish,' and the old woman replied, 'bring it here, bring it here, and let us look at it.' When they looked at it by the light of the fire, they found it full of nothing but toads. Then said the old woman, 'we *are* lucky to-day. We *shall* get plenty of rice to eat to-day.' On this the old man shook out the toads and the old woman began killing them with a stick. But one half-dead toad crept with a broken leg beneath the old woman's stool, and when she had finished skinning the rest of the toads she lifted the stool and saw the survivor. But the toad cried shrilly, 'O Father, do not kill me. I will plough for you, and hoe for you, and plant paddy for you.' But the old man replied, 'who ever saw a toad doing any work? Your offer of work is likely to be a bitter business. You only make it because you fear to die.' But the toad begged so hard that the pair took pity on him and kept him in their home. Time passed and the season of the rains came on. The toad went out into the field to plough, and sitting on the plough-handle urged the cattle with his voice. Now, a certain Rajah, riding on an elephant, came that way, and the toad shouted at him, 'Hi! who are you that come upsetting the balks of my paddy field?' But the Rajah flew into a rage and sent a man to fetch him. However, he hid under a clod, and the Rajah finding no one ordered the plough oxen to be driven to his palace. The toad following behind, climbed into the thatch of the cowshed, and, there hidden, in a loud voice cursed the king by all his gods. The king heard him, but was unable to find him, so in a rage he ordered the cowhouse to be pulled down. But the toad went and hid himself in the thatch of the guesthouse, so that it became necessary to pull that down, too, and so on with other houses. Finally the king addressed his unseen enemy, and asked him whether he was a god or a man. Said the toad, 'no god am I, but merely a man, and I curse you because you carried off my cattle. But if you will take an oath to give me your daughter in marriage I will trouble you no more.' To this the king consented, and the toad jumped down; and, for his oath's sake, and lest the toad should be in some sort a god, the Rajah married his daughter to him, and sent the young pair home to the old man and the old woman, with a retinue and a palanquin and elephants and horses. When the old man and the old woman saw the *cortège* coming, they ran away in fright, but their son, the toad, pursued them and brought them back, and they all lived together.

One day the princess looking at her husband found him very ugly, and asked him to bathe himself, to which he replied that he had lived in water all his life, from childhood up. Then said the princess, 'I know very well that you live in *cold* water, but what I want to give you is a *hot* bath to take the warts off your back.' So she made some water boiling hot and bade her husband jump in. So he perished miserably, and that's all.

The last set of specimens provided by Mr. Anderson consists of a collection of Folk-songs and Nursery Rhymes in genuine agglutinative Bârâ.

From-high, from-high pour, from-high, from-high pour.

In other verses substitute other festive occupations as:—

Goe khau, khau, slice betel-nut.
Zō lū, lū, pass round the beer.
Khurūi sū, sū, clean the plates.

¹ *Motacilla alba*, *dau-thep* = the pinched-tail bird.

Gogorleng is the traditional name for the *bārū* or *bohūā* who plays the buffoon at weddings.

A WOMAN TO HER LOVER.

Sō, mālibai, sō-bai,
Come, my-lover, come-then,
 Gangā zālā,
River fisherman,
 Thākā-nī kheru man-ā-bā
Silver-of ear-rings get-not-if
 Āng-bū thāng-li-ā
I-too come-not

AN EXCHANGE OF COMPLIMENTS.

Girl sings:—

Silākōn-ārūi gāthā-fūr.
Chīnākōnā-folk boy-s.
 Moisū hū-nū fai!
Buffaloes drive-to come!

Boy answers:—

Hū-nū rāngā, mū-nū rāngā,
Drive cannot, wive cannot,
 Āng-khō dā-ling, fai,
Me-to don't-shout, come,
 Engkhut khārūi khūrū-khūrū,
Rice('s) brass-pot bubble-bubble,
 Āng-nī fāt-se tūrū, fūrū
Me-of side-one trouble, trouble
 Khârâ khuzuli,
Head itch,
 Bidot zā-suli.
Flesh eat-er.

WHAT WOMEN SING TO THE BRIDE WHEN SHE IS TAKEN AWAY.

Dā gāp-se, ai, dā gāp-se,
Don't weep, dear, don't weep,
 Khā-nū lai lāng-ā
Bind-for to (they) take-not
 Su-nū lai lāng-ā.
Wound-for to (they) take-not.
 Bāngāl Sim-sā-nū¹ lāng-ā.
Bengali Bhutiā-for take-not.

¹ Sim-sa seems to be Chīn-fsā, son of China.

Ēhē, hāi, hǎi.
Oh, ho, ho.

Lines 2, 3 and 4 may be varied *ad infinitum*.

A MOTHER'S LAMENT OVER HER DEAD SON.

Thokon srong srong
(With) clubs in-crowds in-crowds
 Thāng-dang-man, āfā Sokhai, nang-lai.
Went-est (thou), son Sokhai, thou-oh.

For line 1, substitute—

Emfū blī-blā
Sword flashing
 khaukhā dumā-dumī
turban heaped-high

or Nang dang-bā, omā bidot zang zā-dang-man, etc.
You be-ing, pig flesh we eat-ing-were.

AN INVITATION.

Ūi, Silākōn-ārūi, hing-zau-fūr,
Oh, Chinākōnā-folk, women-folk,
 Nā gut-nǔ fai,
Fish catch-to come,
 Nā gut-nǔ rāng-ā-bā,
Fish catch-to able-not-being,
 Lǔgǔ-se dā-lā fai.
With don't-at-all come.

In other verses substitute { megong khā-nǔ }
vegetables cut-to, or other occupations which
 man and maid can do together.

A LOVE-SONG.

Āgūi Boisāgi,
Sister wanderer,
 Āng-khō dā bāsī,
Me-to (do) not scorn,
 Sīkhā sip-nǔ hā-i-ā-bā
Girl sweep-to able-not-being
 Āng-bǔ sip-fā-gan.
I-too sweep-with (her)-will.

In the next verse, for the last two lines, put :

Dūi lai-nǔ hā-i-ā-bā, āng-bǔ lai-fā-gan,
Water draw-to able-not-being, I-too draw-with (her)-will,
 and so on with other feminine occupations.

If a woman sings, the first line will be

Ādā Būi-dāsi,
Brother Bi-desi,

and she will select men's work as *hāthi* hŭ-nŭ, to catch elephants, *hālī* oi-nŭ, to plough, *mai* gai-nŭ, to plant paddy.

MOTHER-IN-LAW TO DAUGHTER-IN-LAW.

Wā bi-zō-nī gāndeolā,
Bamboo top-of butterfly,
 Bīr-dau, bīr-dau, bīr-dang.
Flutter, flutter, fly.

Bauhāri gādai zō zong-nai-ā,
Daughter-in-law younger('s) beer brew-ing-(nom.),
 Kbūiram-dūiram zā-dang,
Helter-skelter becom-es,

or

Bauhāri gādai khām songnai-ā
Daughter-in-law younger('s) rice cook-ing
 Sigram zethram zā-dang.
Hugger mugger becom-es.

A WOMAN TO HER HUSBAND.

Hī dai-dai-hŭ-bā-bŭ.
Cloth weave-weave-giv-ing-even.

Zim-nŭ rāng-e-ā,
Put-on-to able (is) not,

Mā hoā zang gorop-khŭ!
What husband I ('ve) got-then!

Zang-nī khāfāl-ā!
Me-of luck!

Sū-nī khāfāl-ā.
Evil-of luck.

For the first two lines substitute—

Gāmsā dai-dai-hŭ-bā-bŭ
Shoulder cloth

Gān-nŭ rāng-e-ā
Wear-to

or

Fāli dai-dai-hŭ-bā-bŭ
Turban

Khau-khā-nŭ rāng-e-ā
Bind-to

COURTSHIP.

Man says—

Ŭi bāze, ũi bāze
Oh sister-in-law, oh sister-in-law
 Em bō-nānŭi hŭ.
Mat spreading give.

Woman answers—

Nang-nī hingzau-sŭ nongā, hai,
Thee of wife-indeed am-not, ho,
 Em-sŭ bō-bai-nŭ.
Mat-even spread-(continue)-for.

Other occupations in other verses.

A man speaking to a woman says, *lŭi*.

A woman speaking says, *hai*.

A man speaking to a woman familiarly says, *ŭi*.

A LOVE SONG ?¹

Dŭi lai-nai-ā sŭrŭ man ?
Water draw-ing who was.
 Āgŭi Bonbāhī sikhlē man.
Sister Ban-bāsī girl was.

Other occupations to be substituted, male or female, according as the singer is woman or man.

WOMEN'S WORK.

Dudu-gur, dudu-gur, mā-lā-ŭi ?
Little-drum, little-drum, what-ŕ 'h ?
 F'sā bā-nai-nī fālā-ŭi.
Child bear-(on-back)-ing-of task-eh !

In other verses other work is substituted. The *dudugur* is the little drum with a bead tied to it, which is shaken from side to side so that the bead beats it *dudugur*, *dudugur*.

TO A WOMAN.

Boisāgī, āsāgī, rā, rā,
Wanderer, squanderer, stay, stay,
 Megong mi-khām song-blā, dŭi-lau, dŭi-sau.
Vegetables rice cook-ing, higgledy, piggledy.
 Hoā sā-se nu-bŭ-lā
Man one see-(even)-ing
 Gadā gā-sō.²
Topsy turvy.

It is not necessary to give specimens of the Bārā spoken in Nowgong and other districts south and east of Darrang. It is exactly the same as that which has been illustrated in the preceding pages.

¹ Goes to the tune of 'Savez-vous planter les choux ?' and is a singing game of the same sort.

² *Lit.* 'neck twisted.'

MES OR MECH.

The people who speak this dialect call themselves Mes, which is usually written 'Mech,' according to the spelling adopted when writing the name in the Assamese alphabet.

It is very doubtful whether Mech should be considered as a dialect of Plains Kachāri, or as identical with the standard of that form of speech. If we take the Plains Kachāri of Darrang as the standard, the differences between it and Mech are certainly very slight, and are principally matters of pronunciation; but there are also one or two points of difference in grammar, and hence I have followed the general custom, and treat Mech as a dialect very nearly related to the standard.

The Meches do not admit any relationship with the Bodos of Kamrup and Darrang, but it is doubtful if they are really a distinct tribe. Hodgson in his Essay on the Kóech, Bódó, and Dhimál tribes, has given a Bódó Grammar and Vocabulary, and distinctly states that Mēch and Bodo are the same. He says,¹ 'For Mécch, read Bôdo, *passim*. Mécch is a name imposed by strangers. The people call themselves Bodo, which, of course, is the proper designation.' As a matter of fact, the term Mech is, at the present day, confined to the speakers of Plains Kachāri or Bârâ who dwell west of the district of Kamrup. The head-quarters of the standard dialect are that district, Darrang, and Nowgong. In Goalpara, immediately to the west of Kamrup both terms are in use, for Plains Kachāri has been returned as the language of 8,300 people, and Mech as that of 68,900. Probably the smaller number represents the speakers who dwell near the Kamrup border, and whose language is not affected by what may be called the typical Mech peculiarities. The form of speech illustrated by Hodgson more nearly agrees with what I here give as Mech than with the standard dialect of Darrang, and I hence insert his name in the list of authorities on Mech, and not in that of authorities on standard Plains Kachāri.

Mech has been returned as spoken in the following districts :—

In Assam	in Goalpara by	68,900
In Bengal	in Jalpaiguri by	21,311
„	in Cooch Behar by	3,700
		<hr/>
		25,011
	TOTAL .	<hr/>
		93,911

In Goalpara the speakers are scattered all over the District. There are three settlements of them in Jalpaiguri, while in Cooch Behar they are confined to the eastern and northern tracts of the State, comprised within the Tufānganj Sub-Division. As in all Bodo languages, words are freely borrowed from the neighbouring Aryan forms of speech, Assamese and Bengali respectively. As might be expected, in the case of Mech this tendency is not so marked in Goalpara as in Jalpaiguri and Cooch Behar.

Taking the Goalpara form of speech as the typical one, the following are main points of difference between it and the standard dialect of Darrang :—

Pronunciation.—It is difficult to say how much in the specimens is mere variety of spelling, and how much represents actual variety of pronunciation. In the Goalpara specimen the sound which in Darrang is written *a*, here regularly appears as *o*.

Thus Darrang *dang*, is, becomes *dong*. Darrang *ũ* also becomes *o*, as in *no*, the sign of the dative case. Darrang *ũi* becomes *oi*, pronounced as in 'oil,' as in *ukhoi*, for *ukhũi*, to be hungry. The very short vowels, which in the Darrang dialect are represented by small letters above the line, usually altogether disappear in Goalpara, to which fate they already show a tendency in the former district. Thus Darrang *z'lä* or *zlā*, male, becomes *jlā* in Goalpara. On the other hand Darrang *f'sa* or *fsa*, a child, is *fisā* in that district. The Darrang *z* is uniformly represented by *j* in all the Mech specimens. It is doubtful, however, whether this is not a mere matter of spelling. It may be noted that Hodgson invariably uses *j*. The word *mānsũiā*, which means 'a man' in Darrang, becomes *mānsiā* in the Goalpara specimens.

As regards **declension** of nouns, after allowing for the changes of spelling indicated above, the only difference between the Darrang and Goalpara specimens is that in the latter the termination of the locative is *āo* and not *āu*. This again is almost nothing but a matter of spelling.

As regards **pronouns**, that of the third person singular has a nominative *bī-ō*. The reflexive pronoun is *gāo*, self.

As regards **verbs**, we may note the use of the termination *ni* which is confined to the first person of the present tense. This also occurs in the standard dialect, but attention should be drawn to it here, as it indicates the commencement of a system of inflexion which is further developed in Jalpaiguri.

The past tense is commonly formed by adding *āsoi* to the root. Before this a euphonic *i* is inserted when the root ends in a vowel. Examples are *bung-āsoi*, he said; *jā-i-āsoi*, he became; *lubu-i-āsoi*, he desired.

The following instances occur of the use of a negative past, *ho-ā-kho-soi*, did not give; *naigir-ā-khō-soi*, did not wish; *gār-thār-ā-khoi*, disobeyed not; *ho-ā-khoi*, gave not.

AUTHORITIES—

The authorities on Mech will be found detailed after those on Bārî, Bodo, or Hills Kachârî.

The first specimen is a translation of the Parable of the Prodigal Son from Goalpara.

 bī-fong-ā thoi-nā-nōi thāng-dong-mon, thāng-khāng-bai; gomā-nā-nōi
brother-the having-died going-was, alive-entirely-was; having-been-lost
 thāng-dong-mon, mon-fin-bai.'
going-was, got-again-was.'

Two specimens are given from Jalpaiguri. The first is a version of the Parable. The second is a folk song.

The language of the Bodos of Jalpaiguri closely resembles the Mech of Goalpara. The following are the main points of difference.

We at once notice that the **vocabulary** is much more full of Bengali words. Here and there whole sentences are Bengali from beginning to end. The last two lines of the second specimen are even Bengali in grammar. The influence of Bengali is specially manifest in the spelling. The typical Bengali *sh* is very common, and the tendency to aspirate tenues is not observable. Thus, 'sin' is *pāp*, not *fāf*. There is great laxity in the use of the vowels. We may also note that the word for 'son' is not *fisā-jlā*, but *bishā*.

The declension of **nouns** is in the main quite the same as in Goalpara. The only exceptions worth noting are that in one instance *bifā-niā*, instead of *bifā-nī*, is used for 'of the father,' and 'a house' is *nō*, and 'in a house', *nāo* for *nō-āo*. Here we see an attempt at inflexion.

As regards **pronouns**, the suffix *ō* is used not only with *bī*, but also with *āng* and *nung*. It is used with the nominative plural as well as with the nominative singular so that we have *jung-ō*, we, and *bī-sor-ō*, they. The plural of the first person is *jung*, not

jong, and similarly, 'thou' is *nung*, not *nong*. In the second specimen, *nung-nō* means 'thou.' In the first specimen, *bī-ehī-nū* is twice used to mean 'of them.' Note *ēnbē*, this, which occurs also in Cooch Behar. In Goalpara Mech it is *ēbē*.

In the conjugation of the verb there is a tendency to inflexion in the present tense. The forms are as follows :—

Sing.	Plur.
<i>Āng shu-nī</i> , I strike.	<i>Jung shu-nī</i> , we strike.
<i>Nung shu</i> , thou strikest.	<i>Nung-sorō shu</i> , you strike.
<i>Bī shu-ā</i> , he strikes.	<i>Bī-sorō shu-ā</i> , they strike.

It may be noted that the root corresponds to the standard *soā*, to pound. In Jalpaiguri it is sometimes spelt *shō*, and sometimes *shu*. Both spellings will be found in the list of words and sentences.

Other examples of this tense which occur in the specimens give yet other forms. Thus, *chā-jā-lai-nī*, let us eat; *rong-jā-jā-lai-nī*, let us rejoice, the first person present indicative being used for the imperative. The termination *soi*, which in other places appears to correspond to the standard *sāi* or *sē*, seems to be also used as a termination of the present. Thus, *thui-soi*, am dying, and *long-soi*, they are.

The future has several forms, none of them agreeing with the standard. Those noted are, *āng-shu-nai*, (I) shall strike; *thāng-nai*, will go; *āng-bung-nai-ān*, (I) will say. Different is *mun-gau*, (I) will get.

For the past tense, we have the termination *āsoi*, as in Goalpara. There is also another very common one, *ā-mon*, as in *shu-ā-mon*, struck; *hu-ā-mon*, gave; *thun-hon-ā-mon*, sent. In two instances we find the termination *soi* or *mon* omitted, and only the *ā* remaining. These are *jā-i-ā*, took place, and *khlām-ā*, did. Other forms are *khoā-non*, he heard, and *maubā-i*, (I) have worked. What seems to be a past subjunctive is *rong-jā-jālai-nā*, (I) might be mutually merry.

For the conjunctive participle we have the usual termination *nā-nōi*, and also *nān* as in *rān-nān* and many others.

The following forms occur of the negative verb, *ung-ā*, were not; *gār-ā-khoi*, (I) did not disobey; *nung-ō ho-ā-goi*, thou didst not give; *thāng-ā-gō-soi*, he did not go; and, in the second specimen, *hot-nā-kho-choi*, did not give. In the first specimen *hu-ā-mon* is used to mean both 'gave' and 'did not give.' In the latter instance, there is probably some mistake in writing the Mech word.

TRANSLITERATION OF SPECIMEN II AND INTERLINEAR
TRANSLATION.

1. Mai-nī moddē mai-mā.
The-paddy-of among (as-the)-mother-paddy-(is).
2. Hujur, nung-no jung-nī bīfā bīmā.
Lord, you of-us (are)-father mother.
3. Probhua, āng-khau jonom hot-nān.
Lord, me birth having-given.
4. Budhi ār dhon hot-nā-kho-choi.
Wisdom and wealth not-gave.
5. Joto goāl-nī dong-soi khāriā.
All the-milkmen-of are milk-pots.
6. Āng-nī kopāloi jā-lā-bai hāoriā.
My lot-(because-of) (I) become poor.
7. Dūr hātē dēkhilā hōnā bhālā.
Distance from seeing is good.
8. Kāndāt jāyā dēkhilē diā-dokolā.
Near going seeing ups-and-downs (i.e., appears unseemly).

The last two lines are nearly pure Bengali.

Mech is also spoken in the eastern and northern parts of the Cooch Behar State, comprised within the Tufānganj subdivision. Two specimens are given of this form of the dialect. It will be seen that it is even more corrupt than that of Jalpaiguri, and abounds in Bengalisms. As special peculiarities, we may note the frequent use of *kō* instead of *khō* as the suffix of the Accusative-Dative (a mere matter of spelling), the curious form *bi-khnō*, him, and the use of the plural *jong*, we, in the sense of the singular. The word for 'this' is *imbē* or *ēmbē*. The verb which in the standard dialect is written *dang*, and is here written *dōng*, is used to mean 'was.'

LĀLUNG.

Lālung is spoken in a portion of the south-west corner of the district of Nowgong, and in the adjoining tracts of Kamrup and the Khasi and Jaintia Hills. Immediately to its south-east, and between it and the North Cachar Hills in which Dīmā-sā or Hills Kachārī is spoken, lies a tract of hill country of which the language is Hōjai. The Lālung tract itself is also a hill country. The language is most closely connected with Hōjai and Dīmā-sā, and only presents a family resemblance to Bārā. This will be evident from a comparison of the grammar of the three forms of speech. It is spoken by the following number of people :—

Kamrup	2,060
Nowgong	35,350
Khasi and Jaintia Hills	2,750
														TOTAL	40,160

All that has been hitherto known concerning this language is a short vocabulary given by Mr. Gait on 162 of the Census Report of Assam for 1891. No explanation of the name has ever been offered. How the Lālungs came to their present site, or when, is not known. They are not mentioned by the Āhom historians, nor in the accounts of the Kōch kingdom. In Nowgong they are said to have a tradition that they came from the Jaintia Hills, while some of the Lālungs in the latter district say that their ancestors immigrated thither in the reign of the Jaintia Rājā U-mon Gohain. Another account, however, says that the Lālungs claim to be the autochthones of the Jaintia Hills.

GRAMMAR.

In Lālung the pronunciation, as recorded in Nowgong, appears to be even more fluctuating than in Bārā. The pronunciation even of the consonants seems, if the specimens have been correctly written down, to be uncertain. Thus, we have both: *fādār* and *fāthār*, a field; *pathāl* and *bothāl*, to strike; *jigāl* and *chigāl*, to arise; *parun* and *burun*, a goat. At the same time it should be remembered that these discrepancies may be mistakes of the transcriber, who had to attempt for the first time to write down the sounds of a language hitherto unwritten. It should be explained that the specimens and list of words as received by me were written in the Assamese character, with a transliteration from that character into the Roman one. I have not ventured to alter the transcription as received from the local officers, but it is almost certain that every *ch* should be pronounced as a dental *s*, as is customary in Assamese. So, too, some of the *s*-s, but not all, should probably be pronounced, as in Assamese, as rough *h*-s. This is well illustrated by the word *sukum*, order, which is evidently an attempt at reproducing the word *lukm*, borrowed from Arabic, through Assamese.

Sufficient materials are not available for the compilation of a complete Lālūng grammar, but the following has been gathered from the specimens, and its correctness depends upon the accuracy with which they have been recorded.

The **Plural** is formed by adding *rau* or *ru* (compare Dīmā-sā *rau*). In the case of pronouns, the terminations *rā*, for the second person, *rē*, for the third person, and *khēdā*, for all three persons are used. The last is evidently a corruption of the Assamese *keṭā*, some.

The suffix of the **Accusative-Dative** is *ga* (probably pronounced *go*), as in *chākar-ga chāng-māti*, having called a servant; *chākar-ga kusī-gā*, he said to the servants. For the dative, *nā* is also used, as in *fā-nā*, to a father. Instead of *nā*, we sometimes have *ā*, corresponding to the Dīmā-sā *hā*, as in *fūdār-ā*, to the field; *fū-ru-ā*, to fathers. *Ga* and *nā* correspond, respectively, to the Bārā *khō* and *nū*. Like the Bārā *nū*, *nā* is also the sign of the infinitive.

Examples of the **Instrumental** case are *ādā-rē*, by husks; and *mung-ē-rē*, by name. This termination looks as if it were borrowed from Assamese.

The termination of the **Genitive** is *nē*, as in *bē-nē*, of him; *na-nē*, of a house. As in the case of the dative, the initial is frequently dropped, and we find simply *ē*. Thus *libing-ē*, of a man; *bīl-ē*, of a lake. In *hēbē ghōrā-kichā-nē bayas*, the age of this horse, *ki-chā* (i.e., *kisā*) means, one individual, *chā* (or *sā*) being the numeral, and *ki* the generic prefix like *mā* in the Bārā *mā-sē*. In Bārā the sentence would run *bē gorai mā-sē-ni boyos*, the age of that one-piece horse; similarly *bēi kichā chā-nē-pērā kinī dam-nā*, from whom did you buy that one thing?

For the **Ablative**, *pērā* is added to the genitive, as in *chā-nē-pērā*, from whom? *Pērā* is the Assamese *parā*.

The **Personal Pronouns** are the following :—

<i>Āng</i> , I.	<i>jīng-rau</i> ,	<i>ching</i> ,	<i>ching-khēdā</i> ,	we.
<i>Nā</i> , thou.	<i>nā-rā</i> ,	<i>nā-rā-khēdā</i> ,	<i>nā-khēdā</i> ,	you.
<i>Bē</i> , he.	<i>bē-rē</i> ,	<i>bē-khēdā</i> ,		they.

Āng-ē, is 'my'; *āng-ā*, 'to me'; *jīng-ē*, our; *nē* is 'thy'; *nā-rā-rē*, your; *bē-nē*, 'his,' *bē-rē-u-ē*, their. Other forms noted are *bēi*, that; *ba-ga* or *ba-ga-la*, him, or to him; *hēbē* or *ēbe*, this; *hē-rā-nā*, to them. *Athē* seems to mean 'own.' The Assamese relative pronoun is used. *Chārā* is 'who?', and *chā-nē*, whose? *minā*, what? *chārbā*, anyone.

As regards **Verbs** it is reported that Lālūng shows no distinction between present, past, and future time. This is partly borne out by the list of words and sentences received, in which the present is shown as identical with the past, but, if it is a true statement, it would be a most extraordinary and unique condition of affairs. An examination, however, of the version of the Parable of the Prodigal Son shows that the statement is not correct, and that Lālūng has a complete array of tenses. The most that can be said is that, like the neighbouring tribes, the Lālūngs use their tenses loosely.

The Verb Substantive is *hangya*, am, is; and *thai-dang* or *dangya-man*, was. This is stated on the authority of the list of words, but *thai-dang* is, to judge from analogy, really a definite present, and means properly 'he is becoming.' Other words for 'is' are *dangya*, and *bāngya*. This termination *ya*, which occurs several times above, is probably pronounced as *a*, the *y* in the Assamese character being probably merely a fulcrum for writing the *a*, much as *alif* is used in Hindōstānī, so that *হাং* is really a way of writing *হা*, which is less correct, but more convenient.

Two instances occur of the negative verb substantive, both in the phrase 'I am not worthy.' They are *hing-i-āng-bē* and *hing-i-ām-mē*. These two forms are really identical, for, as will be seen in other cases, *ng* and *m* are freely interchanged.

The Finite Verb is conjugated as follows. The Present tense is formed by the suffix *ya* (?*a*), which after *ā* becomes *o*. This suffix evidently corresponds to the Bārā *ũ*. Examples are *nung-ya* (? *nung-o*), (you) drink; *thāo*, (he) lives; *chāo*, (you) eat.

The Present Definite is formed by the suffix *dang*, as *thai-dang*, is becoming; *thi-dang*, am dying; *ri-dang*, am doing. The final *ng* of *dang* is liable to be changed to *m*, as in *mān-dam*, are getting, and *thai-dam* (a case of the present used for the past), he is, *i.e.*, he was (in the field). Sometimes it is dropped entirely, as in *thai-da*, there are; *charai-da*, is grazing; *fi-da*, is coming; and *khanai-da* (again one of these historical presents), he heard.

The termination of the Future is *ang*, as in *bathāl-ang*, will strike. After a vowel, the initial *a* appears to be elided, as in *kusi-ng*, will say; *ri-ng*, will do, let us do.

The termination of the Past and also of the Perfect is *gāng*, as in *gadar-gāng*, (I) walked; *pathāl-gāng*, (I) struck; *ri-gāng*, (I) have done. The final *ng* is liable to be changed into *m*. It is frequently elided, as in *bathāl-gā*, struck; *hang-gā*, became; *kusi-gā*, he said; *as-gā*, he gave. Another form of the past appears in *hām-gai-bā*, he wished.

An example of the Past Participle is *as-ā*, given. The Conjunctive Participle ends in *māti*, as in *lai-māti*, having collected; *mān-māti*, having got. A kind of Gerund is *li-gā-rē*, on going. *Charē-nā*, for filling, represents an Infinitive.

Causal verbs are formed as in Bārā,—the verb *as*, to give, being appended to the main verb. Thus, *gān-as*, cause to wear. This is also an example of the Imperative, which takes no suffix.

The following examples occur of the negative verb: *as-iām*, gave not; *khan-iām*, did not; *nānā-hām-iām*, did not enter. Another system of conjugation is represented by *fi-ā-jāng*, transgressed not, and *as-ā-jā*, gavest not. The change of *gā* and *gāng* into *jā* and *jāng* reminds one of the Rābhā and Gārō negative form with *jā*.

I am indebted to Mr. J. D. Anderson for the following note on the specimens:—

The specimens suffice to show that Lālung like Bārā has an agglutinate verb which is now conjugated in much the same way as the Bārā verb. The verbal roots in both languages closely correspond, allowing for some phonetic changes. The following list gives the verbal roots found in the specimens which more or less coincide with Bārā roots.

Lālunz.	Bārā.
<i>dangya</i> , be	<i>dang</i> .
<i>kusi</i> , say	<i>khithā</i> .
<i>as</i> , give	<i>hā</i> .
(cf. Lālunz <i>mas</i> , a deer, which in Bārā is <i>mu</i> .)	
<i>lai</i> , bring	<i>lā</i> .
<i>khāmañ-gār</i> , squander	<i>ho-gār</i> .
<i>hang</i> , be	= Rābhā <i>clang</i>
<i>thā</i> , stay	<i>thā</i> .
<i>mān</i> , get	<i>man</i> .
<i>thā</i> , die	<i>thā</i> .
<i>chīpāl</i> , arise	<i>zikhing</i> .
(cf. <i>chālā</i> (far) = Bārā <i>gāzā</i> .)	
<i>khan</i> , do	<i>khīm</i> .
<i>nu</i> , see	<i>nu</i> .
<i>lābā</i> , bring	<i>lābā</i> .
<i>rom</i> , seize	<i>ham</i> .
(cf. <i>re</i> , cloth = Bārā <i>hā</i> .)	

Lālūng.		Bāṛā.
<i>chā,</i>	eat	<i>zā.</i>
<i>lā,</i>	bring	<i>lā.</i>
<i>gān,</i>	put on	<i>gān.</i>
<i>thāng,</i>	breathe, live	<i>thāng.</i>
<i>kamāi,</i>	lose	<i>g*maī.</i>
<i>thai,</i>	stay	<i>thai.</i>
<i>fi,</i>	come	<i>fai.</i>
<i>khanaī,</i>	hear	<i>khnā.</i>
<i>sang,</i>	ask	<i>sang.</i>
<i>fi,</i>	destroy	<i>s'-fai.</i>
<i>fi-gār,</i>	squander	<i>gār</i> (with causative <i>fi</i>).
<i>bathāl</i>	kill	<i>bu-thāt</i>

Eating-of for got.

Ching bil-ē di nung-ya.
We lake-of water drink.

Chingē na bil-ē ōchar.
Our house lake-of near.

DĪMĀ-SĀ OR HILLS KACHĀRĪ.

This member of the Bodo group is only spoken in Cachar, and more especially in the hilly northern portion of that district. It is hence called by Europeans Hills Kachārī, to distinguish it from the Plains Kachārī or Bārā spoken in Darrang, Nowgong, and Kamrup. The Kachārīs of North Cachar do not call themselves by this name, but speak of themselves as Dīmā-sā, explained by some as 'people of the great river, *i.e.*, the Dhansiri,' on which their ancient capital Dīmā-pur, or Riverton, is situated. This appears to be an instance of folk-etymology, for, in the first place, 'Dīmā-pur' is probably a corruption of *Hiḍimba-pura*, *Hiḍimbā* being the Sanskrit name of Cachar, and, in the second place, the Dhansiri is not at all a large river. It is just possible that the *Dīmā* in *Dīmā-sā* has nothing to do with the *Dīmā* of *Dīmāpur*. If the former *Dīmā* is a corruption of *Hiḍimbā*, we should have an Aryan word, *Dīmā*, compounded with a non-Aryan word, *sā*. In Dīmā-pur (supposing it to be a corruption of *Hiḍimba-pura*) both members of the compound are Aryan. If therefore Dīmā (in Dīmā-sā) does mean 'great river,' it is most probably the Brahmaputra which is referred to, and, in that case, the Dīmā-sā have ascended to their present seats from the Assam valley.

There is no doubt that the speakers of Bārā and of Dīmā-sā belong to a common stock, which became divided in comparatively recent times, and which, for convenience sake, we may call Kachārī. How these Kachārīs got their name, and how they migrated into Cachar has been described when dealing with the Bārā language and need not be repeated here.

Dīmā-sā has hitherto been described as a dialect of Bārā. The two languages, like the speakers of them, have certainly a common origin, but they differ so much that one cannot be called a dialect of the other. Both possess all the typical peculiarities which belong to languages of the Bodo group, but Dīmā-sā differs more from Bārā than Gārō does, and the latter, also belonging to the Bodo group, is universally considered as a separate language. I, therefore, class Dīmā-sā as a separate language also.

Dīmā-sā has at least one dialect, Hōjai, which is spoken by 2,750 people in the south-west of the district of Nowgong, in the hills to the south-east of the area in which Lālūng is spoken. Lālūng might also be considered as a dialect of Dīmā-sā, but it differs much more from it than does Hōjai. I have hence followed my predecessors in classing it as a separate language, a sort of border form of speech between Bārā and Dīmā-sā, possessing points of resemblance with both.

According to some authorities, Hōjai is only another name for Dīmā-sā, and both names represent identically the same language. A reference to the specimens will, however, show that this is hardly a correct description of the case.

The following are the figures showing the number of people who speak Dīmā-sā including Hōjai:—

Cachar Plains	7,731	
Cachar Hills	8,200	
	<hr/>	15,931
Nowgong (Hōjai)		2,750
	<hr/>	
TOTAL		18,681
		<hr/>

The following are the authorities, so far as I am aware of them, on Dīmā-sā and Hōjai :—

AUTHORITIES—

- FISHER (Major Thomas),—*Memoir of Sylhet, Kachar, and the adjacent Districts*. *Journal of the Asiatic Society of Bengal*, ix (1840), pp. 808 and ff. On p. 830 there is a brief note on Hills Kachārī.
- BUTLER, Captain J.,—*A rough Comparative Vocabulary of some of the Dialects spoken in the "Nágá Hills" District*. *Journal of the Asiatic Society of Bengal*, xlii (1873), Pt. I, Appendix. Vocabulary.
- CAMPBELL, Sir G.,—*Specimens of the Languages of India, including those of the Aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. Cachari Vocabulary on pp. 188 and ff., and Hōjai Vocabulary on pp. 169 and ff.
- DAMANT, G. B.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers*. *Journal of the Royal Asiatic Society*, Vol. xii (pp. 228 and ff.). On p. 232, an account of the tribe, in which Hōjai is identified with Hills Kachārī; on p. 254 a vocabulary.
- SOPPITT, C. A.,—*Outline Grammar of the Kachāri (Dārā) Language as spoken in District Darrang, Assam*. by the Revd. S. Endle. Shillong, 1884. The Introduction gives a brief Grammar and Vocabulary of the Hills Language by C. A. S.
- AVERY, J.,—*On the Relationship of the Kachari and Garo Languages of Assam*. *Proceedings of the American Oriental Society for May 1887*, pp. clviii and ff., appended to Vol. xiii (1889) of the *Journal of the Society*. Contains a short Grammar of both Hills and Plains Kachārī.
- GAIT, E. A.,—*Report on the Census of Assam for 1891*, p. 160.

The following imperfect sketch of Dīmā-sā grammar is based on the information provided by the specimens and the list of words. Here and there I have pointed out where my information differs from that given by Mr. Endle.

The specimens and list of words received from North Cachar have been carefully prepared, and there seems to be little doubt about the pronunciation of the various words. Perhaps the numerous final *a*-s should be long. This, however, is rather a matter of spelling than of pronunciation.

The plural is formed by the suffix *rao*, spelt *rāu* by Mr. Endle. That gentleman also mentions a plural suffix *nishi*, which does not appear in the specimens or list of words. We find, however, *shi* added to the genitives of pronouns, to form a plural in Hōjai.

The suffix of the Accusative-Dative is *kē*, Mr. Endle's *khô*. He also mentions a Dative suffix *ne* for which I have no authority. The Instrumental suffix is *jung*, and that of the Genitive is *nī*. That of the Ablative is *nī-fārang*, which Mr. Endle writes *nī-frang*. The Locative suffix is *hā*. We thus get the following declension :—

Sing.	Plur.
Nom. <i>buḥa</i> , a father.	Nom. <i>buḥa-rao</i> , fathers.
Acc. <i>buḥa-kē</i> , a father.	Acc. <i>buḥa-rao-kē</i> , fathers.
Instr. <i>buḥa-jung</i> , by a father.	And so on.
Dat. <i>buḥa-kē</i> , <i>buḥa-ne</i> , to a father.	
Abl. <i>buḥa-nī-fārang</i> , from a father.	
Gen. <i>buḥa-nī</i> , of a father.	
Loc. <i>buḥa-hā</i> , in a father.	

As in other Bodo languages, generic prefixes are used with the numerals. For non-rational animate objects in general, and when the numerals are used alone in counting, the prefix is *mā*. Thus *shīsha mā-shī*, one dog; *mā-shī*, one. For human beings the prefix is *shao*, as *shūbāng shao-shī*, one man. For inanimate objects the most usual prefix is *gārāng*, as *nō gārāng-ginnī*, two houses, but for objects of the vegetable kingdom, *fāng* is used, as in *bongfang fāng-jī*, ten trees.

The forms given for the Pronouns by Mr. Endle differ somewhat from those found in the specimens and list of words and agree better with Hōjai. I give the forms according to both authorities :—

	Specimens.	Mr. Endle.
I,	<i>Ang.</i>	<i>Ang.</i>
Me,	<i>Ang-kē.</i>	
My,	<i>Ānī.</i>	
We,	<i>Āni-rao.</i>	<i>Jang, jing.</i>
Us,	<i>Āni-rao-kē.</i>	
Our,	<i>Āni-rao-nī.</i>	
Thou,	<i>Ning.</i>	<i>Nu, nung.</i>
Thee,	<i>Ning-kē.</i>	
Thy,	<i>Ninī.</i>	
You,	<i>Nini-rao.</i>	<i>Nu-shi, ni-shi.</i>
He,	<i>Bō.</i>	<i>Bwa.</i>
Him,	<i>Bō-kē.</i>	
His,	<i>Bō-nī.</i>	
They,	<i>Bō-rao, bōni-rao.</i>	<i>Bwa-nishi.</i>
This,	<i>Ībō.</i>	<i>Eb.</i>
Who?	<i>Sherē.</i>	<i>Shōr.</i>
What?	<i>Shūmo.</i>	

Note how, in the case of pronouns, the plural suffix is usually tacked on to the genitive. This does not occur in the case of nouns.

There appear to be pronominal prefixes in use. No. 223 of the list of words and sentences gives *ni-nī ni-fa*, your father. No doubt the *bu* in *bu-fa*, a father, originally meant 'his,' and the word meant 'his father,' but the special meaning of 'his' has been lost, and the word now means 'a father,' generally. This tendency to generalise the pronominal prefix of the third person is very common in languages which use this method of prefixing pronouns to words of relationship. As an example, the Burushaski of the North-Western frontier of India may be quoted.

The Verb Substantive is *dōng* or *dao*, is; *dōng-bā* or *dōng-kā*, was.

The verb is conjugated as follows :—

Present.	<i>Ang shū-rē</i> , I strike.
Present Definite.	<i>Ang shū-dū</i> , I am striking.
Future.	<i>Ang shū-mā</i> , I shall strike.
Future Definite.	<i>Ang shu-nung</i> , I shall be striking.
Past.	<i>Ang shū-bā</i> , I struck, I was striking.
Past Definite.	<i>Ang shū-kā</i> , I have struck, I did strike.
Imperative.	<i>Shū</i> , strike.
Infinitive.	<i>Shū-mā</i> , to strike.
Conjunctive Participle.	<i>Shū-dada, shū-ho</i> , having struck.
Gerund.	<i>Shū-mā-nī</i> , on striking (properly the genitive of the infinitive).

Causal verbs are formed, as in Bārâ, by adding the root meaning 'to give,' in *Dīmā-sā rī*, to the main verb. Thus, *jī-rī-mā*, to give to eat, from *jī-mā*, to eat.

A negative sentence is formed in two ways.—Either *guri* is added. Thus, *rī-bā*, gave; *rī-bā guri*, gave not. Or else a negative conjugation is used, of which the typical sign is the letter *ā*. Examples are:—

Ning ti-fu-ā, you are not able to call.

Lai-ā-kā, did not wish.

In the following we have a double negative:—

Kānai-ā-bā guri, did not not hear, did not refuse to hear, did not disobey.

 āni-rao gabang kūshī dāng-dada dōng-nung.
we very pleased having-been-proper will-be.'

HŌJAI.

This dialect of Dīmā-sā is spoken by 2,750 people in the south-west of Nowgong District, between the area in which Lālūng is spoken, and North Cachar (the home of Dīmā-sā).

According to Mr. Gait,¹ Hōjai is a local name applied to the Kachāris in that part of Nowgong which was formerly under the rule of Tulārām Sēnāpati, who made himself independent of the Cachar kings of Khaspur on the death of Krishna-Chandra. His sovereignty of the country north of the Barail range was recognised by us in 1830, and he continued in enjoyment of it until his death in 1854, when it was annexed and amalgamated with the Nowgong District.

The name Hōjai is said to mean 'hill-man,' connected with the Bodo word *hāju*, a hill. The home of the tribe is mountainous. The language is clearly a dialect of Dīmā-sā. Mr. Damant, indeed, says that it is the purest form of the language, a statement which may be said to be borne out by the fact that one of the terminations used for forming the plural, *ērāo*, seems to be the original from which the standard Dīmā-sā plural termination *rao*, and the Lālūng *ru* or *rau*, have been derived.

The authorities on Hōjai have been dealt with in the introduction to Dīmā-sā.

The following imperfect account of the grammar of the dialect is based on the specimens and list of words, and depends on the correctness with which they have been recorded.

There is a regular tendency to aspirate tenues. Thus, the Dīmā-sā *tī*, die, becomes Hōjai *thēi*. So the Dīmā-sā *kē* (sign of the accusative) becomes *kha*.

The Pronoun of the third person is used as a definite article, as in the phrase—

pu jīm-kha pu-ni pishāo-hā ri, put the saddle on his back.

The plural is formed by the suffixes *puthu*, *ēra*, or *ērāo*. The standard Dīmā-sā *rao* also appears as *rāo*. *Ērāo* is evidently a fuller form of this.

The suffixes forming cases will be seen from the following declension—

Sing. Nom. *Pafā*, a father.

Acc. *Pafā-kha*, *-khu*, or *-ga*, a father.

Insts. *Pafā-jāng*, by a father.

Dat. *Pafā-ni-pānthā*, *pafā-nē*, to a father.

Abl. *Pafā-ni-fring*, from a father.

Gen. *Pafā-ni*, of a father.

Loc. *Pafā-hā*, on a father.

Plur. Nom. *Pafā-puthu*, *-ēra*, or *-ērāo*.

Acc. *Pafā-puthu-kha*, etc.

And so on.

Numerals, as usual, take generic prefixes. For human beings, both *shā* and *mā* are used. *Mā* is also used in counting and for animals generally. I have no information regarding inanimate objects.

¹ *Report on the Census of Assam*, 1891, p. 227.

The following are the principal Pronominal forms :—

I,	<i>Ang.</i>
My,	<i>Ani.</i>
We,	<i>Jung.</i>
Our,	<i>Jini, jung-ni.</i>
Thou,	<i>Nung.</i>
Thy,	<i>Nini, rung-ni</i> (or, contracted, <i>nu-ni</i>).
You,	<i>Ni-shi, nungni-shi.</i>
Your,	<i>Ni-shi-ni, nungni-shi-ni.</i>
He, that,	<i>Pu.</i>
His,	<i>Pu-ni.</i>
They,	<i>Pu shi, puni-shi.</i>
Their,	<i>Pu-shi-ni, puni-shi-ni.</i>
This,	<i>Ibu.</i>
Who?	<i>Sherē.</i>
Whose?	<i>Sherē-ni.</i>
What,	<i>Shumang, shimung.</i>

The Relative is the Assamese *jē*. The word for 'self' is *āfini* (gen. *āfini-ni*, own), which is corrupted from Assamese.

Note how the plural terminations can be added to the genitive singular, instead of to the base. The genitive termination *ni*, followed by *shi*, is probably the cause for Mr. Endle giving *nishi* as a termination of the plural in Dīmā-sā.

Pronominal prefixes occur in *nā-fā*, your father; *nu-fuang*, your younger brother. So *pa-fā* is, properly, 'his father,' and *pu-fuang*, 'his brother.' See the remarks on this point under the head of Dīmā-sā. Judging from these examples it would appear as if the vowel of the prefix was determined by that of the first syllable of the main word.

The list of words received from Nowgong gave no verbal forms. It is, however, easy to supply most of them from the specimens, and I have inserted such, in the printed list in italics. Taking the specimens as our guide we find the following system of conjugation.

The verb substantive is *dang*, am, is, are. *Dāo* is also used, as in *jau dao*, is tall. It makes a present definite, *dang-rē*, is. The past is *dang-bā*, was. The negative form is *ni-ā-khā*, am, is, are, not. In the parable there is an isolated occurrence of *nu-ni*-(for *nung-ni*)-*nang*, is thine. As in other connected dialects, the root *jā* means 'become.'

The following suffixes are used by the finite verb—

Present—*rē*, as in *mai-rē*, gets.

Present definite—*dāo*, as in *fai-dāo*, is coming.

Future—*nang*, as in *thēi-nāng*, will say.

Past { —*khā*, as in *thēi-khā*, said.

{ —*bā*, as in *naikhā-ba*, wished.

Imperative—no term., as in *ri*, give.

Infinitive (verbal noun)—*mā*, as in *jā-mā*, to become. Its genitive is used as a kind of gerund; as in *jā-mā-ni*, of being.

Infinitive (of purpose)—*gābā*, as in *thāng-gābā*, (did not wish) to go.

Conjunctive Participle—*hi*, as in *run-hi*, having divided.

Causal verbs, as usual, are formed by adding the root 'to give,' as in *ji-ri*, to give to eat; *kēng-ri*, to cause to wear.

Inceptive verbs are formed with the root *fai*, come, as in *jā-fai-khā*, began to be.

The following are examples of negative verbs:—

Shēbai-ā, (I) did not transgress.

Ri-ā, (thou) gavest not.

Ji-ri-ā-khā, did not give to eat.

Ni-ā-khā, am not.

Mujungi-ā-khā, did not wish.

Although all these forms do not readily lend themselves to analysis, it is perfectly plain that the negating syllable is *ā*.

GĀRŌ OR MĀNDĒ KUSIK.

The Gārōs call themselves 'Māndē,' which is the word in their vernacular for 'man'.

Gārō is spoken principally by the inhabitants of the Garo Hills, and also in the plains at their feet, *viz.*, the Districts of Kamrup, Goalpara, the State of Cooch Behar, the Districts of Jalpaiguri, Mymensingh, and Dacca. It is, moreover, spoken by small numbers of people in Sibsagar, Darrang, Nowgong, the Khasi and Jaintia Hills (where it is called 'Dyko'), and Sylhet.

Besides the standard dialect, and forms of speech returned simply as 'Gārō,' without any dialectic designation, the following names have been returned as those of dialects of this language. In order to complete the subject particulars are given for the standard and unspecified dialects also.

Dialect.	Where spoken.	Number of speakers.	
Standard or Āchik	Garo Hills	30,000	
	Goalpara	11,700	
	Kamrup	5,100	
(Under name of 'Māndē')	Mymensingh	8,600	
			55,400
Ābeng	Garo Hills	33,000	
	Mymensingh	5,000	
			38,000
Ātong, Āting, or Kuchu	Garo Hills	10,000	
	Mymensingh	5,000	
			15,000
Āwi	Garo Hills		20,000
Chibok	Garo Hills		1,500
Dālu	Garo Hills		500
Ruḡā	Garo Hills		500
The so-called 'Kōch' dialects	Dacca	4,500	
	Garo Hills	5,500	
	Goalpara	300	
			10,300
Unspecified	Sibsagar	430	
	Darrang	600	
	Nowgong	1,200	
	Sylhet	550	
	Khasi and Jaintia Hills	670	
	Cooch Behar	1,200	
	Jalpaiguri	4,013	
	Dacca	200	
			8,863
	GRAND TOTAL		150,063

It will be understood that most of these figures are merely rough approximations. No attempt was made at the last census to separate out the different dialects. It is to be regretted that I have not succeeded in obtaining any specimens of several of those mentioned above.

The Gārōs call their language 'Māndē Kusik,' *i.e.*, the language of the men, or 'Āchik Kusik,' *i.e.*, the language of the hill men. All the dialects bear a strong resemblance to each other, though to a foreigner, learning to converse with the natives, the differences are striking enough. The Ātong or Kuchu dialect presents the greatest

variation. Gārōs from other parts of the Garo Hills can make themselves fairly well understood wherever they go, except in the Ātong country. Ābeng is the dialect of the western half of the Garo Hills, Āchik of the centre, Āwi of the north-east, and Ātong of the Lower Someswari Valley in the south-east of the Garo Hills, and the north-east of the District of Mymensingh. Chibok and Rugā are spoken only in a few small villages at the head-waters of the Nitai River, and Dālu at the village of that name on the Bogai. *Māndē* is said to be a corruption of *mān-nī dē*, child of Mān. The Gārōs, like all the natives of the Assam Valley, call the Burmese *Mān*, and according to their tradition they came from the home of the *Mān*.

Gārō and Bārā or Plains Kachārī are by far the two most important members of the Bodo group. Between them, their speakers number more than 420,000 souls. In the introduction to the Bodo group, I have quoted Mr. Gait's account of the main features of the Bārā language, and I cannot do better than here quote the passage on page 161 of the Census Report of Assam for 1891, in which he compares it with Gārō :—

'The Gārō language is spoken by the Gārō tribe, which has its home in the Hills to which it has given its name. The very close affinity to Kachārī both in its vocabulary, and grammatical structure, is clearly seen from the vocables, forms of declension, and sentences given by Mr. Endle in the note prefixed to his Kachārī grammar. A few further points of resemblance are noted briefly below. Adjectives in Gārō, as in Kachārī, generally follow the noun they qualify, the case ending being in that case attached to the adjective and not to the noun. They undergo no change to make them agree with the gender and number of the noun. Comparison is expressed by the dative case of the noun, to which is added some word meaning 'than.' The superlative degree is formed by the use of a word signifying 'all' and the word 'than' affixed to the adjective. The numerals differ from Kachārī in being arranged on a decimal system, but, so far as the Kachārī numerals go, the words used are practically identical. There is this further similarity, that the Gārō numerals, like the Kachārī, take varying prefixes according to the class of objects to which they are applied. When human beings are referred to, *sāk* (Kachārī *sā*) is prefixed; for irrational animals the corresponding prefix is *mīng* (Kachārī *mā*), and for inanimate objects *gē* (Kachārī, *gīng* or *thai*). The conjugation of the verb is similar to Kachārī, but the particles used are different.¹ The potential mood, as in Kachārī, is expressed by words signifying ability, etc., added to the infinitive of the main verb. Except in the imperative, where *dā* precedes the verb, as in Kachārī, the negative is expressed by the addition of the word *jā* (Kachārī *ā*) after the verb, and the same particle is also used to make adjectives express a negative quality. The interrogative particle *mā* (Kachārī *nā*) is usually placed, as in Kachārī, at the end of the sentence.'

Gārō has no written character of its own. The local missionaries write it in both the Bengali and the Roman characters. The Bible has been translated into Āchik by them, in which dialect altogether about a hundred thousand copies of books have been printed including a dictionary, school books, religious works, and a monthly periodical which is now in the twentieth year of its existence.

Although Gārō possesses no aspirated consonants, we find, when it is written in the Bengali character, letters like ঋ (*kha*), ঠ (*tha*), and ড (*pha*). These aspirations merely represent the greater stress which is laid on a consonant when it is at the commencement of a syllable, just as, in English, the *p* in 'pile' is more strongly pronounced than the *p* in 'map.' This false aspiration is not shown in writing Gārō in the Roman character, these letters being represented by *ka*, *ta*, and *pa*, respectively. Gārō has only one sibilant,—a dental *s*. Its pronunciation, however, fluctuates. Some Gārōs use a sound approaching *sh* as well as *s*, but there is no uniformity in their practice, and none of them ever pronounce it quite like the *sh* in 'should,' but always through the front teeth. I have hence written only *s* throughout.

¹ There are, however, resemblances; e.g., the Gārō *engā*, signifying the present definite corresponds to the Kachārī *langman*; and *gen*, the sign of the future, to the Kachārī *gun*.

GĀRŌ SKELETON GRAMMAR.

I. PRONUNCIATION.—The alphabet is *ā, i, ī, u, e, ē, o, ō, ai; ng; k, g; ch; j; t, d, n; p, b, m; y, r, l, w, s; h*. These are sounded as in Dēvanāgarī, except that *o* has the sound of *o* in 'song.' The letter *ō* has the sound of the second *o* in 'promote.' The letter *u* has the sound of *u* in 'full.' It is never pronounced long, as in 'rule.' The letter *ng* is pronounced as in 'song.' An apostrophe in the middle or at the end of a word indicates a jerky, staccato, utterance of the preceding syllable. Regarding aspirated consonants, and the pronunciation of *s* see p. 69.

II. NOUNS.—There is no grammatical gender. Sex is indicated by special words in the case of human beings, and by adding words for 'male' and 'female' in the case of the lower animals. **Plurality** is indicated by adding a noun of multitude, usually *rāng*, all. Declension is by suffixes, which are added to the base without causing any euphonic change. When an adjective follows a noun, the suffixes are added to it, and not to the noun. Thus:—

	Sing.	Plur.	<p>Adjectives usually follow the noun they qualify. They do not change for gender. The suffixes denoting case are placed after the adjective. Thus <i>māndē nāmā</i>, a bad man; <i>māndē nāmā-nī</i>, of a bad man, and so on.</p> <p>Numerals are always used with generic nouns, thus <i>sāk</i> is used when human beings are counted, <i>gē</i> when inanimate things are counted, <i>māng</i> when animals are counted, and <i>hō</i> when trees are counted. These nouns are prefixed to the numerals. Thus <i>māndē sāk gnī</i>, two men. The prefix <i>gē</i> is also employed in simple counting, thus, <i>gē-sā</i>, <i>gē-quī</i>, <i>gē-gītām</i>, one, two, three. This is also used in Abeng, but in Atong, Kōch and Jaipaguri it becomes <i>gō</i> (<i>gō</i> or <i>gō</i>), and in Rūgā <i>gāi</i>. At twenty, these particles are added between the tens and the units.</p>
Nom.	<i>song, a village.</i>	<i>song-rāng.</i>	
Acc.	<i>song-kō.</i>	<i>song-rāng-kō.</i>	
Inst.	<i>song-chī.</i>	<i>song-rāng-chī.</i>	
Dat.	<i>song-nā.</i>	<i>song-rāng-nā.</i>	
Abi.	<i>{ song-ō-nī.</i> <i>{ song-ō-nī-kō.</i>	<i>{ song-rāng-ō-nī.</i> <i>{ song-rāng-ō-nī-kō.</i>	
Gen.	<i>song-nī.</i>	<i>song-rāng-nī.</i>	
Loc.	<i>{ song-ī.</i> <i>{ song-ō-nī.</i> <i>{ song-chī.</i> <i>{ song-chī-nā.</i>	<i>{ song-rāng-ō.</i> <i>{ song-rāng-ō-nā.</i> <i>{ song-rāng-chī.</i> <i>{ song-rāng-chī-nā.</i>	
Voc.	<i>ō song.</i>	<i>ō song-rāng.</i>	

III. PRONOUNS.—The **Personal pronouns** have distinct forms for the singular and for the plural. They are: (1) *āngā*, I; *ā-chīngā*, we (including the person addressed); *chīngā* (excluding him); (2) *nā'ā*, thou; *nā'simāng*, you; (3) *uā*, he; *uā'māng*, they. Some of these change their forms before the case suffixes. Thus, *āngā* becomes *āng*, as *āng-nī*, my; *ā-chīngā* and *chīngā* drop the final *ā*, as in *chīng-nī*, our; *nā'ā* becomes *nāng* as in *nāng-nī*, thy. The others do not change. Thus *nā'simāng-nī*, your. The **Demonstrative pronouns** are *īā*, pl. *īā-rāng*, this, and *uā*, that. Their oblique forms are *i* and *u*. *Sā* and *sāwā* are **Interrogative pronouns**, and mean 'who?' *mai* is 'what?'. There is no **Relative pronoun**, a participle or verbal noun being used instead. The **Reflexive pronoun** is *ān'thāng*, own.

IV. VERBS.—**Verbs Substantive.** These are *dong* and *gūng* which mean to 'exist' and *ong*, to be (a copula). The letter *ā* may also be used as a copula. Thus *nāmā-ā*, it is good. *nok*, a house; *nok-ī*, it is a house. The principal word is in fact treated as if it were a verbal root.

Gārō verbs do not change for number or person, both of which are indicated by the subject. There is, hence, only one form for all numbers and persons of each tense. The various ideas connoted by mood and tense are indicated by suffixes as in the following conjugation of the verb *dok*, beat.

Present. *āngā dok-ā*, I beat.

Pres. Definite. *āngā dok-eng-ā*, *āngā dok-ē dong-ā*, I am beating.

Imperfect. *āngā dok-eng-ā-hā*, *āngā dok-eng-ā-chīm*, *āngā dok-eng-ōm* (dialectic), I was beating.

Past. *āngā dok-ā-hā*, *āngā dok-jok*, *āngā dok-ā-chīm*, *āngā dok-īm* (dialectic), I beat. *Dok-ī-hā* is also used as a perfect.

Perfect. *āngā dok-ā-hā*, I have beaten.

Pluperfect. *āngā dok-ā-hā-chīm*, I beat a long time ago, I had beaten.

Future. *āngā dok-gen* and (dialectic) *āngā dok-nim*, I shall beat.

Imperative. *nā'ā doklō*, beat thou.

Subjunctive Pres. *āngā dok-nā mān-nā*, I may beat.

Past. *āngā dok-gen-chīm*, had I beaten.

Infinitive. *dok-nā*, to beat.

Participles.

Conditional. *dok-ō-dō*, if beating.

Present. *dok-ō*, beating.

Past. *dok-ō-ā*, having beaten.

Verbal nouns.

Active, *dok-gipā*, he who beats. This suffix is also used with nouns, much like the Hindōstānī *vālī*.

Passive, *dok-gimā*, he who is beaten, so *nā-gimā*, that which is built.

The **Causal Verb** is formed by adding *āt* to the root, as *āngā dok-āt-ā*, I cause to beat.

The **Passive Verb** is formed by adding *īm* to the root, as *āngā dok-īm-ā*, I am beaten.

The **Intensive Verb** is formed by adding *h* to the root, as *āngā dok-h-ā*, I have well beaten.

The **Negative Verb** is formed by adding *ī* to the root, as *āngā dok-ī-ā*, I do not beat. The future is *dok-ī-ā-wā*. The Imperative is *dok-nā-bā*.

The **Interrogative particle** *mā* is usually put at the end of the sentence, as *nā'ā u-nā k'hān-ī mā*, do you fear?

With regard to the preceding skeleton grammar, the following additional remarks, which are mainly based on information kindly supplied by the Reverend M. C. Mason, will be found of use.

The staccato pronunciation of a vowel, which is indicated by an apostrophe, is what in more Eastern Indo-Chinese languages is called a 'tone.' In them it is known as the 'abrupt tone.'

It is to be noted that Gārō words and modifications are freely built up by, or contracted from, other Gārō forms. For example take the case-endings; *ō* is the sign of the Locative, *nī* of the genitive, and *kō* of the accusative; *ō-nī*, of in, becomes 'from'; again, *ō-nī-kō* is 'from,' but always implies separation by some force, so that the action causing the separation terminates, as it were, upon an object which is indicated by *kō*. Similarly, nouns in any case can be treated as verbs, as *ā'bāō*, in a field; *ā'bāō-chim* (he) was in the field. As an example of contraction we may take *rē'bāngā*, is coming, which is formed from *rē'bāē*, coming, and *ong'ā*, is. This is plainer in Ābeng, where the form is *rē'bāongā*. In the first the initial *o* of *ong'ā* has been elided, and, in the second, the final *ē* of *rē'bāē*.

In regard to pronouns, *ā'chingā*, we (including the person addressed), is contracted from *nā'ā*, thou, and *chingā*, we. A form *nā'chingā* is still in use. In Kamrup we have *ān'chingā*. *Āngā-chim*, means 'it was I.'

The three auxiliary verbs *dong*, *ong'*, and *gnāng* (or in Kamrup *gnung*) differ slightly in meaning. *Ong'ā* is the copula, 'is.' *Gnāng* means 'there is' or 'is there?' *Dongā* is a stronger form than *gnāng*, and is probably a contraction of *donē ong'ā*, is being placed (see above for the contraction), by dropping the *onē*.

In verbs, the present definite is a contracted form, as explained above. In the past tenses the termination *āhā* is a simple indefinite past, while *chim* is a definite past and is added to other tenses, as in *dokā-chim*, *dokengā-chim*, *dokengāhā-chim*. With the future it implies a past condition contrary to reality. In Ābeng *chim* becomes *ming*, and in Rugā *minō*. *Āhā* and *jok* are often used interchangeably, especially by careless speakers, but, properly, *jok* gives more the force of the perfect. Thus, *nikāhā*, (he) saw, but *nikjok*, (he) has seen. There is, really, no form for a pluperfect ('I had beaten'). A past tense must be used, and the meaning judged from the context.

There are several future endings with various shades of meaning. Thus *rē'āng-gen*, (he) will go; *rē'āng-gen-jok* (implying a completed determination), (he) has decided to go; *rē'āng-nākā* (contracted from *rē'āng-nā-skā*), (he) wishes to go; *guī* (contracted from *gennī*, of the will) implies a certain future, as *ā'chingā sī-guī mēndē*, we are men who are destined to die.

There is a difference in meaning between the verbs *rē'ā* and *rē'āngā*. The first implies merely voluntary motion (Hindī *chal'nā*), and the second that motion is away from (Hindī, *chalā jānā*), or continued (to go along).

An almost limitless number of particles may be used to express manner, degree, or character of the action, actor, or object acted upon, by placing the particle after the verbal root. Thus *ē* (derived from *rē'ā*, go, compare the Kamrup form) in *nik-ē-jok*, for *rē'āngē nikjok*, (he) went and saw; *nik-bē-āhā*, (he) saw intensely; *nik-tok-jok*, (he) saw all, or all saw, according to the context.

Ārō, the usual word for 'and,' is of course borrowed from Bengali. The pure

Gārō idiom is to use the particle *mu*, *māng* or *ming*, meaning 'with,' according to dialect or locality. Thus, *Jōhon-mu Jākōb rē'āngē nikāhā*, John and James went and saw.

The letter *n* is used to express emphasis or definiteness, and may be used at the end of any word, or any part of a word, according to conception. Thus *uā*, that; *uān*, that one; *āngnī*, my; *āngnin*, mine; *uān-ō*, in that one; *u-n-ō-n*, at that (time) (here the *n* is added twice). If the final letter of the principal word is a consonant, a vowel is inserted, as in *pilāk-ān*, all.

ĀCHIK OR STANDARD DIALECT.

This dialect was returned from the Garo Hills District under the name of *Mā-chi*. It is the form of the Gārō language which is used by the local missionaries for literary purposes, and is fast superseding the other dialects. It is the speech illustrated in the preceding grammatical sketch. It is spoken in its purity in the centre of the Garo Hills, but also appears, with slight variations in Goalpara, Kamrup, and Mymensingh. In the last-named district it is called *Māndē*, which is the Gārō word for 'man.'

The number of its speakers is as follows:—

Garo Hills	30,000
Goalpara	11,700
Kamrup	5,100
Mymensingh	8,600
TOTAL												.	55,400

These figures are only approximate estimates, as no attempt has been made in the census of 1891 to classify the Gārō dialects.

The following version of the Parable of the Prodigal Son in the Āchik dialect is taken from the existing translation of the gospel of St. Luke by the Reverend M. C. Mason of Tura. I seize this opportunity of expressing my obligations to that gentleman for much valuable information regarding the Gārō language generally, and also for the kindness with which he has prepared the list of words in the Rugā dialect.

The version is first given in the Bengali character, to show how Gārō is written in that alphabet, and subsequently in the usual method in the Roman character with interlinear translation.

 gim-ā-hā-chim, indibā mām'pil-ā-hā.
had-been-lost, but has-been-found-again.'

The Gārō spoken in Kamrup differs slightly from the standard, though not sufficiently to constitute an independent dialect.

The following peculiarities may be noted:—

The suffix of the ablative is *nīkō*, not *ōnīkō*. Thus, *pālgipānīkō*, from a shop-keeper.

The first person plural, including the person addressed, is *ān'chingā*, not *ā'chingā*.

The usual termination of the past tense is *ōm*. The termination *jok* is also sometimes heard, but it is an importation from the Garo Hills.

The termination of the future is *nim*, not *gen*. *Nim* is also used in the north-east of the Garo Hills.

The negative imperative is not *dok-nā-bē*, but *dok-jā-bē*, which in other dialects has an intensive force, 'do not strike at all.'

The initial consonant of the verbs *rē'ā* and *rē'āngā*, to go, is dropped, so that we have *ē'ā* and *ē'āngā*. These words are often sounded *hē'ā* and *hē'āngā*, the aspirate being said to be due to the effort to emphasise the staccato sound of the *ē'*. Or it may be due to Bārā influence: compare the list of words on page 4.

ĀBENG.

The Ābeng dialect of Gārō is spoken in the western half of the Garo Hills, and in the neighbouring part of Mymensingh, by about 38,000 people.

The dialect differs but slightly from the standard. In the pronouns, the Kachārī form *bī* is used to mean 'he' or 'she.' It is applied only to human beings. We notice the use of pronominal prefixes, in forms like *āng-pā* or *ā-pā*, for *āng-nī pā*, my father.

In verbs, the future termination is *nāwā*, which corresponds to the negative future termination *jāwā*, found in Āchik. In the past tense *mīng* is substituted for *chīm*.

(a)-bad man like doing his-own property caused-to-end. His whole
 gām bonōā, uā songō nāmēn ākāl hongjok, uōn biā
property when-ended, that country-in excessive scarcity was, then he
 duk mānbējok. Uōn biā rē'āngē uā songnī āksā māndēō
distress got-exceedingly. Then he going that country's one man-in
 dongtimē chā'jok; biā bikō wākjinmā nīrikāl ābāchā wātētjok.
obiding ate; he him swine-herd (-of) follow (the)-field-to sent.
 Etnīkōā biā wāk-nī chā'ānī chā'chēkō chā'nā hāmōbā,
Then he swine's eating-of husks eat-to sought-although-(he),
 dimdāk-bā bīnā ronjājok. Jāmān kītikō biā gīsikō chānehīe
all him-to gave-not. Afterwards (the)-end-in he mind-in thinking
 āgānjok, 'āngnī āpānī bāsīkbā dāngā rā'gipā nokoldrāng bāngēn
said, 'my father's how-many labour take-who servants much
 mikō chā'nā mānōngā, āngāsā iānō okriē siongā. Āngā chākātē āpāōnā
rice eat-to getting-are, I-only here hungering dying-am. I arising father-to
 rē'āngpīlē āgānnāwā, "ō āpā, silgānī mung nāmnikgījākō,
going-back say-will, "O father, heaven's both good-seeing-not (or displeasure),
 nāngnī mung nāmnikgījākō dākāhā, nāngnī dēpāntē mingō dāō
your and good-seeing-not have-done, your son calling now
 āngā nītōpājā; dāngā rā'gipā nokol āksāgitā āngkō rārikbō." ' Unī
I fit-not-am; labour take-who servant one-like me keep." ' This-of
 jāmānō biā chākātē āpānī mik-kāngōnā rē'āngjok. Uōn chēlē
afterwards he arising father's face-unto went. Then far-away

dongē bīnī āpā bīkō niksōē kāsāchākbējok, mung kātē,
being his father him foreseeing had-compassion-much, and running,
 rē'angē, bīkō gipākē, kudimāhā. Uōn dēgipā bīkō āgānjok, 'ō
going, him embracing, kissed. Then (the)-son him said, 'O
 āpā, silgānī mung nāmnikgijākō nāngnī mung nāmnikgijākō dākāhā,
father, heaven's both good-seeing-not your and good-seeing-not done-have,
 nāngnī dēgipā mingē āngā dāo nītōpājā.' Indibā bīnī pāgipā
your child calling I now fit-not-am.' But his father
 nokoldrāngkō āgānjok, 'tengrē bā'rā dimdāknā bātē nāmākō rābāē
(the)-servant told, 'quickly cloth all-than excelling good bringing
 bīkō gānētbō; mung bīnī jāksīō jāksitem, mung bīnī jā'chokō jākop
him clothe; and his finger-on ring, and his foot-on sandal
 ronbō. Mung mā'su bisā milbēākō rābāē denbō, nāchingā chā'ē
give. And kine young fat-very bringing kill, we eating
 ān'sengnāwā; mainā āngnī iā dēgipā siōbā, tāngpilāhā; mung
happy-will-be; for my this child dead-although, lives-back; and
 gimāōbā, mānpilāhā.' Uōn bisong ān'sengāhā.
lost-although, got-back.' Then they happy-were.

Unī jāmānō bīnī dēpāntē dālbātḡipā ābāo dongāming,
This-of (the)-after-in his son (the)-largest (the)-field-in was,
 mung biā rē'bāē nok sēpāngōnā sokbāwā dokākō ārō
and he coming (the)-house near-unto arriving (the)-drumming and
 ān'sengākō knāē nokoldrāng-ōni āksākō ringgāmē singāhā, 'māwā hongāhā ?'
dancing hearing servants-from one calling inquired, 'what is (it) ?'
 Biā bīkō āgānjok, 'nāngnī jonggipā rē'bājok, ārō nāngnī pāgipā
He him told, 'your younger-brother come-has, and your father
 bīkō hān ān'sengē mānpilānā mā'su bisā milbēākō denāhā.
him body well getting-back-for (the)-kine young fat-very killed-has.'
 Uōn biā kachāiē nokningāchā rē'āngnā gōngjājok. Uōn bīnī āpā
Then he angry-being house-within-to go-to wished-not. Then his father
 bārāngaōnā rē'bāē bīkō malmokjok. Indibā biā pāgipākō āgānjok,
(the)-outside-to coming him besought. But he father-to said,
 'nībō, bāsik bilsinā dipāt āngā nāngnī nokol gitā dongongā,
'behold, how-many year-to until I your servant like am,
 r'āngsābā nāngnī āgānākō gālkujā, indibā āngā bādākē
once-even your saying rejected-not-yet, but I in-order-that
 bājuskādrāngming tārimē chrokmēsaē chā'nā mānnāwā, indākē
companion-fellows-with along dancing-feasting eat-to get-will, thus
 rāngsābā dobok bisā māngsākō āngnā ronkujā; indibā nāngnī jē
once-even goat young one me-to given-yet-not; but your which
 dēpāntē mēchik dāridrāngming tarimē nāngnī gāmko chā'ē bōnetāshā, bīnī
son woman lewd-ones-with along your property eating ended-has, his

re'bāmidingō bīna bisā milbēākō denāhā.' Uōn pāgipā āgānjok,
coming-time-in him-for (the)-young fat-very killed. Then (the)-father said,

'angdērāchā, nāā pāngnān āngming tārimē dongā, mung āngnī dimdāk
my-child-darling, you always me-with along remain, and my all
 gām nāngnī. Indibā nāchingā ānsengē chrokmēsānā nāngā, mānā
property (is)-yours. But we happy-being dance-feast-to ought, for
 nāngnī uā jonggipā siōbā, tāngchāpilāhā; mung
your that younger-brother dead-although, come-to-life-back-has; and
 gimāōbā, mānpilāhā.'
lost-although, got-back-has.'

ĀTONG, KUCHU, OR ĀTING.

This dialect is spoken by some ten thousand people in the lower Someswari Valley in the south-east of the Garo Hills, where it is known as Ātong or Kuchu, and by some five thousand in the neighbouring portion of the district of Mymensingh, where it is said to be called Āting. It presents some points of resemblance to that current in Cooch Behar and Jalpaiguri, but, on the whole, is much more near to the Standard. The following are the principal points of difference between it and the latter.

Instead of the termination *gipā*, which we meet in the standard dialect, and which is equivalent to the Hindī *wālā*, we find *gābā*. This is of very frequent occurrence, and is often the equivalent of the English definite article. Thus, *wā'-gābā*, the father.

The termination of the accusative is *ō*; that of the genitive is *mī*; that of the locative is *chī*; and that of the ablative, *mīō*, or *mingāō*. The sign of the plural is *drāng* or *rāng*. In the case of pronouns the plural sign is *tīm*. In Āo Nāgā the plural sign is *tam* and in Mikir *tum*.

Āngā is 'I.' The other forms of this pronoun are *ning*, *ningān*, *nā'nāng*, we; *ning-mī*, our; *āngā-ō*, me.

Nāng' or *nāng'ān*, thou; *nāng'-mī*, thy; *nā'-tīm*, you; *nāng'-mī*, your.

Ūē, *nān*, or *uēn*, he; *u-mī*, or *u-ming*, his; *uā-ō*, him; *u-tīm*, they; *u-tīmī*, their.

'Who?' is *chāng*, and 'whose?' *chāng-mī*. 'What?' is *ātong*.

The verb substantive is *dong'ā*, *guāng* or *gānāng*, is; *chīm*, was. The termination of the past is *ok* as *tok-ok*, struck. Examples of a negative past are *hun'-nān-chāk*, did not give; *gong'-zān-chāk*, was not willing. The Past Participle ends in *ai*, as in *dong'ai*, having been, or in *ai-mu* (*mu* meaning 'with'), as in *rū'aimu*, having taken.

In this dialect *d* becomes *t*, as in *tok*, to beat, and *tāk*, to do.

 mān'pīnok.'
got-again.'

Gārō is also spoken in the State of Cooch Behar, and in the District of Jalpaiguri. In the former, the number of speakers is estimated at 1,200, and in the latter at 4,013. Those of Jalpaiguri are immigrants who have scattered over the district. In Cooch Behar they are settled principally in the Eastern and North-Eastern portions of the State, comprised within the Tufānganj Subdivision. The language of these people is much mixed with Bengali. It will be sufficient to give a version of the Parable of the Prodigal Son, and another specimen received from Cooch Behar, together with a list of words from Jalpaiguri.

The Gārō language of these two districts differs widely from that of Kamrup and the Garo Hills. Putting the numerous importations of Bengali to one side the vocabulary has many points of variance, and the differences of grammar are so great as almost to entitle this form of speech to be called a separate language. It is, however, rather a corrupt jargon than a true dialect, and its corruptions are apparently due for the most part to the influence of the other surrounding Non-Aryan languages. It is not worth while making a full list of all its peculiarities, nor, indeed, could such a list be made in any satisfactory way from the specimens and the list of words which follow. It will be sufficient here to give the following main points of divergence from the standard type and to point out that in many respects it agrees with the Ātong dialect.

NOUNS.—The standard terminations of the genitive and dative, *ni* and *nā*, are freely used. We have also the following. The termination *uō* is commonly used in Jalpaiguri for the dative and the accusative. The termination of the ablative is *ni-pri* in the same district. There seems to be a locative in *ing*, in words like *chākrā-ing*, on the hand, and *debr-ing*, to the field. Another form of the locative takes the prefix *hā*, as in *hā-song*, in a country.

The plural is formed by adding *dōā* or *dō*.

PRONOUNS.—*First person.*—We have *āng*, I; *āng-gō* and *ā-nā*, me, to me; *ē-ni*, *i-ni*, of me, my; *ning*, *ni*, we; *ningi*, *ning*, of us, our.

Second person.—We have *nāng*, thou; *nung*, thou; *ni-ni*, thy; *nōnok*, you; *nōnok-ni*, *nōnōngi*, *nōnē*, your. The plural is commonly used for the singular.

Third person.—*u*, *ūon*, he; *uō*, him; *ū-nā*, *ū-krau*, to him; *ū-nōng-mon*, for him; *Onok*, *anōk*, they. In the second specimen from Cooch Behar, *morju* is translated 'she' and 'her.'

The Bengali relative pronoun *jē* is of very frequent occurrence. 'Who?' is *chāng* with a genitive *chi-ni*. 'What?' is *āto* or *ētūng*.

VERBS.—*Dōā* or *tōā* is 'is,' and *tōā* or *tōy-tōā*, 'was.' There are, however, several other forms. Thus, *sai-au*, *sai-tōā*, and *sai-ā*, was. The negative verb substantive is *tōng-chā* or *dōng-chā*, is not.

The *Present* tense seems to show signs of inflexion. We have—

Sing.	Plur.
1. <i>tōng-ā</i> , I strike.	<i>tōng-ā</i> .
2. <i>tōk</i> .	<i>tōk</i> .
3. <i>tōk</i> .	<i>tōk</i> .

The following is an example of the *Imperfect*,—*mini-tōā*, (They) were laughing. Compare *sai-tōā* and *tōy-tōā*, above.

Examples of the *Future* are *bōr-nā*, I will say, and *min-nā*, we will laugh. In the list of words from Jalpaiguri the termination is spelt *nyā*.

The usual termination of the *Past* tense is *au*. Of this there are numerous examples, of which it will be sufficient to cite *lāo-au*, he gave; *nēkh-au*, he saw. In *bōr-tau*, he said, a *t* seems to have been prefixed to the termination. Another common termination is *tānā*, as in *lāo-tānā*, he gave; *fai-tānā*, he came, and others. From Jalpaiguri we have *tōk-ai-tenā*, he struck, and *lēi-tānā*, he went. Examples of a negative past are *lāō-chau*, gave not, and *dāng-chau*, entered not.

The *Past Participle* ends in *ai-mon*, as in *gās-ai-mon*, having done.

KŌCH DIALECTS.

The name 'Kōch' looms large in the history of Northern Bengal and Assam. A Kōch dynasty, whose original home seems to have been Cooch, *i.e.*, Kōch, Behar, and which first became prominent in the early part of the sixteenth century was master of nearly the whole of the lower Assam Valley and of Northern Bengal as far west as the present District of Purnea. There are various traditions as to the origin of this line of kings, and, according to Mr. Gait, it is most probable that it has descended from a Mech ancestor, by two Kōch mothers.¹

The people called Kōch spread all over Northern Bengal and Assam, and have now everywhere become completely Hinduised. In Bengal they have intermingled with the surrounding aboriginal tribes and have acquired a cast of feature which is partly Dravidian, while in Assam they have preserved their original Mongolian type.² In both tracts they have abandoned their own language and speak the Bengali or Assamese of their Aryan neighbours. Hodgson has been able to give a vocabulary of the words used by them, which is nearly all Bengali, and regarding their grammar says that it is wholly a corrupt form of that language. This is equally true at the present day. Specimens of the corrupt Bengali spoken by Kōches and Rajbangs'is³ will be found on pages 135 and 163 of the Bengali section of this survey.

I think that there can be little doubt that the original Kōches were the same as the Bodos. 'Kōch,' 'Mech,' and 'Bāṛā' or 'Bodo,' all connoted the same tribe, or, at most, different septs of the same tribe. This is well shown by the traditional origin of the Kōch Kings from a Mech father and Kōch mothers. In Assam the name 'Kōch' is no longer that of a tribe, but rather that of a Hindū caste, into which all converts from the different tribes,—Kachāri, Gārō, Lālūng, Mikir, etc.,—are admitted on conversion. The case is very much the same in Bengal.

The name 'Kōch,' in fact, everywhere connotes a Hinduised Bodo who has abandoned his ancestral religion for Hinduism and the ancestral Bodo language for Bengali or Assamese.

There is, however, in Dacca, the Garo Hills, and Goalpara a small body of people who are known as Kōch or Pāni Kōch, and who still speak a language belonging to the Bodo group, and are either animistic or nominal Hindūs. Six sections of them have been recorded in the Garo Hills, *viz.*, Harigayā, Satpariyā, Dasgayā or Banai, Chaprā, Wanāng, and Tintekiyā. The last are also found at the base of the Hills in the District of Goalpara. The first five are said to be named after the places where they formerly resided, and the Tintekiyās from the dress of their women, who wear one cloth round the waist, another over the body, and a third on the head. These six sections used to be considered to be the only pure Kōches in existence, but it is now believed to be much more likely that they are not Kōches at all, but are Gārōs who have never got beyond an imperfect stage of conversion to Hinduism, involving merely the abstinence from beef. It has been conjectured with some probability that they assumed their present

¹ *The Kōch Kings of Kāmarūpa.* J. A. S. B. lxii. Pt. I, 1893, p. 204.

² *Report on the Census of Assam for 1891.* p. 212.

³ Rajbangs'is are the Hinduised Kōches of Rangpur and Goalpara. The name means 'of royal descent', and evidently refers to the fact that the people who bear the name are of the same tribe as the Rājās of Cooch Behar and Mergalāi. The word *Kōch* is said to be derived from the Sanskrit *Āraṇṇika*, which means the Eastern Himalayas.

name of Pāni Kōch, which means 'small,' or 'inferior Kōch,' by way of propitiating the thoroughly Hinduised Kōch power which was predominant on their borders. Their language, so far as I can judge from the specimens which I have seen, is a mongrel of Gārō and Bengali or Assamese.

In the Garo Hills it is stated that each section of the so-called Kōches speaks a different dialect, but no specimens of any of these forms of speech could be obtained. I am hence obliged to content myself with the specimen received from Dacca which illustrates the dialect of the extreme south, and with that received from Goalpara received from the extreme north. The latter is called Tintekiyā. The only other specimen of the language that is available is the Vocabulary of the 'Konch' dialect of the Garo Hills drawn up by Lieutenant Williamson, and referred to below in the list of authorities. This I reprint in the list of words for purposes of comparison. The dialect differs from both of those of which I give specimens, but is evidently based on Gārō.

This so-called Kōch dialect is spoken by the following number of people :—

BENGAL—

Dacca 4,500

Total for Bengal 4,500

ASSAM—

Garo Hills—

Harigayā 1,100
 Satpariyā 1,100
 Dasgayā or Banai 1,100
 Wanāng 1,100
 Tintekiyā 1,100

Total 5,500

Goalpara—

Tintekiyā 300

Total for Assam 5,800

GRAND TOTAL 10,300

It is hardly necessary to point out that, in the case of the Garo Hills, the figures are only rough estimates.

The following are the authorities on the Kōch language, *viz.*, both those which deal with the language spoken at the present day by Kōches, and also this corrupt Gārō or Mēch spoken by the Pāni Kōches.

AUTHORITIES—

HODGSON, B. H.,—*Essay on the Kócch, Bódó, and Dhimál Tribes.* Calcutta, 1847. Reprinted in Vol. I of *Miscellaneous Essays relating to Indian Subjects*, pp. 1—160. London, 1880. Contains a Kócch vocabulary. Hodgson states that the Kócch grammar is merely corrupt Bengali.

HUNTER, W. W.,—*A Comparative Dictionary of the Languages of India and High Asia.* London, 1868. The Kōch words are taken from Hodgson.

WILLIAMSON, W. J.,—*A Vocabulary of the Garo and Konch Dialects.* *Journal of the Asiatic Society of Bengal*, xxxviii (1869). Pt. I., pp. 14 and ff. This vocabulary is nearly identical, so far as the English goes, with the Standard List of Words and Sentences used in this Survey.

DALTON, E. T.,—*Descriptive Ethnology of Bengal.* Calcutta, 1872. Pāni-Kocch or Kocch Vocabulary on pp. 93 and ff.

LEAMES, J.,—*On some Kōch Words in Mr. Damant's Article on the Palis of Dinajpur.* *Indian Antiquary*, I (1872), p. 371.

- CAMPBELL, Sir G.,—*Specimens of the Languages of India, including those of the Aboriginal Tribes of Bengal, the Central Provinces, and Eastern Frontier*. Calcutta, 1874. Vocabulary on p. 150.
- DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers*. *Journal of the Royal Asiatic Society*, Vol. XII (1880), pp. 235 and 254. Vocabulary
- STACK, E.,—*Report on the Census of Assam for 1881*. Note on the tribe by E. S. on pp. 73 and ff. Calcutta, 1883.
- GAIT, E. A.,—*Report on the Census for Assam, 1891*. Shillong, 1892. Para. 167, p. 161, account of Kōch with vocabulary. Account of the Kōch Tribes on p. 212.

The following is a brief account of the main peculiarities of this Kōch dialect.

Throughout, pronounce the vowel *o* as in 'song':—

The suffix of the plural is *tāng*.

The case suffixes are:—

Acc -Dat. *ko*.

Instr. *ri*.

Dat. *nē kond-āo*.

Abl. *nē hong-tē, nē tuki, dong-ten*.

Gen. *nē*.

Loc. *āo*.

The following are the principal pronominal forms:—

I, <i>Āngā</i> .	We, <i>Chingā</i> .
Me, <i>Āng-nā</i> .	Us, <i>Ching-nā</i> .
My, <i>Āng-nē</i> .	Our, <i>Ching-nē</i> .
Thou, <i>Nā-ā</i> .	You, <i>Nā-pārā</i> .
Thee, <i>Nā-nā</i> .	You, <i>Nā-pā-nā</i> .
Thy, <i>Nā-nē</i> .	Your, <i>Nā-pā-nē</i> .
He, that, <i>Uā</i> .	They, <i>U-tāng</i> .
Him, <i>U-nā</i> .	Them, <i>U-tāng-nā</i> .
His, <i>U-nē</i> .	Their, <i>U-tāng-nē</i> .
This, <i>Iā</i> .	
Who? <i>Sārā</i> .	Whose? <i>Sā-nē</i>
	What? <i>Mā-dā</i> .

The following are verbal suffixes:—

Present, *-ā*.

Present Definite, *-nā hai-ā*.

Imperfect, *-nā-hā-ning*.

Past, *-ning, -jok, -ai-ā*.

Future, *-gān*.

Conjunctive Participle, *-ai*.

The final *ng* of *ning*, is sometimes dropped, as in *dong-ni*, were. The negative particle is *jā*, as in *hong-jā*, am not; *hon-u-jā*, did not give. The verb substantive is usually *dong*, but sometimes *hong* is used.

The causal verb is formed by suffixing the root *hon*, give, to the conjunctive participle, as in *fātai-hon*, cause to wear, put on.

Then they merriment-making-for began.

TINTEKIYĀ OF GOALPARA.

The Tintekiyā Kōches of Goalpara are, as above stated, settled at the foot of the Garo Hills. Their language is a corrupt form of Gārō, largely mixed with Bengali words. I am able to give a version of the Parable in this dialect, transcribed into the Roman character, from a copy received in the Bengali character from that district. No interlinear translation was given, and I do not venture to supply one.

The Gārō portion of the specimen agrees in many respects with Ātong, and with the form of Gārō spoken in Jalpaiguri and Cooch Behar. The following are the chief features of its grammar :—

The suffix of the plural is *rong*. That of the accusative-dative is *nā*, and of the genitive is *ni*. *Bārā* corresponds to the Gārō *gipā*. The pronouns are :—

āng, I; plural (including the person addressed) *nīng*; *ā-nā*, to me; *ā-ni*, of me; *āng-mung*, with me; *nāng*, thou; *nāni*, thy; *n*, he.

The verb substantive is *tōā* or *tong*, is; the past is *tōā* (compare Cooch Behār) or *tong-tō*. The suffix of the present is *trā*; that of the past, *jok* or *tō*, and of the future *-inā* (compare Ātong *nī*, Cooch Behar *ñyū*).

Examples of negative verbs are *lhāo-chā-jok*, or *lhāo-chā-tō*, did not give; *lī-chā-jok*, did not go; *būkoi-chā-tō*, did not refuse.

RĀBHĀ.

This is a language which is fast dying out, and regarding which it has been very difficult to obtain any information. It certainly belongs to the Bodo group. Two dialects of it have been reported, *viz.* :—

Name of Dialect.	Where spoken.	Number of speakers.
Rangdāniā	Goalpara	29,000
	Kamrup	370
	Garō Hills	1,000
		<hr/> 30,370
Maitariā or Matrai	Garō Hills	1,000
		<hr/> TOTAL . 31,370

The above figures are estimates. Goalpara and Kamrup do not report the name of the dialect, but the specimen received from the former district is Rangdāniā, and I have hence provisionally entered the Rābhā of both districts under that dialect.

Regarding the Rābhās and their language, Mr. Gait speaks as follows in his Census Report :—

“The Rābhās, who are also known as Totlās and Dātiyāl Kachārīs, are found chiefly in Goalpara, Kamrup, Darrang, and the Garō Hills. There seems to be a good deal of uncertainty as to who these people really are. In Lower Assam it is asserted that they are an offshoot of the Gārōs, while in Kamrup and Darrang, it is thought that they are Kachārīs on the road to Hinduism. That they belong to the great Bodo family is certain; but it is not equally clear that the Rābhās are more closely allied to any one tribe of that group than to another. They have their own language (which is fast dying out), and it is not necessary for a Kachārī or Gārō to become a Rābhā on his way to Hinduism. On the whole, therefore, although some Kachārīs and Gārōs may have become Rābhās just as others have become Kōches, it seems probable that the Rābhās are in reality a distinct tribe.

“In the Garō Hills there are said to be five sections of Rābhās, *viz.*, Rangdāniā, Pāti, Maitariā, Daburī, and Kachārī. . . . These Rābhās of the Garō Hills are said to differ very slightly from the Kōches of the same district.

“In Kamrup and Darrang, the above-mentioned subdivisions tend to disappear, the Rangdāniā and Pāti sections alone being reported.

“The Rābhās consider themselves superior to the Kachārīs, and have, as a rule, abandoned their tribal dialect in favour of Assamese.”

According to Mr. Damant the Pāti Rābhā have become to a great extent Hinduised, and have abandoned their own language for Assamese; the remainder still preserve their own customs and language to a greater or less extent. He considered the Maitariā Rābhā to be most probably the purest specimens of the race; they bear a close resemblance both to the Gārō and Pāni Kōch, both in their dialect and in their manners and customs. They are a scattered and broken race, having few, if any, villages of their own, but living in small hamlets along with the Mech and Kōch.

GAIT, E. A.,—*Report on the Census of Assam for 1891*, pp. 162 and 232. Shillong, 1892.

I am indebted to the Reverend A. F. Stephen for the following version of the Parable of the Prodigal Son in the Rangdāniā dialect. It has evidently been most carefully transliterated from a copy in the Bengali character, and the rules of pronunciation are those for pronouncing that language. Thus, every *a* should be pronounced as

the *o* in 'hot'. The only exception is the diphthong *ai*, which should be pronounced, as in Hindi, like the word 'I.' It will be observed that this system of writing differs slightly from that adopted for the other languages of the Bodo group, in which I have represented the sound of *o* in 'hot' by *o*. The pronunciation of the letter *s* is probably like *sh* as in Bengali. In addition to this specimen, I have also received an incomplete list of words from the Deputy Commissioner of Goalpara. This I do not publish, but it is utilised below.

The following sketch of the main points of Rangdāniā is based on all the materials available. It will be observed that in many cases it shows points of resemblance with the Ātong dialect of Gārō, with the Gārō of Cooch Behar and Jalpaiguri, and with the Tintekiyā Kōch of Goalpara.

NOUNS.—The plural suffix is *tāng*, as in *bāk-tāng*, swine; *lākar-tāng*, servants. In the pronouns *rang* is used, and this also appears in *sudārī-rang*, harlots.

The suffix of the accusative-dative is *ō*, as in *ṭākā-ō*, money; *bābrā-ō*, to the father. The suffix *nā* is also common for these cases, as in *tūskhu-nā*, to the hand.

The suffix of the genitive is *ni*, as in *kai-ni*, of a man. After *ng* the *n* of the suffix is dropped, as in *rāngkārāng-i*, of heaven; *lākar-tāng-i*, of servants.

The suffix of the locative is *i*, as in *mājār-i*, among; *hūdām-i*, in a place; *sang-i*, in a village.

An ablative is formed by adding *pārā* to the genitive, as in *jānbai-ni-pārā*, from a distance.

These suffixes are capable of combination. Common is *i-nā*, in to, hence, towards, as in *sang-i-nā*, towards a village, hence, as a dative of motion, to a village. Similarly, we have *sang-i-ni*, of in a village, *i.e.*, an inhabitant of a village.

The suffix *brā* corresponds to the Gārō *gipā*, as in *bā-brā*, the father, equivalent to the Gārō *pā-gipā*.

ADJECTIVES.—Gender is denoted by the words *mābā*, male, and *māju*, female, when there are no special words like *bābrā*, father, *āyā*, mother; *dādā*, elder brother, *bibi*, elder sister; *kai*, man, *mistāng*, woman; *sābrā-meusā*, son, *sābrā-misā*, daughter.

The numerals are *sā* or *sān*, one; *mīng* or *mi*, two; *thām*, three. The others are borrowed from Bengali. As in other Bodo languages, numerals take generic prefixes. Thus :—

For human beings, *ṣāk-sā* or *sāk-sān*, one; *kā-mīng* or *kā-mi*, two; *ān-thām*, three.

For irrational animals, *mung-sān*, one; *manīng*, two; *mang-thām*, three.

For clothes, *khō-sā*, one; *khunīng*, two; *khun-thām*, three.

For coins, *gō-sān*, one.

It will be observed that these prefixes are liable to changes according to the numeral to which they are prefixed.

PRONOUNS.—The following forms of the personal pronouns have been noted :—

Āng, I; *āng-ō*, me; *āng-i*, my; *āng-i-nā-ke*, for me; *chīng*, we.

Nāng, thou; *nāng-ni*, or *nāng-i*, thy; *nā-rang*, you.

Ō, he; *ō-ni*, of him; *ō-nā*, him; *ō-rang*, they; *ō-rang-i*, their.

The demonstrative pronouns are *i*, this, and *ō*, that. The genitive of *i* is *i-ni*, of this.

For the relative, the Bengali *ji* is used.

Chāng, who? *āto*, what? *ānā*, why?

Nāng-i ātā-mu, what is your name?

Nāng-i chābā-ni chāng-i sābrā ribi-tā, whose boy walks behind you?

VERBS.—*Toā*, is, are; *to-ja*, was, were; *chhāng-ja*, became; *tong-ja*, remained.

The following are examples of the various tenses:—

Present,—*mān-ētā*, are getting; *khār-ētā*, are doing; *si-tā*, am dying.

Past,—*kāni-ja*, said; *ron-ja*, divided; *reng-ja*, went; and many others.

Future,—*mān-noyā*, will get; *kāni-noyā*, will say; *lāgi-noyā*, will be necessary.

Imperative.—This tense takes no termination. We have *rā-khu* (in which *khu* is not a tense sign), give, and *rāsām*, keep.

Past Participle,—*khār-dang-be*, when it was done; *ribi-dang-be*, when he came.

Conjunctive Participle,—*rubung-e*, gathering; *khār-e*, doing, and many others.

Infinitive,—*chārai-nā*, to herd; *pung-nā*, to fill; *reng-nā*, to go. All these are infinitives of purpose.

Verbal Noun,—*tām-e*, beating; *suk-e*, playing; *fūsā-e*, dancing.

NEGATIVE.—The negative particle is *chhā*, as in *nem-chhā*, not good. bad; *rā-khu-chhā*, gave not; *nung-chhā*, wished not; *khār-ku-chhā*, have not done.

I am indebted to Mr. J. D. Anderson for the following note on the specimen:—

The specimen of Rābhā supplied by the Reverend A. F. Stephen furnishes an interesting link between Gārō and Bārā. Even one specimen suffices to show that, like those two languages, Rābhā is a tongue once agglutinative which has become inflexional, under the influence of surrounding Aryan languages. The specimen, being a translation from Assamese, has few cases of agglutination, but there are some. Thus *khār-dang*, finish doing, is the equivalent of the Bārā *khām-zap*; *rā-khu*, go and give, corresponds to the Bārā *hū-kūi*. Of the verbal roots in the specimen more than half can be identified with the corresponding Bārā roots, as the following list will show:—

Rābhā.		Bārā.
<i>to, tong.</i>	be	<i>dang.</i>
<i>mān.</i>	(as in Gārō), get	<i>man.</i>
<i>rā.</i>	give	<i>hū.</i> (The Bārā <i>h</i> frequently becomes <i>r</i> in the cognate tongues.)
<i>ron.</i>	divide	<i>rān.</i>
<i>chā.</i>	go	<i>zā.</i>
<i>reng.</i>	go	<i>thāng.</i>
<i>khār.</i>	do	<i>khām.</i> (In Rābhā the word for 'work' seems to be <i>khām.</i>)
<i>pung.</i>	say	<i>būng.</i>
<i>nung.</i>	wish, think	<i>nung.</i>
<i>sā.</i>	eat	<i>zā.</i>
<i>sī.</i>	die	<i>thā.</i> (This phonetic change is common throughout the group.)
<i>ruk.</i>	see	<i>nu.</i>
<i>rim.</i>	seize	<i>hom.</i> (<i>h</i> becomes <i>r</i> as in <i>hū</i> above.)
<i>khutām.</i>	kiss	<i>khudum.</i>
<i>fūn-ī.</i>	return	<i>jūn.</i>
<i>kheng.</i>	breathe, live	<i>thāng.</i>
<i>mī.</i>	lose	<i>gāmī.</i>
<i>tīm.</i>	drum	<i>dīm.</i>
<i>nā-thīm.</i>	hear	<i>khutām-song.</i>
<i>rā-bā.</i>	bring	<i>lā-bā.</i>

Some few roots are borrowed from Assamese, as *charai*, feed; *guni*, think; *singechi*, ask; *sīmajī*, entreat. *Rī-bī*, come, is evidently an agglutinate, and the *rī* is no doubt the Gārō *jī*, which represents the Bārā *jai*. So the *thāt* in *kok-thāt*, kill, is found in Bārā. The *jai* in *jai-lung*, run, is probably the Gārō *khai* which corresponds to the Bārā *khāt*. *F^yose*, send, seems to be derived from *jī* or *jai*, come, and the *ose* resembles the Lālūng *os*, give or cause. So *f^yose* may be 'make to come.' *Chāng*, become, is probably an intensitive form of *chā* cited above. This leaves nine roots which, on the information available, cannot be identified with Bārā roots. These are *kāa*, say; *rubung*, gather; *depre*, squander; *māng-sā*, arise; *bobaī*, call; *rā-sām*, keep; *nīsī*, love; *fran*, call; and *dōgō-bī*, go out.

The system of conjugation resembles both Bārā and Gārō. Thus the imperative, as in Bārā, is the bare uninflected root. The infinitive ends in *nā* as in Gārō, and resembles the Bārā *nā*. But so far as can be judged from one specimen, the system of conjugation is less specialised than Gārō and corresponds very closely to Bārā and Tipurā. Thus there is a conjunctive participle in *e* which exactly performs the work of the similar Bārā participle in *ai*, and is even used in a reduplicated form to express continuance of action, thus *rībī-e rībī-ō* = the Bārā *fai-ai fai-ai*, meaning 'continuing to come.' The past participle in *be* is equivalent to the similar Bārā participle in *bā*. On the other hand, the negative-verb in *jā* is the same as the Gārō one. The system of declension of nouns is very similar in Rābhā and Bārā; but the former borrows an ablative in *pānā* from the Assamese পরা।

It should be mentioned that Rābhā appears to be a Hindū name for the tribe and that many men calling themselves, (or called by their Hindū neighbours,) Rābhā, speak pure Kachāri. At one time Rābhās were the fighting clan of the Bārā family, and many members of it joined the three Assam regiments before they took to recruiting Gurkhās.

[No. 24.]

TIBETO-BURMAN FAMILY. BĀRĀ OR BODO GROUP.

RĀBHĀ

RANDĀNIĀ DIALECT.

(DISTRICT GOALPARA.)

(The Revd. A. F. Stephen, 1900.)

Sāk-sā kai-ni kāmī sābrā-meusā to-ja. O-rang-i mājār-i
Person-one man-of two child-son were. Them-of among
 fajangbrā ō-ni bābrā-ō kāni-ja, 'bābā, ji mālmātā āng mām-noyā

but again was-found.'

TIPURĀ.

This language is reported from the following localities :—

				People.
Bengal—				
State of Hill Tipperah, where it is spoken by	.	.	.	90,000
District of Dacca, „ „	.	.	.	300
District of Chittagong Hill Tracts, „	.	.	.	15,250
Assam—				105,550
District of South Cachar, „	.	.	.	300
				300
Total number of speakers				105,850

Tipurā has also been reported as spoken in Sylhet, but an examination of the specimens received from that district shows that the language is really Hallāmī, spoken by immigrants from the State of Hill Tipperah, and belonging to the Kuki, not the Bodo Group. Mr. J. D. Anderson, however, informs me that in 1883 there were many Tipperahs in the south of the district, especially in the Balisira Hills. Under these circumstances it is doubtful whether there really are at present in Sylhet the 8,000 speakers originally reported or not.

Specimens have been received from most of these localities. They show no dialectic differences,—only slight variations of spelling, which might be expected in recording an unwritten language. It will suffice to give the two specimens received from Hill Tipperah, and, to illustrate the varieties of spelling, the list of words received from Dacca. In the Chittagong Hill Tracts the language is also called Mrung.

Mr. Endle has shown in his grammar that Gārō in many cases forms a connecting link between Bārā and Tipurā. A perusal of the following specimens will show several points of resemblance (especially the plural termination *rao*) between the latter and Dīmā-sā, or Hills Kachārī.

The following are the authorities on Tipurā which I have noted :—

AUTHORITIES—

- PHAYRE, Sir A.,—*An account of Arakan*. *Journal of the Asiatic Society of Bengal*, Vol. x, 1841, Pt. II, p. 711 (Vocabulary).
- SUTHERLAND, H. C.,—*Tipperah*. *Calcutta Review*, Vol. xxxv, No. 70, 1860.
- LEWIN, T. H.,—*The Hill Tracts of Chittagong and the dwellers therein*. Calcutta, 1869. Reprinted in *Selections from the Records of the Government of Bengal*. No. 43, 1869. Contains vocabularies of Tipperah and Mrung.
- HUNTER, Sir W. W.,—*A Statistical Account of Bengal*. On pp. 489 and 490 of Vol. vi there is a vocabulary of Tipperah by T. H. Lewin.
- ENDLE, Rev. S.,—*Outline Grammar of the Kachārī (Bārā) Language as spoken in District Darrang, Assam*. The Introduction contains a *Note on the relation of the Kachārī (Bārā) Language to that of Hill Tipperā*, including a comparative vocabulary of Kachārī, Garo, and Hill Tipperā.
- ANDERSON, J. D.,—*A short List of Words of the Hill Tipperā Language, with their English Equivalents Also of words of the Language spoken by the Lushais of the Sylhet Frontier*. Shillong, 1885.
- CAMPBELL, Sir G.,—*Specimens of the Languages of India, including those of the Aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. On pp. 188 and ff. and 204 and ff. there are vocabularies of Hill Tipperah.
- RADHA MOHAN DEV VARMAN THAKUR,—*Kak-barak-mī, a Grammar of the Traipur Language* (in Bengali) Comilla, 1900.

NOTE.—Mr. Smart's *Report on District Tipperah* (Calcutta, Bengal Secretariat Press, 1856) has a list of so-called Tipperah words on p. 3. They are, however, Kuki, not Tipurā.

We find, so far as we can judge from the uncertain spelling of the specimens, the extreme short *a*, written *ʼ*, which has been noted in Bârâ thus, the word for 'child,' corresponding to the Bârâ *f sâ* is *bʼsâ*, *bsâ* and also *bâsâ*. As will be seen in this example, a long *â* is sometimes substituted for the short one. So also we find *jâlâ* or *lâ*, male, corresponding to the Bârâ *zʼlâ*. It must be remembered that the Tipurâ specimens and list of words were originally written in the Bengali character. Hence the pronunciation of the letter *s* must be considered as doubtful. Every *o* is to be pronounced as *o* in 'hot'. *Āi* is to be pronounced as in Hindī.

Several suffixes are used to form the plural. The most common is *rao*, as in *Dī-māsā*. Others are *rok*, *rong*, *song*, and *kobāng*. Examples are: *mānuī-rao*, things; *sēlēng-rao-no*, to the servants; *sā-juk-rok*, daughters; *chērai-rong*, children; *bā-song* or *bā-kobāng*, fathers.

The sign of the Accusative-Dative is *no*, as in *bū-no*, to the father.

The sign of the Instrumental is *bai*, as in *buduk-bai*, with ropes; *bo-bāi*, thereby.

The sign of the Ablative is *ni-thāni* or *ong-oi-sē*, as in *bā-ni thāni*, or *bā-ong-oi-sē*, from the father.

The sign of the Genitive is *ni*, as in *bā-ni*, of the father.

The sign of the Locative is *go* or *āō*, as in *yākum-go*, on the foot; *no-go*, in the house; *yāg-āō*, on the hand. After *ng*, the *g* of *go* seems to be liable to elision, as in *rukung-o*, on the road-side; *sēkāng-o*, before. *Ō* is also used, as in *duku-ō*, in difficulty.

The following are the principal pronominal forms which I have noted :—

I, <i>Āng</i> .	We, <i>Chung</i> .
Of me, <i>Āni</i> .	Of us, <i>Chī-ni</i> .
To me, <i>Āno</i> .	Us, <i>Chun</i> .
Me, <i>Ān</i> .	
Thou, <i>Nung</i> .	You, <i>No-rok</i> .
Of thee, <i>Ni-ni</i> .	Of you, <i>No-rong-ni</i> .
Thee, <i>Non</i> .	You, <i>No-rok-no</i> .
He, that, <i>Bo</i> .	They, <i>Bo-ro</i> , <i>bo-rao</i> .
Of him, <i>Bi-ni</i> .	Of them, <i>Bo-rong-ni</i> , <i>bo-rao-ni</i> .
Him, <i>Bo-no</i> .	Them, <i>Bo-rong-no</i> .
Who? <i>Sā-bo</i> .	What? <i>To-mo</i> , substantive; <i>Bo</i> , adjective.

The Bengali Relative *jē* is used.

The following are instances of the use of pronominal prefixes :—*ni-ni no-sālā*, your son; *ni-ni no-fāung*, your younger brother; *ni-ni no-fū*, your father; *bi-ni bu-fū* or *bi-ni bo-fū*, his father.

As regards verbs, the usual verb substantive is *tong*, with a present *tong-ō*, and a past *tong-khā*. Sometimes the initial *t* appears to be dropped. At least we find a present *ong-o*, an infinitive *ong-nā-ni*, to be, and a negative form *ong-li-ā*, am not (compare the Gārō form). The verb *nāng* means "become."

The following suffixes are used in conjugation :—

Present,—*o* or *ō*, as in *āng-bu-o* or *āng bu-ō*, I strike. The second person singular and plural takes *dī*, as in *nung bu-dī*, thou beatest.

Future,—*ā-nu*, as in *āng bu-ā-nu*, I shall strike. A euphonic *w* is inserted in *sā-wā-nu*, I will say

Past,—*khā* or *kā*, as in *bu-khā*, struck, *sā-kā*, said. (Probably here, as in Bengali-written Gārō, the aspiration is superfluous).

Imperative,—The second person takes *di*, as in *bu-di*, strike.

Conjunctive Participle,—*oi* as in *bāg-oi*, having divided, and many others.

Infinitive,—*nā-ni*, as in *bu-nā-ni*, to strike.

There is a termination *mā-ni*, the use of which is not clear from the specimens. We have *chā-mā-ni*, eatable things; *thāng-mā-ni*, going; *kāmā-mā-ni*, having been lost; *māsū-mā-ni*, the act of dancing; *tām-mā-ni*, music.

The following instances of negative verbs occur:—

Ong-li-ā, am not; *ru-li-ā*, gave not; *kān-li-ā*, did not wear; *thung-li-ā*, did not play. Another formation appears in *nor-iā-khā*, disobeyed not; *ru-iā-thā*, gavest not.

As in other Bodo languages, the causal verb is formed by suffixing the verb 'to give' to the main verbs; thus, *kān-ru-di*, cause to wear.

I give a list of Tipurā words with their Bārā equivalents, which may be of interest, as showing the close connexion of the vocabulary of the two languages. I am indebted for it to Mr. J. D. Anderson.

Tipurā.	Bārā.	English.
<i>mātāi</i> ,	<i>mādai</i> ,	god, spirit.
<i>shāl</i> ,	<i>sān</i> ,	sun.
<i>tāl</i> ,	<i>nākhā-bīr</i> (night-lord),	moon.
<i>āthū kurui</i> ,	<i>hā-thār-khī</i> ,	star.
<i>nākhā</i> ,	<i>nākhā</i> ,	heaven.
<i>bār</i> ,	<i>bār</i> ,	wind.
<i>shātung</i> ,	<i>sān-dung</i> ,	sunshine.
<i>hā</i> ,	<i>ha</i> ,	earth.
<i>shām</i> ,	<i>sān-khri</i> ,	salt.
<i>shār</i> ,	<i>shurr</i> ,	iron.
<i>hā-chu</i> ,	<i>hā-zō</i> ,	mountain.
<i>toi</i> ,	<i>đui</i> ,	water.
<i>toi-mā</i> ,	<i>đui-mā</i> ,	river.
<i>toi-sā</i> ,	<i>đui-sā</i> ,	stream.
<i>kā-chāng</i> ,	<i>g°-zāng</i> ,	cold.
<i>khām-khā</i> ,	<i>āt-salai</i> (fire-tongue),	flame.
<i>hār</i> ,	<i>āt or ar</i> ,	fire.
<i>kūthi</i> ,	<i>g°-thoi</i> ,	dead body.
<i>khārā</i> ,	<i>khārā</i> ,	head.
<i>bukur</i> ,	<i>bigur</i> ,	skin.
<i>khūmun</i> ,	<i>khāmān</i> ,	hair (of body).
<i>khānai</i> ,	<i>khene</i> ,	hair (of head).
<i>yāk-tō</i> ,	<i>āg-dā</i> ,	right hand (or arm).
<i>yāk-chī</i> ,	<i>ak-shi</i> ,	left hand (or arm).
<i>yā-fikung</i> ,	<i>bikhung</i> ,	back of hand.
<i>yāsūi</i> ,	<i>nāshī</i> ,	finger.
<i>yāshī-mā</i> ,	<i>nāshīmā</i> ,	thumb.
<i>yāshī-katoi</i> ,	<i>nāshī-gudoī</i> .	little finger.

Tipurā.	Bārā.	English.
<i>bekreng,</i>	<i>begeng,</i>	bone.
<i>thui,</i>	<i>thoi,</i>	blood.
<i>mukhāng,*</i>	<i>mukhāng,</i>	face.
<i>murku,</i>	<i>mushugur,</i>	eye-brow.
<i>chāhām,</i>	<i>zabam,</i>	forehead.
<i>bu-khū,</i>	<i>khū-gā.</i>	mouth.
<i>kuchui,</i>	<i>gush-thoi,</i>	lip.
<i>salai,</i>	<i>salai,</i>	tongue.
<i>ābu,</i>	<i>ābu,</i>	breast (female).
<i>fikhung,</i>	<i>bikhung,</i>	back.
<i>bakhā.</i>	<i>bikhā,</i>	liver.
<i>sitāp,</i>	<i>sitāp,</i>	bladder.
<i>kalam toi,</i>	<i>galam dūi,</i>	sweat.
<i>chānā,</i>	<i>zā-nai,</i>	food.
<i>mai rung,</i>	<i>mai-rāng,</i>	rice.
<i>mai,</i>	<i>mikhām,</i>	cooked rice.
<i>chu,</i>	<i>zō,</i>	rice-beer.
<i>rī,</i>	<i>hī,</i>	cloth.
<i>yasithām,</i>	<i>nāshithām,</i>	ring.
<i>mākhārā,</i>	<i>mūkhārā,</i>	monkey.
<i>māsā,</i>	<i>māsā,</i>	tiger.
<i>sūi-mā,</i>	<i>sūi-mā,</i>	dog.
<i>mathām,</i>	<i>māthām,</i>	otter.
<i>mushuk,</i>	<i>m'sō,</i>	cattle.
<i>pummā,</i>	<i>burmā,</i>	goat.
<i>sinjā,</i>	<i>inzāt,</i>	mouse.
<i>tau,</i>	<i>dan,</i>	bird.
<i>tā-khū,</i>	<i>dan khū,</i>	owl.
<i>tau-khā,</i>	<i>dan khā,</i>	crow.
<i>bu-tui,</i>	<i>bi-dūi,</i>	egg (bird-water).
<i>chibū,</i>	<i>zībō,</i>	snake.
<i>yānglā,</i>	<i>embu-bānglā,</i>	toad.
<i>ā, ngā,</i>	<i>nā,</i>	fish. (This word seems universal among the hill tribes.)
<i>thēm-mai.</i>	<i>thām-fui,</i>	fly.
<i>thām-pui,</i>	<i>thām-fui,</i>	mosquito.
<i>mai,</i>	<i>mōi,</i>	paddy.
<i>khāl,</i>	<i>khun,</i>	cotton.
<i>siping,</i>	<i>sibing,</i>	sesame.
<i>mōi,</i>	<i>mōi,</i>	vegetables.
<i>phānton.</i>	<i>phānthong,</i>	egg plant.
<i>ihāo,</i>	<i>thāu,</i>	oil.
<i>fātai</i>	<i>fātai,</i>	betel-leaf.

Tipurā	Bārā.	English.
<i>bu-fāng,</i>	<i>f^s-fong,</i>	tree.
<i>wā,</i>	<i>oā,</i>	bamboo.
<i>thai-chu,</i>	<i>thai-zu,</i>	mango.
<i>thaili,</i>	<i>thaili,</i>	plantain.
<i>bu-thai,</i>	<i>f^s-thai,</i>	fruit.
<i>chekrā,</i>	<i>sekrā,</i>	sickle.
<i>thāplā,</i>	<i>hā-thāplā,</i>	ashes.
<i>jālā, jū,</i>	<i>z²lā, zu,</i>	male, female, (suffix).
<i>hār,</i>	<i>hār,</i>	night.
<i>pau-khwā,</i>	<i>bau-gār,</i>	forget.
<i>okhviū,</i>	<i>ukhui,</i>	hunger.
<i>tūi-khāng,</i>	<i>dūi-gāng,</i>	thirst.
<i>tā,</i>	<i>dā,</i>	now.
<i>ka-sam,</i>	<i>g^a-sām,</i>	black.
<i>khufur,</i>	<i>g^a-fut,</i>	white.

TIBETO-BURMAN FAMILY. BÂRÂ OR BODO GROUP.

TIPURÂ.

(STATE, HILL TIPPERAH.)

SPECIMEN I.

Borok kai-sā-ni bāsā-jālā ku-nui-ni bisingoi bāsā-jālā-kusu
Man person-one-of child-male persons-two-of among child-male-younger
 bi-ni bu-fā-no sā-kā, 'bā, jē mānui āng mām-ānu, bo-no ā-no ru-di.'
his his-father-to said, 'father, what things I shall-get, that me-to give.'
 Ākhālaiō bo bo-raō-ni bisingoi mānui bāg-oi ru-khā. Bi-ni kisu-din
Thereupon he them-of among things having-divided gave. That-of some-days
 thāng-khlai-no bi-ni bāsā-lā-kusu jotō thāchā khālai-oi hākehālo dēsh
after his child-male-younger all together having-made remote to-country
 thāng-kā. Ārō bo bējāy cholē-mung cholē-oi bi-ni mānui-raō
went. At-that-place he improper manner behaving his things
 urā-oi khibi-khā. Bo jotō urā-oi pai-khālai-oi ārō
having-wasted squandered. He all having-squandered having-finished at-that-place
 jobor ākāl nāng-khā; tai bo-bo duku-ō kālai-khā. Afru āo jāgā-ni
great famine arose; and he-too difficulty-in fell. Then that place-of
 kai-sā-ni thā-ni thāng-oi tong-khā; āo borok-bo bo-no bi-ni āoro
person-one-of near having-gone remained; that man-also him his field-into
 wāk muruk-nā-ni hor-oi ru-khā. Ulō wāk-raō jē buku-raō chā-ō
swine grazing-for having-sent gave. Afterwards swine what husks eat
 bo-bai bo bo-hog puru-nā-ni khālai-khā, kentu bo-no kēbo ru-li-ā.
thereby he his-belly filling-for did (tried), but him-to anybody gave-no.
 Ulō thāngchā-oi bo sā-kā, 'ā-ni bā-ni busuk mulāsēng mām-oi
Then senses-recovering he said, 'my father's how-many pay having-received
 sēlēng nāng-māni bēshi chā-mā-ni mānui mām-oi-tong-ō, ārō āng ukhu-oi
servants than-enough more eatable things used-to-get, here I hungering
 thui-ō. Āng bāchā-oi ā-ni bā-ni thā-ni thāng-ānu, bo-no sā-wānu, "bā,
die. I arising my father's near will-go, him-to will-say, "father,
 āng shorgō-ni birōddhē ni-ni sākāngō pāp khālai-khā, āng tai
I heaven-of against your presence-in sin have-committed, I any-more
 ni-ni nā-sā-lā hinoi sinijāk-nā-ni lāek ong-li-ā, ā-no ni-ni dormāy mām-oi
your your-child-male as known-to-be worthy am-not, me your pay receiving
 sēlēng-ni hāhāy nārūk-di." Ulō bo bāchā-oi bi-ni bu-fā-ni thā-ni
servants-of like keep." Then he arising his his-father's near

thāng-kā. Kentu bo hākehālō tong-sāni-no bi-ni bu-fā bo-no
went. But he at-distance when-was-yet his his-father him
 nug-nā-ni māng-khā, tai hāmjāgmāni-bai khaichig-oi, thāng-oi, bi-ni totorā
to-see was-able, and affection-through running, going, his neck
 rom-oi motomsu-kā. Bāsā-jālā bo-no sā-kā, 'bā, āng shorgē-ni birōddhē
holding kissed. The-child-male him-to said, 'father, I heaven-of against
 tai ni-ni sākāngō pāp khālai-khā; āng tai ni-ni bāsā-lā hinoi
and your presence-in sin have-committed; I anymore your child-male as
 sinijāk-nā-ni jōgya kurui-khā.' Kentu bo-fā bi-ni sēlēng-raō-no sā-kā,
known-to-be worthy am-not.' But his-father his servants-to said,
 'tāg-di jotō-ni kāhām ri tobu-oi bo-no kār-ru-di; bi-ni yāg-aō
'quickly all-of best cloth bringing him to-put-on-give (cause); his hand-on
 yāsītām, tai yākum-go yākānāp kār-ru-di; tai chung chā-oi ānondo
ring, and feet-on shoe cause-to-put-on; and we eating merriment
 khālai-nā; kārōn ā-ni i-āng-sā-jālā thui-oi thāng-mā-ni, thāng-kā;
make; for my this-my-child-male having-died going, has-become-alive;
 kāmā-mā-ni, mānfi-kā.' Ulō bo-raō ānondo khālai-nā-ni
having-been-lost, again-have-got.' Afterwards they merriment make-to
 nāng-khā.

became (began).

Tai bi-ni bāsā-jālā-kotor khētō tong-māni, bo fai-oi noō-ni
And his child-male-elder field-in on-being, he coming house-of
 sāmīlilai ong-khā-lai māsā-mā-ni tai tām-mā-ni khānā-khā. Āfru
near when-was dancing and music heard. At-that-time
 bo sēlēng kai-sā-no sāmō nūng-oi sung-khā, 'i jotō tāmō?' bo bo-no
he servant person-one near calling asked, 'this all what?' he him-to
 sā-kā, 'ni-ni no-fāung fai-kā, tai ni-ni no-fā bējāy
said, 'your your-younger-brother has-come, and your your-father merrily
 chā-nā-ni sāmām-khā. Bo bo-no sā-go kāhām mān-khā.' Kentu bo
to-eat prepared. He him body-in healthy has-found.' But he
 khāmchui kāsājāk-khā; bisīngō thāng-nā-ni nai-li-ā. Ulō bi-ni
angry became; inside to-go wished-not. Afterwards his
 bu-fā fātārō fai-oi bo-no bujāo-nā-ni nāng-khā. Kentu bo jōbāh
his-father out coming him to-convince began. But he answer
 ru-oi bi-ni bu-fā-no sā-kā, 'nāyo-di usuk bosor bom-oi āng
giving his his-father-to said, 'behold so-many years since I
 ni-ni sēbā khālai-oi ni-ni kōnu kok nor-iā-khā, tobō nung kōnu
your service doing your any word disobeyed-not, still you any
 sālō-bo ā-no punsā mā-sā-bo ru-iā-khā jē ā-ni kiching kāmār-raō-no
day-even me-to kid one-even gave-not that my friends relatives
 nāwo ānondo khālai-nā-ni; kentū ni-ni i ro-sā-lā khānkijag-raō-ni logō
with merriment would-make; but your this your-child-male hearts-of with

ni-ni mānui chā-oi khibi-kā, bo jē-fru fai-kā -fru nung
your goods having-eaten squandered, he at-what-time came at-that-time you
 bi-ni bāgoi chā-mung kāhām khālai-kā.' Kentu bo bo-no sā-kā, sā
him-of for food good made.' But he him-to said, 'child
 nung jotō-fru-no ā-ni logē-ō ong-ō, tai ā-ni jē tong-ō jotō-no ni-ni.
you all-times-at me-of with live, and my what is all yours.
 Kentu ānondo khālai-di khusi ong-nā-ni chā-khā,
But merry make glad to-be-of matter-has-become,
 āmāni-hin-khā-lai ni-ni i no-fāung thui-māni-sē,
because your this your-younger-brother having-died,
 thāng-kā; kāmā-māni, mām-fi-kā.'
has-become-alive; having-been-lost, again-found.'

TIBETO-BURMAN FAMILY. BÂRÂ OR BODO GROUP.

TIPURÂ.

(STATE, HILL TIPPERAH.)

SPECIMEN II.

A POPULAR SONG.

	Tokhāmai-khaichumu	hâyā-hārung-ō	bāroi
	(Name of a wild creeper)	in-unworthy-valley	being-blossomed
	Hâyā-hārung-ō	thāoi	
(and)	in-unworthy-valley	having-fruited	
	Bubāro	sikālā	kān-li-ā
	flower	young-women	wore-not
	Bothai	chērai-rong	thung-li-ā
	fruit	children	played-not.
	Lāmānē-rukung-ō	bartālai	
	By-road-side	if-would-blossom	
	Lāmānē-rukung-ō	khaitālai	
(and)	by-road-side	if-would-fruit	
	Bubāro	sikālā	khān-khā-man
	flower	young-women	would-have-worn
	Bothai	chērai-rong	thung-khā-man
(and)	fruit	children	would-have-played.

FREE TRANSLATION.

Tokhāmai khaichumu having blossomed and borne fruit in an unworthy mountain-valley, its flowers have not become ear-ornaments of young women nor its fruit playthings of young children. Had it blossomed and fruited by the road-side, its flowers would have become ear-ornaments of young women, and its fruit playthings of young children.

CHUTIYĀ.

There¹ are some eighty-seven thousand persons of the Chutiya tribe in Assam. They have four sub-tribes : the Hindū, the Ahom, the Borāhi, and the Deori Chutiya. Of these, the first three are nearly all Hinduised, and with their tribal customs have abandoned their tribal language and now only speak Assamese. The Deoris, who are the Levites of the tribe, are less than four thousand in all. They are a secluded people in the Lakhimpur and Sibsagar Districts of Upper Assam, whose principal settlements are on the Majuli Island in Sibsagar, and on the Dikrang river in North Lakhimpur. They have preserved the language, religion, and customs which, we may presume, have descended to them with comparative little change from a period anterior to the Ahom invasion. The Chutiya² language, indeed, may fairly claim to be the original language of Upper Assam. The original seat of the Deoris was in the region beyond Sadiya. It is only about a century ago that they removed thence to their present settlements, and some of them still occasionally visit Sadiya for religious purposes.

Regarding the language, Mr. Brown's remarks may be quoted :—

"Very little appears to be known about the Chutiya language hitherto. Some time in the forties, Colonel Dalton contributed a few words to the Asiatic Society's journal; from which his acute genius discerned the connection with Kachari. It is the main object of this little work [the writer's Grammar] to confirm and establish that conclusion. A short note is appended of the principal grammatical resemblances between Chutiya and Kachari; and it is hoped that the materials provided will be useful to anyone making a systematic study of the Bodo group of languages. A somewhat longer Deori Chutiya vocabulary was contributed to Hodgson's Essays by the Rev. Mr. Brown of Sibsagar; but the usefulness of this is marred by its being mixed up with the vocabularies of a number of Nāga dialects. Both these vocabularies are inaccurate, and even misleading, on such important points as the numerals. Besides them, I am not aware that anything has been published about the Chutiya language. Indeed, it has recently been officially announced to be extinct by the author of the Assam Census Report for 1891. This is by no means the case; for, although the Deoris all speak Assamese fluently, and have incorporated a good many Assamese words in their own vocabulary, still they all speak their own language; and are rather proud of it, and of the difficulty of learning it."

According to the above there should be about four thousand speakers of Deori. The returns furnished for this survey show a much smaller number and are as follows. I am not in a position to offer any special remarks as to their correctness or otherwise :—

Sibsagar (returned as Deori)	350
Lakhimpur (returned as Chutiya)	4
									—
Total	.								354

Under any circumstances the number of speakers of Chutiya is small, but the language deserves study on account of its philological and historical interest. I do not think that there can be any doubt of its representing the most archaic stage of the various languages grouped together under the name of Bodo. It is most nearly connected with Īmā-sā or Hills Kachari, but is certainly more primitive in its grammatical system. The conjugation of the verb is specially worthy of notice.

We here see in full play that system of modifying infixes, of which there are only sporadic remains in the other languages of the Bodo group. Even in the full study

¹ Most of what follows is copied from the Introduction to Mr. Brown's Deori Chutiya Grammar.

² The people are generally called Deoris, but the language is properly known as Chutiya or Chutiya.

of Bârâ of Mr. Endle, the number of these infixes which he has succeeded in pointing out is very small compared with the number in Chutiya. The student of the latter language has the advantage of being able to consult Mr. Brown's excellent grammar, which contains all the necessary information in full detail and arranged in a scholarly manner. To this he is referred for much information regarding the tribe and its speech which is necessarily omitted from this brief sketch.

The following is a list of the authorities on Chutiya with which I am acquainted:—

AUTHORITIES—

- HODGSON, B. H.,—*Aborigines of the North-East Frontiers. Journal of the Asiatic Society of Bengal*, Vol. xix (1850), pp. 309 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects*, Vol. II, pp. 11 and ff. (London, 1880.) Contains a Deoria Chutia Vocabulary by N. Brown.
- HUNTER, Sir W. W.,—*A Comparative Dictionary of the Languages of India and High Asia, with a Dissertation*. London, 1868. Contains a Deoria Chutia Vocabulary taken from Hodgson.
- DALTON, E. T.,—*Descriptive Ethnology of Bengal*. Calcutta, 1872. Vocabulary on p. 93 taken from Hodgson.
- STACK, E.,—*Report on the Census of Assam for 1881*. On p. 76 there is an account of the tribe by E. S. Calcutta, 1883.
- GAIT, E. A.,—*Report on the Census of Assam for 1891*, pp. 161 and 233. Shillong, 1892.
- BROWN, W. B., I.C.S.,—*An Outline Grammar of the Deori Chutiya Language spoken in Upper Assam, with an Introduction, Illustrative Sentences, and short Vocabulary*. Shillong, 1895.

The following brief sketch of Chutiya grammar is entirely based on Mr. Brown's work, to which the reader is referred for a full and detailed account of the many interesting philological facts which are displayed by this language.

SKELETON CHUTIYĀ GRAMMAR.

I. PRONUNCIATION.—There is a very short *a* (as in 'company'), which Mr. Brown writes *ā*. This I write as a small *a* above the line as elsewhere in the survey. The letter *a* is pronounced as in 'that,' *o* as in 'stop,' and *ei* as the *i* in 'bite.' Other letters as usual, nasalization, being represented, as elsewhere, by *ṁ*.

II. NOUNS.—No gender of inanimate objects. Animate objects prefix *mukagu* (male) for the masculine and *mishigu* (female) for the feminine. Nouns expressing relationship either use special words for each gender (*bābā*, father; *yoyo*, mother), or take special terminations (*pishā*, son; *pishā-si*, daughter).

The plural **number** is formed by suffixing *raju*, *laju*, or *chiga*. The last is only used with human beings.

In **declension**, the nominative singular, as in *Kachāri*, may take *a*, giving the force of the definite article. The following is a specimen declension:—

Sing. Nom.	<i>mōshi(-a)</i> , a (the) man.
Acc.	<i>mōshi-na</i> , a man.
Instr.	<i>mōshi-chṅ</i> , with or by a man.
Dat.	<i>mōshi-mai</i> , to a man.
Abl.	<i>mōshi-chapi</i> , <i>mōshi-yo bachāpi</i> , from a man.
Gen.	<i>mōshi-yo</i> , of a man.
Loc.	<i>mōshi-hā</i> , in a man.
Plur. Nom.	<i>mōshi-raju</i> (- <i>laju</i> , or - <i>chiga</i>), men.
Acc.	<i>mōshi-raju-na</i> , etc., men, and so on.

Adjectives usually, but not always, precede the noun. The comparative is formed by adding *gāri* or *gārike* to the accusative of the noun with which comparison is made, e.g., *ghora-na gārike lokoko*, stronger than the horse. The superlative is formed by using *muguro* or *mugurone* all, as in *muguro-na gārike loi*, harder than all, hardest.

Numerals take qualifying prefixes as usual; examples are : for human beings, *dugu* or *duku*; for animals, abstract nouns, and indefinitely *mu*. *Dugu-cha mōshi*, one man; *mu-ja lipedru*, one goat.

III. PRONOUNS.—Personal pronouns have two plurals each— a long and a short. They are declined as follows, only the genitive is irregular.

	First Person.	Second Person.	Third Person (near).	Third Person (remote).
Sing. Nom.	<i>ā</i> .	<i>nā</i> .	<i>lā, lā-shi</i> .	<i>bā, bā-shi</i> .
Gen.	<i>ay-yo</i> .	<i>ni-yo</i> .	<i>lā-yo</i> .	<i>bā-yo</i> .
Dat.	<i>ā-mai</i> .	<i>nā-mai</i> .	<i>lā-mai</i> .	<i>bā-mai</i> .
Acc.	<i>ā-na</i> .	<i>nā-na</i> .	<i>lā-na</i> .	<i>bā-na</i> .
Plur. (Long) Nom.	<i>jā-ru</i> .	<i>lo-ru, no-ru</i> .	<i>lā-ru</i> .	<i>bā-ru</i> .
Gen.	<i>jari-yo</i> .	<i>lori-yo, nori-yo</i> .	<i>lāri-yo</i> .	<i>bāri-yo</i> .
Dat.	<i>jaru-mai</i> .	<i>loru-mai, noru-mai</i> .	<i>lā-ru-mai</i> .	<i>bā-ru-mai</i> .
Plur. (Short) Nom.	<i>ja-u</i> .	<i>lo-u, no-u</i> .	<i>la-u</i> .	<i>ba-u</i> .
Gen.	<i>jar</i> .	<i>lor, nor</i> .	<i>lau-yo</i> .	<i>ba-u-yo</i> .
Dat.	<i>jau-mai</i> .	<i>lo-u-mai, no-u-mai</i> .	<i>la-u-mai</i> .	<i>ba-u-mai</i> .

The suffixes *ne* and *re* may be added after the case terminations. The first gives a reflexive force. The second is emphatic. The plural of the first person is often used in the sense of the singular. Pronominal prefixes occur in *ja-ba*, my father; *ja-yo*, my mother.

Other pronouns are *sā*, who?; *dām*, what?; *brā*, which?; *brā-si*, which? (adjective). The relative (probably borrowed from Assamese) is *ni-bā* (lit., who that).

IV. VERBS.—The conjugation of the verb is based on the same principles as those which we meet in other Bodo languages. There is a negative conjugation of which the typical note is the vowel *ā*. The main peculiarity of the Chutiya verb is that, besides the usual tense suffixes, there may also be added infixes to the root which modify its meaning, not only giving the idea of mood, but also modifying the sense in a more obscure way. When these are used, the order of structure is as follows:—

Root + modifying infix + negative + tense suffix. There are two conjugations. The first is the regular one. In the second *b* and *r* of the

suffixes are nasalised to *m* and *n* respectively. The following are examples of the positive and negative forms of both conjugations. Every root ends in a vowel :—

Conjugation I, <i>Lare</i> or <i>lari</i> , give.		Conjugation II, <i>No</i> , do.	
Positive.	Negative.	Positive.	Negative.
Present. <i>Lare-i</i> , (I) give.	<i>Lari-ā</i> , (I) do not give.	<i>No-i</i> , (I) do.	<i>No-ya</i> , I do not do.
Pres. definite <i>ā lari-bena</i> , I am giving (only used in the first person).	Not used.	<i>ā no-mena</i> , (I) am doing (only used in the first person).	Not used.
Past. <i>Lare-m</i> , } (I) gave. <i>Lari-bem</i> , }	<i>Lari-ā-ge</i> , } (I) did not give. <i>Lari-ā-pi</i> , }	<i>No-mem</i> , (I) did.	<i>No-yā-ge</i> , (I) did not do.
Perfect. <i>Lari-ri</i> , (I) have given.	<i>Lari-ā-ri</i> , (I) have not given.	<i>No-ni</i> , (I) have done.	<i>No-yā-ni</i> , (I) have not done.
Pluperfect. <i>Lari-rumde</i> , (I) had given.	<i>Lari-ā-rumde</i> , (I) had not given.	<i>No-numde</i> , I had done.	<i>No-yā-numde</i> , (I) had not done.
Future. <i>Lare-n</i> , (I) shall give.	<i>Lari-ā-n</i> , } <i>Lari-ā-mne</i> , } (I) shall not give. <i>Lari-ā-ron</i> , }	<i>No-n</i> , (I) shall do.	<i>No-yā-n</i> , } <i>No-yā-non</i> , } (I) shall not do.
Conditional. <i>Lare-mde</i> , } (I) would have given. <i>Lari-bemde</i> , }	<i>Lari-ā-mde</i> , (I) would not have given.	<i>No-mde</i> , } (I) would do. <i>No-memde</i> , }	<i>No-yā-mde</i> , (I) would not have done.
Imperative. 2. <i>Lare</i> , } Give thou. <i>Lari-be</i> , }	<i>Dā lare</i> , } Do not give. <i>Dā lari-be</i> , }	<i>No</i> , } Do thou. <i>No-me</i> , }	<i>Dā no</i> , } Do not do. <i>Dā no-me</i> , }
3. <i>Lare sâ</i> , let him give.	<i>Dā lare sâ</i> , let him not give.	<i>No-me sâ</i> , let him do.	<i>Dā no-me sâ</i> , let him not do.
Infinitive. <i>Lari-noi</i> , to give (purpose).	<i>No-noi</i> , to do (purpose).
Pres. part. <i>Lare-ngna</i> , giving.	<i>Lari-ā-cha</i> , not giving.	<i>No-ngna</i> , doing.	<i>No-yā-cha</i> , not doing.
Conjunctive part. and N. of agency. } <i>Lare-ya</i> , having given, a giver.	<i>Lari-ā-ba</i> , not having given, a non-giver.	<i>No-ya</i> , having done, a doer.	<i>No-yā-cha</i> , not having done, a non-doer.
Disjunctive part. <i>Lare-mto</i> , giving. ¹	<i>Lari-ā-mto</i> , not giving. ¹	<i>No-mto</i> , doing. ¹	<i>No-yā-mto</i> , not doing. ¹
Last pass. part. <i>Lari-ba</i> , given, the and verbal act of giving. noun.	<i>Lari-ā-ba</i> , not given, the act of not giving.	<i>No-ma</i> , done, the act of doing.	<i>No-yā-ma</i> , not done, the act of not doing.

The verbal noun may be declined as a gerund, thus, *lari-ba-ya*, of giving, and so on.

Irregular Verbs.—The verb *khe*, go, takes an infix *ro*, as follows :—

Pres., *khe-i*; Pres. def., *khe-ro-na*; Past, *khe-ro-m*; Perf., *khe-ro-ri*; Plup., *khe-ro-rumde*; Fut., *khe-n*; Imper., *khe-ro*; Inf., *khe-noi*; Participles, *khe-ro-ngna*, *khe-ya*, *khe-ro-mto*, *khe-ro-ba*. The negative form *khi-yā* is conjugated regularly.

The **Verbs Substantive** are :—

1. *du-i*, am, art, is, are; *du-mde*, was, were. There is a future *du-n*, and a participle *du-mto*. Other parts wanting.
2. The Assamese *ho* (Second conjugation) is also used.
3. *sā*, to become (First conjugation) is regular.
4. The negative of *du* is, present, *jā*; past, *jā-m*; plup., *jā-rumde*; fut., *jā-n*; disj. part., *jā-mto*.

Another **Defective Verb** is *no-i* (neg. *no-yā*), it is necessary.

The **Passive** is formed by conjugating the past passive participle with *sā*. It is rare.

Adjective verbs suffix verbal terminations to adjectives. Thus, *chu*, good; *chu-i*, is good. Or the present participle may be used with *du*. Thus, *chepepe*, cold; *chepepe-ngna du-i*, it is cold.

Infixes.—These are many. Examples are :—

1. *Mi* forms a potential verb e.g., *lari-m-i*, I can give.
2. *Pi* ... causal *lari-pi-i*, I cause to give.
3. *Re-li* ... continuative *lare-re-li-n*, I shall keep giving.
4. *Te* or *teri* ... completive *lari-te-n*, I shall finish giving; *lari-teri-ā*, I do not finish giving.
5. *Jay* or *je* ... obligative *lari-je-n*, I shall have to give.

There are others, the force of which is obscure.

¹ Equivalent to the Assamese-Bengali participle in *le* or *bi*.

The following version of the Parable of the Prodigal Son in Deuri Chutiya is from the pen of Mr. H. N. Colquhoun, I.C.S., Assistant Commissioner of Lakhimpur. The speakers reside in the North Lakhimpur Sub-division. Words borrowed from Assamese are written in italics. The spelling differs slightly from that in the preceding grammatical sketch. As in Mr. Brown's grammar, the long mark is only put over a vowel when it is strongly accented. The vowel *a*, without the long mark, has the sound of *a* in 'that.'

me saw tree-on.

¹ The system of spelling is not the same as in the preceding specimen. The termination of the genitive is written *ya* instead of *yo*, and the long mark over *â* is usually omitted, as in Mr. Brown's Grammar.

FREE TRANSLATION OF THE FOREGOING.

This case is false. I did not go to steal anything at his house. The facts are these. I missed my cow which I had bought from Dhani-rām a year ago. The cow though carefully kept by me used to visit her former owner's house very often, and I had to go and fetch her several times. On the day referred to by Dhani-rām I went to his house to see if my cow had gone there. That was after sunset. I walked through his compound as usual to see whether my cow was straying there. It so happened that at that time his sister Mālāti, a grown-up girl of eighteen years, came to the compound with a water-pot in her hand. It was then nearly dark. She saw me unexpectedly going towards her though I myself had not noticed her. She got frightened and screamed as if she thought I was a ghost. The people of the house, including Dhani-rām, came and seized me, saying that I had come there to visit the girl. That was the story Dhani-rām told to the Police, but in the Court in order to hide shame of his sister he gives out that I was stealing his mangoes and that Mālāti saw me first on the tree.

house-at eating comes. Daughter son trouble give. Her mother father her
 charebem, Biyo chāpi ā nichigage chui nimayāge. Hojur dere anā
ruined. Her from I even-little peace got-not. Your-Honour now me
 bajohā da-pachi; chu māshinā ā jāmānāhā lāreman. Bāmāi kheremtā
hājat-to not-send; good men I surety-in give-can. Thereto go-if
 ayyo jat kheni; ā juyā; dahi mama.
my caste will-go; I abscond-not; fear do-not.

FREE TRANSLATION OF THE FOREGOING.

My name is Bhogrām; my father's name is Dhanirām. I live in Panidehing Mauza, where I am a cultivator.

I ordered my wife to spin thread, but on my return I did not find her doing the work. Thereupon I became angry and slapped her. She screamed aloud and then her parents, who live close by, came out of their house, seized hold of me and beat me, and also had me beaten by my wife.

On this, feeling myself disgraced, I took up a *dāo*, which I began to brandish in self-defence. While doing so the *dāo* might have caused injuries on their persons, but I did not intentionally inflict any blows, and I am not guilty. Your honour will do well by releasing me. My wife is very wicked. She does not obey me, and, on the other hand, always abuses me. She does not cook food for me. I have to remain without food, but when I am away from home, she would cook for herself and eat it, or sometimes she would go to her parents' house and there take her meal and come back. She has been giving similar trouble to my children as well. Her parents have ruined her. I have no peace whatever on her account. Your honour should not send me to the lock-up now. I am prepared to furnish sufficient bail and substantial persons will stand surety for me. If I am sent to the lock-up I shall lose my caste. I am not a man to abscond, and there is no ground for fear on that account.

MORĀN.

This language has not been reported by anyone as existing in British India, but the following notice concerning it is quoted from page 160 of Mr. Gait's Report on the Census of Assam for 1891, in order to complete the survey of the Bodo group:—

‘One Bodo form of speech has escaped notice at the present census and also in 1881. The Morāns of Sibsagar and Lakhimpur have a tribal tongue of their own. It is fast disappearing, and owing probably to their desire to rank as Ahoms, was not entered as a language in a single instance in the census schedules. It is evidently very closely allied to Kachāri (although the Morāns are said to deny all connection with that people), as will be seen from the Kachāri equivalents, which I have added to the following list of Morān words collected by Lieutenant Gardon:—

English.	Morān.	Kachāri.
Water	di	dūi.
Salt	sim	sankhri (sham, Tipurā).
Paddy	mai	mai.
Rice	mairum	mairang.
Cooked rice	miyām	mikhām.
Flesh	mohan	bidot (Tipurā, muihān).
Sun	sān	sān.
Moon	dān	dān.
Stars	hatarai	hātorkhi.
Heaven	dausa	akhrangsā.
Rain	makuhang	nākhā.
Tree	senfang	bangfang.
Clothes	hingka	hi.
Head	khero	khārā.
Body	han	mādam.
Teeth	hatai	hāthai.
Hand	hapka	ākhai.
Foot	happatola	atheng (yafa-talā = ‘sole,’ Tipurā).
Male	hiwa	hōā.
Female	hichi	hingzhān.

**LIST OF STANDARD WORDS AND SENTENCES IN THE VARIOUS
LANGUAGES OF THE BODO GROUP.**

English.	Dârâ or Plains Kachârî (Darrang).	Mech (Jalpaiguri).	Lālūng (of Nowgong).	Dinā-sā or Hills Kachârî (Cachar).
1. One	Sò, sŭi	Thai-sò, shā-sò, mā-sò, fāng-sò (see <i>skeleton Grammar</i>).	Ki-chā (<i>with human beings</i> , sâ-chā).	Mā-shi (see <i>grammatical sketch</i>)
2. Two	Nò, nŭi	Thai-ni, thai-noi	Ki-ning	Mā-ginni
3. Three	Thām	Thai-thām	<i>Reported to be the same as in Assamese.</i>	Mā-gatām
4. Four	Brè, brŭi	Thai-bri	<i>Ditto ditto</i>	Mā-bri
5. Five	Bā	Thai-bā	<i>Ditto ditto</i>	Mā-boā
6. Six	Rā, dā	Thai-rō	<i>Ditto ditto</i>	Mā-do
7. Seven	Sni, s'ni	Thai-shini	<i>Ditto ditto</i>	Mā-sinni
8. Eight	Zāt	Jokhai-noi	<i>Ditto ditto</i>	Mā-jai
9. Nine	Skhō	Jokhai-noi-thai-sē	<i>Ditto ditto</i>	Mā-sugū
10. Ten	Zŭ, zi	Jokhai-noi-thai-ni	<i>Ditto ditto</i>	Mā-ji
11. Twenty	Zakhai-bā (<i>five fives</i>)	Jokhai-bā	<i>Ditto ditto</i>	Mā-tron; bishā-shi (= <i>a score</i>).
12. Fifty	} <i>Assamese used</i>	Jokhai-bā gā-noi jokhai-noi-thai-ni.	<i>Ditto ditto</i>	Mā-dān
13. Hundred		Sho	<i>Ditto ditto</i>	Rājā-shi
14. I	Āng	Āng	Āng	Ang
15. Of me	Āng-ni, āng-hā	Āng-ni; <i>me</i> , āng-no	Āngē	Ānī
16. Mine	<i>Ditto</i>	Āng-ni	Āngē	Ānī; <i>to-me</i> , āng-kē
17. We	Zang, zang-fur, -frā, -far	Jung; <i>us</i> , jang-no	Jing-ran, ching, ching-khēdā	Āni-rao
18. Of us	Zang-fur-ni, &c.	Jung-ni	Jingē	Āni-rao-ni, <i>to-us</i> , āni-rao-kē
19. Our	<i>Ditto</i>	Jung-ni	Jingē	Āni-rao-ni
20. Thou	Nang	Nung; <i>thee</i> , nung-no	Nā	Ning
21. Of thee	Nang-ni, nang-hā	Nung-ni	Nē	Nini; <i>to-thee</i> , ning-kē
22. Thine	<i>Ditto</i>	Nung-ni	Nē	Nini
23. You	Nang-sur, nang-sar	Nung-sor-ō; <i>acc.</i> nang-sor-no	Nu-ra, nā-rā-khēdā, nā-khēdā	Nini-rao
24. Of you	Nang-sur-ni, &c.	Nung-sor-ni	Nu-ra-nē	Nu-i-rao-ni, <i>to-you</i> , nini-rao-kē

Dīmā-sā or Hills Kachārī (Hōjai of Nowgong).	Gārō (standard, and Kamrup).
Mā-si, mā-shi (<i>see gram- matical sketch</i>).	Sā
Mā-gini, mā-gni . . .	Gni
Mā-kāthām	Gitām
Mā-bri	Bri
Mā-bōā	Bongā
Mā-ta	Dok
Mā-sini	Sni
Mā-jai	Chet
Mā-sikau	Sku
Mā-ji	Chikung
Bishā-shi	Kolgrik
Bishā-gni-māji . . .	Sot bonggā
Rājā-shi	Rit-chā sā
Āng	Āngā
Āni	Āngni
Āni	Āngni
Jung	Chingā, ā'chingā, (<i>Kamrup</i>) ān'chingā.
Jini, jung-ni	Chingni
Jini	Chingni
Nung	Nā'ā
Nini, nung-ni	Nāng'ni
Nini, nung-ni	Nāng'ni
Ni-shi, nung-ni-shi . .	Nā'simāng,' (<i>Kamrup</i>) nā'song.
Ni-shi-ni, nang-ni-shi-ni .	Nā'simāng'ni. (<i>Kamrup</i>) nā'songni.

Gārō (Ābeng, of Garo Hills).	Gārō (Jalpaiguri).

No-rok	Nārua, nāru	Loru, nāru	23. You.
No-rong-ni; <i>acc., no-rok-no</i>	Nāriā	Loriyo	24. Of you.

¹ In the Lakhimpur column the letter *a* is evidently meant in most cases to be pronounced long, as in 'father.' I have not, however, ventured to alter what was originally written. The forms in both the Sibsagar and the Lakhimpur columns frequently differ from those given by Mr. Brown in his Grammar. This is almost always a mere matter of spelling.

NĀGĀ GROUP.

GENERAL INTRODUCTION.

The languages composing this group are spoken by tribes inhabiting the districts of Lakhimpur, Sibsagar, the Nāga Hills, Cachar, and Nowgong, the State of Manipur, and the wild country to the east of the frontier of British India. I have divided them into five sub-groups as follows:—

Western Sub-group.

Angāmi, spoken by	35,110
Semā „ „	26,400
Rengmā „ „	5,500
Kezhāmā „ „	1,620
										68,930

Central Sub-group.

Āo, spoken by	15,500
Lhōtā „ „	22,000
Tengsa „ „	?
Thukumi „ „	?
Yachumi „ „	?
										At least 38,000

Eastern Sub-group.

Angwānku or Tableng.	} spoken by	5,000
Chingmēguu or Tamlu		
Banparā		21,600
Mutoniā		
Mohongā	}	21,870
Namsangā		?
Chāng or Mojung		?
Assiringā		?
Moshang	?
Shānggē	?
										At least 10,000

Naga-Bodo Sub-group.

Mikir, spoken by	89,516
Kachchā Nāgā „ „	10,280
Kabui „ „	11,073
Khoirāo „ „	15,000
										125,869

Nāgā-Kuki Sub-group.

Sepremā or Māo Nāgā, spoken by	10,000
Marām „ „	2,500
Miyāngkhāng „ „	5,000
Kwoireng or Liyāng „ „	5,500
Luhūpā or Luppā „ „	25,800
Maring „ „	1,500
										At least 50,000

GRAND TOTAL . At least 292,799

It is questionable whether Sopvomā, which is here classed as belonging to the Nāgā-Kuki sub-group, should not be put amongst the Western Nāgā languages. It possesses points of close connexion with Kezhāmā. Kabui and Khoirāo, which I have classed as Nāgā-Bodo languages, also show points of contact with Kuki.

Nearly all these figures are the roughest of estimates, as no census figures are available for most of these wild tribes. We are, however, safe in saying that at least 300,000 people speak languages belonging to the Nāgā Group.

Regarding the origin of the word 'Nāgā' Mr. A. W. Davis, I.C.S., has been kind enough to give me the following note:—

I think that there can be little doubt that the word 'Nāgā' is our corruption of the Assamese term নগা *nagā*, pronounced *nogā*. The Assamese apply this term roughly to denote all the tribes inhabiting the hills south of the Brahmaputra River, between Makum in the north-east, and the sources of the Dhansiri River in the west, i.e., the hinterland of the Lakhimpur and Sibsagar Districts. Different tribes or portions of tribes were distinguished by terms like *Hatigoriā*, the people using the Hatigor path, *Assiringiā*, those using the Assiringiā path, *Dupdwarīā*, those using the Dup-dwār or Dup-pass, in their visits to the plains of Assam. The old derivations of the word from *nāg* or *nangtā* are consequent on the mispronunciation of the word 'nagā.' I can suggest no derivation for 'nagā,' but writing from memory, I think that Mr. S. E. Peal suggested that the word had probably some connection with the word *nok* or *nokā*, people, terms used by the people of Banfera, who belong to the Survey Eastern Sub-group. This word *nok* or *lok*, meaning 'an assemblage of people,' occurs also in the Āo language.

Up to the census of 1891 the only account of the Nāgā languages, as a whole, was the article by the late Mr. Damant, entitled *Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and the Ningthi Rivers*, which appeared in the Journal of the Royal Asiatic Society for 1880, and which is frequently referred to in these pages. I have, in the main, followed his system of grouping of the various dialects, only departing from it when the additional information gained within the past twenty years has compelled me to do so. The last two groups, the Nāgā-Kuki and the Nāgā-Bodo, have been added by me.

The information regarding the languages mentioned above, which I have been able to gather for the Survey, varies in value and amount. For some languages, such as Angāmi and Āo, thanks to the kindness of Mr. Davis and the Reverend E. W. Clark, the information now given is accurate and full. On the other hand, for the languages of the Eastern Sub-group, I have been able to do little beyond collating previously existing material, much of which was far from accurate. For other languages the information is fuller, if not absolutely satisfactory.

Under these circumstances, I have the less hesitation in reprinting the following valuable note on the Nāgā languages, which was written by Mr. A. W. Davis, I.C.S., for the Assam Census Report of 1891:—

All the tribes in the Nāga Hills District which we lump together under the general term Nāgā, speak languages which are at the present day, whatever they may have been in the remote past, so different that a member of one tribe speaking his own language is quite unintelligible to a member of the next tribe. That these languages were derived from the same stock is, I think, best shown by a comparison of word lists from the various languages. I have therefore given below lists of words from the following Nāgā dialects and Manipuri, i.e., Angāmi, Lhōtā, Semā, and Āo (Chungli and Mongsen).

From these lists, and from the more detailed comparison between Angāmi on the one hand and Kachāri and Mikir on the other, which will be found below, I think that there is good evidence to show that not only Manipuri, but also Bodo and Mikir, are derived from the same stock as the languages spoken by the various Nāgā tribes. Further, in order to show more clearly the common origin of the various Nāgā dialects, I have made a special comparison between the Angāmi and Āo Nāgā languages. I have taken these languages for special comparison for the reason that the tribes in question are separated from each other by the Lhōtā, Rengmā, and Semā tribes, and have from time immemorial never had any connection with each other.

English.	Angāmi.	Semā.	Lhōtā.	Mongsen.	Chungli.	Kachelā Nāgā.	Manipuri.	Kachāri.	Tanlu.	Mikir.
One	<i>ko</i>	<i>lāhī</i>	<i>ekhā</i>	<i>akhe</i>	<i>akha</i>	<i>kat</i>	<i>anā</i>	<i>se</i>	<i>huk</i>	<i>isi.</i>
Two	<i>ke-nā</i>	<i>ki-ni</i>	<i>eni</i>	<i>anā</i>	<i>anā</i>	<i>ganā</i>	<i>ani</i>	<i>ne</i>	<i>ngi</i> or <i>ni</i>	<i>lini.</i>
Three	<i>se</i>	<i>ke-tū</i>	<i>ekham</i>	<i>asam</i>	<i>asam</i>	<i>gājām</i>	<i>aham</i>	<i>tham</i>	<i>cham</i>	<i>ka-tham.</i>
Four	<i>dā</i>	<i>bidi</i>	<i>mēzū</i>	<i>peh</i>	<i>pezi</i>	<i>mādui</i>	<i>marī</i>	<i>bve</i>	<i>peh</i>	<i>phili.</i>
Five	<i>pōngu</i>	<i>pungu</i>	<i>mungo</i>	<i>pangā</i>	<i>pangu</i>	<i>minuao</i>	<i>mangā</i>	<i>bī (longā)</i>	<i>ngā</i>	<i>phongo.</i>
Six	<i>suru</i>	<i>saghlā</i>	<i>tirōk</i>	<i>tirōk</i>	<i>tirōk</i>	<i>sūrāk</i>	<i>taruk</i>	<i>do, ro</i>	<i>wok</i>	<i>therok.</i>
Seven	<i>te-nū</i> or <i>tenā</i>	<i>sinī</i>	<i>ti-ing, seang</i>	<i>teni</i>	<i>tenet</i>	<i>senā</i>	<i>tarēt</i>	<i>sui</i>	<i>nyet</i>	<i>therok-si.</i>
Eight	<i>tettā</i>	<i>lichā</i>	<i>tiā</i>	<i>tuset</i>	<i>thā</i>	<i>dasāt</i>	<i>nipāl</i>	<i>zāt</i>	<i>tset</i>	<i>nerkep.</i>
Nine	<i>tehuo</i> or <i>tepiū teku</i>	<i>tokeu</i>	<i>tokeu</i>	<i>tekhū</i>	<i>teku</i>	<i>shugui</i>	<i>māpāl</i>	<i>shlō</i>	<i>chhā</i>	<i>serkep.</i>
Ten	<i>kerr</i>	<i>chighi</i>	<i>tāro</i>	<i>tarā</i>	<i>terr</i>	<i>gārō</i>	<i>tarā</i>	<i>zā, zi</i>	<i>an</i>	<i>kep.</i>

The resemblance all through is very great, it being borne in mind that in making comparisons of words between the different hill languages, the first syllable of any word should always be left out, being merely a prefix denoting either a noun or an adjective. The resemblances which strike one most at first sight are those between the words, for 'two,' 'five,' 'six,' and 'nine.' The words for 'three' are identical in the Lhōtā, Kachāri and Mikir languages, and also in the Ao, Manipuri and Tanlu.

The words for 'four' are identical in the Ao (Mongsen), Manipuri, Kachāri, Tanlu, and Mikir, if it is remembered that the syllables *me*, *ma*, *pe*, *pa*, *be*, *ba* are interchangeable in the Nāgā dialects. Again we have the great resemblances in the Angāmi, Semā, Ao (Mongsen), and Kachāri words for 'seven.'

The words for 'eight' in Angāmi, Semā, and Lhōtā are almost the same. The same thing happens with this same number in the Ao (Mongsen), Kachelā Nāgā, Kachāri, and Tanlu dialects. It will be observed that in forming the words for 'eight' and 'nine' Manipuri and Mikir use the same methods, viz.,—

Mikir, 8 = *nerkep* = 10 - 2. Manipuri, 8 = *nipāl* or *nipan* = 10 - 2, and *pan* = 10 in the Tablung Nāgā dialect, not given in the lists.

Mikir, 9 = *serkep* = 10 - 1. Manipuri, 9 = *mapāl* or *mapan* = 10 - 1.

The words for 'ten' used in all languages except Kachāri, Tanlu, and Mikir are practically identical.

English.	Ancāmi.	Semā.	Lhötā.	Mongsen.	Chungli.	Manipuri.

Call	u.	lu	tsā	chī	chī	kāu.

These lists, together with those given of the numerals above show, I think, pretty clearly that the Nāgā languages and Manipuri are all very closely connected. The resemblances between the Āo Nāgā dialects and Manipuri are especially striking. Thus we find:—

Āo.	Manipuri.	English.
<i>Ngə</i>	<i>ngā</i>	fish
<i>Āsā</i>	<i>sā</i>	flesh.
<i>Sūng</i>	<i>sing</i>	sticks.
<i>Āok</i>	<i>ok</i>	pig.
<i>Chang</i>	<i>cheng</i>	rice.
<i>Āchā</i>	<i>chāk</i>	rice (cooked)
<i>Ā-i</i>	<i>i</i>	thatch
<i>Lu</i>	<i>lāu</i>	cultivation.
<i>Keyi</i>	<i>kei</i>	tiger
<i>Yi</i>	<i>yu</i>	liquor.
<i>Ta</i>	<i>tāu</i>	do.
<i>Tung</i>	<i>thung</i>	arrive.
<i>Li</i>	<i>lei</i>	buy.
<i>Chen</i>	<i>chen</i>	run.
<i>Chəp</i>	<i>kəp</i>	cry.

In making comparison between the various hill languages the following common vowel and consonantal changes must be borne in mind. These changes occur not only between different languages, but in the same language in different dialects of it. They are for vowels:—

Examples.

ā to ī	<i>mā, mī</i>	= man (Ang.),
ī „ ē	<i>mī, mē</i>	= fire (Ang.),
e „ u	(Ang.) <i>le</i> = <i>lu</i> (S.)	= fields,
ā „ u	<i>nā, nu</i>	= child (Ang.),
o „ u	<i>thenumā, thenomī</i>	= woman (Ang.).

and for consonants,

f = sh	{ <i>tefū, teshu</i> <i>fū, shi</i>	= dog (Ang.), = say (Āo),
kw = pf, ph	<i>kwē, pfē</i> = <i>phi</i> (S.)	= cloth (Ang.),
t = ch	<i>tin, chino</i>	= khel (Ang.),
k = ch	<i>kī, chí</i>	= house (Ang.),
ts = t	<i>kemetsu</i> (S) = <i>kemete</i> (Ang.)	= all,
ts = ch	<i>tsebi, chedā</i>	= now-a-days (Ang.),
kr = ch	<i>krā, chā</i>	= white (Ang.),
y = l	<i>yung, āling</i>	= bamboo tie (Āo),
j = d	<i>jī, dī</i>	= is not (Ang.),
y = v	<i>yī, vū</i>	= liquor (Āo),
z = y	<i>zok, yok</i>	= send (Āo),
zh = y	<i>zha, ya</i>	= help (Ang.),
m = p	<i>pete, mete</i>	= all (Ang.),
p = b	<i>pa, ba</i>	= he (Āo),
kr = kh	<i>kri</i> (Ang.) = <i>khi</i> (S.)	= buy,
r = gh	<i>soru</i> (Ang.) = <i>soghā</i> (S)	= six.

The negative particles are *mo, mā, te, de, hē, ā, e, shu, sī, tici, na, 'm, dā, ri, kanu*. These negatives are distributed over the following languages:—

	Ordinary.	Negative Imperative
Angāmi	<i>mo, lho</i>	<i>hē, shu</i>
Semā	<i>mo, lho</i>	<i>tici, sā</i>
Lhōtā	<i>'m, 'n</i>	<i>tī</i>
Āo	<i>ma</i>	<i>te</i>
Tamlu	<i>na</i>	<i>te</i>
Kachhā Nāgā	<i>ma</i>	<i>shu</i>
Manipuri	<i>de, te, tre, lā</i>	<i>kanu</i>
Uphāri	<i>ā</i>	<i>dā</i>
Mā . . .	<i>o</i>	<i>ri</i>

These languages may be divided into two classes—

- (1) Those in which the negative follows the root of the word it qualifies
- (2) Those in which it precedes the root.

To class (1) belong Angāmi, Semā, Kachchā Naga, Kachārī, Manipurī, and Mikir, *i.e.*

Angāmi	. . .	<i>vor</i>	= come.
		<i>vor^{mo}</i>	= not come.
Semā	. . .	<i>gwāgi</i>	= come.
		<i>gwāgi^{mo}</i>	= not come.
Kachārī	. . .	<i>nu</i>	= see.
		<i>nuā</i>	= not see.
Manipurī	. . .	<i>lāk</i>	= come.
		<i>lāk^{de}</i>	= not come.
Mikir	. . .	<i>vang</i>	= come.
		<i>vang^{ve}</i>	= not come.

To the second class belong the Āo, Lhōtā, and Tamlu languages, *i.e.*

Āo	. . .	<i>alli</i>	= is; <i>malli</i> = is not.
Lhōtā	. . .	<i>li</i>	= is; <i>'nli</i> = is not.
Tamlu	. . .	<i>ang</i>	= is <i>na-ang</i> = is not.

In Kachārī though the ordinary negative follows the root of the verb it qualifies, the imperative negative precedes that root, thus:—

Kachārī	. . .	<i>nu</i>	= see; <i>dā-nu</i> = see not.
---------	-------	-----------	--------------------------------

While—

Angāmi	. . .	<i>ngu</i>	= see; <i>ngu-hē</i> = see not.
--------	-------	------------	---------------------------------

In Angāmi also there is a trace of the negative particle preceding the verbal root in the phrase *'m-bā-wē* = it is not, where *'m* = *mo* = not, *-bā* is the substantive verb, and *-wē* the verbal termination.

These constructions must be relics of the time when in the Nāgā languages the negative particles were indifferently either before or after the word they qualified.

There is one point with reference to the use of the negative particles in which all the languages mentioned above agree, *i.e.*, they all of them use a form for the imperative negative different to that used in the ordinary conjugation of the negative verb, thus—

Angāmi	. . .	{ <i>po vor^{mo}</i> = he has not come.
		{ <i>vor^{hē}</i> = don't come.
Āo	. . .	{ <i>pā maro</i> = he has not come.
		{ <i>taro</i> = don't come.
Manipurī	. . .	{ <i>mā lāk^{de}</i> = he has not come.
		{ <i>lākkanu</i> = don't come.
Semā	. . .	{ <i>pā gwāgi^{mo}</i> = he has not come.
		{ <i>gwāgitivi</i> = don't come.

And so on for all the other languages.

In nearly all these languages the word for 'bad' is merely the word for 'good' used with the negative particle. Thus—

Manipurī	. . .	<i>apha ba</i>	= good, <i>phata ba</i> = bad, <i>i.e.</i> , not good. Here <i>pha</i> = good, while <i>ta</i> = not, the initial <i>a</i> and final <i>ba</i> are merely adjectival formative particles.
Kachārī	. . .	<i>g^ahām</i>	= good, <i>hām-ā</i> = not good = bad, here <i>ā</i> = not; the <i>g^a</i> in <i>g^ahām</i> is the adjectival prefix.
Āo	. . .	<i>ta-chung</i>	= good, <i>ta-mā-chung</i> = not good = bad, <i>ta</i> = adjectival prefix; <i>mā</i> = not
Lhōtā	. . .	<i>mho</i>	= good, <i>'mmho</i> = not good = bad, here <i>'m</i> = not.
Tamlu	. . .	<i>mayang</i>	= good, <i>na mayang</i> = not good = bad.

Angāmi and Semā have separate words for 'bad,' *i.e.*, *keshū* and *ākesī*, but the word for 'good' with the negative particle *mo* is as frequently used to express 'bad' as the special words, thus—

Angāmi	. . .	<i>ke-vi</i>	= good, <i>vi-mo</i> = not good = bad.
Semā	. . .	<i>āke-vi</i>	= good, <i>vi-mo</i> = not good = bad.

ke and *āke* are adjectival prefixes.

At the time of the Census 1881, the Mikir language was classed by Sir C. Lyall as an outlier of the Bodo group. That the two languages are derived from the same stock and do not at present differ much more from each other than the various Nāgā languages do from each other is, I think, pretty evident from an examination of the lists of words and sentences given by him. I shall now try and demonstrate the fact that

the Bodo and Mikir languages are pretty closely connected with the Nāgā group of languages. In order to show this connection, I shall take sentences from the Angāmi Nāgā languages. In the word lists given at the end I have made comparison with other languages, specially Āo.

Numerals.

As far as numerals are concerned, the resemblance that exists between Bodo and the Nāgā dialects has been referred to in the short notes appended to the lists of words given to show the general connection of all the Nāgā dialects known to us at present. To this it is not necessary to refer again. I shall now take the resemblances that exist in Bodo, Mikir, and Angāmi in the method of forming words and sentences.

Formation of Adjectives.

These are formed from substantives by the following prefixes:—

<i>G^a</i>	. . .	Kāchāri.
<i>K^a, ke</i>	. . .	Mikir.
<i>K^a, kə</i>	. . .	Angāmi.

Examples—

Kachāri . . .	<i>det</i> = greatness,
	<i>g^adet</i> = great.
Mikir . . .	<i>the</i> = greatness,
	<i>kethə</i> = great.
Angāmi . . .	<i>d_i</i> = greatness,
	<i>ked_i</i> = great.

The resemblance here is not only in the method of formation, but also in the word; *det*, *the*, *d_i* are all the same word. The change from final *et* to *ā* or *i* is not an uncommon one in the Nāgā languages:—

Cf. Āo . . .	<i>tenet</i> or <i>teni</i> = seven,
	<i>akhā</i> or <i>akhet</i> = one,
	<i>takā</i> or <i>taket</i> = hand,

det and *d_i* are therefore the same word.

Again cf.

(Mikir) . . .	<i>phere</i> = fear = <i>pri</i> (Angāmi),
	<i>k^a-phere</i> = afraid = <i>ke-pri</i> .
(Mikir) . . .	<i>do</i> = abide = <i>to</i> (Angāmi);
	<i>ke-do</i> = abiding = <i>ke-to</i> .
(Mikir) . . .	<i>chok</i> = beat = <i>vū</i> (Angāmi),
	<i>ke-chok</i> = assault = <i>ke-vū</i> .

Method of forming Causatives.

This is done in a similar way in all three languages. In Bodo by the prefix *f^a*, *f^e*, (*pu*, Dimāsā), in Mikir and Angāmi by the prefix *pe*; thus—

<i>Numā</i> (Dimāsā)	= <i>ngu</i> (Angāmi) = to see.
<i>Pu-numā</i> (Dimāsā)	= <i>pe-ngu</i> (Angāmi) = to cause to see.

Cf. also,—

<i>Si</i> (Angāmi),	know; <i>pe-si</i> , inform.
<i>Thi</i> (Mikir),	die; <i>pe-thi</i> , kill.
<i>Ran-nū</i> (Kachāri),	to be dry; <i>f^a-ran-nū</i> , to cause to be dry.
<i>Sā-le</i> (Angāmi),	to be dry; <i>pe-sā-le</i> , to cause to dry.
<i>Si-nū</i> (Kachāri),	to be wet; <i>f^e-si-nū</i> , to wet (act).
<i>Cho-le</i> , <i>tse-le</i> (Angāmi),	to be wet; <i>pe-tse-le</i> , to wet (act).
<i>Me-sen</i> (Mikir),	good; <i>pe-me-sen</i> , cause to be good.
<i>Ke-vi</i> (Angāmi),	good; <i>pe-vi</i> , improve.

These examples are, I think, sufficient to show that the method of forming causatives in the three languages is identical. The formation in Kachāri and Angāmi of compound verbs from two verbs, the first giving the method and the second the result, is similar in both languages. The compounds from the word to 'kill'—(Kachāri) *that*, (Angāmi) *kri*—show this resemblance very clearly, thus:—

Kachāri . . .	<i>gau</i> } shoot; { <i>gau-that-nū</i> } to shoot and kill.
Angāmi . . .	<i>j^a</i> } shoot; { <i>j^a-kri-le</i> } to shoot and kill.
Kachāri . . .	<i>bu</i> } to strike; { <i>bu-that-nū</i> } to beat to death.
Angāmi . . .	<i>vū</i> } to strike; { <i>vū-kri-le</i> } to beat to death.

Kachāri, which have almost exact equivalents in some of the Nāgā languages. The following abbreviations are used in these lists to indicate the particular Nāgā language from which the specimen is taken :—

Ang. = Angāmi. S. = Semā.
Lh. = Lhōtā. M. = Manipurī.
D. = Dimāsā. K. Nāgā = Kachchā Nāgā.

Pronunciation—

\bar{a} = a in 'ball'; \bar{e} = a in 'pray';
 $\bar{ā}$ = a in 'master'; \ddot{u} = German \ddot{u} ;
u = u in bull.

List of words in Mikir that are similar to words in the Nāgā dialects.

English.	Mikir.	Nāgā.
Abide	do	to (Ang.).
Abode	ke-do-ahem	ke-to-ki (Ang.).
Ache	keso	-chi (Ang.), sü (S.).
Afraid	kaphere	kepri (Ang.).
Ascend	thur	ā-to (Āo).
Assault, to	chok	ā-sok (Āo).
Cast away	vār	vā (Ang.).
Cup	bong	bung (Āo), bu (Ang.) = receptacle.
Cut	thu	du (Ang.).
Dead	kethi	keti (S.).
Descendants	asoasu	aso (Āo) = born.
Ear	no	nie (Ang.).
Eat	cho	chi (Ang.), chā (M.).
Egg	voti	vü-dzi (Ang.), a-ti (Tamil).
Fall	klo	krü (Ang.).
Father	po	po (Ang.).
Female	pi	nupi (M.), pjü (Ang.).
Fire	me	mi, me (Ang.).
Give	pi	pi (Ang., Lh., M.).
Pig	phāk	āk (Āo).
Paddy	sok	tsak (Āo).
Rice	sīng	chang (Āo), cheng (M.).
Yawn	ko-hē	kehē (Ang.).
Fowl	ro	vü (Ang.).
Great	kethe	kedī (Ang.).
Village	rong	renī (Ang.).
Day	ni	ni (Āo, M.).

Husk rice, to	<i>sāu</i>	<i>tu</i> (Ang.).
Stay	<i>thā</i>	<i>thā</i> (Ang.) = stand.

With a fuller vocabulary of the Kachārī language and with a more extended knowledge of the other Nāgā dialects except Angāmi than I have at present, it would doubtless be possible to make great additions to these word lists. Enough, though, I think have been given to show the resemblance that exists between Kachārī and Mikir on the one hand and the Nāgā dialects on the other.

The Kachārī words and sentences used in this note have been taken from the Rev. S. Endle's 'Outline Grammar of the Kachārī Language.' The Mikir words used have been taken from the Rev. R. E. Neighbor's 'English and Mikir Vocabulary.'

ANGĀMI OR TENGIMĀ.

We are fortunate in possessing more accurate information about this warlike tribe of Nāgās and their language than about other branches of the same people. There are full accounts of the people by Captain Butler in his 'Rough Notes' and by Mr. Davis in the Assam Census Report for 1891. We have several vocabularies of varying length and importance, and two grammars of the language by Captain Butler and Mr. McCabe, respectively. The two most important Nāgā languages which we meet in British Territory are the Āo and the Angāmi. Both of these are spoken in the Nāga Hills district, Āo being spoken in the North and Angāmi in the extreme South of that area. The following account of the Angāmi Tribe is taken from Mr. Davis's note in the Assam Census Report:—

The Angāmis are the largest of the Nāgā tribes of which we have any knowledge. The portion of the tribe censused occupies 56 villages, with a population of 26,880. In addition to these there are 14 villages, with a population of some 5,000, lying outside the district boundary, in the piece of country bounded on the west by the Brahmaputra-Irawaddy watershed range, on the North by the Thezir river, on the East by the Tiza river, and on the South by the Lanier. The censused portion of the tribe occupies the country drained by the Zullu, Sijju, and Zubza rivers, which all have their origin in the Japvo or Burrail range of Hills. This range forms the boundary of the Angāmi country towards the South.

The name Angāmi by which this tribe is known to us, is a corruption of Gnamei, the name by which the tribe is known to the Manipuris, through whom we first came into contact with them (the Angāmis).

The name by which they call themselves is Tengimā, while they are known to the surrounding tribes of Kezhāmās, Semās, and Lhôtās as Tsoghāmi, Tsungumi, and Tsangho.

The Angāmis assert that their people originally came from the South, i.e., the direction of Manipur. They first occupied the spurs just under Japvo, and thence spread north-west and north-east. Their accounts of their origin are extremely vague and untrustworthy, as is to be expected in the case of a people who have no written language.

The Angāmi tribe is divided into three main divisions,—The Chakromā, who live in a few small villages in the western portion of the country, the Tengimā proper, occupying the central portion, and the Chakrimā or Eastern Angāmis, who occupy the country South and East of Kohima on both sides of the watershed range. The Chakromā, who represent but a very small percentage of the whole tribe, are practically identical with the Tengimā in appearance and language. Between the Tengimā and Chakrimā, however, especially the portion of the tribe which inhabits the villages on the right bank of the Sijju river, there are very marked differences, both in dialect and general appearance.

The differences in dress, cut of hair, etc., between these two divisions of the tribe, are in fact greater than those that exist between tribes that are really different, such as the Lhôtās and Āos. And it is only by examination of the language spoken by the Tengimā and Chakrimā that we find that they really belong to the same tribe.

The Angāmi are distinguished from the other tribes within the district by their method of cultivation. While all the other tribes, including the Western or Chakromā portion of the Angāmi tribe, raise their rice crops by *jhūming*, the Angāmis raise their rice crops on irrigated terraces. These terraces are excavated with great labour and skill from the hillsides, and are watered by means of channels carried along the contour of the hills for long distances and at excessively easy gradients.

We have seen from the above that the Angāmis call themselves Tengimā, but that they are called by the Kezhāmās, Semās, and Lhôtās, Tsoghāmi, Tsungumi, and Tsangho, respectively. To this may be added the following information given by Captain Butler in his Note¹:—

It has been generally believed that the term 'Nāgā' is derived from the Bengali word *nāngā*, or the Hindustānī word *naṅgā*, meaning 'naked,' and the specific name 'Angāmi' has been credited with the same source. Another theory suggests the Kachāri word *nāṅ*, a young man, and hence 'a warrior,' while a third

¹ P. 309

theory would derive it from *nāg*, snake. However, be this as it may, the term is quite foreign to the people themselves : they have no generic term applicable to the whole race, but use specific names for each particular group of villages. Thus, the men of Mezomā, Khonomā, Kohimā, Jotsomā, and their allies, call themselves Tengimās; while others, if asked who they are, would reply simply that they were men of such a village, and seem to be quite ignorant of any distinctive tribal name connecting them to any particular group of villages.—a strange fact, which, I think, is in a great measure accounted for by the state of constant war, and constant isolation, in which they live. The Kachāris, I may add, speak of the Nāgās generally as the Magamsā, and of the Angāmi Nāgās in particular as the Dawānsā.

Mr. Damant on page 245 of his *Notes* quoted below, says,—

This tribe, *i.e.*, the Angāmi Nāgās, the most warlike, and probably the most numerous of all the Nāgā tribes with which we are acquainted, occupies the centre of the great range of hills which divides Assam from Manipur. Their country is about 50 miles long from north to south, and about 80 or 100 from east to west. They are bounded on the west by the Kachā Nāgā, on the north by the great uninhabited forest which covers the valleys of the Dhansiri and Doyang rivers, and by the Rengmā and Lhōtā Nāgā, on the east by the Semā and naked Nāgā, and on the south by the Mao, Tangkhul, and Luhupā Nāgā. They are generally separated into two divisions, known as Eastern and Western Angāmi, the boundary between the two being the Sijju river; they are essentially the same tribe, but there are slight differences in dialect and dress. The Western Angāmi hold forty-six villages, containing about 6,400 houses. . . . Their principal villages are Jotsomā, Kohimā, Khonomā, and Mezomā. Of the Eastern Nāgā we have no accurate statistics. . . . Among themselves, the people who inhabit the central part of their country are known as 'Tengimā,' the remainder being called 'Chakromā.' They are a fine set of men, very warlike and enterprising, taking freely to trade, and possessing in themselves the material for forming a fine nation; but they are blood-thirsty to a degree, village fighting against village, and clan against clan, and in their fiercer quarrels sparing neither age nor sex.

A consideration of the above will show that there are two main dialects of Angāmi,—a western, spoken by the Chakromā and the Tengimā, and called after the latter tribe; and an eastern, spoken by the Chakrimā. The language, however, varies over the whole area from village to village. Chakrimā has three sub-dialects, *viz.*, Dzunā, Kehenā, and Nāli or Mimā, the last of which is spoken only in one village (Mimā). Besides this there are many other Chakrimā dialects, concerning which I have failed to obtain information. The figures reported are as follows :—

Tengimā	26,000	} all reported from the Nāga Hills District.
Dzunā	1,430	
Kehenā	6,490	
Nāli or Mimā	590	
TOTAL		35,410	

Lists of standard words and sentences have been obtained in all these dialects. There are also two specimens in Tengimā. The version of the parable of the Prodigal Son in that dialect has had the advantage of being revised by Mr. Davis himself, and I am also indebted to that gentleman for the preparation of the second specimen. I must also express my indebtedness to Captain A. E. Woods and Lieutenant W. M. Kennedy for the share they have taken in the preparation of the version of the parable, and to the latter gentleman for the list of words in all the dialects. The Dzunā, Kehenā and Nāli lists were only obtained with great difficulty.

The following is a list of the authorities which I have seen dealing with Angāmi :—

AUTHORITIES—

- HODGSON, B. H.,—*Aborigines of the North-East Frontier*. *Journal of the Bengal Asiatic Society*, xix, 1850, pp. 309 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects*, Vol. ii, pp. 11 and ff. London, 1850. Contains an Angāmi Nāgā Vocabulary by N. Brown.

- BROWN, The Rev. Nathan,—*Specimens of the Naga Language of Asam*. *Journal of the American Oriental Society*, Vol. ii, 1851, pp. 155 and ff. Contains a comparative vocabulary of a number of Naga Languages, including Angami and Mozome (? Mezomā)-Angami.
- STEWART, R.,—*Notes on Northern Cachar*. *Journal of the Asiatic Society of Bengal*, Vol. xxiv, 1855, pp. 532 and ff. Account of the Nagas generally on pp. 607 and ff., of the 'Angamie' and 'Kutchā' Nagas on pp. 649 and ff. Comparative vocabularies of Arung Nāgā and Angāmi Nāgā on pp. 656 and ff. The latter name is sometimes spelt 'Angami,' sometimes 'Gnāmi,' and sometimes 'Gnāmie.' On p. 672 the headings of the columns for Arung and Angāmi have been interchanged by the printer.

Classification of the Nāga Languages on pp. 229 and ff. Account of Angāmi Nāga on pp. 245 and ff. Vocabulary on p. 256.
- MCCABE, R. B.,—*Outline Grammar of the Angāmi Nāgā Language, with a Vocabulary and Illustrative Sentences*. Calcutta, 1887.
- DAVIS, A. W., I.C.S.,—*Report on the Census of Assam for 1891* by E. A. Gait, I.C.S. Note on Angāmi compared with other languages by A. W. D. on pp. 163 and ff. Account of the Angāmi Nāgas by the same on pp. 237 and ff. Shillong, 1892.

The following account of the grammar of the language spoken by the Tengimā Angāmi Nāgās is mainly based on that given by Mr. McCabe in the book quoted above. It in no way professes to be complete. For full particulars the student is referred to that work. Mr. Davis has kindly made several corrections and additions.

Pronunciation.—Angāmi pronunciation is very well provided for by the system of spelling used in this Survey. Perhaps the following extra signs are required; at any rate, I have adopted them from Mr. McCabe's Grammar, as they are also used in the specimens, and have become, so to speak, established. The letter *à*, represents the sound of *a* in 'pan,' and *o*, unmarked, represents the sound of the *o* in 'hot.' The sound of *a* in 'all' is represented as elsewhere in this Survey by *ā*. *Th* is pronounced as in 'hot-house,' not as in 'think.' The *n* in the word *un*, *thy*, is very faintly sounded. The suffix *te* of the passive is pronounced *ta* when not followed by *wē*. There are local varieties of pronunciation. The long *ā* used in Khonōmā and Mezomā villages is changed to *à* at Kohimā. In the eastern villages *ā* and *ī* are frequently interchanged. Again *pf*, *kw*, and *kf* are interchangeable. Also *n* and *l*; *o* and *u*; *t* and *th*; *ts* and *ch*; and *p* and *m*. Angāmi is said to be rich in tones, but no information is available concerning them.

Prefixes and Suffixes.—Angāmi expresses the various meanings which a root can assume partly by the aid of suffixes and infixes and partly by the aid of prefixes. These

will be explained in their proper places, but the following prefixes require to be mentioned here. They have no special meaning of their own, and they are frequently dropped,—

1. The following prefixes are used in forming adjectives, adverbs, and present participles :—

ka or *ke*
me
pe
re. Thus,—

<i>ke-zhā</i> , large	<i>ka-ti</i> , black
<i>ke-vi</i> , good	<i>ke-me-thi</i> , strong
<i>ke-re-ku</i> , concave	<i>pe-tē</i> , or <i>me-tē</i> , all
<i>ke-me-ku</i> , ditto	<i>ke-vor</i> , coming
<i>pe-sá</i> , <i>me-sá</i> , or <i>re-sá</i> , above	<i>ke-chi</i> , doing
<i>pe-krá</i> , or <i>re-krá</i> , below.	<i>ka-ngu</i> , seeing.

The adjective usually follows the noun it qualifies. When this is the case, and an indefinite article is also used, the prefix *ke* is not dropped. When, on the other hand, the adjective is a predicate, the prefix is elided. Thus,—

Themmā ke-zhā po,
 Man big one, *i.e.*, a big man.

but,— *Themmā hāu zhā*
 Man this big, *i.e.*, this man is big.

2. In names of animals and objects the prefixes *the*, *te*, and *mi*, are often dropped when the sentence is definite, and no misapprehension is likely to arise from the elision.

Thus, *te-füh*, a dog, but *ā füh*, my dog.

3. Nouns of agency are formed by suffixing *mā*, man, to the present participle. Thus, *bā*, to sit; *ke-bā*, sitting; *ke-bā-mā*, a sitting man, a sitter.

4. Other nouns are formed from verbs by prefixing *the* or *te*. Thus, *bā*, to sit; *the-bā*, a chair.

5. The prefix *u* often replaces *te* or *the* or, rather, in most cases both are used indifferently. Thus, *the-vü* or *u-vü*, fowl; *the-vo* or *u-vo*, pig; *si* or *u-si*, wood; *te-fü* or *u-fü*, dog. *U* is always prefixed to nouns signifying parts of the body when used in an indefinite sense, and when a personal pronoun, or the word *mā*, an individual is not employed. Thus, *u-phi*, the foot or feet; *u-bi*, the hand or hands; *u-tsa*, the head or heads. So :—

u-phi *pe* *themmā-no* *chā-toyā-wē*.
 the-feet by men walking-in-the-habit-are, the feet are used in walking.
u-tsa *gi* *tepē* *pfayā-wē*.
 the-head on loads carried-are.

Like the Lhōtā *ō*, and the Semā, Rengmā and Mikir *ā*-, this *u*- is almost certainly derived in such cases as the above from an old possessive pronoun meaning 'his,' which has in most instances lost its original signification.

Articles.—The numeral *po*, one, is used for an indefinite article. Thus, *mā po*, a man.

For definite articles *hā-u*, this; *lu*, that; and the relative particle *u*, he who is, are used. Thus, *te-khu hā-u* or *te-khu lu*, the tiger.

Nichu-mā andu kevor-u.

Young-male yesterday come-he-who-is, *i.e.*, the boy who is the one who came yesterday, the boy who came yesterday.

As in the above examples, the article invariably follows the noun which it qualifies. If there is an adjective, it follows the adjective. Thus, *te-füh ka-ti po*, a black dog.

Nouns.—Nouns descriptive of parts of the body, or expressing relationship, must always be preceded by a possessive pronoun. Thus, *ā-phi*, my feet; *po-phi*, his feet. *Phi* cannot be used by itself. So, *ā-po*, my father; *un-po*, thy father. *Po*, father, cannot be used by itself.

Gender.—This is only apparent in the case of animate nouns. It is indicated in the case of nouns of relationship by the use of different words. Thus, *ā po*, my father; *ā zo*, my mother. In the case of other nouns it is indicated by the following suffixes,—

Masculine,—*pfö*, *chü*, *dá*, *dzü*.

Feminine,—*krü*.

Some nouns take one suffix and some another. The prefixes *the*, *te*, and *mi* are commonly dropped, as explained above, when these generic suffixes are added. Examples are,—

Te-füh, a dog, *füh-pfö*, a male dog, *füh-krü*, a bitch.

Tsu, an elephant, *tsu-chü*, a male elephant, *tsu-krü*, a cow elephant.

(This last pair of suffixes is used for almost all wild animals.)

Mi-thu, a cow, *thu-dá*, a bull, *thu-krü*, a cow.

(This pair is commonly used for domestic animals.)

The-vü, a fowl, *vü-dzü*, a cock, *vü-krü*, a hen.

(This pair is commonly used for birds.)

If a pronoun or adjective follows a feminine noun, it takes the suffix *pfü*, instead of *u*. Thus, *thu-krü lu-pfü*, that cow; *thu-krü ke-vi ka-ti lu-pfü*, that good black cow.

Number.—Number is only indicated when it is not evident from the context. In such a case, the singular is indicated by suffixing *po*, one, and the plural by suffixing *ko*. This *ko* is the plural of the suffix *u* used as a definite article. It hence invariably has a definite signification. Thus, *mi-thu*, cow or cows generally; *mi-thu po*, a or one cow; *mi-thu-u*, the cow; *mi-thu-ko*, the cows. So,—

Ā un-ki nu te-füh po ngu-lē

I your-house in dog a saw, *i.e.*, I saw a dog in your house.

Te-füh-ko tēlē-chē

The-dog-s catch, *i.e.*, catch the dogs.

The particle *ko* follows the noun, and if there are adjectives it follows them. It also follows the generic suffix if any. Thus,—

Vü-krü ka-chā hā-pfü-ko

Hens white these, *i.e.*, these white hens.

Note the irregular form *náná*, children, the plural of *ná*, a child.

The pronouns form a dual number, which is used to form duals of substantives as follows :—

No u-sāzāu u-nā mhāchē shābāwē.

You your-brother you-two sick are, *i.e.*, you and your brother are sick.

Case.—Cases are formed by suffixes, added to the nominative, which remains unchanged. The accusative and genitive usually take no postpositions. The genitive precedes the noun on which it is dependent. The nominative sometimes takes *no* (corresponding to the Lhōtā *nā*) when it is the subject of a transitive verb. Mr. Davis has only heard it used with interrogative pronouns. *No* is also occasionally used as a suffix of the genitive, generally with proper names. *Nā* serves the same purpose in Semā. We may also compare the Āo Locative suffix *nung*. For the Accusative verbs of asking require the suffix *ki*. The usual suffixes are,—

nu, in, to, or from.

lā, for.

pē, by (literally ‘taking in the hand and carrying,’ hence only used with inanimate nouns).

ki, to, used with proper names of persons only. Proper names of places take no suffix in the dative.

Examples of the various cases are the following :—

Nominative,— *Themmā hā-u vor-wē.*

Man this came, this man came.

Sopo-no hā-u chi-lē-wē?

Who this did?

Accusative,— *Ā themmā hā-u ngu-lē.*

I man this saw, I saw this man.

Po-ki ketsochē.

Him ask.

Po-ki rakā chālēchē.

Him money ask-for, ask him for money.

Instrumental,— *Nhā-si pē po vā pevülē-nitā-shē.*

Jungle-fruit by his belly to-fill-wished, he wished to fill his belly with jungle-fruit.

Dative,— *Ā tisonhā lē nu tsu-yā-wē.*

I daily fields to go-habitually, I go to the fields every day.

Po Sāhā ki vo-te-wē.

He the-Sāhib to went, he went to the Sāhib.

but

Ā Kohirā vo-te-wē.

I to-Kohimā went, I went to Kohimā.

Ā ā-sāzāu lā kwe po lē-to-wē.

I my-brother for cloth a take-will, I want a cloth for my brother.

Ablative,—	<i>Ā thevā lē nu vor-wē.</i> I at-dusk the-fields from came, I returned at dusk from the fields.
Genitive,—	<i>Themmā hā-u zā.</i> Man's this name, this man's name. <i>Lhurukrē-no mā.</i> Lhurukrē's men. <i>Luvanu-no ki.</i> Luvano's house. <i>Nō ki-u-no rā mā gā ?</i> You what-of village man are ? <i>Ā Kekia-no renā mā po wē.</i> I Kekia's village man one am. Locative,— <i>Lē nu thezu chāperē-wē.</i> Fields in rats many-are, rats abound in the fields.

There are many other such postpositions; *e.g.*, *mho*, *mho-ghī*, on; *ki*, *vākri*, across; *lā-nu*, according to; *dā-nu*, between; *ki*, by; *ghī*, above; *mho-dzū*, before; *sā*, behind; *zē*, with; *krā*, below; *matsā-nu*, through; *sā*, except.

Adjectives.—When it is necessary to clearly distinguish the gender of the noun with which it agrees, the addition of the suffix *pfū* makes an adjective feminine. Thus, *the-nu ke-vi-pfū po*, a good woman. Otherwise, adjectives undergo no change. An adjective follows the noun it qualifies, unless it is so intimately connected with the noun it qualifies as to form one compound word with it. Thus, *themmā ke-vi po*, a good man, but *kevi-mā po*, a good man *par excellence*, *i.e.*, a warrior. So *lu-krō*, that month, *i.e.*, last month; *hāu-krō*, this month, *i.e.*, the present month.

The particle of comparison is *ki*. Thus,—

<i>Themmā</i>	<i>hā-u</i>	<i>lu</i>	<i>ki</i>	<i>vi-wē.</i>
Man	this	that	than	good-is, this man is better than that.
<i>Sibo</i>	<i>hā-u</i>	<i>petē-ko</i>	<i>ki</i>	<i>zhā.</i>
Tree	this	all	than	large, this tree is the largest of all.

The numerals are given in the list of words. They follow the words they qualify. Thus,—

<i>Te-fūh</i>	<i>ke-zhā</i>	<i>sē.</i>
Dogs	large	three, three large dogs.

Ordinals are formed by adding *u*, he who is, to the cardinals. Thus, *po*, one; *po-u*, he who is one, first. We have also *ke-rā-u*, he who is in front, for 'first,' and *ke-nā-u*, he who is behind, for 'second.'

Pronouns.—The following are the *Personal Pronouns*. They have a dual,—

Singular,—	<i>Ā</i> , I	<i>Nō</i> , thou	<i>Fo</i> , he, she, it.
	<i>Ī</i> , my	<i>Un</i> , thy	<i>Po</i> , his, her, its.
Dual,—	<i>A-ro</i> , thou and I.	<i>U-nā</i> , <i>ne-nā</i> , you two.	<i>Hā-nā</i> , they two, near.
	<i>He-nā</i> , he and I.		<i>Lu nā</i> , they two distant

Plural,— *He-ko*, (I and you), *Ne-ko*, you. *Hā-ko*, *u-ko*, *li-ko*, *lu-ko*,
u-ko (I and they), they.
 we.
He-ko, *he*, our. *Ne-ko*, *nē*, your. *Hā-ko*, etc., their.

The genitive is in most cases the same as the nominative. The *n* in *un*, thy, is very faintly sounded. These genitives always precede the nouns on which they depend. Thus, *ā nupfö*, my husband; *un ki*, thy house.

The *Demonstrative Pronouns* are,—

Hā-u, feminine *hā-pfū*, this. Plural, *hā-ko*.
Lu, feminine *lu-pfū*, that. Plural, *lu-ko*.

There is no *Relative Pronoun*. The suffix *u*, he who is, feminine *pfū*, she who is, plural *ko*, is used instead. Thus,—

Themmā ke-vor-u,
 Man come-he-who-is, the man who is come.

The-nu lu ki nu ke-bā-pfū.

Woman that house in dwelling-she-who-is, the woman who lives in that house.

The *Interrogative Pronouns* are,—

So-po, feminine *so-pfū*, who?
Ki-u, feminine *ki-pfū*, which? adjective.
Keji-po, *kedi-po*, *so-po*, what?

The *Reflexive Pronoun* is formed by suffixing *thē* or *thā*, as *ā-thē vor-wē*, I came myself. *Ā-thē*, I myself. *Ā-thē ā-*, my own; thus, *ā-vē*, my property; *ā-thē ā-vē*, my own property.

Verbs.—There are five different verbs, with different radical meanings, which are used to express the verb substantive. The most common is *bā*, be. The others are *to*, root meaning 'exist'; *zhū*, root meaning 'recline'; *ni*, root meaning 'possess'; *tā*, root meaning 'stand.' Verbs do not change for gender, number, or person. Tenses are formed by suffixes. As in other cognate languages, there is little or no distinction between present and past time. The main distinction is between time which is future (indicated by the suffix *to*) and time which is non-future (no special suffix). Every verbal form which contains a direct statement usually ends with the syllable *-wē*, closely corresponding to what is called the categorical *ā* in Muṇḍā languages. This syllable (which is sometimes dropped when no ambiguity will ensue) serves to define the verbal character of the word to which it is suffixed. It hence converts adjectives and nouns into verbs. Thus, *mā po*, a man, *mā-po-wē*, (I) am a man (of such and such a village): *ke-vi*, good; *vi-wē*, is good. It is most often dropped in the past and in the future. Two other suffixes which should be noted are *shi* and *lē*. They do not appear to affect the meaning of the verb in any way. They are, however, generally (unless they accompany the *to* of the positive future) used with a past tense, either singly or both together. Some verbal roots can take either of these suffixes, while some affect one and some the other. The root meaning of *shi* is 'to place,' and that of *lē* either 'to take' or 'to go.' Instead of *wē* we often meet the suffix *m'*, which is used in exactly the same way, and is quite as common. Thus, *ā puwē* or *ā pum'*, I speak; *ā pushiwē* or *ā pushim'*, I spoke;

po so-du vortowē or *vortom'*, he will come to-morrow. Subject to these remarks, the tenses of the Angāmi verb may be said to be formed as follows :—

The suffix of the present, of the present definite, and of the imperfect is merely the categorical *wē*. Thus, *ā pu-wē*, I speak, I am speaking, or I was speaking. So also in the past.

A present definite is also formed by *zhü*, as in *sī tetsu-zhü-wē*, the tree is falling.

The suffix of the present habitual is *yā-wē*, as *ā tisonhā pherē-yā-wē*, I am in the habit of walking daily.

The suffixes of the past tenses, generally, are *wē*, *lē-wē*, *lē*, *shi-wē*, or *shi-lē-wē* as—

Ā injōsā po ngu-wē.

I last-year him saw, I saw him last year.

Ā un-ki ke-pu mhodzū po ngu-lē-wē.

I thee-to speaking before him saw, I had seen him when I spoke to you.

Ā mhā-chi-lē-wē.

I thing-ate, I have eaten.

Ā po-ki pu-shi-wē.

I him-to spoke, I spoke to him.

The suffix of the positive future is *to-wē* or *to*. Thus, *ā vor-to-wē* or *ā vor-to*, I shall come.

The suffix of the negative future is *lelho* or *lelho-wē*, as *ā vor-lelho-wē*, I shall not come.

The suffix of the future of doubt is *nhiū* or *nhā*, added to the positive future, as *ā vor-to-nhiū*, I may come.

The suffix of the imperative is *chē* as *pu-chē* or *pu-shi-chē*, speak; *vū-chē*, strike; *totā-chē* or *totā-lē-chē*, go away. In the third person of the imperative, the suffix *bo* or *bu* is added to the subject, as *po-bo ki-nu vor-chē*, let him come into the house.

Similarly, *mi-thu-bu tizā nu lē-hē-chē*

cows-permit garden in enter-not-(imperative suffix), don't let the cows into the garden.

Lhurukrē-bu pu-shi-chē, let Lhurukrē speak.

Ā-bu to-tā-chē, let me go.

Ā-bu un kithā kemhā chi-chē, make me as one of thy hired servants.

This is properly a causative or permissive particle. It can be attached to any noun or pronoun, and when this is done the verb acquires a permissive or causative sense. Compare causal verbs below.

The negative imperative is formed by inserting *hē*, as *pu-hē-chē* or *pu-shi-hē-chē*, do not speak; *zē-chē* or *zē-lē-chē*, sleep; *zē-hē-chē* or *zē-lē-hē-chē*, do not sleep. When the suffixes *shi* and *lē* are used with the positive imperative, and when they are not used with the negative imperative, the suffix *chē* can be omitted: *to-lē-chē*, *to-shi-lē-chē*, *to-lē*, or *to-shi-lē*, move on; *po-ki pu-shi*, tell him; *po-bu vor-hē*, do not let him come.

The suffix of the conditional is *rā*, as *po vor-rā*, if he should come.

The suffix of the infinitive of purpose is *lō* added to the positive future, as—

Ā un-ki pi-to-lō vor-wē.

I your-house to-see came, I came to see your house.

The suffix of the future infinitive is *ye* added to the infinitive of purpose. The whole is then conjugated as an independent verb, as—

Ā tā-to-lō-ye-wē.

I about-to-start-was, I was going to start.

The suffix of the adverbial present participle is *ki*, in, the prefix *ke* being also used as explained above. Thus,—

Ā dē ke-pu-ki themmā lu ā vū-wē.

I words speaking-in man that me struck, while I was speaking that man struck me.

The suffix of the past (or conjunctive) participle is *di*, with or without the prefix *ke*. as—

Po dē pu-di, tā-te.

He words having-spoken, went-away; having spoken, he went away. *Ke-zā-wā-di*, having divided.

The idea of passivity is indicated by the suffix *te*, which, if it is not followed by *wē*, is pronounced *ta*; thus, *po andu ngu-te*, he was seen yesterday. Sometimes *wāte* is used, as *ā vū-wāte*, I was beaten, also *wāho*, as *ā vū-wāho*, I was beaten. This *wā* is merely an intensive infix. See below.

The suffix *te* is also used with intransitive verbs, as in *themmā hāu vor-te-wē*, this man has come. *Ho* often merely emphasizes a verb, as in *po vor-mo-ho*, he has not come.

As in other connected languages, Angāmi uses a large number of infixes which can be added to a verbal root in order to modify its meaning. The following are a few of these infixes which occur in the parable of the Prodigal Son. There are many others.

Infix.	Meaning.	Examples.
<i>hu</i>	entirely	<i>mhā-chi-hu-lelho-di</i> , things to eat all not being able.
<i>lā</i>	again	<i>ngu-lā-lēwē</i> , found again is.
<i>mē</i>	always	<i>to-mē-yā</i> , living always are.
<i>nī</i>	desire	<i>pevūlē-nī-tā</i> , to-fill desire was.
<i>pi</i>	much	<i>chi-pi-tādi</i> , arisen greatly having.
<i>prē</i>	all	<i>kezēchi-prē-rū</i> , together-feasted all having.
<i>pu</i>	all, entirely	<i>peji-pu-ā</i> , lost entirely.
<i>se</i>	very	<i>nī-se-di</i> , glad very being.
<i>tā</i>	entirely	<i>mhā jī-tā-tā</i> , things wanting entirely were.
<i>tē</i>	entirely	<i>chi-tē-lē-di</i> , devoured entirely having.
<i>wā</i>	gives an intensive force.	<i>tsū-wā-chē</i> , give out and out.
<i>zo</i>	gives emphasis	<i>un vē zo-lē</i> , your goods assuredly-are.

The last mentioned, *zo*, is always used in the formula for oaths: *ā un vē regu mo-zo*, I your things steal not-most-assuredly, I assuredly did not steal your property.

Reciprocity is expressed by prefixing the syllable *ke* to the verbal root. Thus:—*mengu*, desire, love; *ā-vo kemengu-to-wē*, we two will love each other: *vū*, beat; *kenu*, mutual beating, to fight: *ngu*, see; *kengu*, to see each other, to meet; *henū chā-nu kengu-wē*, we two met on the road: *zā*, share; *kezā*, to divide.

Potentiality is indicated by the suffix *lēto*, as in *ā tā-lēto-wē*, I can go. The negative of this is indicated by the suffix *kalēji*, as *ā tā-kalēji-wē*, I cannot go. Here *kalē* means

‘physical power,’ and *ji* is the negative verb substantive. Potentiality is also expressed by the words *vi*, good, and *shā*, bad, used with the verbal root with *lē*. Thus, *ā thā Khonorā ro-lē-vi mu shā-gā*, I to-day Khonoma to-go well or bad is? can I go to Khonoma to-day? The same construction occurs in Āo with the words *zung*, good, and *māzung*, bad.

The idea of a frequentative verb is indicated by the suffix *tāzo*, as *ā tā-lāzo-wē*, I go frequently. The same suffix signifies continued action, as in *ā chī-tāzo-wē*, I go on working.

A verb becomes causal by suffixing *bu* or *bo* to the object (compare the 3rd Singular Imperative). Thus *po the-vo kwē-wē*, he tends or tended pigs, but *ā po-bu the-vo kwē-wē*, I caused him to tend pigs.

The negative particle is *mo*. The tense suffix *wē* may be omitted when it is used. It is suffixed to the verb, before *wē*, *lē*, or *te*, when they are employed. Thus, *ā pu-mo*, I did not speak; *ā po ngu-mo-wē*, I did not see him; *po betā-wā-mo-te*, it was not broken. When both *lē* and *wē* are used, *mo* comes between them, as *ā si-lē-mo-wē*, I did not know. When both *te* and *wē* are employed, *mo* precedes both, as *po vor-mo-te-wē*, he did not come. Regarding the negative imperative, see above.

Angāmi possesses a negative verb substantive, *ji* or *ji-wē*, is not. Thus, *rakā jirā neko mhā-po-ri kri-lelho-nhā*, money not-being you anything buy-will-not-perhaps, if you have no money, you will probably not be able to buy anything.

The interrogative particles are *gā*, *ro* and *mā*. They are always placed at the end of a sentence. *Gā* and *ro* are used with interrogative pronouns, *mā* without. Thus,—

No kitsā ro-to-gā (or *ro-to-or*) ?
 You whither will-go? where are you going?
No vor-to-mā ?
 You will-come? are you coming?

When *gā* and *ro* are used without an interrogative pronoun, they must be preceded by the words *mu-mo*, or not, thus,—

No lē-nu tsu-to-mu-mo-gā ?
 You field-to will-go-or-not? are you going to the field?

Any word can be treated as a verbal root, and conjugated throughout. Thus, from *ke-vi*, good, we have *vi-wē*, it is good. From *ki-u*, which? *ā ki-to-gā*, what shall I do?

The word *pe* prefixed to an adjective converts it into an adverb. Thus, *vi*, good; *pe-vi*, well. Adverbs cannot be treated as verbs. Thus, *pevilēchē*, is meaningless, and does not mean ‘do (it) well.’ In such cases another verbal root must be prefixed, as in *hāu chī-pe-vi-lē-chē*, this make(*chī*) well, do it well.

Order of Words.—The usual order is subject (with its adjuncts), direct object, indirect object, verb. Adverbs usually follow the words they qualify. When they qualify verbs, they usually, but not always, follow the root. Thus *pevi* is ‘well’ and *chī-pevi-lēchē* means ‘do it well.’ The adverb *lā*, again, precedes the roots of intransitive verbs, and follows those of transitive ones. Thus, *lā-vor-chē*, come again; *chī-lā-shichē*, do it again.

I your wife will-be,' saying, Jesu (said), 'come, us-two house-to go-let.'

FREE TRANSLATION OF THE FOREGOING.

How Jesu got a goddess for his wife.

Jesu's wife died, leaving him two children, a daughter and a son. Some one would not let these two draw water from the (village) well, so they came and said to their father, 'our villagers would not let us get water from the well. What shall we do?' Then Jesu saying, 'O, never mind, I will make a new well for you,' and accordingly made a new well. Afterwards his children went for water, but the water was all muddy, and when the children came back, their father said, 'why have you brought dirty water?' (They replied), 'O father, we don't know. Somebody has been there before us and has dirtied the water.' (Jesu said) 'Don't tell lies, no one has been there. If you tell me lies, I will beat you.' '(All right),' they said, 'if you say we are lying, go one morning and get water, and then come back and rate us.' So their father went one morning and got water. He found the water dirty and said, 'O, my children spoke the truth. Who has dirtied the water?' So taking shield and spear, he went and watched the water. And (as he watched) goddesses came down and drew water. There was a big stone at the edge of the well, and the goddesses put down their head

ropes (*i.e.*, head bands used for carrying loads) on the stone and bathed. Jesu, on seeing this, stole away a head-rope, and after stealing it, sat upon it. Then the rest exclaiming,

‘If water (quick) we do not bring,
Our parents us will rate,’

went away. And she who had lost her head-rope cried out, ‘O comrades, wait for me, I can’t find my head-rope.’ But her comrades had gone without waiting for her. When her companions had all gone, Jesu came forth and seized her, saying, ‘what is your name? Unless you tell me your name, I won’t give you back your head-rope.’ She (replied), ‘I will tell you, my name is Vihuju.’ Then Jesu said, ‘Be my wife, and I will give you back your head-rope.’ (She replied) ‘O then, I will be your wife.’ Jesu (then said), ‘come along let us go home.’

DZUNĀ, NĀLI OR MIMĀ, KEHENĀ.

These three dialects are all spoken in the Nāga Hills District, to the south of Kohima. Dzunā is the most northern. Then comes Mimā, spoken only in the village of that name, while Kehenā is the most southern of the three. The numbers of their speakers are given on p. 205.

I am indebted to the kindness of Captain A. E. Woods, I.S.C., and Lieutenant W. M. Kennedy, I.S.C., for lists of words in these Nāgā dialects. It was only after many attempts that these lists were obtained, and they both state that they found it extremely difficult to obtain accurate renderings of some of the forms. They, hence, cannot guarantee absolute correctness. No one is in a better position than the writer of these lines to appreciate the care and labour which have been expended in supplying materials for the Survey from this polyglot district. Of most of the languages illustrated little except the names has hitherto been known, and this opportunity is gladly taken of acknowledging the debt which linguistic science owes to these gentlemen.

It will be seen that these dialects bear a very close relationship to Tengimā. Kehenā alone shows any striking points of divergence. The following are the principal points of difference in the grammar of each dialect:—

In Dzunā, the principal differences are in vocabulary, not in grammar. The participles, as is seen from Nos. 169-174 of the list of words, are formed differently, and the interrogative particle is *kē* or *gē* instead of *gā*.

In Nāli, the suffix of the dative is *kēi* and of the ablative is *kēilo*, instead of *ki* and *kinu*, respectively. There is a contracted dual in *popo-nnā* instead of *popo kerna*, two fathers. The particle of interrogation seems to be *ghē*.

In Kehenā the relative particle is usually written *o* instead of *u*. The suffix *mā* sometimes becomes *mī*, as in *relimī keshā po* for *relumā keshā po*, a bad girl. The suffix of the ablative is *kinā*, instead of *kinu*. The comparative is construed with the ablative and not with the dative, see No. 133. The pronoun of the first person is *i* or *ā*, with a plural *hā-ko* instead of *he-ko*. Regarding this pronoun Lieutenant Kennedy states that *i* and *ā* cannot be used interchangeably, but that he has not been able to find out when one should be used and when the other. *Ilī-o* is ‘this,’ and *lu-ā* is ‘that.’ In verbs, the suffix of the past is *lū*, and of the imperative *lē* or *lē-tē*. The interrogative particle is *ghē*. Generally speaking the pronunciation of this dialect is broader than that of Tengimā, and the vowel *ā* is much more common than in the standard form of speech.

Regarding these three dialects Mr. A. W. Davis, I.C.S., writes to me as follows :—

The differences from the standard dialect, which, so far as McCabe's Grammar is concerned, is a blend of the language as spoken in the villages of Mezoma, Jotsoma, and Khonoma, are not very great, and hardly amount to more than the usual variations from village to village, which occur in all these languages that we know. There are great differences, both in vocabulary and pronunciation, for instance, between Mezoma and Kham amongst the Angāmis, between, say, Firui and Mekula amongst the Lhūtās and between Nunkam in the south and Deka Haimong in the north of the Ao country.'

SIMI OR SEMA.

Very little has been known about this tribe or its language till of late years. The first person to describe them was Damant, in his article quoted below, which was published in 1880. It is true that the Rev. N. Brown in the year 1851 published a vocabulary of Mulung or Sima,¹ but an examination of the words entered therein shows that they have only a distant resemblance to the Semā described in the following pages, and belong to some other dialect closely connected with Tablung. The only full account of this tribe is that written by Mr. Davis in the Census Report of Assam for 1891. From this I take the liberty of quoting the following extracts :—

Of this large tribe, who call themselves Simi, but are known to us by their Angāmi name of Semā, there are only nine villages within the [Nāga Hills] district boundary. Outside the district there are about 70 villages belonging to the tribe. The Semās occupy the whole of the Tizu valley, and the whole of the country on the right bank of the Doyang, from the junction of the Sijju and Zulu rivers to the point where the Teshi river flows into the Doyang.

The Semās differ in language, customs, and appearance from the tribes near them. Their language is more like Angāmi than it is like any of the other languages spoken in this district.

The Semās are the most barbarous and savage tribe with which we have yet come in contact in these hills. But four years ago the custom of head-hunting was in full swing amongst all the villages to the east of the Doyang river, and the use of money was unknown to almost every village of the tribe. That this should have been so is not surprising, regard being had to the fact that the Semās have never had any chance of intercourse with the plains, and were beyond the limits into which the most enterprising traders would venture, owing to their treacherous and blood-thirsty habits. In treachery and lying they were and are quite unsurpassed, even amongst Nāgās: to entreat a man well, who came to your house as a guest, and then when he was off his guard to kill him was not considered by a Semā to be other than a meritorious action. A Semā oath is worth less than the oath of any other Nāgā tribe; not excepting the Aos, who, as liars, run a good second to the Semās. Judged by the Nāgā standard, the Semās are good fighting men, and were much respected by their neighbours. Towards the north they kept the Aos in a continual state of dread, and were gradually ousting them from the possession of a great deal of valuable land. Our occupation of the Ao country has, however, stopped this movement, and the only outlet for this rapidly increasing tribe is towards the east.

Semā has only been reported as spoken in the Nāga Hills district and in the independent country to its east. The number of speakers is estimated at 26,400. Of these, 5,200 inhabit the revenue-paying area of the Nāga Hills district, and as many outside it, but within political control. Outside that control there are possibly another 16,000 or so. Two dialects are reported, *viz.*, Simi and Zhimomi, but the relative proportions existing between the speakers of each have not been recorded. The specimens and the list of words show that, as stated by Mr. Davis, the Simi dialect is not widely different from Angāmi. No specimens have been obtained of Zhimomi. I am indebted to Mr. A. W. Davis, I.C.S., Inspector General of Police, Assam, for the following three specimens of Semā :—

The following is a list of authorities on Semā,—

DAMANT, G. H.,—*Note on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers.* *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 247 Mr. Damant classes Semā with Lhotā and Hatigorrā, *i.e.*, Ao, as belonging to the Central Nāgā family, while he classes Angāmi as belonging to the Western family. The two languages are, however, really somewhat closely connected. There is a short Semā vocabulary on p. 257.

A. W. DAVIS, I.C.S.,—*Report on the Census of Assam for 1891* by E. A. Gait. On pp. 163 and ff. there is a note by A. W. D. on the various Nāgā languages, containing comparative vocabularies of several, including Semā. On pp. 246 and ff., there is an account of the tribe from the pen of the same gentleman.

¹ *Journal of the American Oriental Society*, Vol. ii, 1851, pp. 159 and ff. This Sima is a village near Tablung and has nothing to do with the Simi or Semā tribe.

The following imperfect sketch of Semā grammar is based on the forms found in the specimens and list of words and on information kindly supplied by Mr. A. W. Davis, I.C.S. :—

Prefixes and Suffixes.—These are much the same as in Angāmi. The prefix *ki* or *ke* is used with adjectives and participles. Thus, *ki-vi*, good ; *ke-sā*, bad ; *ki-je-na*, dividing ; *ki-tzi-shü*, having collected.

The prefix *ti* or *thi* is used like the Angāmi *the*, as in *mi*, *ti-mi*, or *thi-mi*, a man.

As in Angāmi, parts of the body and nouns of relationship require a pronominal prefix. Thus *pā-pfo*, his belly ; *i-pu*, my father. There is, however, this difference, that when it is not stated to whom the member or relation belongs, the prefix is *ā*, which probably originally meant 'his,' but does not now appear to be used in that sense. This prefix *ā* is of very common occurrence, and is used with nouns and adjectives of all kinds. Thus, *ā-ki*, a house ; *ā-zu*, water ; *ā-tsü*, a dog. In these last cases, the original meaning of the *ā* is doubtful.

The Article.—The indefinite article is the numeral *lāki*, one. Thus, *mi lāki*, a man. The definite article is formed, as in Angāmi, by suffixing the relative particle, *u*, he who is. Thus *ā-kiti-u*, the younger.

Gender.—The generic particles which I have noticed are *tsü* for the masculine, and *ku* for the feminine. Thus, *ā-mishi-tsü*, a bull ; *ā-mishi-ku*, a cow. The Angāmi feminine termination *pfü* is also used, as in *ā-ni-pfü*, a wife.

Number.—The definite plural is formed, as in Angāmi, by suffixing *ko*, when necessary. Thus, *ti-mi lāki*, a man ; *ti-mi-ko*, (the) men. Sometimes *no-ko* is used, as in *i-pu-no-ko*, my fathers.

Case.—The Nominative, Accusative, and Genitive usually take no suffixes. The nominative may optionally take the suffix *nā* before a transitive verb. The genitive precedes the word which governs it. It sometimes takes the suffix *nā*. Thus, *pā-nā-ghā mi lāki ki-lā gvā-no*, having gone to the house of one man of that village. Note the position of the *nā*. Compare the position of *ko* mentioned under the head of adjectives, below.

The principal suffixes of case are *lā*, to, in ; *vülā*, to ; *lā-āno*, from ; *ngu*, from ; *sā*, with.

Examples are *ki-lā*, to the house, in the sentence just quoted ; *ālu-lā*, in the fields ; *kyē-mi vülā ātsā pisilē*, he spoke an order to the servants ; *ālu-lā-āno*, from the fields ; *pā-ngu ininu-velā*, he asked from him ; *ketākālimi sā*, with harlots.

Adjectives follow the noun they qualify as in Angāmi. Thus, *ti-mi ā-kivi lāki*, a good man. The plural suffix seems to be added to the noun and not to the adjective. Thus, *ti-mi ko ā-kivi*, good men, not *ti-mi ā-kivi ko*. The adjective prefix is *āke* or *āki*, corresponding to the Angāmi *ke*. Thus,—

Semā.	Angāmi.	
<i>āki-vi</i>	<i>ke-vi</i> ,	good.
<i>āke-sā</i>	<i>ke-shā</i> ,	bad.
<i>āke-lu</i>	<i>ke-lē</i> ,	hot.
<i>āke-tso</i>	<i>ke-tā</i> ,	true.
<i>āke-tsu</i>	<i>ke-ti</i> ,	black.

The following is a good example of comparison,—*ā-phi kemetsü ā-gwolho ā-kivi-r*.
clothes all among that-which-is-good, *i.e.*, the best garment.

Pronouns.—*First person.*—This is *ngi*, plural *ngi-ko*, *ngingu-ko*, or *ningu-ko*. The sign *ko* of the plural can be omitted when no ambiguity will occur. This pronoun takes the form *i* or *ni* in composition. Thus, *i-pu*, my father; *i-sāzē*, my share; *i-pu*, my property; *i-tsü*, give to me; *i-ki-lā*, or *ni-ki-lā*, to my house. We have, however, *ngi-vüllā*, to me.

In the second specimen there are several instances of the dual. The following are typical instances,—*ā-kuzá povēnya*, we two, *i.e.*, you and I, shall elope; *pā-pu pā-zā nikuzo kuchelu-velā*, her father and her mother calling took us two, *i.e.*, her and me away; *ni-kuzá āu-lā*, we two (she and I) remained (in Kukia's village).

Second person.—This is *nā*, plural *nā-ko* or *nangu-ko*. In composition, this pronoun takes the form *un* or *u'*. Thus, *un-pu* or *u'-pu*, your father.

The pronoun of the *third person* is *pā*, plural *pā-ko*. In composition it retains its form, as in *pā-pu*, his father.

Examples of other pronouns are *i-nu hi*, this my son; *likā hipāhi*, this rupee; *hipā me*, the price of that; *kivi*, who? *kivitai*, what? *kiu-nu*, whose son? *kiu shi-ai*, what is being done; *nā kiutá pfundā ā-kuzá chi-chenyi*, you, what carrying, we two shall eat; how will you carry away enough to provide us with food? *ngi kisingo Toswelhē lunyēāi*, I what-doing Toswelhē take-can? how can I get hold of Toswelhē?

Verb.—The verb substantive is usually *ā-ngi* or *ā-ni*, which is used both for present and past time, and which corresponds to the Angāmi *ni*. Thus, *ā-ki ki-thum lahē i-pu ā-ngi*, my father dwells, *lit.* is, in the small house; *pā-nu kinni ā-ni*, his-sons two were, he had two sons. The second singular is contracted to *nā-ngi*, thou art. Other verbs of this nature appear in *i-nu, nā ā-lholochu i-sā ā-chē*; *i-gwu kemetsü ungwu suchē*, my son, thou always with me art; all my property your property is. The root *ā* (which is also written *āu*) means 'to be' or 'to remain,' and corresponds to the Angāmi *bā*. On the other hand, *(ā-)chē* is the exact equivalent of the Angāmi *to*, to exist. Thus—

Angāmi, *no rakā pfü-to-mu*

Semā, *nā likā pfü-chē-mo*

English, you money carrying-are?

have you any money about you? *Su* = become; *su-chē*, *lit.*, = is becoming.

As in Angāmi, the main distinction in verbs is between non-future (*i.e.*, both present and past) and future time. The simplest form of the non-future tenses is the plain root of the verb, the commonest suffix is *lā* (or *lāung*, as in *i-tsü-lālē-lāung*, promised to give me; *ni tivenchē-lāung*, I will die), which is simply a categorical suffix like the Angāmi *wē*, and can be used with any tense. Instead of *lā*, *vē* (also corresponding to the Angāmi *wē*) may be used. This *vē* sometimes drops the initial *v* after a vowel, and we have only *ē*. When *vē* and *lā* are combined we get *velā*, which gives a past significance. Thus *pi-velā*, he said. When *vē* is suffixed to the verb *gwo* or *gwē*, go, it has the force of the Angāmi *tā*, 'away.' Thus *gwo-vē*, or *gwē-vē*, go away. On the other hand, the verb to come is *gwāgi* or *gwegi*. Corresponding to the Angāmi *shi* and *lē*, we have *sü* or *si* and *lu* respectively, and one or other of these is generally added to the root of the

verb to form the imperative. Subject to the foregoing remarks, the following appear to correspond to the English *Present* tense :—

ngi gwo-lā, I go.
pā gwo-vē, he goes away.
pā bu-ē, he strikes.
pā gwo, he goes.

The following may be classed as *Present Definite* :—

i-nipfū ki-temi su-che-lā, my wife is becoming old.
un-pu ilhu-āni, your father is feasting.
itiyu kin-nu gwo-chē-ni, whose boy comes behind?
ningu kevi shi-āni, we are making rejoicing.
ilhu-ā, you are feasting. These are all formed with various verbs substantive.

As regards *Past* time, there is a great variety of suffixes. The following are the most important of those noted :—

(a) Sometimes there is no suffix at all, as in,—

pā gwo, he went.
pā pu pā-gwu ki-jē-pē pā-mā tsū, his father having divided his property gave it to them.
pā-nu pā-vülā pi, his son said to him.
pā pā-pu ki-lā gwo-vē, he went away to his father's house.
ngi isuzo ālāghi kasu gwāgi, I have walked a long way to-day.
un-tikezu gwāgi, your younger brother is come.
pā-pu ātsā pi-si-lē, his father spoke an order.
pā-pu pā-zā mo-i-lē, her parents did not say, *i.e.*, refused.
pā lu-mo-no ā-ki-lā gwāgi mo-i-li, he not being pleased did not say to come into the house, *i.e.*, did not wish to enter.
pā-pu pā sūto-li, his father entreated him.

(b) The suffix *lā* is common, as in,—

kinimi su-lā, we became rich.
Visāthā kūmsū āu-lā, love of Visāthā has arisen.
ngi kintimi-vülā pi-lā, I said to the woman.
ni-kuzā Kukiēnā-ghā-lā āu-lā, we two remained in Kukia's village.

(c) Much the most common, however, is a compound of *vē* and *lā*, which is written *velā*. Thus,—

ā-kiti-u ā-ghinā shē-shu-ghā gwo-velā, the younger son went to a distant village.
pā-gwu pu-kā-velā, he totally lost his property.
ngi ā-kesā shi-velā, I committed sin.
pā-ngu ininu-velā, he asked from him.
ā-pi kuhu i-tsū-velā, a red cloth was given to me.
pā Visāthā ki-lā nhi-velā, she married into Visāthā's house.

(d) Sometimes we find *lāung* used instead of *lā*, as in,—

ngi pā-nu bu-she-lāung, I have beaten his son with many stripes.

(e) Sometimes periphrastic forms are used with the verb substantive, as in,—

pā ti-vehutino pi-āni, he coming to himself said.
ngi ā-nipfū lunshi-āni; *putsā-āni*, I wished to take a wife; I made proposals.

As regards *Future* time, the most common suffix is *unchē* or *nchē*, as in,—

ngi kitāmi nu lu-nchē, I shall take another girl.

ā-kuzá zhē chi-unchē, we two selling shall eat.

ngi ā-māghā un-vūlā pi-nchē, I shall tell to you a love-philtre.

ngi un-tsü-nchē, I shall give it to you.

pā chi-lu-nchē, she will take to eat (*i.e.* smoke).

ngi pā-ki-lā nhi-nchē, I shall marry into his house.

Connected with this are,—

ngi bu-si-nchē-ni, I shall strike. Here *ni* is the verb substantive, and the phrase is, literally, I striking will be, as in Angāmi *ā vū-shi-to-bā*.

ngi tiu-ngi-nche-lā, I am at the point of death. (*Lit.*, I die-desiring-to-am. Here the *nchē* gives the force of the infinitive.)

ngi ēdēwū ngi-ghā-lā āu-ve-nche-lā, I again shall dwell in my own village. (Here *lā*, as in the preceding, is the categorical suffix.)

Similarly, *ngi ti-ve-nche-lāung*, I shall die.

Another form ends in *nyi* or *nya*, as in,—

ngi i-pu-vūlā pi-nyi, I will say to my father.

nā kiutá pfuná ā-kuzá chi-che-nyi, you what carrying, we two shall eat?
i.e., what will you carry away for us to live upon?

ā-kuzá po-vēnya, we two shall elope.

ā-kazá Kukiēnā-ghā-lā āu-vēnya, we shall remain in Kukia's village.

The *Imperative* is sometimes the bare root, as in *i-sāzē i-tsü*, give to me my share, and sometimes takes the suffix *sü* or *lu*, as in *bu-sü*, strike; *sturu jīn kā-sü*, 'put the saddle on the horse; *pā-pe-sü*, bind him; *kwe-lu*, put on. Regarding the negative imperative, see below.

The *Conditional* suffix is *zá* or *āzā*, as in,—

ngi un-nu i-li pi-āzā, I your-son saying if said, *i.e.*, if I were called your son.

nā un-nupfūlā i-ki-lā pi-nhi mo-i-za, if you do not give your daughter in marriage to my house.

un-gwu zē-chi khāvē-āzā, if, *i.e.*, when, your property has been sold and eaten and so used up.

kintimi ā-kivi lu-āzā, if you take a good woman.

nā-zā āghā ā-kwo-lāki pfē i-ketsu-ngu lēsu-mo, if you do not bring a load of love-philtre, and empty them on my head.

nā timà tū i-tsü-zā, if you give me something small.

ā-khāpuhu-lā āghā su-nā chi-āza, if you place the love-philtre in your hookah, and eat, *i.e.*, smoke, it.

The force of a *Conjunctive Participle* is usually given by the suffix *no*, which is sometimes spelt *nā* to which *ve* is occasionally prefixed. Thus,—

ā-mushi-no pā-gwu pu-kā-velā, having lived riotously he entirely lost his property.

pu-kā-ve-no, having lost entirely; *pukri-kā-ve-no*, a severe famine arose.

pā-ki-lā timini hā-no, there not being anything in his house; *pā-nā-ghā-mi lāki ki-lā gwā-no*, having gone to the house of a man of that village.

ā-khāti āgwo tsu lu-no, having taken the fruits eaten by pigs.
un-zu ā-kesā shi-ve-no, having committed sin before you.
likā ākhē tsü-nā, having given a hundred rupees.
moyā kessü hapfu-nā, secretly carrying-off two annas.

The following forms also occur:—

ki-jē-nā i-tsü, having divided give me.
ki-jē-pē tsü, having divided he gave.
pā-gwu ki-tzi-shü, having collected his property.
pā gwāgi ki-ti-li ilhu-ā, immediately on his coming you are giving a feast.
ā-ki-vülā gwāgi-che-lā, at the time of coming to the house.

The causal suffix corresponding to the Angāmi *bu* is *plo*, as in *pā-plo ā-gwo kyēani*, caused him to tend his pigs. Another causal form is made by prefixing *pi* to the verb, as in *nhi*, to marry (of a woman), *pi-nhi*, to cause to marry, to give a woman in marriage.

The *Negative particle* is, as in Angāmi, *mo*, which is used as follows:—

timmi-hē pā-tsü-mo, gave not anything to him.
pā lu-mo-no ā-ki-lā gwāgi mo-ili, he, not being pleased, said not, *i.e.*, desired not, to come into the house.
minyē-mo, I shall not love.

Other examples will be found above, under the head of the past tense.

In the imperative *tivi* is suffixed, as in *gwāgi-tivi*, do not come.

The negative verb substantive is *ākāhā*, which is only used in the third person. It is interesting as Semā is the only language of the western group in which the word *ākā*, is, occurs, while it is of very common occurrence in Āo. The *hā* in *ākāhā* is 'not,' and we see it again in the Angāmi negative imperative suffix *hē*. Compare *pā-ki-lā timmi hā-no*, there not being anything in his house.

FREE TRANSLATION OF THE FOREGOING.

Wishing to take a wife, I made proposals for a certain girl. Her father and mother refused to give her to me in marriage. I said to them, 'If you won't let me marry your daughter, I shall take another girl, and give two or three hundred rupees for her, so don't you worry yourselves.' The girl said to me, 'Kupu, you're a fine fellow, and I want to marry you, but my father and mother won't let me, so we must run off to another village.' I replied, 'What will you take with you for our support?' The girl said, 'When my father and mother are out of the house, I shall secretly carry off their money, and we shall live on that.' I replied, 'When we have used up all your property, and nothing is left, we shall be in trouble.' The girl said, 'When we have consumed it all, can't I work with my hands? Keep a good heart.' I said to her, 'Then we two shall elope, and remain in Kukia's village.' (So) we lived at Kukia's village. I became rich. As I had become wealthy, my wife's father and mother summoned us back, so I shall again return to my village, and live there. Again being rich, I became a great man. I was given a red cloth by Government. The Sāhib has promised to give me a gun. There is *shikār* to be had at my village and I want the gun for that. Since I married my wife eight years have elapsed. I have four sons and three daughters. My wife is getting old. I said to her, 'You are getting old, and according to our Semā custom I shall marry a new wife. Will you be pleased or not?' My wife said to me, 'Take her. If you marry a good woman I shall be delighted.'

¹ The word *kintimi* is used alike for 'male' and 'female,' the only difference being in the intonation. The *ki* in *kintimi*, 'female,' is pronounced in a higher key than the *ki* in *kintimi*, 'male.'

 'Visāthā, we-two together-live-if anything eat-to-is-not.'

FREE TRANSLATION OF THE PRECEDING.
 THE STORY CONCERNING VISĀTHĀ AND TOSWELHĒ.

CHARACTERS:

- (1) *Visāthā*—An elderly Semā, in love with Toswelhē.
- (2) *Toswelhē*—A Semā girl.
- (3) An old woman, famed for her love philtres.

Visāthā to Toswelhē. 'Oh Toswelhē, when I look at you, my mind is filled with joy. I shall marry you.'

Toswelhē to Visāthā. 'Visāthā, if you do not bring a load of love philtres and empty them on my head I shall not love you.'

(Visāthā consults the old woman.)

Visāthā to old woman. 'Old woman, I told Toswelhē that I wanted to marry her; (but) she said that if I give her not a love philtre to take, she will not marry me.'

Old woman to Visāthā. 'If you give me a small (present), I shall tell you about a love philtre.'

Visāthā to old woman. 'I shall give you one.'

Old woman to Visāthā. 'If you put the love philtre in a hookah, and sit near her, and smoke, she will take it and smoke (too).'
 (Visāthā does as advised.)

Toswelhē. By smoking Visāthā's hookah I have fallen in love with him. Call Visāthā, I shall marry him.
 She (accordingly) married Visāthā.
 (Some time after marriage.)

Toswelhē complaining to Visāthā. 'Visāthā, we two are living together, but we have not anything to eat.'

(The rest is omitted as being obscene, and of no linguistic value.)

RENGMĀ OR UNZĀ.

The seat of the Rengmās is in the Nága Hills to the south of the Lhôtās. Unlike the latter, whose speech is connected with Āo, and belongs to the Central Sub-Group of Nāgā Languages, Rengmā belongs to the Western Sub-Group, and must be classed with Angāmi, Semā, and Kezhāmā. It has Angāmi on its south and west and Semā on its east.

The members of the tribe call themselves Unzā, but about half speak what they call the Māyi Language, and the others what they call the Unzā. The whole tribe is known amongst themselves as Unzā. Māyi is said to be also spoken across the Tizu River outside British Territory. The Rengmā Nāgās are closely allied to the Semās. In Themokedima, the largest village of the tribe, the people are bi-lingual, *i.e.*, they all talk Semā (Simi) as well as their own language, and most of the village songs are sung in that tongue, and not in Rengmā. The name Rengmā itself is a foreign one, probably Assamese, and is unknown to the people themselves or any of their neighbours. Its origin has not been ascertained.

A version of the Parable of the Prodigal Son and a list of words in this language have been obtained with considerable difficulty by the Deputy Commissioner of the Nága Hills. They form the first attempt at reducing the speech of this savage tribe to writing and are confessedly imperfect. Many passages are extremely doubtful, and the spelling is not always consistent. So far as I could, I have separated out the various elements of each word by means of hyphens, but I have had to leave many riddles unsolved. In order to complete the materials for investigation, I have added a list of words (so far as they were available) taken from Captain Butler's vocabulary mentioned below. That is all that I have been able to do. The affinity of Rengmā with the Western Sub-Group is obvious. Mr. Damant's is the only notice of the tribe which I have found. It is as follows:—

The original site of the Rengma or Injang tribe, as they are called in their own tongue, is a tract of country lying between the Rengmapani and the Doyang rivers, where seven villages inhabited by this tribe are still to be found. They are surrounded by the Angāmi, Semā, and Lhôtā tribes, with whom they are constantly at war. . . . The largest villages are Themokdima and Tesephima, both of which contain more than 500 houses. Some years ago a number of them were driven out by the constant attacks of neighbouring tribes, and settled on a range of hills lying between the Mikir Hills in the Nowgong district and the forests of the Dhansiri. They now inhabit thirty small villages or hamlets and their population numbers about 2,000; this portion of the tribe is fast losing its savage customs, and taking to the habits of the people of the plains to some extent, while the others still retain their primitive simplicity.

The number of speakers of Rengmā reported from the Nága Hills district is estimated as follows:—

AS FOLLOWS:																
Unzâ	2,750		
Mâyi	2,750		
													TOTAL	.	.	5,500

The Census of 1891 gives the total number of Rengmās as 9,080.

AUTHORITIES—

BUTLER, CAPT J.—*A Rough Comparative Vocabulary of some of the Dialects spoken in the "Nága Hills" District.* *Journal of the Asiatic Society of Bengal*, Vol. xlii, 1873. Pt. I, App., pp. i and ff. Contains a number of vocabularies including one of 'Rengmā Nágá'

DAMANT, G. H., I.C.S.—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and the Ningthi Rivers.* *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 245 there is the account of the tribe above quoted, and on p. 256 a short vocabulary based on Butler's.

Many passages in the version of the Parable of the Prodigal Son, and many words in the list, are so doubtful, that it is impossible to compile a satisfactory account of the grammatical features of this language. The following notes, which have these materials for their only basis, must therefore be taken with every reserve. So far as I have been able to collate the facts, I here give the principal peculiarities of Rengmā grammar.

In the specimens there is no certainty as to the spelling of words. The same word is sometimes spelt in two different ways. Thus the word for 'son' is sometimes written *nyu*, and sometimes *nyo*. I have not considered myself justified in adopting a uniform spelling, unless it is clearly certain which of two alternative methods of writing is correct.

The **Prefixes** *ke*, *ka* and *the* are used much as in Angāmi. Thus *ke-gwā*, good; *ka-jē*, distant; *the-bā*, swine. *The* sometimes appears as *tā*, as in *The-ro-nyū*. God, which in the list of words appears as *Tā-ro-nyū*. The prefix *ā* is, as in Semā, of very common occurrence. It means both 'my' and 'his,' but has often merely the force of a definite article, as in *ā-nchegū*, the younger. There is a **Suffix** *nyu* or *nyū* corresponding to the Angāmi *mā* or *mī*. Thus, *Thero-nyū*, God; *kechi-nyu* (Angāmi, *ke-tekye-mā*), a servant; *āgo-nyu*, a servant; *āpfū-nyu*, a friend; *kāshu-nyu*, a harlot.

Article.—For the definite article, the prefix *ā* is used as shown above. For the indefinite article, the numeral *mē*, one, is employed.

Gender.—The only suffixes of gender which I have been able to identify are *tsē* for the masculine, and *lē* for the feminine. Thus *metu tsē mē*, a bull; *metu lē mē*, a cow.

Number.—The usual suffix of the plural seems to be *dang*, as in *metu tsē-dang* bulls. *Abong* occurs in *ā-pfū-ābong*, fathers.

Case.—The Nominative takes the suffix *lē*, much like the Āo *e*. This suffix is used before both transitive and intransitive verbs. In one case, apparently, *ē* is used instead of *lē*. Examples are *nyu-lē kohung bi-nē*, there were two sons; *ā-pfū-lē ā-zō-hā-shi*, his father said; *un-sī-kāzang-ē si-lā-se-lē*, thy brother died. The termination, as in Āo, is omitted when no ambiguity will ensue. Thus, *ā-nchegū ā-pfū-kā zō-lē*, the younger said to his father. The relative particle, corresponding to the Angāmi *u* is apparently *gū*, as in *ā-nche-gū*, the younger; *peshi-gū*, the elder.

The Accusative takes no termination, as in *ā-hong ā-pui un-kē-lā-lē*, wasted the whole of his property.

The Genitive takes no termination, and precedes the noun that governs it, as in *the-bā chu*, swine's food.

Other suffixes of case are *kā* or *kī*, to; *hu*, to; *ki*, from; *kā*, in; *nyū*, in; *ghenyu*, from; *sanho*, with. Examples, *ā-pfū-kā zō-lē*, said to his father; *ā-nyu-hu pī-sū-lā-tā*, gave to his son; *reni kaje-kī gū-ho*, going to a distant village; *ā-pfū-kī zō-lī-te*, will say to my father; *ā-kī kī-lo-tā*, take from him; *tsū-renyu-kā*, in that village; *lā-kā*, in a house; *lo-nyū*, in a field; *kā-nyū*, in the house; *kā-shu-nyu sanho*, with harlots.

Adjectives follow the nouns they qualify, and in that case, case- and number-suffixes are added to them, and not to the noun, as in *reni kaje-ki*, to a far country. They take the prefix *ke* as in Angāmi, thus, *ke-gwā*, good.

Pronouns.—It will have been noticed how economical Rengmā is in the use of the suffixes of case, the same syllable being used to illustrate such widely different ideas as 'to' and 'from.' This is also strikingly true with the personal pronouns, those of the first and third persons being identical in form. It is possible that in such cases the two words which are the same in appearance are distinguished by being pronounced with different tones, but no information is available on this point. The following are the forms of the personal pronouns which I have noted:—

First person.—Nom. *ā-lē*; *ā-nyo*, we; *ā-no*, to me; *ā*, my. The list of words gives the plural as *ā-pwi*, *aghu-nē*, *agun*, *hagha-lē*. The *nē* of the second form and the *n* of the third, may be corruptions of the Nominative suffix *lē*, or *nē* and *n* may be contracted forms of *nyo*. *Aghu*, *agu*, *hagha*, are almost certainly different ways of recording the same sound. In the list as received by me the only form recorded opposite No. 17 was *ā-pwi*. The other forms have been taken from other occurrences of the word 'we' in the list. The syllable *ā* is used as a pronominal prefix, meaning my, me, to me. Thus, *ā-pfū*, my father; *ā-tsü-tà*, give to me.

Second person.—Nom. sing. *nē*. For the Nom. plur. the list of words originally gave opposite No. 23 *apürenyi*, in addition to which other entries in the same list give *haghu-nē* and *lidan*. The *-nyi* in *apürenyi* is possibly the same as the suffix *nyu*. Compare *ā-nyo*, we. The gen. sing. is *un* or *u'*, as in *un-si-kāzang*, thy brother; *u'-hong*, thy property.

Third person.—The Nom. sing. is *ā-lē*. Other cases are *ā-kā*, to him; and *ā* common as a prefix, as in *ā-pfū*, his father; *ā-khu-lo-ho*, seeing him. For the plural the list of words gives *apürenyi*, and also *haghu-nē*.

Hī-lē is 'this.' *Tsü-gē*, pl. *tsü-nyu*, 'that'. *Tsü-renyi-kā*, in that village.

Sagē-ho, who? *ngutē-ho*, what? *tā-mē*, anyone. The interrogative particle is *ho* placed at the end of a sentence.

Verbs.—These present many points of uncertainty. As in Angāmi, the suffixes of the present and of the past tenses are the same, and the meaning of the verb must be concluded from the context.

The most common verb substantive is *bi-nē*, is or was. *Bi-nyong* is also common with the same meaning. *Āzang-he-lē*, thou livest with me. As in other connected languages, the verbal suffixes can be added to substantives, adjectives, etc., as in *u'-hong-nē*, is thy property.

In the case of other verbs, the most usual suffix of the present is *lē* or *nē* as in *vū-lē*, beats; *tē-bi-nē* is making. In *tē-bi-nyong*, was doing, *nyong* apparently gives a continuative or durative sense.

An example of the simplest form of a past tense is *zō-lē*, said. In *un-kē-lā-lē*, wasted, and *gū-rā-lē*, came back, *lā* and *rā* are infixes modifying the root-meaning, and not tense-signs. Other forms translated as past tenses are *pfsū-lā-tā*, gave; *zō-ā*, said; *ā-zē-hā-shi*, ordered; *zō-ni-shi-lē*, and *zō-ni-shi*, said.

The simplest form of the future is *vü-ti*, will strike. Connected forms occurring in the Parable are *kan-si-ti-si*, shall die, in which *si* is the root; *zō-ti-lē*, will say; *ā-kanü-ti-lē*, we will be merry. *Ā-nyo gü-dē-gwā-lē*, which I am unable to analyse, is translated, 'we will be happy.' The root *gü* signifies 'go,' and *gwā* means 'good.'

As in Kezbāmā, the imperative ends sometimes in *tà*, and sometimes in *lo*. Thus, *ā-tsü-tà*, give to me; *heki-rā lo*, come.

The infinitive of purpose seems to end in *ngon*, as in *nī-shi-ho tsügē kwē-bi-ngon*, sending him to feed. The form is, however, very doubtful. Possibly it is only incorrect for the durative suffix *nyong*.

The conjunctive participle ends in *ho*, as in *nī-shi-ho*, sending, and many others. Other forms translated as conjunctive participles are *kan-jipē*, dividing; *kekwe-no*, having collected; and, beside *gü-ho*, going, *gü-ngē*, going, and *gü-tsē*, having gone.

The causative particle, corresponding to the Angāmi *bu* is *no*, as in *ā-pui-no ā-kanü-ti-lē*, let us all be merry.

As an example of a desiderative verb, we may quote *tē-bi-sü-bi-nē*, wished to eat.

The negative particle is *mo* as in *ā-tsü-mu-ho*, not giving to him, here the *mo* is changed to *mu*, probably a false spelling; *ke-mo-tē-lā-si-lē* and *ke-mo-tē-lā-lē*, did not, the root being *tē*, do; *sā-ri-mo-lē*, broke-not; *ā-pfsü-mo-lē*, did not give to me.

thy-word broke-not, but my-friends with merry-making goat-child
 mē ā-pfsü-mo-lē. Tsānā u'-nyu hi-lē kā-shu-nyu zanho u'-hong
one to-me-gavest-not. But thy-son this harlots with thy-property
 ke-nji-nha-lē, ā-lē gworenyemho magui lē-bi-nā-sa-lē.' Sūkā ā-kā zō-lē,
wasted, he as-soon-as-he-comes feast gavest.' Then him-to said,
 'hirē, ā-nyu ā-ketōu-lē ā-zang-he-lē. Sānā ā-hong ā-pui u'-hong-nē.
'lo, my-son living me-with-art. And my-property the-whole thy-property-is.
 Tsānā un-sī-kāzang-ē si-lā-se-lē, rhāni gwo-re-lē; mhē-nā-ho, ni-lo-lē,
But thy-brother was-dead, alive came-again; was-lost, was-found,
 su-ghenyü u'-kānye-ho, kaiyütē-mu-tā-shu-lē.'
therefore to-be-merry, to-play-not-doing-bad-is.'

KEZHĀMĀ.

Regarding this tribe, I have even less information than concerning the Rengmās. They inhabit the south-eastern border of the Nága Hills district, and have the Angāmis immediately to their west and south. To their east are the wild little explored tribes of the unsettled country. To their north are the Semās. We know all their villages well. In appearance and customs they do not differ from the Angāmis in whose country their villages lie.

The Deputy Commissioner estimates that there are about 1,620 speakers of Kezhāmā. Their language differs considerably from Angāmi and Semā, but clearly belongs to the same sub-group. Through the kindness of the Deputy Commissioner, I am enabled to publish a version of the Parable and a list of standard words and sentences in the language, which do not profess to be altogether correct, and which were obtained with considerable difficulty.

I have not found any authority which deals with this people or their language.

The following account of the principal peculiarities of Kezhāmā grammar is based on the specimens which have been now made available for the first time. Everything that is said below must be taken with great reservation, for, owing to the difficulties experienced in obtaining the specimens, there can be no doubt that they contain several errors. Where I have been able, I have separated out the various component parts of each word by hyphens, but this has not been done uniformly, as I have left doubtful words untouched. In many places the interlinear translation is most uncertain, and, in some places, I have not been able to offer any translation at all. I can only therefore say that the following *appear* to be the noteworthy points of the grammar.

Nouns have a prefix *e*, corresponding to the Semā and Rengmā *ā*, which was originally the pronoun of the third person and means 'his,' but often has the force only of the definite article, or even has no meaning whatever, as in *e-nē me-chü*, a distant town. Corresponding to the Angāmi relative suffix *u*, we have *o*, as in *kachü-o*, he who was the younger. The Angāmi *mā*, person, is represented by *mi*.

In nouns, the nominative singular takes the suffix *nyi* before transitive verbs, corresponding to the Lhōtā *nā*. As in that language, the suffix can be omitted when no ambiguity will ensue. Thus, *kachü-o-nyi pu*, the younger said; but *pu*, not *pu-nyi*, *gwo-lā*, he went.

The genitive, as in other cognate languages, takes no termination, and precedes the governing noun, as in *sü e-nē mi kelē kē*, that town's man one's house, the house of a man of that town.

The dative takes the suffix *nhà*, as in *e-pfü-nhà*, to his father.

The locative takes *chē*, as in *e-lā-chē*, in the field, and *òzo* means 'with,' as in *krokromu-òzo*, with harlots.

The sign of the plural is, as in Angāmi, *ka*.

As regards pronouns, we have the following forms,—

Yē or *iyē*, I; *āwu-ko*, we. The word *rē* means 'property,' as in *ā-rē*, my property, but is also used to give the force of various cases to the personal pronouns, as in *ā-rē*, with me. *Ā*, by itself, is used as a prefix meaning 'my,' as in *ā-pfü*, my father.

No, 'thou' and 'you'; used as a prefix *i* means 'thy,' as in *i-pfä*, thy father; *i-vē*, thy property, with thee; *no i-vē*, means 'thy son.'

Pu, he; *āvu-ko* means 'they' as well as 'we.' The prefix is *e* or *pu*, as in *e-pfä*, his father; *pu-vē*, his property. *Pu-ē*, apparently for *pu-vē*, is 'to him'; *pu-nhà*, to him. The nominative before transitive verbs is *pu-nyi*.

Sü, that; *hi*, this; *tu-o*, who? *dì*, what?

As to verbs, we have *bā*, is, was. Adjectives take verbal terminations, as in *rē-ā*, it is good. The present tense in the list of words is not very clear, but it is probably meant that *yē-nyi dā*, means 'I beat.'

The usual suffix of the past tense is *nā*, as in *psü-nā*, gave; *chü-nā*, as well as *chü*, did. Sometimes we find *lá*, as in *gwo-lá*, went; *e-nyi-lá*, was happy. Another suffix is *ā* or *wā*, as in *pu-ā*, said; *gwo-ā*, has come; *me-lho-wā*, has given food. Finally, there are several instances in which no suffix is used, as in the present. Thus, *pu*, said; *gwo*, went; *chü*, did.

The suffix of the future is *dā*, as in *pu-dā*, will say; *e-nyi-dā*, will be happy.

The suffix of the imperative seems to be *nē*, as in *psü-nē*, give.

The usual suffix of the conjunctive participle is *ngi*, as in *ngu-ngi*, seeing. There is also *pfä* in *ke-zē-pfä*, dividing; *me-lo-pfä*, sending.

Ká-ke-lá, seems to be an infinitive of *ká*, call.

The causal suffix, corresponding to the Angāmi *bu*, is probably *lá*, as in *pu-ē-lá mā-pfu-lo*, cause him to wear.

The following are examples of negatives, *psü-mo*, gave not; *pyē-mo-tà* I am not worthy; *e-nyi-mo*, was not happy; *liü-mü-bā*, did not wish; *mo-tà-mo-lío*, transgressed not; *psü mo*, gavest not. We have also *ho-tà*, was not; *to-huē-hotà*, who cannot eat, the root *to* meaning 'eat.'

I zu gwovē	Ā mho dē-ki rhi-tā	A jū rhilo	238. Walk before me
Itiyu kinu-nu gwochēni	Ā-siki sage nyu-lē henye-ho ?	A tsi pa tu-nyi nodo	239. Whose boy comes behind you ?
Hipāhi kiuki-la kalui	Nē sage-ho-n' hilo-ho ?	Tu-nhelo krilā	240. From whom did you buy that ?
Āghinā dukankilā kalo	Reniji gaki kanyā nyuki hilo	Ena mi kyelo kanyā mhi nhelo krilā.	241. From a shopkeeper of the village.

NĀGĀ GROUP.

CENTRAL SUB-GROUP.

This sub-group includes the Āo and Lhōtā languages, and occupies the centre and north-east of the Nāga Hills District. Mr. Damant included in it the language of the Semās, but this clearly belongs to the western sub-group.

The speakers of this sub-group are estimated to number as follows :—

Āo	16,500
Lhōtā	22,000
Tengsa	?
Thukumi and Yachumi	?
Total at least	38,500

The first two tribes have only lately been described under these names. They have frequently been referred to by earlier writers, but under various appellations. Different forms of Āo have been described under the names of Chungli, Mongsen (these are two well defined dialects), Assiringia, Deka Haimong, Dupdoria, Hatigorría, Khari, Nowgong Nāgā, and Tengsa Nāgā¹; while instead of Lhōtā we also meet the names Tsontsu and Miklai. The Lhōtās call themselves Kyō. Thukumi and Yachumi are now dealt with for the first time.

The great distinction between the Western and the Central sub-group of Nāgā languages, is that, in a negative proposition, the latter prefixes, while the former suffixes, the negative particle to the word which is negatived.

Taking Angāmi as the typical western, and Āo as the typical central language, we are at first sight impressed at the great difference which apparently exists between these two languages, which are so little distant from each other. Mr. Davis has, however, clearly shown in his note printed in the Assam Census Report for 1891 that the difference is more apparent than real, and is principally a matter of prefixes and suffixes.

What follows is based on Mr. Davis's note, and on some remarks thereon which were made by Mr. Clark, and which were published at the same time :—

At first sight there would seem to be scarcely anything in common between these two languages. In sound they are very different. The Āo shows a preference for the nasal *ng*-sound as a termination, as in the words *āsūng*, to-morrow, *tāzūng*, good, etc. This sound does not occur at all in the Angāmi language.

Again the negative particle in Āo precedes the root which it qualifies; in Angāmi, follows it. *E.g.* Āo *āru*, come; *māru*, not come; Angāmi, *vor*, come; *vorno*, not come

The only trace that Mr. Davis can find in Angāmi of the negative preceding a verbal root is in the phrase *mbā*, equivalent to Āo *māsa*, there is not. Here the *m* is the negative

But now to trace the resemblances between the two languages. To do this, let us first compare the numerals from one up to twenty,—

English.	Angāmi.	Āo.
One	<i>po</i>	<i>kā. ākā.</i>
Two	<i>kennā</i>	<i>ānī.</i>
Three	<i>sē</i>	<i>āsam.</i>
Four	<i>dī</i> •	<i>pezi</i>
Five	<i>pangu</i>	<i>pungu</i>
Six	<i>suru</i>	<i>irok. terok</i>
Seven	<i>thenā</i>	<i>net</i> : Mongsen. <i>ten.</i>
Eight	<i>thethā</i>	<i>ti</i> : Mongsen. <i>tsat.</i>

¹ Regarding these names, see the section on Āo.

English	Angāmi.	Āo.
Nine	<i>tekūu</i>	<i>tukū.</i>
Ten	<i>kerr</i>	<i>ter.</i>
Eleven	<i>kerr o pōkrū or kerr ī pō</i>	<i>teri ākī.</i>
Twelve	<i>kerr o kenōā</i>	<i>teri ānī</i>
Thirteen	<i>kerr o sē</i>	<i>teri āsum.</i>
Fourteen	<i>kerr o dā</i>	<i>teri pezu.</i>
Fifteen	<i>kerr o pangū</i>	<i>teri pangū</i>
Sixteen	<i>kerr o suru</i>	<i>metsa mā-ben teru.</i>
Seventeen	<i>mekūū pe-mo thenī</i>	<i>metsa mā-ben tenī.</i>
Eighteen	<i>mekūū pe-mo thethō</i>	<i>metsa mā-ben t.</i>
Nineteen	<i>mekūū pe-mo tekūu</i>	<i>metsa mā-ben takō</i>
Twenty	<i>mekūū, mepfū. or mech.</i>	<i>metsa ; Mongsen. mekūu</i>

The resemblances in this list between the words for 2, 5, 6, 9, and 10 are very striking. Above ten we find the same method used in the formation of the numerals. In forming 17, 18, and 19 both languages employ the same methods, these numbers being denoted by the expressions '20 not-brought 7,' '20 not-brought 8,' '20 not-brought 9,' respectively. *Pō-mo* and *mā-ben* are identical words. In Āo, however, this method of formation begins at 16, at one place further back than in Angāmi.

PERSONAL PRONOUNS.

These present considerable points of resemblance. They are—

English.	Angāmi.	Āo.
I	<i>ā. ā. ene</i>	<i>nī. ngī.</i>
Thou	<i>nō</i>	<i>nā.</i>
He	<i>pō</i>	<i>pā.</i>
	<i>Singular</i>	
We two, including person addressed	<i>ā-ro</i>	<i>o-nī (Mongsen). tenī (Chungli.)</i>
We two, excluding the other	<i>he-nī</i>	...
You two	<i>ne-nī</i>	<i>ne-nī.</i>
They two	<i>lu-nī, u-nī</i>	<i>pā-nī (Mongsen)</i>
	<i>Plural</i>	
We (inclusive)	<i>u-ko</i>	<i>āsenok.</i>
We (exclusive)	<i>he-ko</i>	<i>o-nok.</i>
Ye	<i>ne-ko</i>	<i>ne-nok.</i>
They	<i>hā-ko, lu-ko, u-ko</i>	<i>pā-re, pāre-nok.</i>

The forms *ā. ene*, given for 'I' in Angāmi are Eastern Angāmi variations. They are not unlike the Āo *nī*. The words for 'thou' in both languages are practically the same, as also are the words for 'he'. Both languages form the dual and plural in a very similar manner.

VOCABULARY.

The following list gives a few words in the two languages which are very similar or identical.—

English.	Angāmi.	Āo.
House	<i>ku</i>	<i>kī.</i>
Fire	<i>mī</i>	<i>mī.</i>
Smoke	<i>mikhū</i>	<i>mukhozū</i>
Man	<i>mā, mī</i>	<i>āmi (Mongsen).</i>
To-day	<i>thī</i>	<i>tānū.</i>
Call, to	<i>ke, che</i>	<i>āzā, zā, ājā, jā</i>
Eat, to	<i>chī</i>	<i>āchī, chī.</i>
Salt	<i>metsa</i>	<i>metsū.</i>
Water	<i>dzū</i>	<i>tša, tzu.</i>
Liquor	<i>zu</i>	<i>yī.</i>
Blood	<i>te-zā</i>	<i>ā-za.</i>
Laugh, to	<i>-nū</i>	<i>menū.</i>
Red	<i>kemeri</i>	<i>temerem.</i>
Tell, to	<i>pu, si, -she</i>	<i>shī, ſū (Lungkam)</i>
One day	<i>konha</i>	<i>kā-nu</i>
Cooked rice	<i>tīe</i>	<i>chī, zī.</i>
See, to	<i>ngu</i>	<i>āngu</i>

Again, let us take an example of a word which is apparently very different in the two languages. Such a word is Angāmi *zoghāi*, Mongsen *ā-i*, thatching-grass. In Chungli, *ā-i* is a general term for weeds growing in cultivated land. In *zoghā*, *zo* is a generic and *ghā* a specific term specifying the kind of grass. *Ghā* is therefore 'thatch.' Now in the Semā language, the language most closely connected with Angāmi, 'thatch' is *ā-ghā*, *ā* being the prefix placed before all substantives in the Semā language. Cutting off this prefix we have—

Semā.	English.	Angāmi.
<i>ghā</i>	thatch	<i>ghā</i> .

These words are identical, for *i* and *ā* are commonly interchanged in the two languages. Now between—

Semā.	English.	Āo.
<i>ā-ghāi</i>	thatch	<i>ā-i</i>

there is scarcely any difference in pronunciation, and the words may be fairly said to be identical. We have thus found *zoghāi* to be the same as *ā-i*. This method could be easily applied to other words.

From a comparison of the words in the subjoined list, it will be seen that the Āo termination *er* performs the same function as the Angāmi *mī* or *mī*, man. Mr. Clark, however, maintains that *er* does not mean 'man,' but that it is really a relic of an old present tense of the verb 'to be' and means 'he who is.' Thus *tūm* means 'old,' *bu* means 'man,' and *tūm-bu-r*, means 'he who is an old man' 'an old man.' So *nung* means 'in,' and *nung-er* means 'he who is in,' hence 'an inhabitant.' It should be remembered that when, by inflection or composition, in Āo two vowels come together, one disappears, or the two coalesce and form a new vowel. Hence, when *er* is suffixed to a word ending with a vowel, the *e* is usually dropped. On the other hand, Mr. Davis considers that this *r* is the exact equivalent of the Angāmi *mā*. He says, 'In the Thukumi language we find this too. The Thukumi people use *-rē* in exactly the same way as the Angāmis use *-mī*. It seems going out of one's way to say that the *-r* in these words is the verbal termination *er* which is equivalent to the Angāmi *-mī*. Again take the term "Āo," by which we know these people. The word is never used with a final *-r* by the people themselves. They call themselves *Āor'*, i.e., the Āo people, never plain *Āo*, and their language is *Āor'*, Āo-men's tongue, not *Āo u*. The exact rendering of *Āor'* in Angāmi would be *Āo-mā*. They call the Lhātās *Shener'*, the Semās *Moyār'*, the trans-Dikhu tribes *Mīrīr'*, and the Assamese *Tsunār'*.'

Āo.	English.	Angāmi.
<i>Tāmbu-r</i>	old man	<i>ketsa-mā</i> .
<i>Tāntza-r</i>	old woman	<i>ketsa pju-mā</i> .
<i>Tānu-r</i>	child	<i>nichu-mā</i> .
<i>Tebu-r</i>	male	<i>te-pfo-mā</i> .
<i>Āyi-r</i>	maid	<i>reli-mā</i> or <i>āli-mā</i>
<i>Āsāngu-r</i>	young man	<i>krisā-mā</i> .
<i>Tātā-r</i>	village elder	<i>pryu-mā</i> .
<i>Tetsa-r</i>	woman	<i>henu-mā</i> .
<i>Tākā-r</i>	a rich man	<i>kēni-mā</i> .
<i>Temet-er</i>	one who knows	<i>kēsi-mā</i> .
<i>Tāru-r</i>	a comer	<i>kevor-mā</i> .

Again, take the phrase—

Āo	Nā	ko	im-er ?
English	You	what	village-er (are) ?
Angāmi	No	ki	ra-mī
English	You	what	village-man (are) ?

and the answer to the question—

Āo	Nī	Lungkām	nung-er
English	I	Lungkām	m-er, i.e., inhabitant (are).
Angāmi	Ā	Lungkām	no-mā-wō
English	I	Lungkām	of-man-am.

It being established that the function of the Āo *er* is the same as that of the Angāmi *mī*, we have the following identical words in the two languages:—

Āo	<i>te-bu-r</i> ,	male.
Angāmi	<i>te-pfo-mā</i> ,	male.

Here *te* is a mere prefix. The essential part of the word is, in Āo, *bu*, and, in Angāmi, *p*, which may be taken as identical words, *-pfo* in Angāmi being a common male termination for a number as well as men.

Again—

Āo	<i>ā-yi-r</i> ,	a girl.
Angāmi	<i>re-li-mā</i> or <i>ā li-mā</i>	a maiden

Here the essential part of the word in both languages is *Āo yi*, Angāmi *li*, and, as *y* and *l* are commonly interchangeable (cf. Mongsen *āling*, Chungli *yung*, a bamboo tie), the identity of *āyir* and *relimā* is established.

Again—

Āo	<i>tā-nu-r</i> ,	a child.
Cf. Angāmi	<i>nā</i> ,	a child.

Assuming that the function of the *Āo er* is the same as that of the Angāmi *mā*, we find that the formation of nouns of agency is the same in the two languages. Thus, in Angāmi they are formed by prefixing *ke* and suffixing *mī*, to the verbal root. Thus, *vor*, come; *ke-vor-mā*, a comer. In *Āo*, these nouns are formed by prefixing *te* and suffixing *er*. Thus, *āru*, come; *t-āru-r* for *te-āru-er*, a comer. In both cases the prefixed particle is the common adjectival prefix.

Other examples are—

Angāmi.	<i>nī</i> , possess;	<i>ke-nī-mā</i> , a rich man.
Āo	<i>ākā</i> , possess;	<i>t-ākā-r</i> , a rich man.
Angāmi	<i>sī</i> , know;	<i>ke-sī-mā</i> , the knower.
Āo	<i>met</i> , know:	<i>te-met-er</i> , the knower.

SIMILARITY IN THE CONSTRUCTION OF SENTENCES.

Angāmi	<i>tie</i>	<i>chile-ro</i>	<i>ā</i>	<i>ki</i>	<i>nu</i>	<i>vorchē</i> .
Āo	<i>chiu</i>	<i>chiunger-āng</i>	<i>ozo</i>	<i>ki</i>	<i>dīnge</i>	<i>ārungmā</i> .
English	rice	eaten-having	my	house	to	come.
Angāmi	<i>ā</i>	<i>sāha</i>	<i>zē</i>	<i>kerr</i>	<i>chī-to (idi)</i>	<i>vorriwē</i> .
English	I	sāhib	with	conversation	to-make	have-come.
Āo	<i>nī</i>	<i>sāhab</i>	<i>den</i>	<i>o</i>	<i>sambi-tsa</i>	<i>āru</i> .
English	I	sāhib	with	word	to-speak	have-come.
Angāmi	<i>po</i>	<i>ngu</i>	<i>-ro</i>	<i>ā</i>	<i>ki</i>	<i>pushichē</i> .
Āo	<i>pā</i>	<i>ngu</i>	<i>-rū</i>	<i>ke</i>	<i>dāng</i>	<i>shōkīng</i> .
English	him	seen	having	me	to	tell.
Angāmi	<i>Silēchē</i>	<i>nichu-u</i>	<i>mu</i>	<i>po-zo</i>		<i>u-nā</i> .
Āo	<i>Shīshīāng</i>	<i>tīnur</i>	<i>-o</i>	<i>tetzu</i>		<i>nā</i> .
English	Arise	the-child	and	its-mother		the-two.
Angāmi	<i>zē</i>	<i>Israel</i>	<i>kiju</i>	<i>nu</i>		<i>rotāchē</i>
Āo	<i>ānir</i>	<i>Israel</i>	<i>lim</i>	<i>āe</i>		<i>wāng</i> .
English	taking	Israel	land	to		go.
Angāmi	<i>h'ko</i>	<i>lō</i>	<i>lē</i>	<i>prē</i>		<i>lēte</i> .
Āo	<i>onke</i>	<i>ālu</i>	<i>ru</i>	<i>mā</i>		<i>ogwe</i> .
English	we	fields	cut	entirely		have

In this sentence the similarity of the construction for 'entirely' is very marked. It being represented in both languages by an infix following the verbal root.

ĀO OR HATIGORRIA.

Āo is spoken in the extreme north-east of the Nāga Hills District. Beyond the tribe, in the unsettled territory are the naked Nāgās, and more to their north and west in the district of Sibsagar, we meet the Banparā and other unidentified Nāgā tribes, Dīmā-sā, Assamese and some Shān languages. To the south they are bounded by the Lhōtā and Semā Nāgās, by whom they are separated from the Rengmā, Angāmi, and Kezhāmā tribes. Regarding this tribe, Mr. Davis gives the following particulars in the Census Report of Assam for 1891, pp. 241 and ff.

The Āos occupy the country which is drained by the Jhanzi, the Desoi, and by the streams which flow into the Dikhu on its left bank. The only Āo village on the right bank of the Dikhu is Longsa. The Āos profess to have their origin from a stone, which is situated between Longsa and the Sangtam village of Luban. From this place they gradually migrated across the Dikhu and occupied the country in which they now dwell. They are divided into two tribes, Chungli or Zungi and Mongsen, speaking dialects which are so dissimilar as to be practically different languages. These two tribes, though they in many instances live side by side in the same villages, have each preserved their own dialect.

The Āos occupy, excluding Longsa, which was not censused, 46 villages. Of these 21 are Chungli entirely, 19 are Mongsen entirely, while six are mixed villages, inhabited both by Chungli and Mongsen. Roughly speaking, the Āo country is composed of three parallel ridges, called Lampungkung, Changkikung, and Japukung, respectively. The Chungli tribe inhabits all the villages on the Lampungkung (the range immediately overlooking the Dikhu), with the exception of the villages of Mokokchang and Nunkam, which are partially Mongsen. The valley of the Melak or Jhanzi, *i.e.*, the valley enclosed between the Lampungkung and Changkikung, contains the mixed villages, while on the Changkikung and Japukung the villages are, with the exception of Deka Haimong, Molungting, and Assiringia (a non-Āo village), entirely Mongsen.

Assiringia, called by the Āos Mirinokpo, is a village which really belongs to the 'naked' tribe of Nāgās. The inhabitants came many years ago from the village of Wankhong or Orangkang, a village belonging to that tribe, and situated a day's march east of the Dikhu from Susa village. Now-a-days, in all but language, the Assiringia people have become Āos. The problem is, how did they get on to their present site, which is on the range immediately over the plains, through the intervening Āo villages? Where they are at present they are at least three days' journey from the nearest villages of the tribe to which they really belong.

The two dialects of Āo are, as stated above, Chungli or Zungi and Mongsen. The Deputy Commissioner of the Nāga Hills gives 15,500 as the total population speaking the language, and adds that the Zungi are the larger section, being about three-fifths of the whole tribe. This would give the following approximate figures for the speakers of each dialect:—

Chungli or Zungi	9,300
Mongsen	6,200
Total	.							<u>15,500</u>

The only one of which we have a grammar is Chungli, and the version of the Parable of the Prodigal Son, which follows, and for which I am indebted to the kindness of the Reverend E. W. Clark, is couched in that dialect. There is a list of Chungli and Mongsen words and sentences in Appendix G of the Census Report already quoted from, which I take the liberty of reprinting, after the Chungli specimen.

The use of the word Āo in connection with this language is modern. The earliest instance of its occurrence with which I am acquainted is in Mr. Clark's *Specimen*, written in 1879. The name was unknown to Mr. Damant, whose essay was published in 1880. He called the tribe Hatigorrria, and wrote as follows about it:—

This large and warlike tribe is found to the east of the Lhota and Sema, but how far they extend it is impossible to say. In their own language they are called Samaina or Nissomeh.¹

¹ Mr. Davis writes, 'I have never even heard these terms, but 'Nissomeh' looks like an incorrect rendering of a Semā or Angāmi term.'

The tribes known as Assiringia, Dupdoria, Dekha Haimong, and Khari, are really part of the Hatigoria tribe, and included with them; Dekha Haimong and Khari being merely the names of villages.

In addition to the above, I find on examination that what is called Nowgong Nāgā is closely connected with Āo.

Mr. Davis informs me that the true language of Assiringia is not Āo at all. The inhabitants of this village come from Orangkang, which lies just across the Dikhu, and belong to a 'Naked Nāgā' tribe. Āos come down to the plains through that village and hence the Assamese sometimes call them by its name. Dopdoria is the Assamese name for Āos who come down to the plains through the Dop Duār, and Hatigoria for those who do so through the Hatigor Duār. The names Dopdoria and Hatigoria include both Chungli and Mongsen. Khari is a large Mongsen village, and Nowgong the Assamese name of the Chungli village Merangkung.

The following are the authorities which I have met which deal with Āo under each of its many names:—

I.—ĀO GENERALLY.—

DAVIS, A. W., I.C.S.—*Report on the Census of Assam for 1891.* by E. A. Gait, I.C.S. On pp. 163 and ff. there is a note on the relation which the principal languages of the Nāgā group (including both the Chungli and Mongsen dialects of Āo) bear to each other. It contains lists of words in both dialects. On pp. 172 and ff. there is a *Comparison showing points of resemblance in words and structure of the language between the Angami and Āo Nāgā (Chungli) languages.* with notes by the Reverend E. W. Clark; pp. 242 and ff., an account of the Āo tribe. Appendix G pp. cxxiv and cxxv, is a list of words and sentences showing the differences between the Chungli and Mongsen Dialects of the Āo Nāgā language. All these are by A. W. D. Shillong, 1898.

II.—CHUNGLI OR ZUNGI.—

CLARK, THE REV. E. W.,—*A Specimen of the Zoongee or Zurungee Dialect of a Tribe of Nagas bordering on the Valley of Assam, between the Dikhu and Desui Rivers, embracing over forty villages.* *Journal of the Royal Asiatic Society*, Vol. xi, 1879. pp. 278 and ff.

AVERY, J.,—*The Āo-Naga Language of Southern Assam.* *Proceedings of the American Oriental Society* for May, 1886, pp. cix and ff., published with Vol. xiii of the *Journal of the Society* for 1886. See also *American Journal of Philology*, vii, pp. 344—360.

- HODGSON, B. H.,—*On the Aborigines of the Eastern Frontier.* Journal of the Asiatic Society of Bengal, Vol. xviii, Pt. II, 1849, pp. 967 and ff. Vocabulary by N. Brown. Reprinted in *Miscellaneous Essays relating to Indian Subjects.* London, 1880. Vol. ii, pp. 19 and ff.
- BROWN, THE REV. N.,—See No. VI., Dupdoria, above. The words given are more or less incorrect Chungli.
- HUNTER, SIR W. W.,—See No. VIII., Khari, above. Also contains Vocabulary of Nowgong Nāgā.

The following account of the main features of the Chungli dialect of Āo is based on Mrs. Clark's grammar. The student is referred to that work for full particulars. What follows does not pretend to be more than the merest sketch.

Pronunciation.—Āo rejects not only the sonant but also the surd aspirates. There does not appear to be any restriction as to initial letters, and most occur as final, though the most usual termination is either a vowel, a nasal, or *r*. The sound *ng*, which is very frequent as a final, seldom occurs as an initial. The letter *h* occurs very rarely. There does not appear to be any system of tones in the language.

The pronunciation of the vowels fluctuates. Thus, the root *nūk* becomes *nōk-shī*, to covet, and *ā-nak*, watching. When two vowels come together, they coalesce. Examples are,—

sa + āng = sāng, be.
ka + āng = kwāng, give.
āru + āng = ārung, come.
ālū + āng = ālung or *luāng*, come down.
ātu + āng = ātung or *tuāng*, come up.
shī + āng = shīāng, say.
ājī + āng = ājīāng, see.
āo + āng = wāng, go; *ong*, go on.
pā + e = pai, he.
shī + ōgō = shīgō, said.

When a verbal root ends in a vowel the *e* of the termination *er* is elided. Thus,—

ben + er = benēr, brings.
bendā + er = bendār, brings.
zambī + er = zambīr, speaks.

Consonants frequently interchange. Especially, *b* and *p*; *d* and *t*; *g* and *k*; and sometimes *b* and *m* and *n*, respectively. When *tsa* at the end of a verbal root is followed by *ā*, the whole becomes *zā*, thus *āgatsa* + *āng* = *āgazāng*, give thou.

The letters are pronounced as indicated in the system adopted for this Survey. The vowel *a* is pronounced as the *u* in 'nut.' In Mrs. Clark's Grammar this sound is represented by *u*. The same lady represents the sound of a prolonged *s* by *se*. I have thought it best to follow her in this latter point.

Articles.—The force of the indefinite article is given by suffixing the word *kā* or *kātī*, one. Thus, *nīsung kā*, a man. To give the force of the definite article, the suffixes *zī* and *tū* or *tō*, which are properly demonstrative pronouns, are often used. Thus, *nīsung-zī*, the man. The prefix *te* or *t* to be mentioned below seems to be often used in the same sense. Thus, *bū*, father, but *te-bu-e āgātsa*, the father gave.

Prefixes and suffixes.—In addition to the prefixes and suffixes used to make forms corresponding to declension and conjugation, the following should be noted.

The prefix *te*, or, before vowels, *t*, may be added to a verb without making any essential change in meaning, except in the Imperative mood, which it negatives. All that it does is to impart some emphasis. Thus, from the root *āo*, go, we have *pārenōk t-āo-r*, they are just going, or are indeed going. Similarly, prefixed to adjectives, it gives emphasis, and forms a kind of superlative, as from *āzung*, good, *t-āzung-bā*, the good one, the best. Prefixed to verbal roots, it is also used to form abstract nouns. Thus, *sāngwā*, to illumine, *te-sāngwā*, light.

The suffix *tsa*, with or without the prefix *te*, is also used to form abstract nouns. It is properly the suffix of the future tense. Thus, *pelā*, rejoice; *pelā-tsa*, will rejoice; *pelā-tsa*, or *te-pelā-tsa*, joy.

The suffix *er*, or, after vowels, *r*, is properly the termination of the present and of the continuative past. Thus, *ādōk-er*, he is just come. It is also very commonly used as the termination of a noun of agency. Thus, *ādōk-er*, a comer; *shīshī-r*, a trader; *āshī-r*, a speaker. In this way, like the Angāmi *u*, it is often substituted for the relative pronoun, *i.e.*, it forms what in Dravidian languages would be called a Relative Participle. Thus, *ādōk-er*, may be used to signify he, or they, who come, or came. So, also, with the antecedent expressed. Thus,—

tāng ādōk-er āzī ōdā āshī.

just come-who-are they thus said, *i.e.*, they who have just now come said so. Again *nung* means 'in' and *nung-er*, he who is in, an inhabitant.

This suffix is also used to indicate the act done. Thus, from *shīshī*, to traffic, *shīshī-r* not only 'a trader,' but also 'trading.' Thus, *pā shīshī-r āge tākār ākam*, he became rich by trading.

The suffix *bā* is used exactly like *er*. Thus, *shīshī-bā*, he who trades, or trading; *pelā-bā*, he who rejoices, or joy.

The suffix *dāk* indicates place. Thus, *ālī*, to be, *ālī-dāk*, a place of abode, a residence; *ī*, this, *ī-dāk*, here.

SUBSTANTIVES.

Gender.—For human relations different words are used to indicate gender. Thus *bu*, father; *tza*, mother. *Tebur*, male, and *tetza*, female, are also used for the same purpose. For animals we have *tebōng*, male, and *tetza*, female. The suffixes *ta* for male, and *tā* for female are also commonly used.

Number.—Number is only indicated when the non-indication would cause confusion. In such cases the singular is indicated by suffixing *kā*, *kātī*, one, and the plural by *tam*. Thus, *āyānger-tam*, workers for hire. A dual is indicated by suffixing *nā*. Thus,—
tānur-ō tetza-nā.

Son-and mother-two, both the mother and child.

Case.—Case is indicated by postpositions. They are as follows:—

Nominative.—This case takes the suffix *e*, which may be omitted when no ambiguity would ensue.—Example, *tānubu-e āshī*, the younger said.

Accusative.—The suffix is *dāk*, which may be omitted under similar circumstances. Some verbs always require it. *Dāng*, the dative suffix, is sometimes used for the accusative. Examples, *pā-dāk*, him; *nī nā-dāng tenzaker*, I am serving thee.

Instrumental.—The suffix is *āge*, as in *pā shīshīr āge tākār ākam*, he became rich by trading; *ā* is also used, as in *teket-ā*, by hand.

Dative.—The suffixes are *nam*, *nung*, or *dāng*, as in *ka-nung kwā*, give to me; *tebu-dāng āshī*, he said to the father. Motion towards is indicated by *dānge* or *e*, as in *Nī ō-bālā-dānge ō-lī*, I will go to our father; *pā-e ārem-e āo*, he went to the jungle.

Ablative.—The suffix is *nunge*, as in *pā-nunge*, from him.

Genitive.—No suffix is used. The possessor simply precedes the possessed, as in *tetī-zī āin*, the elder brother's anger.

Locative.—*Nung*, already given for the dative, also means 'in' or 'on.' Thus, *tetsung-nung*, on the legs.

Concomitant.—The suffix *den* means 'with.' Thus, *pā-den*, with him; *nā tetī ka-den līr*, thou art ever with me.

ADJECTIVES.

Adjectives usually follow the substantives they qualify, as in *nīsung tāzung*, a good man, or the man is good.

The suffix *lā* forms verbal adjectives. Thus *chī*, eat; *tā-chī-lā*, edible. The suffixes *tsa*, *bā*, and *er*, already described, are also used for the same purpose. *Tā-chī-tsa*, edible; *tāru-tsa nīsung*, the man who will come, the coming man; *pāe āshī-bā ō*, *pāe āshīr ō*, the word said by him.

Adjectives are freely treated as verbs. *Azung*, good; *āzungtsa*, will be good; *zunger*, is good.

Comparison is indicated by the dative with *dāng*, as in *āzī-dāng ībāzī tāzung*, than that this is good, this is better than that. As explained above, the *t* in *tāzung* emphasizes the adjective, and gives it the force of a superlative, as in *āzāk-dāng ībāzī tāzung-bā*, this is better than all, *i.e.*, the best.

The numerals are —

- | | |
|-------------------|--|
| 1. <i>kā</i> . | 8. <i>tī</i> . |
| 2. <i>ānā</i> . | 9. <i>takō</i> . |
| 3. <i>āsam</i> . | 10. <i>ter</i> . |
| 4. <i>peza</i> . | 11. <i>terī kā</i> , and so on to |
| 5. <i>pungū</i> . | 16. <i>metsa māben trök</i> , <i>i.e.</i> , 20 not brought 6 |
| 6. <i>trök</i> . | 17. <i>metsa māben tenet</i> , and so on to |
| 7. <i>tenet</i> . | 20. <i>metsa</i> . |

- | | |
|------------------------------|---|
| 21. <i>metsarī kā.</i> | 70. <i>tenem ser metsa</i> , 50 and 20. |
| 26. <i>semar māben trok.</i> | 80. <i>lir ānāsa</i> , twice 40. |
| 30. <i>semar.</i> | 90. <i>telāng takō.</i> |
| 40. <i>lir.</i> | 100. <i>telāng</i> or <i>nōklāng.</i> |
| 50. <i>tenem.</i> | 1000. <i>meyirizāng</i> or <i>meirzāng</i> or <i>meirāng.</i> |
| 60. <i>rōkar.</i> | |

As regards ordinals 'first' is *mazang*, *kesa*, or *kesakā*. Others are formed by adding *sa* or *bubā* to the ordinals. Thus, *ānā-sa* or *ānā-bubā*, second.

PRONOUNS.

The personal pronouns have two forms each, a direct and an oblique. The direct forms are as follows :—

<i>nī</i> , I.	<i>ka-nā</i> or <i>ke-nā</i> , you and I.	<i>ozo</i> , <i>ozonok</i> , <i>onok</i> , <i>āsen</i> , <i>āsenok</i> , we.
<i>nā</i> , thou.	<i>ne-nā</i> , you two.	<i>nenok</i> , you.
<i>pā</i> , he, she, it.	<i>te-nā</i> , <i>pā-nā</i> , they two.	<i>pāre</i> , <i>pārenok</i> , <i>pā-tam</i> , they.

Except *nī* and *pāre*, all the above can take the termination *e* in the nominative. Thus *pā-e* or contracted *pai*, he. The plural forms *āsen*, *āsenok*, include the person addressed. The other three plurals of the first person do not.

The oblique forms are employed in the sense of the genitive, and also usually, but not always, with postpositions.

<i>ka</i> , <i>ke</i> , or <i>k</i> , my.	<i>ō</i> , our.
<i>ne</i> , thy.	<i>nenok</i> , your.
<i>pā</i> , his, etc.	<i>pārenok</i> , their.

Examples are *ka-dāng*, to me; *ke-den*, with me; *ō-bā*, our father; *ne-tenu*, thy younger brother; *pā-nung*, to him.

The reflexive pronoun for all persons is *peī*, own, as in *pai peī tebu-dānge āo*, he went to his father.

The demonstrative pronouns are *ī-bā*, *ā-bā*, and *yā* or *ā*, this, and *ā*, that. They are declined like substantives. To all of them the suffixes *zī* and *tū* or *tō* may be added, which come after the suffix denoting case, and, when the pronoun is an adjective, after the noun with which it is in agreement. Thus, *ībā līmā-nung-zī*, in this country; *ī-dāng-zī*, on this, *i.e.*, then.

The interrogative pronouns are *shīr*, *shībā*, who? *kechī*, what? and others.

The relative is usually supplied by the suffixes *er* and *bā*, as already explained. Sometimes the interrogative pronoun is used as a relative. Thus,—

<i>shībāe</i>	<i>tāng</i>	<i>āru</i>	<i>pai</i> ,	<i>āzī-ōdā</i>	<i>āshī</i> .
who	just-now	came	he,	so	said, <i>i.e.</i> , the man who has just come said so.

The indefinite pronouns are *kā* or *kātī*, one; *kāre*, some; *lāngkā*, something. They follow the nouns they qualify. Thus, *nīsung kāre*, some man, or some men.

VERBS.

The ideas of time and mood are conveyed by prefixes and suffixes, added in the root. The verb does not change for number or person. The use of the prefix *tē* or

/ with verbs has already been described. Another very common prefix is the letter *ā*, which is used only with past tenses, but not with all. If, however, a verbal root commences with *ā*, the prefix is merged in the first syllable, and does not appear. Thus the past of the verb *āo* is *āo*, not *ā-āo*. With this exception, nearly all simple verbs, and some of the compound verbs to be described later on, take this prefix. On the other hand, most compound verbs, and a few primary ones, e.g., *zambī*, speak, do not take it.

The following are the principal tenses of the verb *ben*, bring:—

<i>Present.</i>	<i>nī ben-er</i> , I bring.
<i>Present Definite.</i>	<i>nī ben-dā-ge</i> , <i>ben-dā-r</i> , or <i>ben-dā-kā</i> , I am bringing.
<i>Past.</i>	<i>nī ā-ben</i> , <i>ā-ben-kā</i> , <i>ben-kā</i> , I brought.
<i>Continuative Past.</i>	<i>nī ā-ben-er</i> , I have been bringing, and do so still.
<i>Completed Past.</i>	<i>nī ben-ōgō</i> , I have brought and finished bringing. Some verbs take <i>kū</i> or <i>kūr</i> , as <i>nī āretsa-kū</i> or <i>āretsa-kūr</i> , I have admonished and finished admonishing.
<i>Immediate Future.</i>	<i>nī ben-dī</i> , I shall bring soon.
<i>Distant Future.</i>	<i>nī ben-tsa</i> , I shall bring.
<i>Imperative.</i>	<i>ben-āng</i> , bring.
<i>Negative Imperative.</i>	<i>tā-ben</i> , or <i>te ben</i> , do not bring.

Participles.—*Present.*—*ben-er*, *ben-ā*, bringing, as in *pai scong bener āru*, he came bringing wood. The negative is *mā-ben-e*, not bringing.

Past.—*ben-er-āng* or *ā-ben-er-āng*, having brought, as in *scong ābenerāng pā āru*, having brought the wood he came, he came after he had brought the wood.

Gerunds.—*Present.*—*ben-dāng* or *ben-dākā*, in bringing, while bringing, as in *pai āru-dāng tsunglū āru*, as he was coming the rain came.

Past.—*ā-ben āge*, by having brought; *ā-ben nung* or *ā-ben yong*, in having brought, on account of having brought, as in *pā temūlung tāngā āru-nung*, *pai yā ōdā bilimtet*, on his mind again returning, he remembered in this manner.

Infinitive.—There are several forms, all meaning the same thing, usually an infinitive of purpose, *ben-tsa*, *te-ben-tsa*, *tā-ben-tsa*, *ā-ben-tsa*, *ben-e*, *te-ben-e*, *tā-ben-e*, *ā-ben-e*. Example, *pārenoke scong bene āo*, they have gone to bring firewood. The infinitive is often governed by the postposition *āsōshī* or *yong*, both meaning 'for.'

Conditional Sentences.—The usual words for 'if' are *āsa-bō*, *āsāng*, *shī-bō*, *bō*, and *kā*. *Kā* and *bō* must be attached to the verb, the others are treated as independent words. If *bō* is attached to a noun or pronoun, it indicates an apodosis or contradiction. Thus, *nā āo-kā*, *nī-bō māotsa*, if you go, I will not go; *sakā nī-bō lūmīsetā ālīr*, (my father's servants have more than enough to eat) yet as-for-me I am famishing.

Future Conditional.—The suffix is *dī-r*, or *er-ā*. Thus, *kō-dāng nī tū-dī-r*, *nā āo tsa*, when I go, you will go; *pai yāmae shī-r-ā*, *nī ō-dī*, if he say so, I will go. The suffix *shīā* means 'even if,' as in *tsungsāng māzung-shīā*, even if the weather is bad.

Past Conditional.—In the protasis, *āsa-bō*, is used with the past indicative, or *āsāng*, or *shī-bō* may be used, but in the last two cases the verb loses the prefixed *ā*. In the apodosis, the suffix is *lā*. In the following example the verbs are *zam*, drink, and *masa*, not die, from *sa*, die.

Pai mōza ā-zam āsa-bō, masa-lā.

He medicine drank if, would-not-have-died, *i.e.*, if he had taken medicine, he would not have died. Instead of *ā-zam āsa-bō*, we might have used *zam āsāng*, or *zam shī-bō*.

Compound Verbs.—*Āo* uses a large number of infixes which can be added to a verbal root in order to modify its meaning. Such modified verbs I call compound, and it should be noted that, as a rule, they do not take the prefix *ā* in the past tenses. The following are a few of these infixes, which occur in the Parable of the Prodigal Son :—

Infix,	Meaning.	Example,
<i>dāktsa</i> or <i>tsa</i>	cause	<i>ben-dāktsa</i> , to cause to bring; <i>kam-zāng</i> (for <i>kam-tsa-āng</i>), cause to become; <i>sepōk-zāng</i> , cause to slip on.
<i>mā</i>	completion	<i>ne-chīr-zī shībā ne sen chī-mā</i> , this thy son who has eaten up thy property.
<i>na</i>	desire	<i>pā peī pōk sung-na-ā</i> , wishing to fill his own belly; <i>tetī-zī kī-dānge mā-tū-na-ā ā-lī</i> , the elder brother was not wishing to enter into the house.
<i>sī</i>	fine division	<i>lem-sā</i> , to divide thoroughly.
<i>shī</i>	hardly any definite modification of meaning. Sometimes repetition.	<i>āngā</i> sometimes means 'to hear,' but <i>āngā-shī</i> always does so, as in <i>pai yārerbā ōlā āngā-shī</i> , he heard the sound of dancing. <i>te-bāng mesep</i> , to kiss; <i>te-bu-e te-bāng mesep-shī</i> , the father kissed repeatedly.
<i>tep</i>	reciprocity	<i>onoke pelā-tep-dī</i> , we will rejoice together.
<i>tet</i>	potentiality	<i>bilim</i> , to think, <i>bilim-tet</i> , to be able to think, to remember, as in <i>pai yā ōdā bilim-tet</i> , he remembered in this way.
<i>tsa</i>	action on a third person	<i>pai kākat-zī ka-nung āga-tsa</i> , he will give the paper to me; <i>pai kākat-zī pī-nung āga-tsa-tsa</i> , he will give the paper to another person.
<i>zen</i> or <i>jen</i>	frequentative, continuous action.	<i>te-bu-e āsam-jen-ā</i> , the father, running continuously.

shīā, used as a prefix, means 'back again,' as in *shīā-āru*, returned.

Verbs Substantive.—The two most common are *kā* and *lī*. The first refers to things, and the latter usually, but not invariably, to persons. When used in questions they take the prefix *ā* even in the present. Thus,—

pāktī ā-tāk-tsa yong ā-kā āsa mā-kā ? kār.

mat to-weave splints are or not-are ? are; *i.e.*, are there materials for weaving a mat or not ? there are.

pā kī-dānge ā-lī āsa mā-lī ? līr.

he house-in is or not-is ? is, *i.e.*, is he in the house or not ? he is.

The present tense of *kā*, *viz.*, *kār*, also means 'to have,' as in *ōza-e tseep kār*, birds have nests.

The past tense of *lī*, is sometimes *lī-āsa*, instead of *ā-lī*, as in *nīsung kā chīr ānā lī-āsa*, of one man two sons were. This verb is often used to form periphrastic tenses with the participles of other verbs. Thus, *pā men-ā līr*, he is sitting; *pai mā-tū-na-ā ā-lī*, he was not wishing to enter. *lī* is sometimes spelt *le*.

Other verbs substantive are *ār* and *er*, which are only used in the present, as in *pai ācī ār*, he is mistaken. These are not often used.

The verb substantive *āsa*, *sa*, is, has many uses. It is used to form the past tense of *lī*, as shown above. It is often used in questions, as in *te-zang-zī tāmien āsa?* is the fruit ripe?

It is frequently to be translated by 'or' in an alternative question, as in the examples given above. With *bō*, it means 'if.'

Passive Voice.—This is rare. Nearly all roots are capable of being used as passives without change of form. Thus, *mādōkbā nāshī pāe ā-ngū*, he found the lost cow, and *mādōkbā nāshī pā āge ā-ngū*, the lost cow was found by him. The verb substantive *kā* is often used to show clearly that the sentence is passive. Thus, *mādōkbā nāshī pā āge ā-ngu ā-kā*.

Negative Verbs.—The usual negative is *mā*, which precedes the verb. If the verb commences with a vowel, the two coalesce, which gives rise to some irregularities. An example of the regular use is *nāe mā-gatsa*, thou gavest not. Examples of irregular formations are *sa*, die, *ma-sa*, not to die; *zambī*, say, *me-zambī*, not to say. Some compound verbs insert the negative particle between the two members. Thus, *sensāk-āsem*, to converse, negative *sensāk-māsem*. The negative imperative is not formed with *mā*, but with *tū* or *te*.

Order of Words.—The verb usually comes last in the sentence. The subject may be first in the sentence, or in any other place where it may best serve the full expression of the main and subordinate thoughts. Adjectives follow the words they qualify, and genitives precede the words on which they depend.

is; lost though, back-came.'

Āngzi pāreno ke pelātsa tenzak-dāng pā teti ālū-nung āli.
Then they rejoice-to began-when his elder-brother cultivation-in was.
 Yāseir pāe (pai) ādōkā kī ānāsāe āru-nung kentenā yārerbā ōlā āngāshī-
This-after he appearing house near come-in singing dancing sound heard-
 nung, pāe kilīr kā zā āruā āsongdāng, 'yā kechī sar?'
in, he house-resident one called having-come having-asked-on, 'this what is?'
 kilīr-zāge pā-dāng āshī, 'ne tenu ādōk, āseir ne buē pā ānemā
servant-that him-to said, 'thy younger-brother appeared, and thy father him well
 āngū-nung pā āsōshī benzong yānglū.' Āngzi teti-zī āin-ādōkā
found-because him for large-feast made.' Then the-elder-brother angry-being
 kīdānge mā-tūnā āli. Ānungzi tebue kimāe lūā pā
house-to not-enter-wishing was. Therefore the-father house-court-to descending him
 mēpiā āshī. Pāe (pai) lāngzaā tebu-dāng āshī, 'tezaāngzō, kam pā
entreating spoke. He answering the-father-to said, 'consider-please, years so
 pīketi nī nā-dāng tenzaker āseir ne zambibā ō kōdāngā mesensa. Āzī
many I thee-to serving-am and thy spoken word never disregarded. This
 sākā ka tembār-tam-den pelāteptsā āsōshī ka-nung nāe nābōng
notwithstanding my friends-with rejoice-together-to for me-to thou goat
 chānū kātāngā mā-gatsa. Sākā ne chīr-zī shibā jabo-jari-den senza-nung ne
kid one-even not-gavest. But thy son-this who licentious-with going-by thy
 sen chimā pā āru-nung pā āsōshī nāe benzong yānglū.' Āngzi
property eaten-all he arrive-on him for thou feast made.' Thereupon
 tebue pā-dāng āshī, 'te-chīr nā teti ka-den lir, āseir nī kechī kā
the-father him-to said, 'the-son thou ever me-with art, and I what have

azak-zī na meyong. Zoko ne nū-zī saā ākā, tākam līr; mādōk
all-this thee for. But thy brother-this dead though, alive is; lost
 ākā, shīā-āru; ānungzī onoke temūlung chīā pelātsa tim.'
though, returned-has; therefore we mind pleasing rejoice-to ought.'

In the following comparative vocabulary of Chungli and Mongsen, from the pen of Mr. Davis, it should be noted that the sound which Mrs. Clark represents by *ɣ*, and which is represented in this survey by *a*, is here written *ü* or *i*. In other respects also, the spelling differs slightly from that followed in the preceding pages.

English.	Chungli.	Mongsen.
Send	yokong	zükong.
Strike	asukong	yäkong.
Cut	lepong	lepong.
Throw	entokong	enchukong.
Give	äketsüang	kiang.
Take	agiang	tsang.
Eat	chiungong	chäng.
Drink	chimang	yüngong.
See	ngu	ongja.
Look at	riprangang, asitangang	ringang, ächang.
Arrive	ätung	ätung.
Where have you been?	Nä kuleni äur	Nang chebä nä wäri?
I have been for wood	Ni süng penē äur	Ni äsüng enwär.
Why did you steal from his house?	Nä kichi tsü pēki tang ä-uyä?	Nang chebä tav pē ki ko fü tsungi?
Have you eaten rice or not?	Nä chi chuing assü mä chuing?	Nang ächä chäng opä?
What are you doing?	Nä kechi sir?	Nang cheba tari?
I am cooking rice	Ni chi surotar	Ni ächä suroteli.
What vegetables are you cooking?	Nä kechi än äsur?	Nang chebä enso suri?
Come back when you have had your food.	Chi chungri arungmä	Ächä chungri rangma.
Where have you come from?	Nä kulen nungi äro?	Nang ko tangi phening rä-i?
I have come from my fields	Ni älu nungi ätokr'	Ni älu phening tsukär.
Are your people in the village or have they gone to the fields?	Nä yimr' imtāk lir assü älu-e äü?	Nangila yimr' aki ko li sü älu nä wä?
They are in the village	Kitang lir	A ki ko lanu.
Make liquor	Yi sä-äng ma no	Azü sepang ma no.
I am going to pound paddy	Ni tang tsak sen tsü	Ni tago ätsak siätili.
This man is very ill	Nisung pae kangä shirang tsü	Ämi pi iyätang telangä nepungr'.
Wash this cloth	Ssü yä shito-ongmä	Assü pi shi chu kong.
What are you looking at?	Nä kechi riprangr. or asitangr?	Nang chebä ringari?

[NOTE how in Mongsen, as in Semä, nearly every noun has the prefix ä, corresponding to the Lbötä ö.]

LHŌTĀ.

I regret that up to the time of writing I have not succeeded in obtaining any specimens of this language. What follows is based upon Mr. Davis's note in the Census Report of Assam for 1891 and on Mr. Witter's grammar.

Twenty-two thousand Lhôtās were counted at the Census just referred to. The tribe is called Lhôtā or Tsōntsü, but its members call themselves Kyō, which means both a Lhôtā man and a man generally. It is not known which meaning is the original. 'Tsōntsü' is merely another spelling of 'Kyō' or 'Kyōntsü.' The Assamese call them Miklai after the name of a village in the Lhôtā country which lies near the plains. The term Lhôtā is also an Assamese one, and is unknown to the people themselves.

They live in 73 villages of which 69 lie in the Wokha, and four in the Mokokchang Subdivision of the Nāga Hills district. Their language differs from village to village, but this is principally a matter of intonation and pronunciation. As a whole the language has no marked dialects, though it might be equally true to say that every village has its own dialect. Its speakers dwell about the centre of the Nāga Hills district, which is at the same time close to the southern edge of that of Sibsagar. Their location may be described as the hills on both sides of the Doyang river from the point where the Chebi river falls into it. Their linguistic boundaries are Āo to the north, Semā to the east, Mikir to the west, and Angāmi and Rengmā to the south. Lhôtā is a distinct language from Āo, but is at the same time closely connected with it. A perusal of the following grammatical sketch and of the list of words appended will show that the two have certainly a common origin, while, at the same time, they are both widely different from Angāmi, Rengmā, Kezhāmā, and Semā. Mr. Davis has shown that, ultimately, both Āo and Angāmi can be referred to a common ancestor. We may therefore class these Nāgā languages as a great tree with at least two boughs, one represented by Āo and Lhôtā, and the other by Angāmi, Rengmā, Kezhāmā, and Semā.

The following are the authorities which I have seen in regard to Lhôtā :—

- CAMPBELL, SIR G.,—*Specimens of the languages of India, including those of the aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier.* Calcutta, 1874. On pp. 254 and ff. there is a Miklai Naga Vocabulary.
- BUTLER, CAPTAIN J.,—*A rough Comparative Vocabulary of two more of the Dialects spoken in the "Nāgā Hills."* *Journal of the Asiatic Society of Bengal*, Vol. xlv, Pt. I, 1875, pp. 216 and ff. Contains a 'Lhotā Nāgā' Vocabulary.
- DAMANT, G. H., I.C.S.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers.* *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 247 there is an account of the tribe, and on p. 257 a short vocabulary.
- WITTER, THE REV. W. E.,—*Outline Grammar of the Lhôtā Nāgā Language; with a Vocabulary and Illustrative Sentences.* Calcutta, 1888.
- DAVIS, A. W., I.C.S.,—*Report on the Census of Assam for 1891.* By E. A. Gait, I.C.S. Shillong, 1892. On pp. 163 and ff. there is a note on the relations which the principal languages of the Nāgā group bear to one another. This includes several Lhôtā vocabularies. On p. 248 there is an account of the tribe. Both are by A. W. D.

The following brief account of the main features of the language is based on Mr. Witter's Grammar, to which the student is referred for further particulars. The list of words for Lhôtā has been filled up, so far as was possible, from the same source, and has been supplemented by another list received from the Deputy Commissioner of the Nāga Hills district.

Pronunciation.—Lhötā Nāgā, unlike Āo, abounds in aspirated consonants. There is even an *fh*, and a *phh*. As in Āo there is the double sibilant, written *sc*. The letters *b*, *k*, and *v*, are often silent, as also *g* following *n*. Sounds are frequently interchanged,—thus, *a* and *ā*; *ā* and *e*; *ā* and *o*; *ā* and *o*; *e* and *i*; *e* and *ī*; *e* and *ai*; *ī* and *ü*; *ō* and *ū*; *ō* and *yü*; *üe* and *wi*; *b* and *p*; *b* and *v*; *ch* and *kh*; *dl* and *dr*; *h* and *p*; *kh* and *th*; *l* and *n*; *m* and *p*; *m* and *n*; *m* and *v*; *m* and *w*; *n* and *y*; *n* and *~*; *n* and *ng*; *p* and *s*; *tsü* and *tzü*.

Tones play an important part in Lhötā. At present there is no information available concerning them except that the syllable of negation is always pronounced on a much higher key than the rest of the word to which it is prefixed. This is indicated by an apostrophe. Thus *m'mā*, is not, but *mmā*, belly. In the latter the two *m*'s are pronounced on nearly the same key. The voice always falls at the end of a sentence, and in double interrogatives, in which the verbal root is reduplicated, the first syllable of the interrogative verb is spoken on a much higher key than the rest of the sentence.

Prefixes and Suffixes.—In addition to prefixes used to make forms corresponding to declension and conjugation, the following should be noted.

Nearly every noun takes the prefix *ō*, which is again dropped when a possessive or other modifying word unites with it to form a word of two or more syllables. Thus, *ō-kī*, house; *ā-kī*, my house; *ō-tchhü*, water, *e-lamō*, hot, *tchhulam*, hot water; *ō-tōng*, tree, *etsi*, Sāhib, *etsi-tōng*, Sāhib's tree.

This prefix corresponds to the prefix *ā* which is met in Semā, Rengmā, and Mongsen Āo, and to the Kezhāmā *e*.

The prefix *e*, corresponding to the *te* or *t* of Āo, is used before nouns, adjectives, and gerunds, has no formative significance, and may be assumed or thrown off at pleasure. It is perhaps slightly intensive in character, and is possibly assumed for the sake of euphony and to avoid the recurrence of monosyllabic words.

Examples of this prefix will be found below.

Nouns of agency are formed by the suffix *č*, with or without the prefix *e*. Thus, *shisho*, to trade, *shishoč*, a trader; *vü*, to sew, *e-vü-č*, a tailor.

Another suffix having a similar force is *wōchī* or *mōchī*. Thus, *tsō*, to eat, *e-tsō-wōchī*, an eater; *vān*, to stay, *e-vā-mōchī*, the one who stays. This corresponds to the Āo suffix *er*, and the Angāmi suffix *n*. Instead of *chī* we often find *chü*. This suffix, which corresponds to the relative particle of Dravidian languages, is of frequent occurrence. It means 'he who is.'

Mr. Witter gives the following excellent example of the way in which nouns, adjectives, and verbs are in their root forms indistinguishable from one another. The base throughout is the stem *tsō*, eat :—

e-tsō-wō, eatable.

e-tsō-yü, or *tsō-pē e-pē*, food.

n' tsō-wō, not eatable.

e-tsō mhōnā, good to eat.

e-tsō-č, *tsō-č*, an eater.

e-tsō-wōchī, *e-tsō-wōchü*, he who is the eater, he who eats.

tsō-ā-lā, *tsō-ā*, *tsō*, eats.

tsō, *e-tsō-lo*, *tsō-lo*, to eat.

Articles.—The force of the indefinite article is conveyed by suffixing the indefinite pronouns *matsangā* or *ntsangā*, a certain. In the case of human beings, *nchyūā*, which has the same meaning, may be substituted. Thus, *kyō nchyūā* or *kyō matsangā*, a certain man. The numeral *e-khā*, one, is only used in counting, and not as an article.

The force of the definite articles is given by suffixing the demonstrative pronouns *shī*, this, or *chī*, that. Thus, *kāko shī*, this book, the book. More often, however, the relative particle *wōchī*, or *wōchū* is suffixed. Thus *e-tsō-wōchī*, he who eats, the eater.

These articles are only used when ambiguity would result from their absence.

Substantives.—Gender.—For human relations, different words are used to indicate gender. Thus, *ō-pō*, father; *ō-yō*, mother. For human beings, *e-pūē*, male, and *e-lūē*, female, are also used, as *nūngōr*, a young person; *nūngōr e-pūē*, a boy; *nūngōr e-lūē*, a girl. For the lower animals the words are *ō-pōng* and *ō-khō*. Thus, *phurro*, a dog; *phurro ō-pōng*, *phurro pōng*, *phu-pōng*, a male dog; *phurro ō-khō*, a bitch. Irregular is *hōnō*, a fowl; *hāmpōng*, a cock; *hānkhō*, a hen.

Number.—Number is only indicated when this is rendered necessary by the context. In this case, the indefinite article is used to indicate the singular, and, usually, the plurals of the demonstrative pronouns, *shī-āng*, *chī-āng*, etc., to denote the plural. There is no plural suffix corresponding to the *Āo tam*. Thus, *kyō shīāng*, the men. Nouns of multitude are also added to form the plural. Also the suffix *dī*, as in *korr-dī*, horses.

There is a rudimentary dual, as in *Āo* and *Angāmi*. The sign is *ōnī*. Thus *Andriā Filip ōnī*, Andrew Philip two, Andrew and Philip.

The syllable *tō* is frequently suffixed when two or more objects are spoken of in succession. Thus,—

Ā-tā nā shī ō-tā tō wō-cho.

My-brother and his brother both went.

With more than two individuals *tō* might be translated 'all.'

Case.—Case is indicated by postpositions. They are as follows:—

Nominative.—The sign of the nominative, when it is the subject of a transitive verb, is *nā*. When there are two or more nominatives to the same verb, the *nā* is only suffixed to the last. It should be distinguished from the conjunction *nā*, meaning 'and.' Example—

nī-tā nā ā-tā-tō-nā mharr lang-tāt-ā.

your-brother and my-brother-both-(case-sign) tiger killed-much, i.e., your brother and mine slew a tiger.

This *nā* is evidently the sign of the case of the Agent, and the literal translation of the foregoing sentence is 'by your brother and my brother a tiger was slain.' Compare the Instrumental. The suffix corresponds to the *Kezhāmā nyī*.

When the nominative is the subject of an intransitive verb it either takes the suffix *cho*, or has no suffix at all. Sometimes, however, *nā* is used. Thus,—*hī-cho mhōnā*, *ōsī ō-chī-cho m'mhō*, this is good, but that is bad; *māngsū wōntōn-tāt-ā*, the cow is very hungry.

Accusative.—The accusative case takes no suffix. When a verb has also an indirect object, it stands between the direct object and the verb. Thus,—*shī-nā ō-mā ā pī-cho*, he gave me salt.

Instrumental.—This case is formed by the suffix *nā*, as in *ā-nā ō-nung-nā shī e-phīā-tsang-cho*, I slew him with a stone.

Dative.—The suffixes are *i*, *theni* and *thingi*, to, and *o*, *etchi*, *etchü* and *etsconā*, for. Thus, *ā-nā nī yān-i wō*, I will go to your village; *Etsi-theni wō-ā*, go to the Sāhib; *shī-nā ō-tsang-o iyā*, he has gone for wood; *ā-tā-etchü ō-scü shī-ā*, buy a cloth for my brother.

Ablative.—The suffix is *nā*, as in *ā kī-nā rō-chō*, I came from my house.

Locative.—The suffixes are *i*, in; *o* or *lo*, on; and *we* or *wi*, in the direction of, on, upon; or other postpositions may be used. Examples are *shī-cho ō-ha-i*, or *ō-hā nūngi*, *thet-ā*, place this in the basket; *ō-tōng-o*, *ō-tōng-we*, on the tree.

When a noun is followed by an adjective in agreement with it, the postposition is added to the latter. Thus,—

<i>ā-korr</i>	<i>emmhü-wōchī-nā</i>	<i>kōngke tsō-ā-lā</i> .
my-horse	white-he-who-is-(sign of nom. case)	oranges eats.

Adjectives.—Adjectives usually, but not always, follow the nouns they qualify. The suffix *wōchī*, or one of its varieties, is very commonly used with adjectives, as in the example just given.

Comparison is indicated by suffixing *wō*, gone, to the adjective. The suffix is liable to be euphonicly changed to *mō* or *ō*. Examples are, *aiyō nī sapō-wō*, I you tall gone, you are taller than I; *shī-cho chī mhō-mō*, this is better than that; *langā nūngōr shī tsa-pō-wō*, all boys this large gone, this is the largest boy.

The numerals will be found in the list of words. Sixteen, etc., is, something like *Āo*, *mezü-nā mekwü m'pě*, by four twenty incomplete, but also, and more commonly, *taro sūtirok*, ten plus six.

The following ordinals are given by Mr. Witter:—

ovūngōchü, the one in front, first.

ovūngōchü sīlāmo, the one in front behind, second.

ovūngōchü-chī-tō ōnī sīlāmo, the one in front that one two behind, third.

or *ennōächü sīlāmo*, the again behind.

And so on.

Pronouns.—The Personal pronouns are—

<i>ā</i> , <i>ai</i> , <i>aiyo</i> , <i>ākhā</i> , I	<i>enī</i> , we, you and I	<i>e</i> , <i>ete</i> , we.
	<i>shī ennī</i> , we, he and I	
<i>nā</i> , <i>mā</i> , <i>nō</i> , <i>mō</i> , <i>nīnā</i> , <i>yī</i> , thou	<i>nī-nī</i> , you two	<i>nī</i> , <i>nīno</i> , <i>ntě</i> , <i>yī</i> , you.

Nom. *ā-nā*, etc., and so on for the other cases.

The Demonstrative pronouns are used for the third person. The Possessive pronouns are as illustrated below:—

ā-kī, my house.

nī-kī, thy house.

shī kī, *ōmō kī*, his house.

e-kī, *en-kī*, *eten-kī*, our house.

nīn-kī, *ntě-kī*, your house.

ōtē kī, *ōnte kī*, *chüāng kī*, *shīāng kī*, their house.

The Demonstrative pronouns, both of which are used as pronouns of the third person, are,—

1. *shī, hī*, this, he; *shī tō ōnī*, these two; *shīāng, shīā, shīānō, hīang*, these, they.

2. *chī, chū*, that, he; *ōchī tō ōnī*, they two; *chīāng, chūāng, chyūā, chīāno, ōtē, ōntē* *ōteno*, those, they.

The Interrogative pronouns are —

ō-chī, ō-chō, who?

ō-chō, kūwe, kō, which?

ō-chō, ō-chī, what person?

ntīō, nyū, nyūwo, what thing?

The force of the Relative pronoun is usually given by the relative suffix *wōchī*, etc., he who is. Thus, *nchō kyō e-rō-wōchū*, yesterday man he who is come, the man who came yesterday. Sometimes the interrogative pronoun is used as a relative, and is then followed by a demonstrative. Thus,—

kūwe nī khī hngā-nā chī khī-ā.

What you take desiring that take, (which is the one you wish to take? Take it) *i.e.*, take the one which you like.

The Reflexive pronoun is *mōchī* or *mōmō*, self.

ā mōmō tāp-cho, I struck myself.

ā mōchī kī, my own house.

Verbs.—The ideas of time and mood are conveyed by prefixes and suffixes added to the root. The verb does not change for number or person. The use of the prefix *e* has already been referred to.

The following are the principal tenses of the verb *tsō*, eat :—

Present. *ā-nā tsō, ā-nā tsō-ā-lā*, I eat, I am eating.

Present definite. *ā-nā tsō-ā kam-ā, ā-nā tsō-ā vān-ā-lā*, I am eating.

Imperfect. Same as second form of present, *ā-nā tsō-ā-lā*, I was eating.

Past. *ā-nā tsō-ā, ā-nā tsō-cho*, I ate.

Perfect. *ā-nā tsō-ā, ā-nā tsō-chākā*, I have eaten.

Pluperfect. *ā-nā tsō-chākā, ā-nā tsō-chākā-chākā*, I had eaten.

Future. *ā-nā tsō, ā-nā tsō-v, ā-nā tsō-kā*, I shall eat.

Imperative. *tsō-ā*, eat.

Negative Imperative. *tī tsō-ā*, do not eat.

Participles and Gerunds. It is difficult to distinguish these two. The same form sometimes has the power of an adjective, *i.e.*, participle, and sometimes that of a verbal noun, *i.e.*, gerund. Classifying them according to time referred to, we have the following suffixes and prefixes :—

Present. *tsō-ā-thang*, while eating.

tsō-ā-le, tsō-ā-vān-le, while eating.

tsō-le-hā, although I eat.

Past. *tsō-sā, tsō-sī*, having eaten.

tsō-chāk-nā, after having eaten.

tsō-chō-le hā, although (I) ate.

tsō-chāk-lā, since (I) have eaten.

Indefinite.—*tsō-nā*, on eating, if (I) eat, from eating.

tsō-ī, on eating, immediately on eating.

Infinitive.—There are two forms of the Infinitive of purpose.

1. *tsō kàttō*, *tsō kiàttō*, to eat; *ā-nā tsō-kàttō tscō-ā-lā*, I wish to eat.

2. *ā-nā tsō-lō rō-cho*,
ā-nā e-tsō-lō rō-cho,
ā-nā e-tsō rō-cho, } I came to eat.

Conditional sentences.—These are generally expressed by the aid of participles. Thus, *nnā tsō-le-hā*, *ā-nā n'tsō*, though you eat, I will not eat.

nnā shkī tsō-nā, *pō*, if you eat this, well, *i.e.*, if you eat this you will be well.

The past conditional is formed with *wō* in the protasis, and *kātōlā* in the apodosis. Thus, *nnā shkī tsō-wō mhōm m'mhōm ntsyü-kātōlā*, if you had eaten this, you would have known whether it was good or bad.

Compound verbs.—As in *Āo*, a large number of particles can be added to a root in order to modify its meaning.

Examples are,—

Potentials.—Infix *kōk* or *che*, as

in *ā-nā tsō-kōk-ā*, I can eat.

Causals.—, *tōk*

ā-nā hī tsō-tōk-ā-lā, I cause him to eat.

Desideratives.—*hng* or *tāne*

ā-tsō-hng-ā, I wish to eat.

Intensives.—*tāt*, *tsang* or *khang*

ai'yip-tsang-ā or *ai yip-tāt-ā*, I am very sleepy.

And many others. There are also prefixes used with a similar result.

Passive voice.—As in *Āo*, roots may be used either in an active or in a passive signification. Thus, *tsō-chākā* means either 'has eaten' or 'has been eaten.' The meaning has to be judged from the construction of the sentence.

Negative verbs.—Negative forms are indicated by the prefix *n* or *m*, except in the imperative mood, where it is *tī*. The negative prefixes are pronounced as separate syllables, and always in a higher key than the rest of the word. Thus, *ā-nā n'tsō*, I do not eat. In such cases *n'vān* becomes *m'mā*. Thus, *ā-nā tsō-ā m'mā*, I am not eating.

Interrogative sentences.—The Interrogative particles are *ke* and *nung*, which are attached to the verb. *nnō tsō-ā-ke* or *nnō tsō-ā-nung*, do you eat? Double interrogatives double the verbal root, and, in the past tense, take the termination *ēlā*. Thus, *nnō tsō tsō-ā-lā*, do you eat or not? *nnō tsō tsō-ēlā*, did you eat or not? or we may have forms like *nnō tsō tsō-ālō*, *n'tsō-chō-lā*, did you eat or not?

Order of words.—Adjectives and articles usually follow the nouns they qualify. The thing possessed follows the possessor. The subject usually commences the sentence, and the verb usually ends it.

TENGSA NĀGĀ.

Tengsa is a trans-Dikhu village, between the Naked Tribes and the Āos. The inhabitants wear a little loincloth. We know very little else about them, as they have generally absconded when visits have been paid to them. All that we know of their language is based on vocabularies made by Brown in the middle of the last century. Brown wrongly considered that it was the same as Dupdoria, one of the forms of Āo. He must have got his specimens from some stray members of the village who visited the plains in company with some party of Āos from Nowgong or of naked men from Tamlu. I have failed to obtain any specimens of their language for this Survey, but have filled up the standard list of words, so far as was possible, from Brown. From this it will be seen that the language belongs to the Central Group. The following are the earlier authorities on this form of speech :—

HODGSON, B. H.,—*On the Aborigines of the Eastern Frontier. Journal of the Asiatic Society of Bengal.* Vol. xviii, Pt. II, 1849, pp. 967 and ff. Vocabulary by Rev. N. Brown. Reprinted in *Miscellaneous Essays relating to Indian Subjects.* London, 1880, Vol. II, pp. 19 and ff.

BROWN, THE REV. N.,—*Specimens of the Naga Language of Assam. Journal of the American Oriental Society,* Vol. ii, 1851, pp. 155 and ff. Contains a vocabulary of Tengsa and Dopdor (*sic*).

HUNTER, SIR W. W.,—*A comparative Dictionary of the Languages of India and High Asia.* London, 1868. Contains a vocabulary of Tengsa Nāgā based on Hodgson.

THUKUMI AND YACHUMI.

I am indebted to Captain A. E. Woods, I.S.C., Deputy Commissioner of the Nāga Hills District, for the lists of words in these languages. They were taken down by him in the cold weather of 1899-1900. Regarding them he says,—

Both the tribes inhabit country right outside British Territory in the Tita Valley. The Tita is a river which flows west of the Saramethi Hill and falls into the Lanier which again falls into the Chindwin.¹ The country has never been surveyed and of course little or nothing is known of the inhabitants.

The Thukumi language seems to be very similar to a language spoken by a tribe called *Sangtam* who are trans-Dikhu or Miri Nāgās also living outside British Territory.

The Yachumi (Yemshong or Tozhuma) tribe also inhabit the Tita Valley. I could not find out the tribal name, so I have called it Yachumi, from one of their big villages. I was sorry I could not get more information about the languages, etc., but as Yachumi was unfriendly and had to be punished it was impossible.

The lists of words are not complete, and do not pretend to be accurate. They, however, give sufficient information to show us that these two languages certainly belong to the Central Group of Nāgā languages. I may add that Mr. Davis informs me that Thukumi has a noun-suffix *-rē*, corresponding to the Āo *-r*, and the Angāmi *mū* or *mi*. He adds,—

'The Thukumi call themselves *Isāchānu-rē*. "Thukumi" is a 'Semā term. They inhabit the upper portion of the Tita valley, the whole of the valley of the Nāzār' stream and extend across the Tita-Dikhu watershed to just opposite the Āo village of Mokokchang. Their villages are small. The Āos call the tribe Sangtamra. As amongst the Āos, the women are tattooed on the legs and arms, but not the men. Their loincloth resembles that of the Āos and Lhōtās. Their language is closely allied to both Lhōtā and Āo and in sound has a very strong resemblance to Lhōtā. I have visited most of the villages of this tribe.

¹ The Tita and Lanier are marked, but not named, in Coustale's *Hand-Atlas of India*. Both will be found in sheet 130 of the *Indian Atlas*.

The following list of standard words and sentences in the dialects of the Central sub-group of the Nāgā languages is far from complete. I have not been able to obtain lists specially prepared for the Survey and what I give are compilations, in some cases incomplete, from materials already available. The columns for Ao (Chungli) and Lhötā are probably accurate enough, being compiled, respectively, from the grammars of Mrs. Clark and Mr. Witter. The sentences at the end have been supplied by the Rev. E. W. Clark and the Deputy Commissioner of the Nāga Hills, respectively. The few Āo (Mongsen) words are taken from Mr. Davis's list in the Assam Census Report for 1891, which I have reproduced in full a few pages back. Two columns are from vocabularies published in 1851 by the Rev. N. Brown. They are No. 3, Khari (regarding which he says, 'a large and interesting tribe, whose dress and general appearance are more respectable than I have elsewhere seen among the Nagas.' Mr. Davis has kindly made some corrections in this column. Khari is a large Mongsen village, and the words given are in the Mongsen language); and No. 8 Tengsa (which he seems to class wrongly as a form of Āo, under the name 'Tengsa and Dopdor.' It is in no way a form of Āo, although belonging to the same sub-group).

Two columns have been taken from Sir George Campbell's *Specimens of the Languages of India*. They are given for what they are worth. Unfortunately the originals have many misprints, and, while these columns are more complete than the others, I cannot vouch for their accuracy.

The columns are—

4. Hati Garya Nāgā. (This is more or less inaccurate Mongsen.)
7. Miklai Nāgā. (Miklai is the Assamese name for Lhötā.)

In all these lists, I have not ventured to alter the spelling, except to correct what are evident misprints which are capable of being put right.

Finally, there are two incomplete lists of Thukumi and Yachumi, which I owe to the kindness of Captain Woods.

STANDARD LIST OF WORDS AND SENTENCES IN THE

English.	Āo (Chungli) (Clark). ¹	Khari (Brown).	Hati Garya Nāgā (Campbell).
1. One	Kā, ākā	Akhet	Ākhāt
2. Two	Ānā	Anne	Ānek
3. Three	Āsam	Asam	Āchām
4. Four	Peza	Phali	Fli
5. Five	Pungu	Phangā	Fāngā
6. Six	Trok, terok	Tarōk	Thorok
7. Seven	Tenet	Tani	Theni
8. Eight	Ti	Taset	Chet
9. Nine	Tako	Takū	Thuku
10. Ten	Ter	Tarah	Therā
11. Twenty	Metsa	Makhi	Meki
12. Fifty	Tenem	Tanam	Chāmra
13. Hundred	Nōklāng, tālāng	Telang	Telengā
14. I	Ni	Ni	Ni
15. Of me	Ka, ke, k	Ka	Ilābā
16. Mine	Ka, ke, k	Ka	Kābā
17. We	Oz, ozonok, onok, āsen, āsenok.	Akau, nigila	Ilāuching
18. Of us	O	Ārogā
19. Our	O	Ilātelāng
20. Thou	Nā	Nang	Nāng
21. Of thee	Ne	Ne	Bā (sic)
22. Thine	Ne	Ne	Nebā
23. You	Nenok	Nangla	Ninglā
24. Of you	Nenok	Ninglābā

¹ The spelling of Mrs. Clark's Grammar is followed, except that *α* is substituted for *o*, and *ā* for *a*. The quantities of the other vowels are marked.
N. G.—292

NĀGĀ GROUP.

THE EASTERN SUB-GROUP.

This includes the following languages :—

Name of District.	Name of language.	Estimated Number of speakers.
Nāga Hills	Angwānku or Tableng	5,000
	Chingmēgnu or Tamlu	
Sibsāgar	Banparā	? 1,600
	Mutoniā	
	Mohongiā	
Lakhimpur	Namsangiā	? 1,870
Extra British Territory	Chāng or Mojung	6,500
	Assiringiā	?
	Mōshāng	?
	Shānggē	?

The figures for the Nāga Hills are only a rough estimate. Those for Sibsagar and Lakhimpur are what are given by the local authorities for 'Nāgā' without specifying any language for their respective districts. They certainly by no means represent all the speakers of the various languages mentioned, of whom there must be many thousands more beyond our frontier.

Mr. Damant has given the following account of the Eastern Nāgā Group :—

In this family are included all the tribes found in the tract lying east of the Hatigorria country extending to the Singpho country on the east and bounded on the south by the Patkoi range of hills. Within these limits there are many different tribes, some of them consisting only of a few villages, and all, or nearly all, speaking languages unintelligible the one to the other. Within twenty miles of country five or six different dialects are often to be found. We do not yet possess vocabularies of many of the languages spoken in this area, but, so far as our knowledge extends at present, a considerable affinity appears to exist among them. There is also a great resemblance in the manners and customs of the Nāgās of this tract; they nearly all expose their dead upon bamboo platforms, leaving the body to rot there, the skull being preserved in the bone-house, which is to be found in nearly every village. Most of the tribes tattoo; the tattoo, *ak*, as it is called, not being given except to men who have killed an enemy. In several of the tribes the women are perfectly naked, in others the men.

Proceeding in an easterly direction from the Hatigorria country, the first tribe we meet are the Tablung Nāgā, so called from their principal village; they are a tribe of naked Nāgā inhabiting about thirty villages with a population of about 25,000. Very little is known of these people.

Next to them come a tribe called Sangloi, the name of their principal village; nothing is known of them but they are believed to be as numerous as the Tablung Nāgā.

The next tribe to the east are the Banfera, Joboka, or Abhaypurya tribe; they have about twelve villages, with a population of some 20,000. Joboka and Banfera are names of two of their principal villages. Abhaypurya is a name given them by the people of the plains.

The Mutonia, so called from Muton, their largest village, are a small tribe with only four villages, and a population of about 4,000.

The Mohongia, who are also called Borduaria and Paniduaria, have a population of about 10,000. I have no information as to the exact number of their villages, but it may be eight or ten.

The Namsangia, or Jaipuria, as they are also called, have probably about thirty villages, with a population of 25,000, or 30,000. They are the last Nāgā tribe of importance to the east, though there are a few broken tribes still further to the east of them; these are of little note, and are in subjection to the Singpho.

I regret that, for the purposes of this Survey, I have only been able to obtain a few new lists of words in these languages. In order to make the information regarding the Nāgā speeches as complete as under the circumstances I could, I have endeavoured to collate what has hitherto been known regarding each, and to throw it into the form of the Standard List of Words and Sentences. Much that is there given must be taken with reserve, for, even where a list is apparently nearly complete, it has all the defects

of its sources, which were seldom as accurate as could be desired. In order to prevent the reader being misled by wrong information, I have, whenever two independent authorities were available, given the words recorded by each in two parallel columns. It is probable that, when both agree, what they say may be taken as accurate.

The most fruitful cause of mistakes in the original sources from which the lists have been compiled is printer's errors. It is quite clear that in many cases, for instance, an 'n' has been printed 'u' and *vice versa*. When there was no uncertainty about this, I have silently corrected the mistake, but doubtful cases (and there are many) I have not ventured to touch.

An examination of this list shows two important peculiarities of the Eastern Nāgā Sub-Group.

The first is that it is a group of transition languages, bridging over the gulf between the other Nāgā languages and Singpho, the great language which lies to their east and south-east. A large portion of the vocabulary agrees with that language, as is shown by Mr. Needham's notes to the words taken from Mōshāng.

The other peculiarity which deserves notice is that, at least, four languages of the group, Tableng, Tamlu, Mojung, and Namsangiā, have an organic conjugation of the verb. That is, that each tense changes according to the person of the subject, a state of affairs quite foreign to the other Nāgā languages, and almost foreign to the Bodo ones. The Namsangiā verb (while not changing for number) has its three persons for each tense, just like Assamese or Bengali. This is also unknown to Singpho.

ANGWĀNKU OR TABLENG AND TAMLU OR CHINGMĒGNU.

Immediately to the east of the Āos, in the extreme north-east of the district of the Nāga Hills, where it meets the Sibsagar District we come upon two tribes living together, the Tamḷu or Chingmēgnu and the Tabḷeng or Angwānku. Both these languages belong to the Eastern Sub-Group. The Deputy Commissioner estimates the number of people speaking these languages as follows :—

[illegible]

He says—

These tribes are naked and reside in the hills on each side of the Dikhu River, before it enters the valley of the Brahmaputra. In the village of Tamlu, in British Territory, both languages or dialects are spoken. I am inclined to believe that they are separate languages, but the customs of the people, with some slight exceptions, are the same, and also the tattooing on their bodies; but the Tableng people wear black cane coiled round their waists, while the Tamlu people wear the piece of the bark of a tree like a belt, with an attachment behind resembling a tail.

I compared a certain amount of common words in the languages, and they seem very different, and they say a Tamlu man cannot understand a Tableng man unless he has learned the language.

Both tribes call themselves 'Kātā'.¹ Those speaking Tableng call themselves 'Wān-ching Wākching Kātā,' Wānching and Wākching being their two principal villages. Those speaking Chingmēgnu are called 'Dikpā Kātā.'

The names **Tableng** and **Tamlu** are those given to the tribes by the English. **Angwānku** and **Chingmēgnu** are, respectively, what they themselves call their respective languages.

Brown in his *Specimens* quoted below, says that the following languages are identical with Tableng, or, as he calls the language, Tablung, — Jaktung, Kongon, Geleki-Duor and Southern Namsang. He also gives another language which he calls Mulung and Sima, which is evidently closely related to his Tablung.

Mr. Noel Williamson, the Subdivisional Officer of Mokokchāng, in the Nága Hills District, has supplied me with lists of words in both Tableng and Tamlu. They will be found printed on pp. 342 and ff. There are not sufficient materials available to form a grammatical sketch of either of them, but the principal forms will be found in the lists. It will be seen that the two, though closely related, are distinct languages. It should be noted, that both have an organic conjugation of the verb, there being different forms for each person of the present and future tenses, while (as in Namsangiā), there is no distinction between the singular and the plural. Moreover, there are instances of euphonic change; for instance in Tableng 'he will beat' is *shellok*, contracted from *shet-lok* and in Tamlu the suffix *dhu* of the imperative becomes *thu* after a hard consonant. Thus *thai-dhu*, go, but *up-thu*, beat. In other words, these languages are ceasing to be agglutinative, and are becoming synthetic.

The following are the authorities which I have noted as dealing with Tableng:—

- HODGSON, B. H.,—*Aborigines of the North-East Frontier.* Journal of the Asiatic Society of Bengal. Vol. xix, 1850, pp. 309 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects* Vol. ii, pp. 11 and ff. London, 1880. Contains a Tablung Nāgā Vocabulary.
- BROWN, REV. N.,—*Specimens of the Nāgā Languages of Asam.* Journal of the American Oriental Society. Vol. ii, 1851, pp. 155 and ff. Contains Vocabularies of 'Tablung and Jaktung,' and of 'Mulung and Sima.'
- HUNTER, SIR W. W.,—*A comparative Dictionary of the Languages of India and High Asia, with a Dissertation.* London, 1868. Contains a Vocabulary of Tablung Nāgā taken from Hodgson.

¹ The word *kātā* means 'man' in Tableng.

- DALTON, COLONEL E. T., C.S.I.,—*Descriptive Ethnology of Bengal*. Calcutta, 1872. On p. 71 a Tablung Nāgā Vocabulary based on Hodgson.
- CAMPBELL, SIR G.,—*Specimens of the languages of India, including those of the aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. On pp. 254 and ff. a Vocabulary of 'the Tablungia Nāgā Dialect.'
- DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers*. *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 249 a note on the Tablung Nāgā tribe. On p. 257 a brief Tablung Vocabulary taken from Dalton.

BANPARĀ.

This tribe (which Brown and Damant call Banfera) inhabits the District of Sibsāgar, to the East of the Tablung, and separated from them by a small tribe called Sangloi or Changnoi about whom nothing but the name is known. According to Brown the latter speak Banparā, as also do the Joboka, another tribe close to, and (according to Peal who wrote in 1872) constantly at war with, the latter. Both Joboka and Banparā are villages from which the tribes take their respective names. The Banparā are also called Abhaypurya (from one of their villages called Abhaypur) by the people of the plains.

No specimens of this dialect have been received by me, and all that I have been able to do has been to reproduce Sir George Campbell's list of words and sentences. This is fairly complete, but is unfortunately full of misprints. To enable the reader to correct as far as possible any mistakes arising from this source, I have given the words corresponding to those in Sir George Campbell's list which I have been able to find in Mr. Peal's vocabulary mentioned below.

The following is a list of the authorities on Banparā which I have come across:—

- BROWN, REV. N.,—*Specimens of the Naga Languages of Asam*. *Journal of the American Oriental Society*, Vol. ii, 1851, pp. 155 and ff. Contains a Vocabulary 'Joboka and Banfera.' which, according to the introduction, includes 'Changnoi.'
- PEAL, S. E.,—*Notes on a visit to the tribes inhabiting the hills south of Sibsāgar, Asām*. *Journal of the Asiatic Society of Bengal*, Vol. xli, 1872, Part I, pp. 9 and ff. Reprinted in *Selection of papers regarding the hill tracts between Assam and Burma and on the Upper Brahmaputra*. No. 10 Calcutta, 1873. Contains an account of the tribe. Banparā numerals and 'Nāgā' vocabulary (the words of which are Banparā) on p. 29.
- PEAL, S. E.,—*Vocabulary of the Banparā Nāgās*. *Journal of the Asiatic Society of Bengal*, Vol. xlii, 1873, Part I, appendix, pp. xxx and ff. This is said to be 'Mainly Banparā Nāgā.'
- CAMPBELL, SIR G.,—*Specimens of the Languages of India, including those of the aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. On pp. 220 and ff. a Vocabulary of 'Nāgā of Sebsaugor,' which is Banparā. On pp. 254 and ff. a vocabulary of 'Abhay Purya Nāgā Dialect,' which is also Banparā.
- DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers*. *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 249 an account of the tribe. On p. 257, a short vocabulary taken from Peal.

Peal (p. xxxv) says of this language:—

'The letter *r* at the end of a word seems rare. So far I have not met a single case, and I am inclined to think it is never used, inasmuch as all Assamese words used by them that so end, have the final *r* turned into *a* as *khār* (gunpowder) to *khāt*, *kīr* (cloth) into *kīut*, etc.'

CHĀNG OR MOJUNG.

The speakers of this language live beyond the Dikhu river, outside British territory. On the west face of the Patkoi range there is only one very small village in British Territory. The Āos call all trans-Dikhu tribes, generally, 'Miri,' hence this language is also known by this name. The Āos call it 'Mojung,' but its speakers call it 'Chāng.' Their principal village is called by the Āos 'Mojunjāmi,' and by themselves 'Chong-Sāng.' The number of speakers of Chāng is estimated at about 6,500.

I am indebted to Mr. Noel Williamson, the Subdivisional Officer of Mokokechang, in the Nāga Hills, for a list of words in this language, which appears most closely connected with Banparā and Mutoniā.

ASSIRINGIĀ.

The name Assiringiā, also spelt Asuring, denotes a village, called by the Āos Miri-nokpo, situated in the Āo country on the Japukung range overlooking the plains of Sibsāgar. The people have adopted the customs and dress of the Āos, but not their language. They really belong to a tribe of naked Nāgās, and came many years ago to their present site from the village of Wankhong or Oranggang, which is situated a day's march east of the Dikhu from Susu village. As has been explained under the head of Āo, Āos come down to the plains through Assiringiā, and hence the Assamese call them by that name. We thus often find the Āo language wrongly called Assiringiā. It is to be regretted that nothing is known about the true Assiringiā language. As its speakers belong to a 'naked' tribe, I have provisionally classed it as belonging to the Eastern sub-group of the Nāgā languages.

MUTONIĀ.

Immediately to the East of the Banparās, in the District of Sibsāgar, are the Mutoniā, a small tribe with only some four villages, of which Muton is the principal. Their language is merely a dialect of Banparā. I have not obtained any specimens of it. All that I can do is to partially fill up the list of standard words from the materials provided by Brown.

Brown mentions three groups of people speaking this language, *viz.*, Bor-Muthun, Horu-Muthun and Khulung Muthun, and Hodgson calls it 'Mithan Nāgā.'

The authorities on Mutoniā which I have seen are as follows :—

- HODGSON, B. H.,—*Aborigines of the North-East Frontier*. *Journal of the Bengal Asiatic Society*. Vol. xix, 1850. pp. 309 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects*. Vol. ii, pp. 11 and ff. Contains a 'Mithan Nāgā' Vocabulary.
- BROWN, REV. N.,—*Specimens of the Nāgā languages of Asam*. *Journal of the American Oriental Society*. Vol. ii, 1851, pp. 153 and ff. Contains a 'Muthun and Khulung-Muthun' Vocabulary.
- HUNTER, SIR W. W.,—*A comparative Dictionary of the Languages of India and High Asia with a dissertation*. London, 1868. Contains a Vocabulary of 'Mithan Nāgā.' Taken from Hodgson.
- DALTON, COLONEL E. T.,—*Descriptive Ethnology of Bengal*. Calcutta. 1872. Mithan Nāgā Vocabulary on pp. 71 and ff. Taken from Hodgson.

MOHONGIĀ.

About eight miles to the east of the Banparās, and the same distance to the west of the Namsangiās lie the Mohongiās, who are also called Borduariā and Pāniduariā.

Brown in his *Specimens*¹ classes the 'Bor-Duor' and the 'Pani-Duor' as speaking the same language as the Namsangiās. The only other information which we possess about Mohongiā is a list of the numerals given by Peal in Appendix I to his *Visit to Nāgā Hills*,¹ which I reproduce here. With them, for the sake of comparison, are also given the corresponding words in Banparā and Namsangiā.

Banparā.	Mohongiā. ²	Namsangiā.
1. ē-tā	<i>tumchee</i>	<i>rānthē</i>
2. ā-nī	<i>kinee</i>	<i>vānṇi</i>
3. ā-jam	<i>kahom</i>	<i>vānram</i>
4. ā-lī	<i>mellee</i>	<i>belī</i>
5. ā-gā	<i>manga</i>	<i>bangā</i>
6. a-rok	<i>torrong (k ?)</i>	<i>īrōk</i>
7. ā-nat	<i>tenjee</i>	<i>īngit</i>
8. ā-chat	<i>ashut</i>	<i>īsat</i>
9. ā-kū	<i>akoo</i>	<i>īkhū</i>
10. ā-bu	<i>abau</i>	<i>īchi</i>

¹ Quoted under Banparā.

² Peal's spelling.

NAMSANGIĀ.

The Namsangiās live across the eastern border of the Sibsāgar District. Their headquarters are the village of Jaipur, and the banks of the Namsang River in its neighbourhood, at the south-west corner of Lakhimpur, where it abuts on Sibsāgar. They are also known by the name of Jaipuriā Nāgās after their principal village. Brown classes their language as identical with Borduariā and Pāniduariā, but these are the names of two septs of the Mohongiā tribe, some eight miles to their west. Mohongiā is, so far as I can tell from the scanty materials available, not the same as Namsangiā.¹

The Namsangiās are the last Nāgā tribe of importance to the east. We know more about their language than we do about the other members of the Eastern Nāgā group, for Robinson wrote a short grammar of it so long ago as 1849. As this grammar is not readily available it is reproduced below. Sir George Campbell has given us a list of words in the 'Naga of Luckimpur' by which he means Namsangiā. This I also reproduce. It would be very valuable were it not disfigured by numerous misprints. As a check on these I also give the corresponding words, so far as I could gather them from Brown, Hodgson and Butler. These must be taken for what they are worth.²

The following are the authorities which deal with Namsangiā :—

- OWEN, J.,³—*The Naga Tribes in Communication with Assam*. Calcutta, Carey & Co., 1844. Contains Vocabulary and Notes on Eastern Nagas (Namsangiā and others).
- ROBINSON, W.,—*Notes on the Languages spoken by the various Tribes inhabiting the Valley of Assam and its Mountain Confiner*. *Journal of the Asiatic Society of Bengal*, Vol. xviii, 1849, Part I, pp. 184 and ff., and pp. 310 and ff. On pp. 324 and ff. a Nāmsāngiyā grammar. On pp. 342 and ff. a Nāmsāngiyā Vocabulary.
- HODGSON, B. H.,—*On the Aborigines of the Eastern Frontier*. *Journal of the Asiatic Society of Bengal*, Vol. xviii, Part II, 1849, pp. 967 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects*, Vol. ii, pp. 19 and ff. London, 1880. Contains Vocabulary of Namsang Nāgā by the Rev. M. Bronson.
- BROWN, The Rev. N.,—*Specimens of the Nāgā Languages of Assam*. *Journal of the American Oriental Society*, Vol. ii, 1851, pp. 155 and ff. Contains a 'Namsang and Bor-Duor' Vocabulary by the Rev. M. Bronson.
- PEAL, S. E.,—*Notes on a Visit to the Tribes inhabiting the Hills South of Sibsāgar, Asām*. *Journal of the Asiatic Society of Bengal*. Reprinted in *Selections of Papers regarding the Hill Tracts between Assam and Burma and on the Upper Brahmaputra*, No. 10. Calcutta, 1873. On p. 29. the Namsangiā numerals.
- CAMPBELL, Sir G.,—*Specimens of the Languages of India including those of the aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. On pp. 221 and ff. a Vocabulary of 'Naga of Luckimpore.'
- BUTLER, Captain J.,—*A Rough Comparative Vocabulary of two more of the Dialects spoken in the 'Nāgā Hills'*. *Journal of the Asiatic Society of Bengal*, Vol. xlv, 1875, Part I, pp. 216 and ff. Contains a Vocabulary of 'Jaipuriā Nāgā.'
- DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi rivers*. *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. On p. 250 a Note on the tribe. On p. 257, a short Vocabulary taken from Butler.

I here reproduce the Namsangiā grammar written in 1849 by Robinson and quoted above.

¹ See preceding page.

² See list of words on pp. 345 and ff.

³ I am indebted to Major Waddell, C.I.E., I.M.S., for this reference.

OF NOUNS.

Comparatively copious as is the grammatical apparatus of this language, it possesses no affixes by which to designate the cases of its nouns.

The Genitive case is denoted merely by the juxta-position of the two substantives, the former being understood to be in the genitive. *Kien ngiupo phyet-ō*, milk the goat (or literally), draw the goat's milk. In the other oblique cases, the noun is followed by the distinguishing adjunct, *nang*, sometimes with, though more frequently without, the addition of a post-positive particle.

Ham-nang vanrō, bring a mat.

Irā minyāng-nang lāko-tak, I gave it to that man.

Sān-nang lam-ō, put it in the sun.

Jō-nang kien-ō, fill it with water.

The particles *mā* and *pā* are frequently used as affixes to nouns singular, but they seem to be merely euphonic, and have no definite signification attached to them.

The particle *he* is employed in the same manner, but only in cases where plurality is implied. It is, however, often omitted, and then the plural number is distinguished by the collective or plural idea expressed by the noun, or by the addition of a numeral adjective.

The difference of gender in individuals of the human family is denoted by distinct terms; in the case of all other animals, the appellatives *pōng*, male, and *nyōng*, female, are added to the noun.

Masculine.

Mi-nyān, man.

Delā, husband.

Vā, father.

Īphō, brother.

Mān-pōng, a bull.

Hū-pōng, a dog.

Kien-pōng, a he-goat.

Feminine.

Dehiek, woman.

Tang-ngyū, wife.

Ing-yōng, mother.

Ing-yāh, sister.

Mān-nyōng, a cow.

Hū-nyōng, a bitch.

Kien-nyōng, a she-goat.

OF ADJECTIVES.

In composition, an adjective invariably follows the noun it serves to qualify.

Irā kien ngiu-pa asan ko-ā.

That goat milk good gives

Adjectives in this language admit of no variations expressive of number, case, or gender, or even of the degrees of comparison. But as the comparison of one person or thing with another, so as to ascertain the relative quality possessed by each, must necessarily exist in every language, we find that the general mode of forming comparison among the Nāmsāngiyās, is merely by placing the adjective after the noun with which the comparison is made, the noun being put in the oblique form. *Ngāmā irā m-nyān nang ālō*, I am taller than that man, or literally I that man tall. *Ngāmā*

irānangmā ajā ilamang, I want more than that. *Jō* or *linjō* is often added to an adjective to express a quality as existing in the highest degree.

Irā dehiek phangsan jō, that woman is very handsome.

Ārā arīmā asan linjō, that fruit is exceedingly nice.

NUMERALS.

The numeral system of the *Nāmsāngiyās* is emphatically decimal—of the ten fingers. Thus they count—

- | | | | | |
|-------------------|-------------------|------------------|-------------------|------------------|
| 1. <i>Vānthē.</i> | 3. <i>Vānram.</i> | 5. <i>Bangū.</i> | 7. <i>Ing-it.</i> | 9. <i>Īkhu.</i> |
| 2. <i>Vānyi.</i> | 4. <i>Belī.</i> | 6. <i>Irōk.</i> | 8. <i>Isat.</i> | 10. <i>Īchi.</i> |

And then throwing their fingers in an imaginary heap they explain, *ruak*, a decade.

- | | |
|-------------------------------------|--------------------------------------|
| 11. <i>Īchi vānthē</i> , 10+1 | 20. <i>Ruak nyi</i> , two decades. |
| 12. <i>Īchi vānyi</i> , 10+2 | 30. <i>Ruak ram</i> , three decades. |
| 13. <i>Īchi vānram</i> , 10+3, etc. | 40. <i>Ruak belī</i> , four decades. |

And so on till they come to *chā*, a hundred.

- | | |
|----------------------|---|
| 100. <i>Chā-the.</i> | 300. <i>Cha ram</i> , etc. |
| 200. <i>Chā-nyi.</i> | <i>Chā īchi</i> , ten hundred or 1,000. |

OF PRONOUNS.

The *Personal pronouns* are, *Ngā*, I; *Nang*, thou; and *Atē*, he, she, or it. As the pronoun is, next to the verb, the most important part of speech, and that from which the verb chiefly derives its precision, we find in this language the use of distinct terms to express the plural number. They are, *Nimā*, we; *Nemā*, ye; and *Sening*, they.

In, what we have termed, the oblique form, these pronouns take the particle *nang* after them, as in the case of nouns.

- | | | |
|-----------------|-----------------|--------------------|
| <i>Ngānang</i> | <i>Nangnang</i> | <i>Atieng.</i> |
| <i>Nimānang</i> | <i>Nemānang</i> | <i>Seningnang.</i> |

Atieng appears to be merely a contracted form of *atē-nang*; the one term is as commonly used as the other.

The *Possessive pronouns* are *Ī*, my or our; *Mā*, thy, or your; and *Ā*, his or their. They are invariably used before the nouns with which they are connected.

Ārāpā ī lāh, this (is) my kite.

Māmā vā ngyōng-nang veō, honour thy father and mother.

In this sentence the first syllable *mā* is the pronoun, the second a euphonic particle.

Ānāppā ajun jō, his hair (is) very soft.

The particle *rāng* is often added to the above pronouns.

Īrāng mōk itōngā, the horse is mine.

Ārāng hum itōngā, the house is his.

The *Demonstrative pronouns* are, *Ārā*, this; and *Īrā*, that; with their plurals *Ārāhe*, these; and *Īrāhe*, those.

They precede the nouns they serve to point out.

Īrā khat-pā ilamang, I want that cloth.

Ārā-pā jo-kō, drink this water.

The *Interrogative pronouns* are *Hanā* or *Hammā*, who? and which? and *Chennā*, what?

OF VERBS.

The Nāmsāngiyā verb appears to be the most interesting part of its grammar. It has but one form of conjugation and the various modifications of an action are expressed by the addition of terminations to the verb expressing the action. The terminations are the same in both the singular and the plural numbers.

Thien, to put.

Indicative Mood—

Present tense,—1. *Thien-ang*, I put; 2. *Thien-ō*, thou puttest; 3. *Thien-ā*, or *-ē*, he puts.

Past tense,—1. *Thien-tak*, I did put; 2. *Thien-tō*, thou didst put; 3. *Thien-tā*, he did put.

Perfect tense,—1. *Lā-thien-tak*, I have put; 2. *Lā-thien-tō*, thou hast put; 3. *Lā-thien-tā*, he has put.

Future tense,—1. *I-thien-ang*; 2. *I-thien-ō*; 3. *I-thien-ā*, or *-ē*.

Gerund,—*Thien-rāng*.

Participle continuative,—*Thien-limā*, or *lāmā*.

The *Imperative* form is the same as that of the 2nd person Present tense.

When it is necessary to give a *Conditional* or *Subjunctive* force to the verb, the particle *ōkō* is affixed to the verb in its various forms.

Thienang ōkō, if I put; *Thienō ōkō*, if thou put; *Thienā ōkō*, if he put, etc., etc.

The *Potential* form, used to express power or ability, is denoted by the use of the verb *Tā*, to be able, as an auxiliary.

Tā thienang, I can put.

In conjunction with this form of the verb, we find a peculiar use made of the possessive, instead of the personal, pronoun. Thus instead of saying *Ngā tā-thienang*, I can put; *Nang tā-thienō*, thou canst put, we find the conventional form to be—

1. *Itā thienang*, I can put.
2. *Mātā thienō*, thou canst put.
3. *Ātā thienā*, he can put.

The *negative form* is denoted by the addition of the negative particle *Mak* to the auxiliary verb.

1. *Itā mak thienang*, I cannot put.
2. *Mātā mak thienō*, thou canst not put.
3. *Ātā mak thienā*, he cannot put.

When the *necessity* of an act is to be expressed, *thing* is compounded with the verbal root.

Ngā thien thing, I must put.

Nang thien thing, thou must put.

Ātē thien thing, he must put.

Prohibition is expressed by the use of the negative particle *mak* or *nak*, immediately before the verbal root.

Mā dak nak sakō, do not lay your hand (on it).

Inang mak kănō, do not go there.

To express *Simple negation* the particle *mak*, or *mā*¹ is put after the root of the verb.

Ārā hū-mā kak mā, that dog does not bite.

Ā ingyōng-mā kōmā-tā, his (or her) mother did not give (it).

Minyān moōt ahō dang-mā-ōkō, if the man has not any work.

Interrogation is denoted by the particles *ne*, *ā* or *le* added to the end of the sentence.

Jō alō le, is the water deep?

Nang-mā chennā lam-ō ā, what do you seek?

Majā nang sōijāng mā lutō ne, did you not catch a pea-fowl yesterday?

OF ADVERBS.

Adverbs are used to qualify verbs and adjectives; and in composition they usually precede the verb, and follow the adjective.

Āchānmā, fast; *Āchānmā lu-ō*, hold fast.

Jō, very; *Īrā natā-mā along jō*, that boy (is) very cross.

Tajā, to-day.

Hālō, afar.

Ni-nap, to-morrow.

Rangjānang, in the evening.

Majā, yesterday.

Rankhānang, in the morning.

Dokko, now.

Khorōk, quickly.

Anang, here.

Arē, slowly.

Inang, there.

The CONJUNCTIONS are

Irokovā, and.

Irōōkomin, but.

Min, *ākomin*, also.

Cherāngmā, for, because, etc.

Ōkō, if.

Post-positive Particles are used in this language in the same manner as the prepositions of occidental tongues.

Pungmā, with.

Nyunang, within.

Nyu, in.

Khonang, upon.

Akhan, under.

Vā, from.

Dumnang, by means of.

SENTENCES.

Rang i-pathā, it will rain.

Khat-hūp vanrō, bring an umbrella.

Sān-mā lang-mā sai hang, the sun is very hot.

Mā dānang mak achang jō, your feet are very dirty.

Jōnang kāl-ō mā suan-ō, go to the river and wash them.

Nangmā chen mōot ī-ta-mōō, what work can you do?

Nangmā chen ngait-ō, what do you say?

Ngāmā ngin mathu mathōithak, iraphimā nang nak thō thōō, do not talk when I am speaking.

¹ The dot under the *ā* indicates an abrupt cessation of the voice in pronouncing the vowel.

Nangmā mōot mōot rāng nak lakō, do not forget to do your work.

Ngā idak matūmā suantak, atē la-kā-tā, he went when I was washing my hands.

Mā dak sūtūnpā jō-nang lūmsū-ō, dip the end of your finger in water.

Nangmā mā jet-kōkō, atēmā chen i-khēsakā, if you do not know then he will show you.

Katakrang vānthē itōngā, there is one God.

Irā katakrang-pā rang tiēk-tā, this God built the heavens.

Atē-mā hā mīn tiēk-tā, He created the earth.

Ngā, nang-nang, hueri mīnyān nang tiēktā, He made me and you and all men.

Bang āhīng, hā-ho achūong, jō adōng, sūn, dāfē, mērik achūm, tiēktā, the green tree, the high hill, the great water, the sun, the moon, the shining stars, He made.

Phang-tang lāt-nang ekhē-ā, He sees in all places.

Kangro-nang marō ekhē-ā rang-ngyak-nang mīn iro ekhē-ā, as He sees in light, so He sees in darkness.

THE LORD'S PRAYER.

Irā nī rang nang tongte Vā, mā mīng pūjā chen dāngā; mā nok ngyārang chen sōngā; rang nang marōā, irōā hā-nang madākū chen sōngā; tejā nī aphak achālī nī-nang kōhī; irokorā nī thā-pētenang nīmā marōrang lietang, irārangrang nī thāpē pā tinghī; nīnang tōam-nang nak kāthī, ikorā nīnang cham chō tūkō pamhī; chenmā rōantang rōanjang nok, ākomīn chan, ākomīn mōhima, urāhē marāng, irō chen dāngā.

MŌSHĀNG AND SHĀNGGĒ.

These tribes are in the independent country south of the Patkoi. Nothing is known about them, except a short vocabulary entitled '*A Collection of a few Mōshāng Nāgā Words*,' by Mr. F. J. Needham (Shillong, 1897).

From this I have extracted all those which I could insert into the List of Standard Words and Sentences. Both languages evidently belong to the Eastern Nāgā sub-group.

STANDARD WORDS AND SENTENCES IN

English.	Tableng. ¹	Tamlu. ¹	Mulung and Sima (Brown). ²
1. One	Chā	Hak	Chā
2. Two	I	Ni	Ih
3. Three	Lum	Chum	Lem
4. Four	Peli	Āli	Pili
5. Five	Ngā	Ngā	Ngā
6. Six	Wok	Uyok	Vok
7. Seven	Ni-yet	Ni-yet	Niath, (nith)
8. Eight	Tāt	Set	Thuth
9. Nine	Tu	Si-yu	Thu
10. Ten	Pàn	Ān	Pan
11. Twenty	Tā	Hā	Thā
12. Fifty	Ti-chā-pàn	Pi-ni-bā ān
13. Hundred	Te-ngā-chā	Pungā	Thinga cha
14. I	Tāo	Ngai	Helam, (tau)

Emak iyepa chhenta rang pa madanga?	..		221. How old is this horse?
EKasmira la pa chhet janga?	.		222. How far is it from here to Kashmir?
Ma-ba hu-ma nanga neta chhenta?			223. How many sons are there in your father's house?
Nga theiya bala nang phang tak.	224. I have walked a long way to-day.
Iremi an ire iyāng teying didi chama kapika.		225. The son of my uncle is married to his sister.
Humiyo khanwa jin mak papanang ma danga.	226. In the house is the saddle of the white horse.
At manang khakka		227. Put the saddle upon his back.
Achanang iya ranga watak.	..		228. I have beaten his son with many stripes.
Haha nang mau bamika	229. He is grazing cattle on the top of the hill.
Iman khanang maktam nang changika.	230. He is sitting on a horse under that tree.
Anang tei yāng nama anang te achho yāng.	.		231. His brother is older than his sister.
Phani khath heh athapa			232. The price of that is two rupees and a half.
Iba pahuma chane rang tanga.	.	..	233. My father lives in that small house.
Un phathepa kak	234. Give this rupee to him.
Angeya ngun hi ngaba kar	235. Take those rupees from him.
Jarang obad ate ruma khak chhen.		.	236. Beat him well and bind him with ropes.
Ja nad khan ma jakhan	237. Draw water from the well.
Ima karang phang khama			238. Walk before me.
Madinang hanchao yāng ira		..	239. Whose boy comes be- hind you?
Hange warita wa irepa	240. From whom did you buy that?
Hawatha chang te newa	241. From a shopkeeper of the village.

NĀGĀ GROUP.

THE NĀGĀ-BODO SUB-GROUP.

The Western Nāgā Group of languages is bounded on the south by the Kuki, and on the west and north (so far as concerns Tibeto-Burman languages) by the Bodo Group. In each direction there is a transitional linguistic area. That is to say, between Angāmi Nāgā and the Bodo languages there is a group, which I call the Nāgā-Bodo Group, bridging over the difference between the characteristic features of the two forms of speech, and similarly between Angāmi Nāgā and the Kuki languages there is another group which I call the Nāgā-Kuki. At present we have to deal with the former,—the Nāgā-Bodo Group. This consists of two main languages, *viz.*, Mikir, whose headquarters is in the Mikir Hills in the east of the Nowgong District, and Kachchā Nāgā or Ēmpēo, which is spoken in North Cachar and in the adjoining tracts of the Nāga Hills. Subordinate languages, closely akin to, but not dialects of, Kachchā Nāgā, are Kabui Nāgā and Khoirāo Nāgā. These last two are mostly spoken in the western hill country of the State of Manipur. As might be expected, the Bodo language, with which they show the most important points of kinship, is the eastern one,—Chutiya,—while Angāmi and Lhōtā are the two Nāgā tongues to which they are most closely allied.

The following is the estimated number of people who speak the various languages of this group,—

Mikir	89,516
Kachchā Nāgā	10,280
Kabui	11,073
Khoirāo	15,000
										125,869

The close connexion which mutually exists between these four languages will be evident from a perusal of the list of words and sentences on pp. 432 and ff. It must, however, be confessed that in regard to Kabui and Khoirāo the classification is somewhat arbitrary, for, though they have undoubted connexion with the Bodo languages, they also show many points of contact with the Kuki ones.

MIKIR.

Mikirs call themselves 'Arleng,' a word which also means 'man' generally, although more strictly applied to a Mikir man. They have also borrowed from Assamese the word *monit* or *munit* for 'a male human being' when a precise term is required. The following account of their habitat is from the pen of Sir Charles Lyall (1882):—

The country which, from its geographical nomenclature, we should look upon as the home of the Mikir race is tolerably extensive, and includes a large area of hills in which there are now few or no Mikirs. The characteristic elements of Mikir topographical nomenclature are *Ling*, river, water; *Lāngso*, small stream; *Inglong*, mountain; *Long*, stone; *Rong*, village; *Sir*, chief. In the isolated mountainous block which fills the triangle between the Brahmaputra on the north, the Dhansiri Valley on the east, and the Kopili and Kalang Valleys on the west, these names are found everywhere, as well in the southern part now inhabited by the Rengmā Nāgās from the hills across the Dhansiri as in the northern portion included in the Nowgong district, and known more particularly as the Mikir Hills. They are also found in considerable numbers to the south of the Lāngkher Valley, in the mountains now inhabited by Kukis, Kachchā Nāgās, and Kachāris (e.g., *Līngreng* = 'water of life,' *Līngting*, *Long-lai*, etc.) as far south as the courses of the Jhiri and Jhinam. In the centre of North Cachar they are rarer; but there is a considerable group of Mikir names again to the west of this tract, about the head waters of the Kopili, and on the southern face of the hills north of Badarpur. Mikirs also abound, mixed with Lālungs, on the northern face of the Khāsi and Jaintia Hills, and along the courses of the Kopili and Umkhen rivers.

Across the Brahmaputra the topographical nomenclature shows no trace of them, though there are a few recent colonies of the race in Darrang.

They are thus essentially a people of the lower hills and adjoining lowlands of the central portion of the range stretching from the Garo Hills to the Patkoi. Their neighbours are (1) The Syntengs of Jaintia on the west; (2) Bodos or Kachāris on the south; (3) Assamese on the north and east, where the country is inhabited at all; and intermixed with them are recent colonies of Kukis and Rengmā Nāgās and older ones of Lālungs and Hill Kachāris.

Mikir is believed to have but slight dialectic variations, although the following dialect names have been reported for this Survey:—

Name of Dialect.	District where spoken.	Number of speakers.
Standard	Cachar	536
	Kamrup	12,200
	Darrang	2,400
	Nowgong	44,850
	Sibsagar	1,000
	Nāga Hills	17,000
	Total	77,986
Bhoi Mikir	Khāsi and Jaintia Hills	10,680
Amri	North Cachar	725
Rongkhang	North Cachar	725
	Total	89,516

The last three are said to be, strictly speaking, not dialects but mixtures of pure Mikir with the languages of neighbouring tribes. This is borne out by the only sample of them (that of Bhoi Mikir) which I have succeeded in obtaining. It has been found impossible to get specimens of Amri and Rongkhang. Through the kindness of Sir Charles Lyall, K.C.S.I., I am able to print the following first three specimens of standard Mikir, together with the very full grammatical sketch which precedes them. The first specimen of the Parable of the Prodigal Son has been translated by Sardoka Perrin Kay, who is by birth a Mikir, and is at present employed in Government service in Shillong.

The two pieces of folklore have been also prepared by him, under the supervision of Mr. H. Corkery, LL.D. I must also express my indebtedness to the Rev. P. E. Moore, who has worked as a missionary for many years among the Mikirs, for the second version of the parable which follows the three specimens referred to above.

Mikir clearly belongs to the same group as Kachchā Nāgā, Kabui, and Khoirāo. Like them it is an intermediate stage between the true Nāgā languages and the various speeches belonging to the Bodo group. Sir Charles Lyall (writing at the time when no materials were available for comparison with Nāgā) has clearly shown, in the note quoted in the list of authorities, the close connexion which exists between Mikir and the latter, and Mr. Davis has also shown the remarkable points of agreement which exist between it and the former.

The following are the authorities on Mikir with which I am acquainted :—

AUTHORITIES—

- ROBINSON, W.,—*Notes on the Languages spoken by the various tribes inhabiting the Valley of Asam and its mountain Confines.* *Journal of the Asiatic Society of Bengal*, Vol. xviii, 1849. Pt. I. pp. 184 and ff., 310 and ff. On pp. 330 and ff. a Mikir Grammar. On pp. 342 and ff. a Mikir Vocabulary.

- CAMPBELL, SIR G.,—*Specimens of the Languages of India, including those of the Aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier.* Calcutta, 1874. On pp. 204-205 and ff. there is a Mikir Vocabulary.
- ANON.,—*A Mikir Catechism in the Assamese character.* Sibsagar, 1875.
- NEIGHBOR, THE REV. R. E.,—*A Vocabulary in English and Mikir, with Sentences illustrating the Use of Words.* Calcutta, 1878.
- DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers.* *Journal of the Royal Asiatic Society*, Vol. xii, 1880, pp. 228 and ff. Account of the Mikirs on p. 236. Short Vocabulary on p. 254.
- LYALL, SIR C. J., K.C.S.I.,—Note on the geographical distribution and ethnological affinities of the Mikirs on pp. 78 and ff. of the *Census Report of Assam for 1881*. Calcutta, 1883. This has been reprinted on pp. 177 and ff. of the *Census Report of the same Province for 1891*. The reprinted copy has been revised.
- PURSELL, MISS,—*Arleng Alam. A Mikir Primer.* Assam, 1891.
- DAVIS, A. W., I.C.S.,—Note by A. W. D. on the Relations of the principal Languages of the Nāgā Group on pp. 163 and ff. of the *Census Report of Assam for 1891*, by E. A. Gait, I.C.S. Shillong, 1892. Compares Mikir with the languages of the Nāgā and Bodo Groups.
- BAKER, E. C. S.,—Account of the Mikirs on p. 254 of the same Report.

I take this opportunity of expressing my thanks to Sir Charles Lyall, K.C.S.I., for the following sketch of the principal features of Mikir Grammar. It is based on the very instructive specimens which follow, and on materials, not yet published, gathered by the late Mr. E. Stack in the years 1885-86.

PRONUNCIATION.—Mikir possesses the following **Consonants**,—*b, ch, d, h, j, k, l, m, n, ng, p, r, s, t, v*, and the aspirates *kh, ph, th*. *Bh, dh*, and *q* occur only in a few borrowed words, and *bh* and *dh* are commonly resolved, as *bahūr*, a load; *dohòn*, money. *F, sh, w, y* (consonantal) and *z* are unknown. *Ng* is never initial, and the *g*-sound in it is never separately audible.

In **Vowels** Mr. Stack recognised the following,—*ā, à* (the latter in closed syllables, abruptly pronounced, as in German *Mann*); *ē, è* (the latter in closed syllables, as in *pet*), *e; ī, i; ō, ò* (in closed syllables, abrupt, as in *pot*), *o* (this apparently represents a shortened long *ō*, as Mr. Stack notes that the sound *ā* or *aw*, represented in this survey

by *ā*, does not occur); *ū*, *u*. The differences in length of vowels seem often to be (as in Assamese) rather indeterminate. There is a tendency for the long *ā* to be thinned down to *ē*, as in the loan-words *rēcho* = *rājā* and *bērī* = *bārī*; *ē* frequently occurs as a variant of initial *ā*-, *vide post*.

The **Diphthongs** occurring are *ai*, *ei*, *oi*, *ui*, in all of which the first element represents the long vowel, and the combinations might be written *āi*, *ēi*, *ōi*, *ūi*.

ROOT-WORDS.—The root-words, whether nouns, adjectives, pronouns, adverbs or verbs, are generally monosyllabic. Roots longer than one syllable are apparently formed by adding **prefixes**, originally having separate significance, now often lost, to monosyllabic roots, or by compounding one or more roots. Prefixes of which the significance is not now traceable are *ār*- (as in *ārlèng*, man; *ārlòng*, stone; *ārni*, sun, day); *ing*-¹ (*inglòng*, mountain; *inghòn*, pity, etc.); *ning*-² (in *ningvê*, night; *ningkàn*, year, etc.); and *te*-, *ti*-, *to*- (as in *teràm*, call; *tekàng*, abandon; *tikup*, an enclosure; *toṽār*, a road). Prefixes which are still significant will be noted below. Instances of compound roots are, in nouns, *kèng-òp*, shoe (foot-covering); *ni-òp*, cloud (sun-cover); *rèng-mê*, being happy (life-good), etc.; in verbs numerous examples will be found in the specimens.

INFLECTION.—Words (whether nouns or verbs) are not inflected, but are located in sense by their position in the sentence or by the addition of particles. These particles may often be omitted where ambiguity is not likely.

Gender.—Gender is not distinguished except for animate beings, and in them either (1) by difference of termination, or (2) by added words indicating sex, or (3) by different terms. Thus,—

(1) <i>pō</i> , father	<i>pē</i> , mother.
<i>phu</i> , grandfather	<i>phi</i> , grandmother.
(<i>pu</i>) <i>nu</i> , paternal uncle	<i>ni</i> , paternal aunt.
(2) <i>sō-pō</i> , boy	<i>sō-pī</i> , girl.
<i>su-pō</i> , grandson	<i>su-pī</i> , granddaughter.
<i>āsō-pinsō</i> , male child	<i>āsō-pī</i> , daughter.
<i>chainòng-ālō</i> , bull	<i>chainòng-āpī</i> , cow.
(3) <i>ārlèng</i> , man	<i>ārlosō</i> , woman.
<i>īk</i> , elder brother	<i>ingjīr</i> or <i>tē</i> , elder sister.

Number.—The ordinary suffix for the plural is *ātum*, but other words are occasionally suffixed to indicate plurality, as *mār*, a mass, quantity, or company; *òng*, many; *lī* (a respectful form used chiefly in addressing a number of persons). With pronouns the suffix is *tum*, not *ātum*; *nē*, I; *nē-tum*, we; *ī-tum*, we, including the person addressed; *nàng*, thou; *nàng-tum*, ye; *là*, he, she, it; *lā-tum*, they: respectful forms *nē-lī*, *ī-lī*, *nàng-lī*, *ālàng-lī*; also *nē-lī-tum*, *nàng-lī-tum*.

Case.—Case is indicated by position, or by postpositions. The *Nominative* and, generally speaking, the *Accusative* have no postpositions, but are ascertained by their position in the sentence—the nominative at the beginning, the accusative following it

¹ When a prefix comes before *ing*-, it coalesces with it into one syllable; thus, *ā* + *ing* = *àng*; *kā* + *ing* = *kàng*; *che* + *ing* = *chàng* (*ching*); *pu* + *ing* = *pàng*. Apparently the form *kā* (not *ke*) is always chosen for the adjectival prefix, and *pā* (not *pe* or *pi*) for the causal prefix, before *ing*-.

² *Ning* means breast, mind, and in that sense numerous easily intelligible compounds of it occur; but in the word-mentioned it seems to be of different origin.

before the verb : but both where necessary can be emphasised by the particles *-kē* and *-sī*, which in some sort play the part of our definite article. Thus :—

-kē,—*nē-kē lādāk àn-kàngchir-sī thī-pō*, I (distinguished from my father's servants) here from hunger am dying.

nàng-kē nē-lòngsī kaitā do, thou (distinguished from the prodigal son) with me ever art.

lā nàng-mu-kē thilòt-tā, rəng-thu-èt-lō, this thy younger brother was dead, and is alive again.

nē-mèn-kē Ōng, my name is Ong.

-sī,—*konāt āchainòng-ā-òk-sī dàklē kedo-jī*, where should cow's flesh be here ?

konāt ādohòn-sī nànglī kelòng-dām, where did you get so much money from ?

It is to be carefully remembered that these emphatic particles are *not* case postpositions, but may be followed by the latter : *e.g.*, *jàngrēsō-kē-āphàn pulō*, he said to the orphan ; and *-sī* is to be distinguished from *-sī*, suffix of the locative and (probably the same) of the conjunctive participle. Another emphatic particle is *-tā*, which may often be translated 'also' or 'even' : *vide* specimens.

The construction of the Genitive is one of the most characteristic features of the language. The genitive always precedes the noun on which it depends. When it is a pronoun of the first or second person, nothing intervenes between the two : thus, *nē-hèm*, my house ; *nàng-pē*, thy clothes. But when the pronoun is of the third person, or when the first noun takes the place of a pronoun of the third person, the following noun has *ā-* inserted before it. Thus *lā-āpō*, his father ; *Ārnàm āhèm*, God's house, *lā hijai-ātum ākàm*, this is the jackals' work ; *ārni-kàngsām āpòr*, day-becoming-cool time. This prefixed *ā-* is really the possessive of the third personal pronoun, as is proved by the equivalence of the pronouns in the following passage from a folk-tale :—

Ānsī' jàngrēsō rēchō-āsōpō-āphàn pulō, 'lā nàng-pē nàng-rī-pèn
Then the-orphan the-king's-son-to said, 'these your-clothes your-dhoti-with
mamàtlē nàng ru-ārlo nàng-lutlō-tē, nàng chinidètpō ;
yourself-bedecked you cage-into enter-if, you (they)-will-recognise :
nē-pē nē-rī nàng pīpō, ànkē ru-ārlo lut-nòn.' Ānsī
my-clothes my-dhoti you (I)-will-give, then cage-into enter.' Then
rēchō-āsōpō ru ingpu-sī jàngrēsō nàngbārlō, ànsī jàngrēsō
the-king's-son the-cage opened-having the-orphan let-out, and the-orphan
ā-pē ā-rī rēchō-āsōpō pīlō, lā rēchō-āsōpō ā-pē, ā-rī,
his-clothes his-dhoti the-king's-son gave, that king's-son his-clothes, his-dhoti,
ā-lèk, ā-roi, jàngrēsō pī-thu-lō.
his-necklace, his-bangles, the-orphan (-to) gave-in-return.

'The orphan said to the king's son, "if you go into the cage wearing your own clothes, they will recognise you at once (*dèt*) ; I will give you my clothes, and then you can enter the cage." So the king's son opened the cage and let out the orphan, and the orphan gave the king's son his clothes, and the king's son gave the orphan in exchange his clothes, necklace, and bangles.'

Here *nē-pē*, *nē-rī*, *nàng-pē*, *nàng-rī*, are followed by *ā-pe*, *ā-rī*. This use of *ā-* before every noun which has a genitive depending on it has led to that syllable becoming the common prefix of most nouns in the language, and being prefixed not only to the governing word, but also to the word governed. It is, in fact, the ordinary particle indicating relation, and thus comes to be prefixed to adjectives, e.g., *Ārnām ākethē*, God the Almighty; *lā ākībī ābàng*, that younger one; and not only to adjectives, but to postpositions: *āphàn*, to, has *ā-* when used with the third person: *lā-āphàn*, to him; *jàngrēsō āphàn*, to the orphan; but *nē-phàn*, to me; *nàng-phàn*, to thee. The only postpositions used without this prefixed *ā-* are *pèn* (*pèn-sī*), with; *lē*, at, in; and *sī*, in: *āpèn* and *ēpèn* are sometimes found. As already observed, this *ā-* frequently takes the form *ē-*; e.g., *hījai-ēhur*, a pack of jackals; *hèm-ēpō*, widower; *hèm-ēpī*, widow (literally, the male or female owner of a house).¹

The other cases are formed by postpositions, which, however, are often omitted when the sense is clear without them:—

The *Instrumental* is generally indicated by *-pèn* (*āpèn*, *ēpèn*) or *-pènsī*, as *āphèk-ēpèn*, with husks; *Tèntòn-ingchin-āni-pèn kekòk*, tied by Tenton with an iron chain.

The *Dative* takes *āphàn*, to or for (frequent after verbs of saying and asking), which is also occasionally used for the accusative. The sign of the Dative of Purpose is *āpòt*, for, for the sake of: *pī-āpòt*, what for, why? *kopī-āpòtsī*, id.; *āphàn* is also used in this sense in the phrase *jīrpō-ātum-pèn nīng-āròng chipījī-āphàn*, with my friends in order to make merry.

The *Ablative* is formed with *-pèn* (*āpèn*) or *-pènsī*: *hēlōving-do-āk-pèn*, from afar off; *nòn-pèn*, from now; *dāk-pèn*, from here. *Āperā* (Assamese *parā*) is also used.

The *Locative* is formed with *-sī*: *hèm-sī*, in the house; *ādèt-sī*, in the country. We also have *ārlō*, in, inside, under. *Lē* (properly the conjunctive participle of *lē*, to arrive) is often used as a locative postposition, for 'at, in.'

Other common postpositions are,—

- āthāk*, upon, on.
- āngsòng*, above, upon, over.
- ārum*, below.
- ābēr*, below.
- ālòng*, together with (*lòng* = place).
- ādung*, *ādun*, beside, close to.
- ādàk*, between.
- àng-bòng*, in the middle of.
- āphi*, after.

ADJECTIVES are regularly formed by prefixing *ke-*, *kā-*, or *kī-* to the root, and do not change for gender, number, or case. Thus, *mē*, being good; *kemē*, good: *hēlō*, distance; *kāhēlō*, far off: *dòk*, savour; *kedòk*, savoury: *hō*, bitterness; *kehō*, bitter: *lòk*, whiteness; *kelòk*, white: *rī*, wealth; *kīrī*, rich. The form of the adjective is precisely the same as that of (1) the present participle of the verbal root used to form the present

¹ It may be noted that *ī-*, the pronoun of the first person plural is sometimes used in the same way as this prefixed *ā-*. Thus, *ī-mu*, a younger brother or our younger brother. The pronoun of the first person is used similarly in other Nāgā languages. Hence, in some cases, *ē-*, also, probably, originally represents the first person, and not like *ā-*, the third.—G. A. 1.

tense, and (2) the abstract or infinitive of that root, and the collocation of the sentence alone determines the meaning of the word used. When particles of comparison or other modifying elements are added to the adjective, the prefix (*ke*, etc.) is often omitted as unnecessary. Thus,—

kelòk, white; *lòk-hik*, whitish.

kemē, good; *mē-mū*, better; *mē-nē*, best.

kening, tall; *ding-mū*, taller.

but *kàngtui*, high; *kàngtui-mu*, higher; *kàngtui-nē*, highest.

The emphatic suffix *sī* sometimes gives the force of the superlative, as in *Ārnām ākethē-sī*, God the Most High; *kemē-sī āpē*, the best garment.

Adjectives sometimes precede, but more commonly follow, the noun qualified (see below as to the relative clause): as already observed, they are usually constructed with the relative prefix *ā-* when joined to a noun.

Numerals.—The Cardinals are given in the list of words. The numeral follows the noun. In composition *hinī* (except with *bāng*, person) is reduced to *-nī*, and *kethòm* to *-thòm*, as *jō-nī jō-thòm*, two or three nights. *Philī* and *theròk* are often contracted to *phlī* and *thròk*.

Generic Prefixes are commonly used with numbers, as in many other Tibeto-Burman languages:—

with persons, *bāng*, as *ā-òng-mār kòrtē bàng-theròk-kē*, his uncles, the six brothers.

with animals, *jòn* (Assamese loan-word), as *nē kethèk-lòng chelòng jòn-philī*, I saw (got to see) four buffaloes;

with trees and things standing up, *ròng*, as *thèngpi ròng-theròk*, six trees.

with houses, *hum*, as *hèm hum-phòngō*, five houses.

with flat things, as a book, a leaf, a hoe, a knife, *pàk*, as *nokē pàk phlī*, four knives; *lō pàk-phòngō*, five leaves.

with globular things, as an egg, a gourd, a vessel, *pum*, as *vō-ti pum-nī*, two eggs.

with parts of the body, and also with rings, bangles and other ornaments, *hòng*, as *kèng èhòng*, one leg; *roi hòng-nī*, two bangles.

Note that *one* of anything is not formed with *īsī*, but, if of persons, with *īnut*, if of other things, with *ē-* prefixed to the generic determinative; one cow = *chāinòng ējòn*; one tree = *thèngpi èròng*; one book = *puthi ēpàk*; one egg = *vō-ti ēpum*, etc. This *ē-* appears to be borrowed from Assamese, in which it is shortened from *ek*.

Ordinals appear to be formed by prefixing *bātāi* to the cardinal, as *bātāi kethòm*, third; *bātāi phlī*, fourth.¹ Distributive numeral adverbs are formed by prefixing *pur* or *phòng* to the cardinal, as *purthòm* or *phòngthòm*, thrice.

PRONOUNS.—The Personal Pronouns are,—

1st Person,—*nē*, I; *nē-tum*, *nē-lī*, *nē-lī-tum*, we, excluding the person addressed.

ī-tum, *ī-lī*, we, including the person addressed.

¹ The only examples of ordinals so formed are found in the Mikir catechism (1875). In the folk-tales clumsy periphrases are used which indicate that ordinals are not generally known. Thus, in mentioning five brothers one after another, we have *āk'èng*, the eldest; *ādàkràm*, the junior (between-coming); *ādàkràm-ādun*, the next to the junior; *ādàk-vàm ādun-lēthòt*, the next to the next to the junior; and *āk'īlī*, the youngest.

2nd Person,—*nàng*, thou; *nàng-tum*, *nàng-lī*, *nàng-lī-tum*, ye.

3rd Person,— $\begin{cases} lā, & \text{he, she, it; } lā-tum, & \text{they.} \\ ālàng, & \text{he, she; } ālàng-lī, & \text{respectful; } ālàng-ātum, } \\ & ālàng-lī-tum, & \text{they.} \end{cases}$

These take the postpositions like nouns. The possessive prefixes have been already mentioned: they are *nē-*, my, our; *nāng-*, thy, your; *lā-*, *ā-*, his, her, its, their. The possessive prefix for the first person plural, including the person addressed, is *ē-* or *ī-*, as—

<i>ē-chainòng</i>	<i>ē-haidi</i>	<i>ē-pāchithukoilàng,</i>	<i>āphu-thāk-tā</i>	<i>ē-rèng</i>
<i>our-cows</i>	<i>our-cattle</i>	<i>us-he-has-caused-to-kill,</i>	<i>over-and-above-that</i>	<i>our-skin</i>
<i>ē-hu</i>	<i>ē-kāpesō.</i>			
<i>our-hide</i>	<i>us-he-has-caused-to-smart.</i>			

The **Demonstrative Pronouns** are *lābàngsō*, *bàngsō*, this, pl. *lābàngsō-ātum*, these; *hālā*, *hālābàngsō*, that, pl. *hālā-tum*, *hālābàngsō-ātum*, those. The syllable *hā* connotes distance, as *dāk-sī*, *lādāk*, here; *hādāk*, there; *hā āhēm chevoilō*, he returned home from a distance.

Relative Pronouns, properly speaking, do not exist. Their place is taken by descriptive adjectival phrases. Thus, 'those six brothers who had gone to sell cow's flesh' is—

lā chainòng-ā-òk kejòr-dām-ātum kòrtē bāng-theròk.
those cow's-flesh to-sell-going-(pl.) brothers persons-six.

and 'those persons who had carried cow's flesh (to market) returned home,' is—

lā chainòng-ā-òk kevàn-ātum hēm chevoilō.
those cow's-flesh carriers home returned.

It is to be noticed that in these sentences the adjectival descriptive clause precedes the noun. So also in *Tèntòn ingchìn-ōni-pèn kekòk ālèng*, the man whom Tenton had tied with an iron chain.

There is a word, *āling*, which is sometimes called a relative pronoun; it seems, however, to be rather a distributive. 'I don't believe what he says' = *lā keningjē āling-tā nē kroì-kre*, literally, he speaking whatever, I believe not; compare *mār āling-tā ādim-tòt-tòt-lē bī-nòn*, the goods, each thing in its place setting down, put, i.e., put everything in its own place; *nàng kedo-āling, nē-tā dojī*, you staying wherever, I also will stay.

The interrogative syllable used to form **Interrogative Pronouns** is *ko*: *komàt*, *komàt-sī*, who? *kopi*, what? *kopu*, *kopu-sī*, *kolopu*, *kolopu-sòn*, how? *ko-àn*, *ko-ànsī*, *kolo-àn*, how many? *konàt*, where? *konàmthu*, when?

The **Reflexive Pronoun** is *āmethàng*, self, own; but a more usual mode of indicating that the action affects oneself is to prefix the particle *che* (*chī*, *chìng*, *chèng*, and rarely *cho*) to the verbal root. Thus, *lā hēm che-roì-lō*, he returned home (i.e., to his own house); *ā-òngmār-ātum che-pu-lō*, his uncles said to one another; *che-hàng-jō*, they asked for themselves. Examples will be found in abundance in the specimens.

VERBS.—The Mikir verb indicates time, present, past, and future, by means of particles prefixed or suffixed to the root. The verb does not vary for gender, number¹ or person. There is no separate verb substantive, though there are several ways of

¹ There are particles which indicate plurality where necessary, of which *jō* is that most often used.

indicating existence, as *do*, stay, abide; *plàng*, become; *làng*, exist, continue; *lē*, arrive, happen, etc. Great use is made of adjectival or participial forms, and, in narration, of the conjunctive participle. Compound roots are very extensively used, the principal verb being put first, then the modifying supplements, and then the time-index.

The **Simple, or Indeterminate, Present** is expressed by the participle with *ke-* (*kā-*) without any suffix, as *konòtsi nàng kedo*, where do you live? *vō kàngjār*, the bird flies; *sārbūrā thī-lòt-sī nē kāchiru*, the old man having died, I am weeping; *nē-phu kesō-kòn*, my head is aching badly. This tense is, as in other languages, often used historically for the past.

The **Definite, or Determinate, Present** is expressed by the same participle with *-lō* added: *lā kopi kànghoi-lō*, what is he doing (now)?

The **Habitual Present**, including the Past, is expressed by the verbal root with *-lō*, as *vō-ātum-kē nē-phu-āthāk ingjār-lō*, the (*kē*) birds fly above our heads.

The **Simple, or Narrative, Past** is formed by the verbal root with *-lō* or *-dèt*, as *lā pu-lō* or *pu-dèt*, he said; *nē-phu sō-dèt*, my head was aching; *lā ke-ri āphī-sī lōng-lō*, he, after searching, found it. Sometimes *-dèt* and *-lō* are used together: *lā nē ingtòn-dèt-lō*, he abused me. *Dèt* appears to be a particle (perhaps once a verb, but not now used separately) indicating completeness, whether continuing in the present or not, and so may be used for the present when the state indicated by the verb is one that began in the past and still endures, e.g., 'why are you afraid?' may be expressed by *kopi āpòtsi nàng kāphērē*, or *kopi āpòtsi nàng phērē-dèt*?

The **Complete Past** is indicated by the root with *-tàng-lō* (*tàng* is a verb meaning to finish), as *lā-āpòtsi nē dām-tàng-lō*, I went, or *had gone*, on his account; *tēlòng lōnglē phō-tàng-lō*, the boat *has* touched ground.

There are besides a great number of other particles indicating past time, used with particular verbs. Thus with the various words meaning 'to fall' the following are used: *kā-lā che-koi-bup*, he fell down; *hēm ru-bup*, the house collapsed (= *ru-tàng-lō*); *lōng-chòng klī-bup*, the upright memorial stone fell down; *lōng-pāk klō-buk* (or *klō-tàng-lō*), the flat memorial stone fell down; *thèngpi-àngsòng-pèn nàng-klō-buk*, he fell down from the top of the tree. All these particles denote abruptness.

A **Periphrastic Past**, with the root followed by *inghoi-lō* (did), must be noticed. This is probably borrowed from Assamese; e.g., *hijai-ēhur ējai āhèn chō-klip-inghoi-lō*, the jackal-pack the whole of the arums ate up completely (*klip*); *sārpī inghàp ingkīr-dun-hèt-inghoi-lō*, the old woman having shut the door made it fast.

Here should be noticed the prefix *nàng*, used (as the specimens show) with great frequency in narrative. It has the effect of *fixing the occurrence to a known place*. Thus, *phāk lādùksī nàng-thī-lòt*: *methàn nàng-chō-dèt*, the pig died here: the dog has eaten it up,—in a known place;—but *methàn pòn-dèt* or *pòn-tàng-lō*, the dog has taken it away,—from a known place to a place unknown. It seems very probable that the word is originally the pronoun of the second person, and that it refers to the knowledge of the person to whom the tale is related—'as you know' or 'as you see.'

The **Future** is represented in two ways only: (1) by *-pō* added to the root, to indicate an action beginning now and continued in the future, as *ne-tum nònke labàngso akàm upòtsi pu-pō*, we will talk about this affair *now* (*nònke*); (2) by *-ji* added to the

root, for an action which commences later on, e.g., *bādu ārlèng-tā thī-jī*, all men will die (i.e., at some future time).

As *-pō* includes the present in the case of continuing action, it may also be (and often is) used in a present sense: *-jī* is restricted to future time.

A compound future may be formed by adding to the root with *-jī* the termination *dòkdòk-lō*; *lā thī-jī dòkdòk-lō*, he is just about to die; *àn īk-jī dòkdòk-lō*, the rice is nearly all done; *àn-chō-jī dòkdòk-lō*, it is near breakfast time (i.e., rice-eating); *lē-jī dòkdòk-lō*, we have almost arrived; *dām-jī dòkdòk-lō*, he is about to go. A doubtful future may be expressed by *-jī* added to the present participle, as *konāt chainòng-ā-òk-sī dāksī kedo-jī*, where should cow's flesh be here; *chainòng kenām-jī*, I want to buy a bullock.

From the above it will be seen that there is much indefiniteness in the indications of time afforded by the Mikir verb: except *-tàng* for the past complete, and *-jī* for the future, the other suffixes may, according to circumstances, be rendered by the past, present, or future; but the context generally removes all ambiguity.

Conditional phrases are formed by putting *-tē*, if, at the end of the first member, and the second generally in the future with *-jī*.

Conditional Future,—*nàng dām-tē, nàng lā thèk-dām-jī*, if you go you will see him; *nàng nē pu-tē, nē klēm-jī*, if you tell me, I will do it.

The **Conditional Past** inserts *āsòn* (like, supposing that) before *-tē*; *dohòn do-āsòn-tē, nē lā nām-jī*, if I had money, I would buy it.

The **Conditional Pluperfect** modifies the second member thus,—*nàng dām-āsòn-tē, nàng lā lònglòk-jī āpòtlō*, had you gone, you would have got it; *nàng nē thàn-āsòn-tē, nē lā klēm-tàng-lō*, if you had explained to me, I would have done it.

Other Conditional phrases:—

nàng dām lòm-tē, làk mu-chòt-jī làng, the farther you go, the more you will be tired, (*bòm*, to continue; *làk*, to be weary; *mu-*, elative particle; *chòt*, constant affix to *mu-*; *làng*, verb, meaning 'to continue' or 'exist').

nàng chòk-pèt-àn mu-chòt-tē, chiru-pèt-àn mu-chòt-pō, the more you beat him, the more he will cry.

Tē may be omitted where the sense is otherwise fixed:—

nàng dām pàngthui òng, chung òng jī.

you go high more, cold more will-be, the higher you go, the colder it will grow.

nàng pu òng, nàng kroi-kre òng pō.

you speak more, you disobey more will, the more you tell him, the more he will disobey.

nàng dohòn pī-òng pī, pekòn òng pō.

you money giving-more give, waste more will, the more money you give him, the more he will throw away.

The **Imperative** is, for the second person, the bare root, or more usually the root strengthened by the addition of *noi*, *thā*, or *nòn*. Thus, *pī-noi*, give; *làng-thā*, see; *pu-nòn*, give. The form with *nòn* (meaning 'now') is the strongest form. The other two are of about equal value. The other persons are formed by the addition of *nàng*

(a verb meaning 'to be necessary') to the future in *-pō* or present in *-lō*. 'Let us go' = *itum dām-pō-nàng*; 'let us go to the field and plough' = *rit hai-bai dām-lō-nàng*; or, by using the causative form of the verb, 'let him go' = *lā-kē pedām-nòn*.

Participles.—The **Present Participle** has the form of the adjective, with the prefixed *ke-* (*ki-*) or *kā*, as *kedām*, going; *kāchiru*, weeping.

The **Past Participle** is the root compounded with *tàng*: *dām-tàng*, gone; *thèk-tàng*, having seen; *kāpàngtu-tàng*, fattened.

Perhaps the most used form of the verb, especially in narrative, is the **Conjunctive Participle**, either the bare root, or the root with *-sī*, as *hèm chevoi-sī thèk-lō*, having returned home, he saw. When the past is indicated, *dèt* is used, either with or without *-sī*, as *chō-dèt jun-dèt sārūrā tòn-ārlo kaibòng pātu-joi-sī i-lō*, having finished eating and drinking, the old man, having quietly hidden his club under a basket, lay down; *Tèntòn dohòn-ālàng-pòng lòng-sī, rit dām-dē-dètsī, kàt-jui-lō*, Tenton, having got the bamboo-joint with the money, without returning to the field, ran away.

When the phrase in which the Conjunctive Participle occurs is terminated by an imperative, the suffix is not *-sī* but *-rā*. Thus, 'having eaten your rice, go' or 'eat your rice and go' is *àn chō-rā, dām-nòn*; but 'having eaten his rice, he went' is *àn chō-dèt-sī, dām-lō*. While *-sī* links together parts of a narrative, *-rā* links together a string of imperatives.

The **Infinitive** or **Verbal Noun** is identical in form with the Present Participle: *kum-kiròt tàngtē kekàn ārki nàng-ārju-lòng-lō*, he heard there (*nàng*) the sound of fiddle scraping (*kiròt*) and dancing (*kekàn*). All words beginning with *ke-* (*ki-*, *kā-*) may therefore be regarded as (1) Adjectives; (2) Participles forming tenses of the verb; or (3) Verbal nouns; and it will be seen from the analysis of the specimens how clearly this at first sight strange allocation of forms can be made to express the required sense.

A Future Verbal Noun, or **Gerund** can be formed by adding *-jī* to the verbal noun with *ke-*: *keklēm-jī*, to make (rejoicing is proper): this form generally occurs with a postposition; *ning aròng chipī-jī āphàn*, in order to make merry together.

The **Passive**, as in other languages of the same family, is unknown as a separate form. It may sometimes be expressed by a periphrasis, as in the word-list 'I was beaten' = *nē kechòk èn-tàng*, lit., 'I received a beating;' but it is most frequently found in a participial form, which is identical with the active participle, and is in fact the same thing regarded from the other side. Thus 'bring the fatted calf and kill it here,' is *kāpàngtu-tàng āchainòng-āsō lādàk vān-rā thu-nòn*: *kāpàngtu-tàng* is made up of the root *ingtu*, to be fat; *pā*, the causal prefix; *kā*, the participial prefix; and *tàng*, the suffix of completion: the word might mean 'having fattened,' and since in a transitive verb, which alone can form a passive, there are always a subject and an object, it is evident that the verb may be regarded as active from the point of view of the subject, and passive from that of the object. In such a phrase, moreover, the participle (as, in relative phrases, the adjectival clause) comes first, and thus calls attention to the action upon the following patient; while in an active phrase the agent comes first and the participle or noun of action after it. In the same way, the phrase 'he was lost, and is found again' is rendered *ingbō-dèt-tō, lòng-thu-lòk-lō*: this might equally well (since

no pronoun is expressed) be rendered actively 'I had lost him, now I have found him again.' Thus the absence of a formal passive, in a language required to express so simple a stage of thought, is not found to be an inconvenience.

The **Negative Verb** is a very interesting and remarkable feature of the language. A separate negative root, formed by prefixing or suffixing a negative particle and conjugated in the same way as the positive, is indeed a common property of Tibeto-Burman speech; but in Mikir this secondary root is formed in an exceptional manner. The syllable *-ē* is added to the primitive, as *un*, can; *un-ē*, cannot, is unable. But when the root begins with a consonant or a nexus of consonants, these are repeated before the added syllable: *thèk*, see; *thèk-thē*, see not; *dàm*, go; *dàm-dē*, go not; *kroi*, believe; *kroi-krē*, disbelieve, disobey; *mèk-pràng*, awake (eye-open); *mèk-pròng-prē*, not awake. When the verb is of two or more syllables, the last is chosen for reduplication: as *inghoi*, do; *inghoi-hē*, not do; *ingjinsō*, show mercy; *ingjinsō-sē*, not show mercy; *chini* (Assamese loan-word), recognise; *chini-nē*, not recognise.

The secondary root thus obtained is conjugated just like the positive root, except that the time-index is more often dropped as unnecessary, owing to the context showing what the time relation is.

In the Imperative, the reduplication is not used: the particle *-ri* is added to the positive root: *thèk-nòn*, see; *thèk-ri* or *thèk-ri-nòn*, see not.

It may be added that this method of forming the negative by reduplication is not peculiar to verbal forms; adjectives are also negated in the same way: *kesō*, in pain, sick; *sō-sē*, not sick, well; *kàngjinsō*, merciful; *kàngjinsō-sē*, merciless: but, as there is no distinction between an adjective and a verbal or participial form, this is not remarkable.¹

Besides this organic negative, there is a periphrastic negative formed by adding the word *āvē*, is not: *Ārnam ābàng āvē*, *kechèng āvē*, *kāpetàng āvē*, God has no body, no beginning, no end (*lit.*, God his-body is not, beginning is not, end is not). The *ā-* in *āvē* is the usual *ā-* of relation, and may be dropped; *ālām-āvē*, without a word; *lām-vē*, wordless, dumb. *Ke-* may be prefixed, yielding *kāvē*, used as an adjectival negative: *kedo-kāvē*, literally 'being-not-being' is a common expression for 'all';—Italian *tutti quanti*.

Interrogative sentences are formed (when not containing an interrogative word formed with *ko-*) by adding *mā* at the end: 'are you planting the arums uncooked?' = *nàngtum hèn ākerēi ke-ē mā*; 'is it true?' = *sākhit-mā*; 'having a bullock already, why should I buy one?' *chainòng do-kòk-lē, kenàm-jī mā*.

Causal Verb.—This is formed by prefixing the syllable *pe-* (*pī-*, *pā-*), which is probably the root *pī*, meaning 'give.' Thus, *chō*, eat; *pechō*, cause to eat, feed; *tàng*, finish; *petàng*, cause to finish, end; *ingrum*, be gathered together; *pàngrum*, collect; *vēr-dèt*, be lost; *pī-vēr-dèt*, destroy. This syllable takes precedence of *che* in reflexive verbs: e.g., *ē-chainòng ē-pā-chi-thu-koi-làng*, our cows he has caused us to slaughter all. Here *ē-* is the first person plural pronoun including the addressee; *pā-*, the causal prefix;

¹ In the Kuki-Chin language called Kolrén, there seems to be optionally a somewhat similar reduplication of the verb before the negative particle. Thus, we find *na-pī-pēk mto-gūi*, did not give. Here *na*, perhaps, corresponds to the Mikir defining prefix *nàng*; *pī* or *pēk* means 'to give'; *mto* is the negative particle, and *gūi* is the ten causative. So also, in Khamti we have an Imperative *pepe-nōk*, do not give. In Khamti the root is also *pī* or *pēk*. In several Tibeto-Burman languages these suffixes are freely dispensed with in the negative form. Good examples are Khyang and Burmese. —G. A. G.

chi, the reflexive particle, indicating that the cows slaughtered were their own; *thu*, the verb 'to cut,' 'kill'; *koi*, a particle indicating completeness, all (*chō-koi*, to eat up); *làng*, the tense-suffix.

Inceptives are formed with the verb *chèng*, to begin, used with the infinitive: *āròng kă-chi-pī chèng-lō*, they began to make merry; or with the future participle or gerund in *-jī*, with the locative particle *-sī* added, as *keduk-jī-sī chèng-lō*, he began to be in want.

Compound Verbs meet us at every step in Mikir. Roots are heaped together, and the compound is closed by the tense-suffix. Ordinarily the *first* root determines the meaning of the compound, the rest being adverbial supplements of modifying force; *chiru-pī-lēm-lō*, pretended to weep (*chiru*, weep; *lēm*, seem, appear; *pī-lēm*, cause to seem, pretend); *ke-phlòng-dàm ābàng*, a person who will go and set fire (to the funeral pile) (*phlòng*, kindle; *dàm*, go); *kroi-dun-lō*, she consented (*kroi*, agree, obey; *dun*, go with another); *nē do-dun-jī mǎ*, will you be a companion to us? (*do*, remain; *dun*, be a companion to, go with); *hēm lē-dàm-rā jun-dàm-nòn*, go to the house and drink your fill (*lē*, arrive; *dàm*, go; *jun*, drink); *thàng-tā pu-hai-hè-dèt-sī i-joi-lō*, not daring to say anything, he lay down quietly (*pu*, say; *hai*, dare; *hai-hē*, negative verb; *i*, lie down; *joi*, adv., quietly); *nàng dàm-lòng-lē*, you cannot go (*dàm*, go; *lòng*, get, obtain; *lòng-lē*, negative verb); *ārju-lòng-lō*, he chanced to hear (*ārju*, hear; *lòng*, get); *dàm-jui-lō*, he went away (*dàm*, go; *jui*, run away). Some verbs take the suffix *lèt* before the suffix of past time, amongst which may be mentioned *thī*, die; *i*, lie down; and *jàng*, close (the eyes). As an example we may quote *thī-tàng-lèt-lē*, died.

ADVERBS.—These are extremely numerous, and are, like subsidiary verbal roots, inserted between the principal verb and the tense-suffix; e.g., *thu*, again; *rèng-thu-èt-lō*, is alive again (*rèng*, live, takes *èt* before verbal suffixes); *lòng-thu-lòk-lō*, is found again (*lòng*, find, takes *lòk* before verbal suffixes); *pèt*, completely; *ē-pèt-lō*, he planted completely (*ē*, plant); *nàng-lut-pèt-lō*, all are entered in, they have gone in completely (*nàng*, defining prefix,—see above; *lut*, enter); *klip* and *koi*, also meaning 'completely,' used with *chō*, eat, as in *chō-klip-lō*, *chō-koi-lō*, he ate up; *seràk*, quickly; *ràm-seràk-lō*, he brought quickly.

Here may be mentioned the way of forming **Diminutives** and **Augmentatives**. For the former, add *sō*, small, to the noun; *làng*, water; *làng-roi*, river; *làng-roi-sō*, a brook; *hēm*, a house; *hēm-sō*, a hut; (*ār*)*lòng*, stone; *lòng-sō*, a small stone, a whetstone; *ālòm*, time, interval; *ālòm-sō*, a short time. On the other hand, the syllable *pī* added to a noun magnifies it: *thèng*, wood, firewood; *thèng-pī*, a tree; *làng*, water; *làng-pī*, the great water, the sea; *tovār*, a path; *tovār-pī*, a highway, a broad road; *tovār-sō*, a foot-path.

 ārbu-lō. Ānkē hijai ābāhāk thī-lō, ābāhāk-kē ārpòng tèt-rai-rai-sī
severely. Then the-jackals some died, some the-wall pushed(-and)broken-having
 kàt-lō.
ran-away.

¹ Nē is here an interrogative particle, probably borrowed from the Assamese *nā*, with the often observe change of *ā* to *ē*

THE OLD WOMAN, THE OLD MAN AND THE JACKALS.

One day an old man and an old woman were planting arums (*kachu, colocasia*) in a field. While they were so engaged, a pack of jackals came up, and said to them,—‘Oh, granny and gaffer, are the arums you are planting raw or cooked?’

‘Raw,’ they answered. Then the jackals said, ‘Arums ought to be boiled before being planted.’

‘Is that true?’ asked the old man.

‘Quite true,’ said the jackals. Then the old man made his old woman boil the arums, while he himself planted them. All day long this went on till all the arums had been boiled, and the planting of the whole field finished. Then in the evening the old pair went home. Then during the night the jackals gathered together, and ate up the whole of the arums in the field. Next morning the old couple came to look at their (*che*) field and found that all the arums in it (*nàng*) had been eaten up. They said, ‘This is the work of the jackals: we must be revenged upon them.’ So they returned to their house. When they got there, the old man said to his wife,—‘I will feign to be dead inside the house. I will wrap myself (*chì*) up in a cloth and lie quite still. Do you go outside and weep bitterly. The jackals will come and ask why you are weeping. If they do so, say, “I am crying because my old man is dead—besides, there is no one to set a light to the funeral pile, what am I to do?” Then if the jackals say, “we will eat him up,” agree to this. Then if the jackals come into the house to eat me, do you weep as hard as you can, and say, “One has gone in, old man! two have entered, old man! three have entered, old man! all have gone in! fall upon them with your club.”’

Then after having eaten and drunk the old man hid his club in a bamboo basket and lay down quite quiet, and the old woman went outside and pretended to cry. Then the pack of jackals came and asked her, ‘Why are you crying, granny?’ The old woman answered, ‘My old man is dead. I have no companion, no friend; that is why I am crying; besides there is no one even to set a light to the funeral pile.’ Then the jackals said, ‘We will eat him up for you.’ The old woman agreed, and the jackals one by one entered the house. Then the old woman, pretending to weep, cried, ‘one has gone in, old man! two, three have gone in! all of them have gone in! Whirl your club!’ Then she shut the door tight and made it fast. So the old man rose up and belaboured the jackals with his club. And of the jackals some died, and others thrust themselves through the wall of the hut and ran away.

'Tèntòn lòng-lō, vàng-nòn,' pu Tèntòn binòng ālung-kedo-āsànghō-āphàn
'Tenton is-caught, come,' saying Tenton the-real near-being-people-to
hàng-ī, kàt-jui-lō. Ānkē kedo-àn ārlèng vàng-pèt-sī,
called-having, ran away. Then all the-men come-together-having,
Tèntòn-ingehin-āni-pèn-kekòk ārlèng jāsemèt chòk-lō. Ānkē lā 'nē Tèntòn
Tenton-iron-chain-with-tied man severely beat. Then he 'I Tenton
kāli' pu-lō. 'Nàng Tèntòn kāli ?' rā pu chòk-pèt-àn-muchòt
am-not' said. 'You Tenton not ?' thus saying beat-more-and-more
inghoi-lō. Ānkē bàng-sō ārlèng kechòk-òng thī-lòt-lō.
(they-) did. Then that man being-very-much-beaten died

STORY OF TENTON.

Once upon a time there was a Brahman and his wife, who had neither son nor grandson. Tenton, wandering about, came to the Brahman's house. The Brahman said to him,—‘Why have you come?’

He answered,—‘I am a wanderer.’

The Brahman said, ‘Then will you stay with us and be our companion?’

Tenton answered, ‘If you will treat me kindly, I will stay with you: I have no place to live in, and am a wanderer.’

‘Very well; we have neither son nor grandson, so that when I go to the field to plough there is no one to pick a mote out of my eye; if you stay with us, I shall have company when I go to the field,’ the Brahman said.

‘Very good, I will stay with you,’ Tenton replied; and he took up his abode with them.

Two or three nights passed, when the Brahman said, ‘Let us go and plough in the field,’ and Tenton went with him. After ploughing for a certain time, Tenton rubbed some mud on the back of the bullock with which he was ploughing, and said to the Brahman, ‘I am very thirsty, Grandfather.’

The Brahman said, ‘Go to the house and get a drink.’

‘But what if Granny does not give me to drink?’ said Tenton.

‘If she does not, then call out to me,’ said the Brahman. Then Tenton went to the house and said to the old woman, ‘O Granny, Granny, my grandfather says, “bring out the bamboo-joint with the rupees in it, I want to buy a bullock.”’ The old woman said, ‘I won’t give it you; we have a bullock already, why should we buy another?’

Tenton answered, ‘Look there in the ploughing place, do you see the white bullock?’

The old woman said, ‘I cannot give it you.’

Then Tenton called out to the Brahman, ‘She won’t give me the bamboo-joint.’

The Brahman called to the old woman, bidding her give it. Then the old woman brought the bamboo-joint with the money in it and gave it to Tenton, who, when he had got hold of it, did not go back to the field, but ran away.

Then, about noon, when Tenton did not return to the field, the Brahman came home and asked his old woman where Tenton was. She answered—

‘You told me to give him the bamboo-joint with the rupees in it, and I sent it by him; long ago I sent it.’

Then the Brahman said, ‘So then he has run away with it; I must follow after him.’ After taking his food he accordingly pursued Tenton.

Now Tenton, after getting hold of the Brahman's money, went to the King's town, and began to gamble with the King's sons. The King's sons asked him his name. Tenton said that his name was *Ong* (‘maternal uncle’) and the King's sons called him by that name. Then the Brahman, in the course of his search after Tenton, arrived at the place where they were gambling. Tenton, as though he did not know the Brahman, went on gambling. The King's sons said to Tenton, ‘It is Ong's turn to play.’

The Brahman, hearing the King's sons call him ‘Ong,’ thought that he was perhaps really their maternal uncle, and not daring to say anything, lay down quietly and went to sleep in the place where they were gambling.

When Tenton and his companions had finished their play, Tenton said to the King's sons—'Just give me a hundred rupees, and I will leave with you this slave of mine.'

Then the King's sons paid over to Tenton a hundred rupees as the price of the Brahman, and Tenton, when he had got the money, ran away again. Then the Brahman, awaking from his sleep, asked the King's sons, 'Where is that lad who was gambling with you with cowries?'

The King's sons answered, 'Why, that young man said you were his slave, and we have bought you from him for a hundred rupees; you cannot therefore go away. You will have to stay in our house as our slave.'

The Brahman said, 'O my fathers! Why did you pay away money for nothing at all without making any enquiry from me? This fellow has robbed me of a hundred rupees, and I am pursuing him; but seeing him gambling in your worshipful company I waited a little while, otherwise I would long ago have seized and carried him away.'

The King's sons said, 'Oho! is this really so? Since he has cheated both of us so much, let us go and seek for him, taking iron chains with us; if we lay hands on him, we will bind him hand and foot.'

Then all the people of the King's whole country took iron chains and went in search of Tenton. Now Tenton, meeting a man who had an iron chain with him, said to him, 'Friend, what is the reason why you are carrying about an iron chain?'

The man answered, 'If I meet Tenton, this chain is to bind him with, hand and foot, friend.'

'Is it so?' said Tenton, 'how is this chain to be put upon his hands and feet? please explain to me, friend; if I come across Tenton, I also would like to bind him.'

Then that man, to show Tenton, put the chains on his own hands and feet, so that he could not release himself. Then the real Tenton called out to all the people round about, 'Tenton is caught, come here!' and himself ran away. Then all the men came up together and beat severely the man whom Tenton had tied up with chains. He cried, 'I am not Tenton!'

'You are not Tenton?' said they, and beat him more and more, till in the end that man died from the blows he received.

Sir Charles Lyall makes the following remarks on the above story :—

Notice the Assamese words,—*hai* (in *hai-bai*), from Ass. *hāl*, plough (final *l* in Mikir becomes *i* or *y*); *dohòn*, for *dhan*, money, rupees (*dh* is an unknown sound in Mikir except in loan-words, and is therefore resolved into *d* and *h*; *chini*, to recognise. *Pō* in *bāmòn-pō* is a syllable indicating respect = father. *Pèngànsō* or *pèngnànsō*, a wedded pair (*pèngàn* = husband).

Notice also the idioms *hai-bai-mā-lai-sī* and *pāthu-mā-pāthu-lō*, where the interrogative particle *mā* is used to indicate an indefinite continuance of the action.

The syllable *-i* in *hai kebai-i āchainòng*, bullock used for ploughing, indicates purpose, and frequently occurs in such adjectives.

Notice also the honorific forms used of the king's sons :—*jō* in *teràm-jō-lō*, called, *pu-jō-lō*, *pu-jō*, said, which is a plural of honour, and the *lī* in *nàng-lī-tum ālòng*, *pō-m-ir-lī*, also indicating respect.

The *ē-* in *ē-kechōbēi*, has cheated us both, is the plural of the pronoun of the first person, including the person addressed, while *nē* *er iu l* is the addressee.

In *āḷèt-īṣī* notice the idiomatic use of *īṣī*, one, to signify *the whole country*.

Lāng-pòng, the bamboo-joint (commonly called *chungā*) used in Assam to hold water (*lāng*), is used also as a receptacle for other things, as here for money. The back of the bullock was rubbed with mud apparently that it might become invisible to the old woman, and lead her to think that it had run away or died, and that it was necessary to buy another. *Khādòt*, cowrie, *pāthu* (or *pātu*) to hide; the two together signify to gamble with cowries. *Ni* (*āni*) is apparently self-locking handcuffs or fetters, which once locked cannot be opened without a key.

I am indebted to the kindness of the Rev. P. E. Moore, who has for years worked as a missionary among the Mikirs, for the following additional version of the parable of the Prodigal Son. The words and sentences in the list following headed 'Mikir (Nowgong)' are also furnished by that gentleman. The Mikir words are spelt according to the general system of transcription used in this Survey, which differs slightly from that used by Sir Charles Lyall in the preceding grammar and specimens. It will be observed that, instead of his *à* and *ā*, we have only *ā*, and that instead of *è*, *e* and *ē*, we have only *e*. Instead of *ò* and *o*, we find *ó*, representing the sound of *o* in 'all,' which, according to Mr. Stack, does not occur in Mikir. The letter *ū* is invariably marked long; short *u* does not appear. The use of *ó* and *ū* probably represents local varieties of pronunciation. The other discrepancies are matters of detail, and are of little importance. We may also note that the prefix *chī-* seems to be used even when a reflexive sense is not required. Thus, we have *chī-tān-nān*, clothe (not oneself, but some one else).

 īngbō-tāng-det-tā, lāng-tūlāk-lā.'
lost-entirely-was-also, found-again-is.'

BHOI MIKIR DIALECT.

This dialect is spoken in the north-east of the Khási and Jaintia Hills District, bordering on Nowgong. 'Bhoi' is a Khassi word meaning non-Khassi subjects of the Khassi chiefs in the low hills north of the high plateaux of Khassi-land, and includes Lálungs and Gārōs as well as Mikirs. The Assam Census Report of 1891 doubtfully classes Bhoi as belonging to the Khassi family, but an examination of the specimens shows that the dialect is certainly Mikir. The specimen is, however, written according to the system of sound rendering used in Khassi, and is particularly valuable as giving independent testimony as to the correct pronunciation of Mikir words.

It is to be regretted that the specimens which I have obtained through the kindness of the Deputy Commissioner of the Khási and Jaintia Hills are not as accurate as could be wished. No attempt has been made to mark the length of the vowels,¹ and the inter-linear translation is certainly wrong in parts. The latter, when my knowledge extended to the task, I have corrected in a few places, but most of the passages have been left untouched. Such as it is it shows that the dialect is certainly Mikir.

The speakers dwell in the vicinity of the Syntengs, and hence they have adopted some Khassi expressions. The principal of these are, (1) the use of *ho* for the accusative or dative, *prefixed*, as in Khassi, instead of the Mikir *āphān* *postfixed*; (2) the use of *to* in the imperative in lines 4 and 5 of the second page of the specimen; and (3) some cases (chiefly in Nos. 220—241 of the list of words and sentences) of the use of the Khassi instead of the Mikir (Tibeto-Burman) order of words. One striking Khassi feature in the parable is the almost complete absence of the Conjunctive Participle, and the use in its stead of the perfect *-lo*, or the present-future *-po*.

The main body of the specimen is in Mikir. The spelling is not consistent, and I do not venture to compile a grammar from the imperfect materials available. It must suffice to note that the principal difference between this language and standard Mikir is (if the spelling is to be trusted) one of pronunciation. Thus the standard *ō* regularly appears as *uh*, as in *duh*, was, for standard *dō*; *a-suh* for *ā-sō*, a son. Standard *ch* appears as *sh* (the former letter not existing in Khassi). Thus we have *shi-pleng* for standard *chī-plēng*, he filled; *ankangshir* for *ānkāngchīr*, hunger. It sometimes appears as *j*, as in *kī-jing* for *ke-chōng*, began; *jainong* for *chainōng*, a cow. We may also note a plural formed by suffixing *kī-ong* or *ke-ong* (the Mikir for 'many,' 'much,') and an Imperative by suffixing *noij* (*pī-noij*, give) or *nonj* (*shi-kam-ri-nonj*, call not) instead of *noi* or *nān*. The verbal adjective with the prefix *kī* is used throughout to represent the present tense, as in *kī-long-thu*, he is found again.

The speakers of the Bhoi dialect are confined to the Khási and Jaintia Hills and number 10,080 souls.

¹ This remark applies also to the list of words.

 phak-eh.'
again-is.'

ĒMPĒO or KACHCHĀ NĀGĀ.

The tribe speaking this language inhabits the eastern part of North Cachar, and the adjoining portion of the Nāga Hills. The Ēmpēos of North Cachar are also called Arung, and, by the Angāmi, Sengimā. Stewart and, following him, Damant seem to have considered Arung and Kachchā Nāgā to be different languages, but a perusal of the list of words will show that this is not the case.

According to Mr. Soppitt, the term Nāgā is unknown to the people; their designation in their own dialect being Ēmbo or Ēmpēo. This name is stated by them to be derived from the abode of the god who created the tribe,—a land somewhere in the far east, called Ēm This may possibly point to an exodus from other parts to North Cachar and the Nāga Hills; but, if this be the case, it took place at so remote an age as to be untraceable at the present day. The fact of their not being a wandering race, like the Kachāris and Kukis, and rarely, except for some very pressing reason, changing the site of the village, and, even on these occasions, never moving more than a mile or so from the old location, would lead one to conjecture that they are descended from the earliest inhabitants of the parts they now occupy.

Many of the people from intercourse with the plains begin to acknowledge the term Nāgā and to answer to it, but in the remoter villages, removed from outside influences, the term is unknown; nor is it any way recognised by the surrounding tribes, Kukis and Kachāris.

In the Nāga Hills there are said to be three dialects of Kachchā Nāgā, *viz.*, Inzēmi, Sengimā, and Yēmā. The last name is also pronounced Jēmā, and becomes Jēmē in North Cachar, where it is used as a general term for the whole tribe. In the present state of our knowledge it is impossible to say how many people speak each dialect. The figures estimated for the entire language are—

Nāga Hills	5,230
North Cachar	5,050
TOTAL									<u>10,280</u>

The language cannot be said to be closely connected with any of the Western Nāgā tribes. On the contrary, it has some features which are Nāgā, others which are like those which we meet in the Bodo group, and others like those of Kuki. There are a Bodo (Dimāsā), and a Kuki (Rāngkhol), language spoken in North Cachar, and I am inclined to look upon Ēmpēo as a connecting link between the three groups of Tibeto-Burman languages, Nāgā, Kuki, and Bodo. On this point, I cannot do better than quote the remarks made by Mr. Gait on p. 176 of the Assam Census Report for 1891.

Empeo or Kacha Naga is spoken by the tribe of that name which inhabits the north-western portion of the Naga Hills district and the east part of the North Cachar Subdivision. From Mr. Soppitt's grammar of the language, it seems that the rules regarding the gender, number, and case of nouns are precisely the same as in Kachāri.¹ The adjective invariably follows the noun. It is not inflected for the different genders and numbers. Comparison is effected by affixes to the nouns compared, the adjective remaining unchanged. Thus 'boys are stronger than girls' is rendered 'girls than boys strong.' There are separate words for the numerals from one to ten, and for twenty, a hundred, and a thousand, intervening numbers being expressed by multiples of these. Different prefixes are used according to the class of objects referred to, *hāng* for human

¹ The exact particles used differ as much as other vocables.

beings, *gāng* for money, *bāng* for trees. The prefix is attached to the last numeral. Thus sixty-nine men would be 'men sixty and (prefix) nine.' The description of Kachāri pronouns applies also to Kacha Naga. It may be noted, however, that the personal pronoun may be combined with the substantive verb and that although the participle is used in preference, there is also a relative pronoun. The verb is conjugated as in Kachāri, except that the imperative mood has a distinctive affix. Like Kachāri, adjectives and nouns may be conjugated as verbs.

The passive is formed by the use of the perfect participle with the different tenses of the verb 'to b.' A few intensitive particles are in use, and are inserted between the stem and the termination. Causative verbs are formed by appending the verb meaning 'to give' to the infinitive of the main verb. The negative force is given by adding *māk* to the stem. In the imperative the negative follows the stem, as in other tenses, but greater force is given by inserting it once before and again after the stem. Adverbs may be declined like nouns. Words corresponding to the English prepositions follow, instead of preceding, the noun. There are a few conjunctions, but they are very rarely used.

I regret that I have not been able to obtain specimens of this language for the Survey. I here give a brief account of its main rules of construction, compiled from Mr. Soppitt's Grammar, and in the List of words on pages 432 and ff. will be found a vocabulary derived from the same source, and another of Arung, taken from Lieutenant Stewart's article.

The following are the authorities dealing with Ēmpō which I have consulted:—

AUTHORITIES—

- STEWART, LIEUT. R.,—*Notes on Northern Cachar.* *Journal of the Asiatic Society of Bengal.* Vol. xxiv, 1855, pp. 552 and ff. On pp. 607 and ff. an account of the 'Aroong' Nāgās. On pp. 649 and ff. an account of the 'Kutchā' Nagas, whom the writer seems to consider as nearly the same as the Angāmis. On pp. 656 and ff. an Aroong, also spelt 'Arūng,' Vocabulary.
- BUTLER, CAPT. J.,—*A rough Comparative Vocabulary of some of the Dialects spoken in the "Nāgā Hills" District.* *Journal of the Asiatic Society of Bengal,* Vol. xlii, Pt. I, 1873, Appendix. The 'Kutchā Nāgā' Vocabulary is very scanty.
- DAMANT, G. H., I.C.S.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers.* *Journal of the Royal Asiatic Society,* Vol. xii, 1880, pp. 225 and ff. On p. 243, an account of the Arung, Kutchā, and Quoireng, or Liyang Nāga. The Quoireng are wrongly classed as the same as the Kutchā Nāgā. The language of the Quoireng is certainly a form of Kuki. On p. 256 short Vocabularies of Arung and Kutchā.
- SOPPITT, C. A.,—*A short Account of the Kutchā Nāga (Ēmpō) Tribe in the North Cachar Hills, with an Outline Grammar, Vocabulary and Illustrative Sentences.* Shillong, 1885.
- GAH, E. A., I.C.S.,—*Report on the Census of Assam for 1891.* On p. 176 an account of the language. Shillong, 1892.

Pronunciation.—The nasal *ng* is of frequent occurrence but never commences a word.

The accent is usually on the penultimate syllable, but in the case of conjugation is usually on the conjugational suffix. In interrogative sentences, it is on the interrogative suffix *mē*. There are numerous exceptions, which must be learned from Mr. Soppitt's Grammar.

Nouns.—Note the extreme frequency with which the prefix *mi* is used in the case of nouns relating to parts of the human body. Thus *mi-pā*, hand. This prefix is very loosely joined to the main noun, and is liable to be dropped when a pronominal prefix precedes. Thus *ā-pā*, my hand. Another prefix used without changing the meaning of a word is *b̄*, as in *b̄-gī* or *gī* a house.

Article—There are no Articles. Sometimes *kāt*, one, is used as an indefinite article.

Gender.—Gender is only indicated in the case of living beings. Sometimes different words are used, as *āsi*, brother; *ākinā*, sister. Sometimes there are different terminations, as *em-bo*, a Nāgā man; *em-būi*, a Nāgā woman. Frequently it is indicated by suffixes. Thus *enrūi-rē*, a male bird, a cock; *enrūi-pūi*, a female bird, a hen.

Number.—The plural is indicated by the following suffixes :—

- (1) Human beings take *mī* : as *mīnā*, man; *mīnā-mī*, men.
- (2) Animals, birds, insects, etc., take *dūng* : as *godōm*, cow; *godōm-dūng*, cows.
- (3) Plants, trees, etc., take *jēō* : as *jīnglāng*, tree; *jīnglāng-jēō*, trees.
- (4) Inanimate things take *kēdā* : as *mī*, fire; *mī-kēdā*, fires. Compare Lālūng *khēdā*, and the Assamese *kefā*, some.

There is a plural suffix *nung*, used like the Hindūstāni *wālā*, and the Āo *er*. Thus *gāḍabā-nung*, other ones; *rāme-nung*, the villagers, (*gāw-wālē*). This last exactly corresponds to the Āo *im-nunger*, the men of in the village, the villagers.

The singular is often used for the plural, when no ambiguity will result.

Case.—This is indicated by suffixes, as follows :—

Sing.	Nom.	<i>Godōm</i> , a cow.
	Acc.	<i>Godōm-kī</i> , <i>godōm-ju</i> , a cow.
	Instr.	<i>Godōm-nē</i> , <i>godōm-gēnē</i> , by a cow.
	Dat.	<i>Godōm-dūi</i> , <i>godōm-lāng</i> , to a cow.
	Abl.	<i>Godōm-gēnē</i> , from a cow.
	Gen.	<i>Godōm-gū</i> , of a cow.
Plural	Loc.	<i>Godōm-ēnē</i> , in a cow, <i>godōm-gā</i> , in or into a cow.
	Nom.	<i>Godōm-dūng</i> , cows.
	Acc.	<i>Godōm-dūng-kī</i> , and so on.

The suffixes for case are often omitted. This is specially common with the accusative.

Adjectives.—The Adjective does not change for gender. It follows the noun it qualifies.

As in Āo Nāgā, adjectives frequently take the termination of the present tense. Thus in *ī-īdā*, good, the termination *dā* is really verbal, and the compound means, literally, 'he who is good,' like the Āo *zung-er*. *Mīnā īdā* means both 'good man,' and 'the man is good.'

Comparison—is formed with the particles *hā* (for comparative) and *dē* (for superlative).

Thus,—*āi jīngbāng-hā īdā*, this tree-than is good, this tree is better than that tree; *āi-jīngbāng bālā-ā-dē īdā*, this tree-many-than is-good, or *āi jīngbāng-īē īdā*, this tree-than is-good, this tree is best of all. *Sāng* is used to form an absolute superlative, as in *ī-sāng-ī*, very good.

Numerals.—Cardinals take prefixes of classification according to the objects enumerated. With human beings *hāng* is used. Thus *mīnā hāng kāt*, one man. With money, the prefix is *gang*, and with trees *bāng*.

Pronouns.—The **Personal Pronouns** are—

<i>Ānūi</i> , I.	<i>Ānūi-mī</i> , we.
<i>Nāng</i> , thou.	<i>Nāngnūi-mī</i> , you.
<i>Jī</i> , he, she, it.	<i>Jī-mī</i> , they.

These are declined regularly.

The first and second persons may, however, become *ā* and *nā* respectively before postpositions.

Thus *ānūi-hāng*, or *ā-hāng*, to me; *nāng-gū*, or *nā-gū*, thy. When postpositions are dropped, this *ā* and *nā* simply become pronominal prefixes. Thus, *ā-pā*, my hand, and so on. There are no special possessive pronouns.

The Demonstrative Pronouns are—

<i>āi</i> , this.	<i>āi-kēdā</i> , these.
<i>ūi</i> , that.	<i>ūi-kēdā</i> , those.

They are declined regularly, except that, before terminations, the *dā* of *kēdā* is dropped. Thus, *āi-kē-gū*, of these.

The **Relative Pronoun** is *gī*, as in *gī-i-bāpēo*, he who is good. It is rarely used, participial constructions being preferred.

The Interrogative Pronouns are—

chāō-lo, who?

endaī, which? what? The *lo* of *chāō-lo* is liable to be transferred to other words in the sentence, as in *chāō līmrā lo*, who is to dance?

Verbs.—There is no distinction between verbs and other parts of speech; nouns, adjectives, and pronouns freely taking verbal terminations. Thus *minā-dā*, it is a man; *minā-gū*, it will be a man: *i-dā*, is good: *i-gū*, will be good: *ānūi-dā*, it is mine; *nāng-dā*, it is yours.

The ideas of tense and mood are conveyed by suffixes. There are two main tenses, a Future, and a Non-future (including both simple Present and simple Past). There are other derived tenses. The tenses do not change for number or person. The following table shows how the tenses, etc., are formed for the root *lū*, get:—

Non-Future.—*Ānūi lū-dā*, I get, I got.

Future.—*Ānūi lū-gū*, I shall get.

Perfect.—*Ānūi chūnā lū-dā*, literally, I got, or get, now, hence, I have got.

Definite Present.—*Ānūi chūnā lū-gū*, literally, I shall get now, hence, I am getting.

Pluperfect.—*Ānūi lū-dā-lē*, I had got.

Future Perfect.—*Ānūi lū-gū-dā-lē*, I shall have got.

Imperative.—*Lū-jō*, *lū-chō*, get thou; *lū-lā*, let him or them get.

Conditional.—*Ānūi lū-lā-jōi*, if I get, or had got.

Infinitives, Present. *Lū-rā*, to get. As in *nāng lū-rā-mē*, are you to get; *ānūi lū-rā-dā*, I have got (not, 'I have to get'); *lū-rā ba-shi māk dā*, he is not to get; *lū-rā i-dā*, it is good to get; *lū-rā pāg-jō*, run to get.

Past.—*Lū-rā-dā-lē*, to have got.

Participles, Present.—*Lū-laijainē, lū-laijai, lū-lai, lū-jai, lū-jainē, lū-jaiḥā,* getting.

Past.—*Lū-shē,* having got, got.

Noun of Agency.—*Lū-lū-pēo* or *lū-bā-pēo*, he who gets (*pānē-wālā*). In the first form the root is reduplicated.

The **Passive Voice** is formed by the past participle of the verb, followed by the different tenses of *lā-rā*, to be. Thus *ānūi lū-shē lū-dā*, I was, or am, gotten. *Ānūi lū-shē lā-gū*, I shall be gotten.

The **Causative** verb is formed by appending the verb *pē-rā*, to give, to the infinitive of the principal verb. Thus, *ānūi lū-rā pē-gū*, I shall cause to get.

The **Potential** verb is formed by compounding the suffix *dūi* with the root of the main verb. Thus, *ānūi lū-dūi-dā*, I could get. The negative potential is formed by suffixing *lāg*, as in *ānūi minā-mī jui-lāg-dā*, I could not get the men.

The **Frequentative** verb is formed by suffixing *dai* (which bears the accent) to the root. Thus *tā-dai-jō*, come again.

The **Completive** verb is formed by suffixing *tā*. Thus, *pāg-dā*, ran; *pāg-tā-dā*, ran away. Another similar suffix is *kām*. Thus *tā tēo-kām-dā mē*, is the work completed?

The **Negative** verb is formed by suffixing *mā* or *māk* to the verb after conjugation. Thus, *ānūi lūgū-mā* (or *māk*), I shall not get.

The mere root of a verb is often used in a negative sentence,—all tense suffixes being dropped. Thus, *tā tēo-māk*, he (does) not do work; *tingrui rui-māk*, it (will) not rain. If the negative particle precedes as well as follows the verb, additional emphasis is gained. Thus, *mā-tēo-mā*, nothing whatever has been done.

The **Negative Imperative** is formed by adding *sho* to the root. Thus, *lū-sho*, or, more emphatically, *sho lū-sho*, do not get.

There is a negative form of the verb substantive, viz., *galē*, is not; *gadā*, *godālā*, was not; and (negative interrogative) *ga-mē*, is not? are not?

The **Interrogative** verb is formed by suffixing *mē*, which comes last in the sentence. Thus, *jingbāng lā-dā-mē*, is it a tree? In these cases, the bare root is often used, as in the case of negative expressions. Thus *nāng tēo-mē*, are you eating?

When there is an interrogative pronoun in the sentence, this *mē* is not necessary, as in *chāōlo wāngdā*, who came? So *chāō līmṛā-lo*, who is to dance? And even *endaī līmṛā-lo*, which is to dance?

Order of words.—This is usually Subject, Object, Verb. The adjective follows the word it qualifies, and the interrogative particle *mē* comes at the end of a sentence.

KABUI OR KAPWĪ.

This language, which is called 'Koupooee' by McCulloch, is spoken by the tribe bearing the same name. Damant, writing in 1879, gives the following account of the people, who are one of the so-called 'Nāgā' tribes of the State of Manipur:—

The Kabui are divided into two classes: the Songbu and the Poeron; the former inhabit the range of hills which separate Cachar from Manipur, a tract of about sixty miles from east to west, and thirty from north to south. Their villages are found on both sides of the road [*i.e.*, the main Manipur Road from British India], but there are now few to the south of it, as they have lately been driven northwards by the constant attacks of the Lushai. A few villages are also to be found in the valley of Manipur and plains of Cachar. Their principal villages are Nongba, Kalanāga, Lilanang, and Lualang Khulel.

The Poeron are not a numerous tribe, and inhabit a few villages to the north-east of the Songbu.

At present the Kabuis of the valley centre round Langthabal, a village some eight miles south of the town of Manipur. It is estimated that altogether there are about 8,000 of them. To these may be added 3,073 speakers of 'Nāgā' (probably Kabui) reported from Cachar Plains, making a total of 11,073. Damant classed their language as belonging to the Kuki family. In this he is clearly wrong. It belongs to the Nāgā group, and, like Kachchā Nāgā is a transition language between Angāmi and the languages of the Bodo group. The connexion will be evident from a perusal of the list of words. At the same time, it also shows points of contact with Kuki languages.

The following are the authorities on the Kabui language:—

AUTHORITIES—

BROWN, REV. N.—*Comparison of Indo-Chinese Languages*. *Journal of the Asiatic Society of Bengal*. Vol. vi. 1837, pp. 1023 and ff. On p. 1034 a short 'Kapwī' Vocabulary.

MCCULLOCH, MAJOR W.—*Account of the Valley of Munnipore and of the Hill Tribes: with a comparative Vocabulary of the Munnipore and other Languages*. Selections from the Records of the Government of India, Foreign Department, No. XXVII, Calcutta, 1858. On pp. 42 and ff. there is an account of the Koupooee Tribe. On pp. v and ff. of the Appendix there are vocabularies of Koupooee Pooceron and Koupooee Songboo. The following specimens and list of words agree with the latter.

DAMANT, G. H.—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers*. *Journal of the Royal Asiatic Society*. Vol. xii, 1880, pp. 228 and ff. On p. 242 there is an account of the Tribe above quoted. On p. 255 there is a short Kabui Vocabulary taken from McCulloch.

The following very imperfect account of Kabui grammar is based on the specimens and list of words collected for this Survey; and its correctness, so far as it goes, depends entirely upon the accuracy with which these have been prepared. The grammatical account is far from being complete, and cannot pretend to do more than illustrate the more prominent features of the language.

Pronunciation.—The letters *r* and *l* are interchangeable. Thus, *Lā* or *Rā*, God; *lan* or *ran*, wealth. When a termination commences with one of these letters, it always becomes *l* after a consonant, but *r* after a vowel. Thus, *pahut-lanā*, having run; *bāi-ranā*, having beaten; *lan*, wealth; *ka-ran*, his wealth. This is also the case in Meithei.

Prefixes and Suffixes.—The prefix *ka*, which in some cases properly means 'his,' is often used without any special signification, beyond perhaps giving an idea of definiteness. Thus, while we have *ka-nā*, his son, we have also *ka-chanā-uhāi*, the (not his) two brothers. The prefix is freely dropped in favour of other prefixes as in *nāi-nāi*, two days. In some cases this prefix corresponds to the Western Nāgā prefix *ke* used to form adjectives. Thus, *ka-nāi*, two = Angāmi *ke-nā*; *ka-thom*, three =

Semā *ke-thu*. *Ā*, meaning 'my,' is used in the same way, as *ā-po*, my father, or a father.

The use of the suffix *mai* or *māi* (both spellings occur) should be noted. It is employed much like the *Āo er*, he who is, or the Angāmi *mā*, person. Thus *gā-mai*, he who is a man, a man; *gāi-māi*, he who is good, good; *gāi-mak-māi*, he who is not good, bad, a bad action; *bam-ai*, for *bam-mai*, he who remains, a dweller (compare Angāmi *ke-bā-mā*); *samkān-mai*, he who wastes, a waster; *tālpāng-mai*, a human being; *naū-naū-mai*, bosom-who-drinks, a suckling.

Nouns.—Gender.—The following are examples of the modes in which gender is indicated:—

<i>Ā-po</i> , my father.	<i>ā-poi</i> , my mother.
<i>Ā-kāinā</i> , my brother.	<i>ā-tānpoi</i> , my sister.
<i>Gā-mai</i> , a man.	<i>to-mai</i> , a woman.
<i>Nā-gāmai</i> , man-child, son.	<i>nē-tonai</i> , woman-child, daughter.
<i>Takon gāmai</i> , a horse.	<i>takon koi</i> , a mare.
<i>Goitom gāmai</i> , a bull.	<i>goitom koi</i> , a cow.
<i>Si-rū gāmai</i> , a dog.	<i>si-koi</i> , bitch.
<i>Jū-chi</i> , a he-goat.	<i>jū-koi</i> , a nanny-goat.
<i>Changāi kachi</i> , a male deer.	<i>changāi koi</i> , a female deer.

Number.—The plural of human beings is formed by suffixing *nhun* (sometimes *hnū*). *Goi* is also used as a plural suffix both for human beings and things. Thus *ā-po*, father, *ā-po-nhun*, fathers. *Ka-bang-nhun* is 'his servants,' but *ā-pū bang-goi-roi tū-bamē* is translated, 'my father's servants eating live.' So *ka-ran-goi-so*, his-properties-those, that his wealth. The plural of animals seems to be formed by adding *gāmai*, as in *takon gāmai gāmai*, horses.

Goi, with or without *hnū*, is used to form the plurals of pronouns.

Case.—Cases are formed by suffixes.

The *Nominative* takes no suffix, except when it is the subject of a transitive verb, when it takes *roi* (or *loi* after consonants). Thus, *āi tadē*, I go, but *āi-roi bāiyē*, I strike; *ka-nā khūmai-roi lapāwē*, his younger son said; *ka-pū-roi jalāthē*, his father divided; *ka-bang-loi dūwē*, his servant answered. Sometimes the suffix is used before intransitive verbs, as in *ka-nā khūmai-roi ka-ran-goi-so fanpā lon-dū-tho tēkūthē*, his younger son carrying all his wealth departed to a distant place.

The suffix of the *Accusative* is *tā*, as in *āi-roi māi-nā-tā bāi-thē*, I have beaten his son.

There appears to be no example of the suffix of the *Instrumental*.

The suffix of the *Dative* is usually *kho*, as in *gāng khat klo taranā*, going to a man; *ka-pū kho lapāwē*, he said to his father. Sometimes the accusative suffix *tā* is used as in *gak-tā tītūni*, what is given to the swine to eat. 'For' is *k'ang* as in *kachanā-nhūi khang*, for the two brothers. In the list of words the dative suffix is *tho*, but in the specimens it has not always this meaning. In *lon-dū-t'ho*, to a distant place, it is a dative. On the other hand, we have *nang-nā gang-kho-the nang-loi nap ti-tū-bamthē*, you are giving rice to your son to eat on (his) coming. Perhaps *tho* may mean 'to' if we treat *nang-nā gang-kho* as one word, your-son-who-has-just-come. In *nang-'ho* you (live continually with me) I am unable to explain the *tho*. *Tho* in *kāi-tho*, and

elsewhere is the sign of the Locative. In the first sentence of the parable *loi* appears as the suffix of a dative of possession.

The suffix of the *Ablative* is *tho-roi* as in *āpo khat-tho-roi*, from a father.

The *Genitive* as a rule takes no suffix. It is simply prefixed to the governing noun as in *ā-pū banggoiroi*, my father's servants. Sometimes the suffix *khang* is used, as in *ā-po khang*, of a father. The only instance which occurs in the specimens is *na-khang*, yours, where it is a genitive absolute. As shown above, *khang* is also used for the dative, meaning 'for.'

The suffix of the *Locative* is *kho*, which is also used for the Dative. Examples are *kāi-kho*, in the house; *ka-nhām-kho*, on his back. *Tho* is also used, as *kāi-tho*, in the house.

Adjectives.—Adjectives, including numerals, follow the nouns they qualify, as in *takon bāngmai*, the white horse. In the list of words, however, 'a good man' is rendered *gāimāi gāmai khat*, in which the adjective precedes, and the numeral follows. When an adjective follows a noun, case suffixes etc., are suffixed to the adjective. This *gāng khat kho taranā*, going to one (*i.e.*, a) man.

In the Bodo languages, and in Kachchā Nāgā, numerals take generic prefixes which vary according to the articles enumerated, thus (Kachchā Nāgā) *minā hāng-kāt*, one man; but *jingbāng bāng-kāt*, one tree. In Angāmi Nāgā, on the contrary, these generic prefixes are not used. In this respect, Kabui Nāgā appears to occupy an intermediate position. These prefixes are used, but not compulsorily. Moreover, the prefixes are not *generic*, *i.e.*, there is not one special prefix used for any one class of objects. Judging from the specimens available, the prefix is, in Kabui Nāgā, in every case, a repetition of the essential part of the word which represents the thing enumerated. This is parallel to the Kachchā Nāgā repetition of *bāng* in *jingbāng bāng-kāt*. Thus the essential part of *gā-māi*, a man, is *gā*, and 'one man' or 'a man' is *gā-māi gā-khat*. So *nāimhek jang nāi-nhāi nāi-thom bamlanā*, after two or three days had passed. On the other hand the prefixes are omitted in *gāng khat kho*, to one man; *nāi-khat nāi-nhāi bamlanā* (second specimen), after one or two days have passed.

The following are examples of comparison;—

Gāi-māi, good.

Kanhāi kako gāi-māi, better.

Gāi-chūi-māi, best.

Ka-chūi-tū ka-kāinā-roi kā-wī.

His-sister-than his-brother tall-is, *i.e.*, his brother is taller than his sister.

Pronouns.—As in Kachchā Nāgā, pronouns have an oblique form which is used before suffixes and as a genitive. Thus—

Nom.	<i>āi, āi-roi</i> , I.	<i>hāi-goi</i> , we.
Obl.	<i>ā</i> , me, my.	<i>hāi</i> , us, our.
Nom.	<i>nang, nang-loi</i> , thou.	<i>nang-huū-goi</i> .
Obl.	<i>nang, na</i> , thee, thy.	<i>nang-huū</i> .
Nom.	<i>kamāi, kamāi-roi</i> , he, she, it.	<i>māi-kai, ka-nhū</i> .
Obl.	<i>kamāi, ka</i> , or <i>māi</i> , him, etc.	<i>māi-kāi</i> .

EXAMPLES—

First Person,—*ai lathē*, I went; *āroi sānithē*, I will say; *ā-po*, my father; *ā-tā hāiyē*, beats me, I am beaten; *ā-khang titho*, give to me.

Second Person,—*nang māi-tāi thaū-kho lhūtong*, from whom did you buy that? *nang jān kumcho*, what is your name? *nang nā*, your son; *na-bang*, your servant; *na-kāinā*, your brother; *na-ran*, your wealth; *nang-tā makot-bamhāi*, serving you; *na-khang*, yours.

Third Person, (and demonstrative pronoun)—*kamāi tajāūthē*, he went; *kamāi-roi ti-tū-we*, he is giving to eat (fodder); *kamāi-roi sādapūilat*, he said; *ka-nhū gāi-thaū-thē*, they began to rejoice; *kamāi-tā haūranā*, having seen him; *ka-tā thiyēmē*, entreated him; *māi-tā-tāi bāinā*, beat him well (*tāi* adds definiteness). *Māi-kho-tāi* (from him) *lūpā māi-tāi* (those) *lāo*, take those rupees from him; *ka-kho titiyo*, give to him; *ka-pā*, his father; *ka-nhām*, his back; *āroi māi-nā-tā bāithē*, I have beaten his son; *māi-man*, the price of that. Note *fāi gāithē-tū-māi lāganglanā*, bringing that which is the best cloth. Here we see the force of *māi* (often spelt *mai*) as a demonstrative pronoun, which has resulted in the word developing into a suffix of agency as already explained. *Ka*, on the other hand, has become sometimes a mere definite article, as in *ka-chanā-nhāi*, the two brothers.

We have seen how *tāi* added gives a definite power to the pronoun. It gives the force of a demonstrative pronoun. A common phrase is *kho-tāi*, thereon, in which what is usually a suffix precedes. Another suffix which gives definiteness is *so*, as in *ka-ran-goi-so*, his wealth, literally, his-wealths-those; *pāina māiso zin-mhāng-kam-thē*, he wasted all that; *pūi nap-so*, that rice (*nap*). *Goi* is 'that,' and *hai*, 'this,' as in *ā-nā-hai*, this my son.

Interrogative pronouns are—

Who? *thaū-cho*

What? *tabui-cho*, *kum-cho*.

Examples are *nang jān kum-cho*, what is your name? *thaū-nā*, whose son? *thaū-kho*, from whom? *kum-bam-hai tabui-yam-cho*, what are these things?

Cho at the end of a sentence gives an interrogative force, as in *ā-pūi thāiti-cho*, is my mother dead?

Verbs.—As usual in this group and in Angāmi the boundary line between verbs and other parts of speech is ill-defined. Adjectives freely take verbal terminations, first divesting themselves of adjectival accretions. Thus, *kā-ū-mai*, tall; *kā-wē*, is tall.

As in Kachchā Nāgā, the only time which is clearly defined is the future, which is indicated by the suffix *ni* as in *āi tū-ni*, I shall be; *āi-roi bāi-ni*, I will strike; *āi-roi sā-ni-thē*, I will say.

The auxiliary verbs are *tū*, to be, and *bam*, to remain. They frequently appear in conjugation. Note that *tū* also means 'to eat.'

The following are the principal tense-forms (excluding the future) which I have noted. It will be remarked how interchangeable the suffixes are.

Present,—*bāi-yē*, strikes (the *y* is evidently euphonic; compare Angāmi *vu-we*, Sema *bu-ē*); so *bam-ē*, remains.

tū-thē, is; *thāi-pini-thē*, am dying; *atik-nam-thē*, equivalent to 'am not worthy'; *ta-dē*, goes.

Present Definite,—*bāi-bamboi*, is striking; *tū-bamē* (they) are eating; *ti-lū-thē*, is giving to eat; *ti-tū-bam-thē*, (you) are giving to eat.

Imperfect,—The one example is *bāi-bame*, was striking.

Past (including Perfect),—*bāi-linā*, struck.

bāi-thē, has struck; *ti-thē*, *ta-jā-thē*, *tu-kā-thē*, went; *jā-thē*, divided; *tāng-thē*, became dear; *sā-thē*, said; *gāng-da-thē*, has come again: and many others.

pōklā-wē, were born; *ti-pā-wē*, said; *karkarrā-wē*, joined; *dā-wē*, answered.

sā-da-pūi-lal, *sā-pūi-lal-sā*, he said (?): *sāi*, said.

Pluperfect,—*bāi-lāu-dū-wē*, had struck.

Imperative,—The most common suffix is *tho*, as in *tī-tho*, give; *tisū-tho*, make. We have also *tī-ti-yo* (of Hindī *dē-dēnā*), give; *lā-o*, take; *tī-sō-yo*, cause to wear; *thū-raū-ti-yo*, put on (shoes); *ta-ro*, walk.

Infinitive,—This ends in *nā*, as in *bāi-nā*, to strike.

Participles—

Present,—*bāi-nā*, striking; *tū-nā*, eating.

Past,—*bāi-ranā*, having beaten; *ta-ranā*, having gone; *hāu-ranā*, having seen; *thāi-ranā*, having died; *pakhā-lanā*, having run; *pam-lanā*, having embraced; *lāgong-lanā*, having brought.

Noun of Agency,—As already stated, this is formed by suffixing the pronoun *māi* or *mai*. Thus *samlān-mai*, a waster.

Compound Verbs,—As in the cognate languages, compound verbs are common. Thus, *Causal or Permissive*,—*tī-mā-thē*, gave the breast. Here the verb *tī*, to give, is prefixed. So *tī-sō-yo*, cause to wear; *tī-tū-thē*, gives to eat. *Tī-nū-mak-thē*, (he) refused, is also probably a causal verb with a negative.

Desiderative,—*āi-tū-ni-thē*, wished to eat.

Inceptive,—*gāi-thē-ū-thē*, began to rejoice.

Repetition is indicated by suffixing *da* to the root, as in *thāng-da-thē*, is alive again; *gāng-da-pūi-kho*, as he was coming back.

The Negative Particle,—This is *mak* (*māk*) or *makh*, which is used as follows:—

gāi-māi, good; *gāi-mak-mai*, bad, a bad action; *tī-makh-ē*, did not give; *gāt-mak-nā*, without trouble; *lāng-si-mak-nā*, without illness; *tūnū-mak-thē*, refused; *tū-makh-ē*, (I) did not do (wrong); *lāūhāū-mak-mai*, one who did not commit a lie; *thōi-mak-sān*, as long as (she) is not dead, until she dies.

¹ The word *pūi* occurs also in *pūi-clam*, catch; *kāi-pūi*, who is going; *pūi-nāp-sā*, that time; *pūigan-lhot-ū*, at that time; *gāng-da-pūi-kho*, as he was coming back; *ti-lāu-pūi-thē*, the root of the tongue. It also means 'mother.' In Kholāo and Maring it is a suffix of the feminine.

FREE TRANSLATION OF THE FOREGOING.

We, human beings, can after death reach the holy feet of God in Heaven, if we do not commit any sin and pass our lives honestly in this world; but those who commit theft and do many other sinful actions such as telling lies, cheating others, etc., are all sent to hell.

When a child drinking milk of its mother is dead it remains crying near God, because it is hungry and wants to drink its mother's milk; and when its mother is dead it says to God, 'O God, is my mother dead? let me see her and satisfy my thirst by drinking her milk.' And God answers, 'O child, your mother cannot come here now, because she is in hell bound with fetters for committing theft in her lifetime in the world.' Nevertheless the child continues crying bitterly and makes repeated prayers for the release of its mother. At last God, being compassionate, releases the mother from her confinement in hell and brings her to her hungry child. The child now drinks her milk to its heart's content.

KHOIRÃO.

The Khoirão Nāgās inhabit the northern hills of the Manipur State. They are flanked by the Kukis on the west, and the Tangkhuis on the east. Their language is called Kolya in some books dealing with Manipur. In the Valley of Manipur they are found at Thangal, a village about 20 miles north of the capital. The language is closely connected with Kabui and Kachchā Nāgā. Like Kabui, it shows points of contact not only with the Bodo languages, but also with the Kuki ones. I have met no account of its peculiarities or of the tribe which speaks it. The latter is not mentioned by McCulloch in his account of Manipur quoted under Kabui, but, in the Appendix, there is a list of 'Tukai mee' words, many of which agree with what is here called Khoirão. The number of speakers of the language in the Manipur State is estimated at 15,000.

The following very imperfect account of Khoirão Grammar is based on the specimens and list of words collected for this Survey, and its correctness, so far as it goes, is entirely dependent on the accuracy with which these have been recorded. It does not pretend to do more than illustrate the more prominent features of the language. There is much in the specimens that I have not been able to analyze.

The Khoirão grammar closely follows that of Kabui. The spelling of much of what follows is doubtful. I am pretty sure that *u* should be substituted for *ā* in many places. The word *thō* is also spelt *thaū* and *thay* and this gives a clue which should not be neglected in considering other words.

Prefixes and Suffixes.—The prefix *ka* has altogether lost its proper meaning of 'his.' It seems to be used, as in Kabui, as little more than a definite article. Thus, *ka-nāū*, the son, not necessarily *his* son. Exactly corresponding to the Kabui suffix *mai*, we have *lā* (also found in Ao, Chutiya and Meithei) and, more rarely, *tang*. Thus, take the word *woi*, corresponding to the Angami *ei*, meaning 'good.' 'A good man,' *chapāmi ka-woi-bā*, literally, 'the man who is good.' So, *savāūbā*, he who is a brother, a brother. Again, nouns of agency, *ka-bam-bā*, he who resides; *ka-gāi-bā*, he who has killed, a killer; *si-bā*, he who is dead, the deceased; *ka-gāi-teng*, the man who has killed, a killer.

Nouns.—Gender.—The following are examples of the modes in which gender is indicated :—

<i>Takōn pābā</i> , a horse,	<i>tekōn pāi</i> , a mare.
<i>Tōm pābā</i> , a bull,	<i>tōm pāi</i> , a cow.
<i>Thi tapābā</i> , a dog,	<i>thi pāi</i> , a bitch.

And so on. *Pāi* is possibly a contraction of *pā-woi*, see adjectives, below.

Number.—For nouns, the plural suffix is *kahak*, as *pā-kahak*, fathers. It is only used when necessary for the sense. Pronouns take *rami*, see below.

Case.—Cases are formed as usual by suffixes.

The *Nominative*, either takes no suffix, or else takes the suffix *ni* (compare Chutiya *nā*), which apparently means 'by,' and converts the whole sentence into a passive one. At least, *ni* is also used as the suffix of the case of the agent. In Kabui, the nominative takes the suffix *roi* before transitive verbs only, and the Khoirão *ni* seems to be bound by the same restrictions, though, like *roi*, it occasionally appears before intransitive verbs also. Thus, *pāi-pā-ni yēn-pi-ngē*, the father divided and gave; *hai-ni gāng-lē*, I will say;

but *pāi pā chāng rā-ē*, he came to his father. An instance of the use before an intransitive verb is No. 211 in the list of words, *viz.*, *hai-ni tha-nuē*, I went.

The *Accusative* usually takes no suffix, as in *pāi wān ang mahūnāi kū-pi-lā*, put a ring on his hand; *tūngkhōn chā-ngē*, he heard a sound. Sometimes the suffix *yō* of the dative is also used for this case, as in *pāi-yō laū-ā thaūntani-ngē*, sent him to the field.

The suffix of the *Agent* seems to be *ni*, as in *wōk-ni katā-gataū-chi*, that which was eaten by the swine.

I have not noted any instance of the use of the *Instrumental* case in the specimens or list of words.

The usual suffix of the *Dative* is *yō*, as in *nāū kati-yō yēn-pi-ngē*, he divided and gave to the two sons. The list of words translates 'to a father' by *pā khat thanāū*. Other forms of the dative are *hai-ni hai-pā chā-kāni gāng-lē*, I will go to my father; *pā chāng rā-ē*, he came to the father; *nāū chi-ni pāi-pā chāng-ang kēnē*, that son answered to his father.

As regards the *Ablative*, the list of words gives *pā khat thanāū-i* for 'from a father.' In No. 235 we have *pāi-chā-thō*, from him. So (240) *sū-chā-thō*, from whom?

The suffix of the *Genitive* is *hūi*, or *goi* as in *pā khat hūi*, of a father. We have also *chapā-mi ka-woi-bā khagoi*, of a good man, in which *khat* and *goi* have apparently coalesced. Usually, however, there is no suffix as in *hai-pā rāwā*, my father's servants.

The usual suffix of the *Locative* is *thaū* or *thō*, as in *kai-thō*, in the house. The correct spelling is probably *thō*. Sometimes we have *ā*, as in *laū-ā* meaning both 'into the field,' and 'in the field.' With verbal roots the suffix *chū* is very common, as in *tha-n-gē-chū*, on having gone: *si-chū*, when dead; *pa-chū*, at the time of coming.

In all cases, the suffixes are liable to be omitted, as in *pāi-pā wā-ngē*, said to his father.

Adjectives.—Adjectives, including numerals, follow the nouns they qualify. They do not themselves change for gender, but the feminine of the common suffix *bā* seems to be *woi*. Thus, *chapā-mi ka-woi-bā khat*, a good man; *sanūi-mi ka-woi-woi khat*, a good woman. Other examples are *takōn ka-ngoū-bā*, the white horse; *chapā-mi nāū-mi kasi khat*, a bad boy; *sanūi-mi nāū-mi kasi khat*, a bad girl; *sanūi-mi ka-woi kahak*, good women. As usual when an adjective qualifies a noun, the case suffixes, etc., are appended to the adjective only.

The only good example of comparison which I can give is *pāi tambūi-yō*, than his sister.

The numerals will be found in the list of words. *Khat*, one, coalesces with a following word, as in *khagoi* already quoted, and in *khalli*, even one.

Pronouns.—The **Personal Pronouns** are—

Hai, *hai-ni*, I.

Nang, *nang-ni*, thou.

Pāi, *pāi-ni*, he.

The plural of each is formed by suffixing *rami*. Thus, *hai-rami*, *hai-rami-ni*, we.

They are all declined regularly. The genitive suffixes are given as *cham* or *hūi*. Thus, *hai cha m*, of me; *hai hūi*, mine; but as a rule the suffix is not used. Thus, *hai*

pā, my father; *nang pā*, thy father; *pāi pā*, his father; *ngai nang ūiyē*, all is yours. The genitive of *nang* is given as *nang goi*, instead of *nang hūi*. *Goi* has been quoted above as a substantival suffix also. Amongst other forms we may note *nangō*, contracted from *nang-yō*, the accusative of *nang*, in *nangō hai-ni ngam-ē*, I defeated thee. In No. 235 of the List of Words, we have *pāi chāthō*, from him. *Pāi* sometimes takes the demonstrative *chi* without changing its meaning. Thus, *pāi-chi nanga-ngē*, he became miserable.

The **Demonstrative** pronouns are *hi*, this, and *chi*, that, as in Tāngkhul. Thus, *hai nāū hi si-yaū-ni*, this my son having died; *lam chi thaū*, in that place; *mi chi-ni pāi-yō thaūntani-ngē*, that man sent him?

The **Relative** pronouns are supplied, as in Āo, by the use of the verbal participles in *bā*.

The **Interrogative** pronouns are *sū*. (compare Angāmi *so-po*, Āo Mongsen, *su-bā*) who? as in *sū kanāū chapā-mi*, whose boy? *sū-chāthō*, from whom? *Kadi* (compare Angāmi *kedi* or *keji*) is 'what'? *Sū* is used in this sense in *nang jan sū-bō*, what is your name?

Verbs.—The following forms of the *verb substantive* occur. The commonest root is *ūi*, as in *ūi-yē* or *ūi-ē*, is, was; *ng-ūi-lē*, will be; *ūi-bā*, in *nang nāū ūi-bā hai matik tāngē*, I am not worthy to be thy son, means literally, 'he who is', ... one who is thy son.

Another root is *bam*, to remain (also in Kabui and Mikir; compare Meithei *pham*, Angāmi *bā*). It occurs in phrases such as the following—*nang hi hai-lōngasūini bamē*, you are with me; *hai-pā rūwā bam-ō-ē*, my father's servants are living; *pāi-rami nūngāini bam-amē*, they remained rejoicing; *laū-ā bam-daiyē*, he was in the field; *lam chi thaū ka-bam-bā mi khat*, a man who resided in that place.

nai-ē or *naiyē* means is, was, were. Its interrogative form, *vide post*, is *nai-bō*.

tā-ngē means 'is not.'

As in Kabui and Ēmpēo, the system of tense suffixes is very loosely applied. The one tense about which there is any certainty is the Future, of which the sign is *lē*, corresponding to the Kabui *ni*. The suffix *ē* (compare Angāmi *wē*) used both for present and past time, as in Kabui, but the past often takes in addition the sound *ng*, making *ngē*, which does not appear to be used for the present. Also as in Kabui, when a root ends in a vowel, a euphonic *ŋ* is optionally inserted before the suffix *ē*, as in *ūi-yē* or *ūi-ē*, is. The following are the principal tense forms which I have noted, and have been able to analyze:—

Present,—*haini wū-ē* (Angāmi *wu-wē*; Semā *bu-ē*), I strike; *hai thaū-ē* (Angāmi *to-wē*), I go.

Present Definite,—*haini wū-mē*, I am striking; *ngāk-amē*, he is grazing.

Past (including *Perfect* and *Pluperfect*),—*rā-ē* (Āo Mongsen *ra-i*), came; *kanāi-ē*, asked; *hēm-ē* (? *hē-mē*), entreated; *kēuē*, answered; *ngam-ē* (? *nga-mē*), defeated.

haini wū-ngē, I struck; *thaū-ngē*, went; *wā-ngē*, said; *yēn-pi-ngē*, divided and gave; *pak-thō-ngē*, departed; and many others.

In *āpā cham gā-nghai*, ancestors said (these) words, the form *gānghai* seems to be a remote past.

Imperfect.—The only example is *haini wū-ni nai-ē*, I was striking.

Future,—*wū-lē*, will strike; *gāng-lē*, will say; note *ng-ūi-lē*, will be.

Imperative.—The suffix is *lā*, as in *pī-lā*, give; *nyāk-lā*, pasture; *yāū-lā*, see; and others. *Pi-ngā*, also means 'give.' In Nos. 77—85 of the list of words there are a number of forms ending in the future suffix *lē*, but it is doubtful if they are really imperatives.

Infinitive.—The only examples are *ūi-lēni* and *wū-lēni*, which are given in the list of words as translations of 'to be,' and 'to beat,' respectively.

PARTICIPLES.—

Present.—The suffix is *ni*, and is very common, both as a true adjective and as an adverbial participle. Thus *wū-ni*, striking; *pāi wōng-thaū-ni pā chāng rā-ē*, he getting up, came to his father. In the parable, *gāng-ō-ni* is translated 'it was said (my father's servants, etc.)'. I am not certain that it is not really a present participle as it is translated in the last line of the first paragraph.

Past.—The form of the past participle is the same as that of the present. Thus *wu-ni*, having struck. Other forms are *kamāo-nani*, having wasted, and (?) *pa tani*, having come.

Noun of Agency.—This, as already shown, is formed by the suffix *bā*, with or without the prefix *ka*. Thus, *ka-bam-bā* (Angāmi *ke-bā-mā*), one who resides; *si-bā* (Angāmi *ke-sā-mā*; Āo *tā-sa-bā*), the deceased. *Tang* is also used, as in *ka-gāi-tang*, a slayer.

Gerund.—This ends in *chū*, and is common. Thus, *si-chū*, on being dead, when he is dead; *pa-chū*, at the time of coming; *wōng-chū*, at the time of coming; *yāū-chū*, on seeing.

Passive Voice.—This is the same as the active. The subject is put into the accusative. Thus, *hai-yō wū-ē*, I am beaten, literally, beats me. Some forms in the specimens which are translated as passives are not clear to me. Such are *pāi-ni lōnga sūini*, he went and was joined; *gāng-ōni*, it was said.

Negative verb.—The negative particle is *mak*, as in Kabui, but there seem to be other forms which I cannot analyze. The examples in the specimens are *tāngē*, is not; *pī-tāng-ē*, did not give; *sūigama khali kamē*, did not disobey; *pī-mak-chū*, you did not give; *fūng-lā-ki*, will not carry; *nga-mak-ē*, did not defeat. *Tāng* is probably borrowed from the Meithei *tā* or *dā*. Compare the Mikir negative suffix *ē*. *Chū* in *pī-mak-chū* is probably an intensive particle like the Angāmi *bi*, as in *tsū-mo-bi*, certainly did not give.

Interrogative verb.—The suffix *bō* is added to the verb in interrogative sentences. Thus, *nāū-chapā-mi kadiyā nai-bō*, how many sons are there? *sū kanūū chapā-mi rā-bō*, whose son comes? and many others.

Compound verbs.—As in cognate languages, these are of frequent occurrence. Thus *yēn-pi-ngē*, dividing he gave, he divided and gave. The materials available are not sufficient to enable us to analyze all, or even nearly all, the compound verbs which occur in the specimens. The following must suffice. The root *tā* means 'to eat,' and *tā-ga-ni-chi* means 'though he wished to eat.' The root *ni* or *nyi* means 'to desire' in several cognate languages. In Kabui and Semā it is used as a suffix for the future. The root *pī* means 'to give,' *tā* means 'to eat,' *tāk* means 'a feast,' and *pī-ntāk-amē* means 'is giving a feast.' In other words the causal verb is, as in cognate languages, formed by compounding the root meaning 'to give,' with the main verb.

are-given.

FREE TRANSLATION OF THE FOREGOING.

A piece of Khoirāo Nāgā folklore.

Our forefathers have told us that when a man dies in fight, he is clad in his war-dress. If he does not die in fight, he is not so clad.

When he who killed him dies, the man who was killed comes to him and tells him to carry his basket. 'I will not carry it,' says the conqueror, 'for I defeated you in our life-time.' They fight about this. 'You did not defeat me,' denies the other. Says

the conqueror, 'If you deny, rub your face and see.' Then the other rubs his face, and finds marks of a *dao* on it. 'It is true,' he says, 'my friend, you defeated me. I will carry the basket,' so he does so.

When a man who has killed an enemy dies, he is given spears and a *dao*, because he will have to fight again in the path of death. They also give him a spade and an axe to cultivate land in the nether-world.

NĀGĀ GROUP.

THE NĀGĀ-KUKI SUB-GROUP.

Just as the Nāgā-Bodo language bridges over the gulf between Angāmi Nāgā and Kachārī, so the Nāgā-Kuki group bridges over that between Angāmi and the Kuki languages of Manipur. It probably contains a number of dialects, concerning some of which we know nothing, concerning others of which we know a little, and concerning the three principal of which, Sopvomā, Tāngkhul, and Maring, we have now fairly complete information. These three languages exhibit a regular gradation in the change of speech. Sopvomā is most nearly connected with the Western Nāgā languages, and Maring with the Kuki ones, while Tāngkhul occupies an intermediate position.

All the languages of this group have their homes in the north of the Manipur State and for the information now presented regarding the three main ones, I have to thank Colonel H. Maxwell, C.S.I., the Political Agent in that State. Two of the specimens have been prepared by Babu Bisharup Singh, of Uribok in Manipur, and the third by the Reverend W. Pettigrew.

The following is a complete list of all the languages which I have brought together under this group :—

Name of Language.	Estimated number of speakers.
Sopvomā or Māo Nāgā	10,000
Marām	2,500
Miyāngkhāng	5,000
Kwoireng or Līyāng	5,500
Luhūpā or Luppā language <i>viz.</i> :—	
Tāngkhul	25,000
Maring	1,500
	<hr/>
TOTAL	49,500, say 50,000

The number of speakers given is a mere estimate, as no census materials are available for Manipur.

SOPVOMĀ or MĀO NĀGĀ.

The Māos inhabit the country south of the Angāmi. Their villages lie in a compact group on the Manipur Nāga Hills frontier, 20 miles south of Kohima, the head-quarters of the Nāga Hills district. Sopvomā is the tribal name used by the people themselves. The Manipurīs consider them as one and the same with the Angāmis. Māo is the Manipurī name of their chief village.

Their language is the one of the Nāgā-Kuki group which most nearly approaches the true Nāgā languages. Of these it possesses the closest resemblance to Kezhāmā, as will be seen from an examination of the lists of standard words of the two forms of speech. Indeed Sopvomā is so closely connected with all the languages of the Western sub-group, that it might with equal propriety be classed as belonging to it as to the Nāgā-Kuki one.

The number of speakers of Sopvomā is estimated at 10,000. Immediately to their east lies the important tribe of Luhūpās. To their south lie the Marām.

The following are the authorities on Sopvomā which I have come across:—

McCulloch, Major W.,—*Account of the Valley of Munnipore and of the Hill Tribes, with a comparative Vocabulary of the Munnipore and other Languages.* Selections from the Records of the Government of India, Foreign Department, No. 27. Calcutta, 1859. Short account of the tribe on p. 69.

DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers.* *Journal of the Royal Asiatic Society*, Vol. xii. 1880, p. 225. On p. 244 an account of the tribe.

In order to show the close connexion which exists between Sopvomā and the Western Nāgā languages, I here give a comparative list of words which has been kindly prepared for me by Mr. Davis.

Sopvomā.	Angāmi.	English.
<i>u-bā</i>	<i>u-bi</i>	hand.
<i>u-pfi</i>	<i>u-phi</i>	foot.
<i>u-me</i>	<i>u-mē</i>	mouth.
<i>u-hū</i>	<i>u-hu</i>	tooth.
<i>u-pi</i>	<i>u-pi</i>	head.
<i>māli</i>	<i>me-lü</i>	tongue.
<i>ma</i>	<i>mā</i>	man.
<i>u-khro</i>	<i>u-krö</i>	moon.
<i>u-mi</i>	<i>u-mi</i>	fire.
<i>u-za</i>	<i>u-dzü</i>	water.
<i>u-to</i>	<i>mi-thu</i> or <i>u-thu</i>	cow.
<i>u-si</i>	<i>te-sku, te-jüh, te-li</i>	dog.
<i>tāo</i>	<i>to</i> or <i>tā</i> .	go.
<i>thi</i>	<i>sā, ti</i> (Semā)	die.
<i>pi</i>	<i>pi, tsü</i>	give.
<i>tū</i>	<i>tā</i>	run.
<i>āja</i>	<i>-dzü, āzu</i> (Semā)	before.
<i>o-ē</i>	<i>u-wē</i>	yes.
<i>mo</i>	<i>mo</i>	no.
<i>iyā</i>	<i>ayā</i>	alas.
<i>ā-pū</i>	<i>ā-pu</i>	father.
<i>kā-yi</i>	<i>ke-vi</i>	good.
<i>kā-si</i>	<i>ke-shi</i>	bad.
<i>u-tu-kru</i>	<i>ke-rekrē</i>	high.
<i>uto fodo</i>	<i>pedū</i>	bull.
<i>ka-kri</i>	<i>ke-kri</i>	white.

There are also many resemblances in the grammatical forms, which will be found noted in the proper places.

The following incomplete account of the Sopvomā language is based on the forms found in the specimens and list of words:—

Prefixes and Suffixes.—The otiose prefix *u* is very common. It corresponds to the prefix *u* of Angāmi, and to the *ā, ē* or *ō*, which we find in Mikir and in many of the Nāgā languages, including Semā and Lhōtā. As elsewhere, it is dropped when the noun to which it is prefixed is preceded by a possessive case. Thus *unnā*, son, but *ni-nā*, your son. It should be noted that, as in this instance, the first consonant of a noun is often doubled after the *u*. Thus *unnā* is equivalent to *u-nā*; *ubbā*, a hand, for *u-bā*. This prefix, as in the other languages, originally meant ‘his,’ and still often does so. Thus *u-chi* means both ‘house’ and ‘his house.’

In the case of nouns of relationship *a* is often used instead of *u*, *a* properly means 'my.' Thus *a-pū*, my father, or, simply, 'father.' We have both *a-pū* and *u-pū* meaning 'father'; *a-pū*, my father; *u-pū*, his father; and (with the prefix dropped) *nī-pū*, your father. A good example of the use of these prefixes and of the way in which they are dropped is in *nī-pū chi-lē*, in your father's house. Here 'house' is *u-chi*. The prefix is dropped because the word is preceded by the genitive *nī-pū*. In *nī-pū*, the prefix *a* or *u* of *a-pū* or *u-pū*, has been dropped for similar reasons.

Just as adjectives in Angāmi Nāgā take the prefix *ke*, so in Māo they take *ka* or *kā*. Thus *kāyi*, good; *kasi*, bad; *kakrā*, white.

Note the use of the word *mai* meaning 'person' which is frequently employed like the Hindūstānī *wālā*. Thus *chi-lē-mai* (? the man in the house), a slave; *utākata-mai*, a cultivator. It is the same as the Angāmi *mā*.

NOUNS.

Gender.—Nouns of relationship, as usual, have special words to indicate gender. Thus,—

a-pū, father.

pū-to-mai, man.

nā-pū-to-mai, son.

a-pē, mother.

nī-to-mai, woman.

unāmoni-to-mai, daughter.

In other cases *fodo* usually means male, and *kru* (Angāmi *krū*), female. Thus *kuri fodo*, a horse; *kuri kru*, a mare. Variations of this are:—

u-si silo, a dog.

u-khro fodo, a male deer.

u-si sikru, a bitch.

u-khro tu-kru, a female deer.

Number.—The usual plural suffix is *inūi*, all, as in *apū-inūi*, fathers. Pronouns take *kru*, and, connected with this appears to be *pū-tomai kāyi krohē*, good men, the plural of *pū-tomai kāyi*. In *unnā-hā-hi*, to his two sons, we have a rudimentary dual.

Case.—As in Lhōtā Nāgā, the *Nominative* takes *nā* (corresponding to the Kezhāmā *nyi*) when it is the subject of a transitive verb. This *nā* is also occasionally used with the verb substantive, and with intransitive verbs, but not as a rule. Thus always *yi-nā dāi*, I strike; but *yi-nā soē*, I am; *yi nolē*, I shall be; *ikru-nā tāwē*, we went; *nīlēkru tāwē*, you went. Other examples are,—

nonau-nā pē-ē, the younger said.

u-pu-nā kojū-piē, his father divided.

nī-thēhū (not *thēhū-nā*) *khēwē*,—*nī-pū-na* (not *nī-pū*) *koto koso piwē*, your brother has returned,—your father has given eating and drinking (*i.e.*, a feast).

This *nā* is, properly speaking, the suffix of the *Instrumental* case, so that sentences in which they are used are really passive constructions.¹ *Nonau-nā pē-ē* is literally 'by the son it was said.' In the pronouns, *no* is sometimes used instead of *nā*.

The *Accusative* takes no suffix, as in *u-nā kojū-piē*, he divided his wealth. Here *nā* means 'wealth' and is not the nominative suffix.

The suffix of the *Instrumental* is *nā*, as in *ubbā-nā poē*, (we) hold (two spears) by means of our hands.

¹ This is the normal construction in Tibetan. A Tibetan does not say 'I beat you,' but 'a beating happens, regarding you, by me.'

The usual suffix of the *Dative* is *hē*, as in *apū-hē pō*, (he) said to his father; *unnā-hē-hē kojū-piē*, he divided to his two sons. Sometimes we find the instrumental suffix *nā* or *no* used for this case. Thus, *mai kali-nā*, to one man (there were two sons); *ma kali-no* (he went) to a man.

Motion towards is usually indicated by *lē-khē*, as in *ido lē-khē*, (sent him) to the field; *u-chi lē-khē* (as he came) to the house. Sometimes the locative suffix *lē* is used, as in *iniū kali-lē*, he went to (*literally*, in) a country.

The suffix of the *Ablative* is *hē-ā*, as in *a-pū-hē-ā*, from the father. Note, however, *po-hino* (take) from him; *ubbalētino*, (draw water) from the well.

The *Genitive* takes no suffix. It is simply prefixed to the noun signifying the thing possessed. Thus *a-pū chilā-mai-nā*, my father's servants. In the pronouns *chu* is sometimes used as a genitive suffix.

The sign of the *Locative* is *lē*, as in *u-chi-lē*, in the house; *ido-lē*, in the field. 'On' is *khē*, as in *ubbā-khē*, on his hand; *upfiwā-khē*, on his feet. *Cha-hē lodē* is translated 'to enter in the house.'

ADJECTIVES.

These usually, but not always, follow the nouns they qualify. They do not change for gender or number. When a case suffix is added to the noun, it comes after the adjective. The Adjective prefix is *ka* (compare Angāmi and Mikir *ke*).

kuri kakrā, the white horse.

pūtomai kāyi kali, a good man, lit., man good one.

nītomai kāyi kali, a good woman,

pūtomai kāyi kali-hē, to a good man.

pūtomai kāyi krahē-hē, to good men.

The following are examples of comparison :—

kāyi, good.

kāhē kono ka-li-yi, better (*kāhē* means 'two').

mainiū kono kaliyi, best.

ūsā pāji kāyi, very excellent coat.

otukru, high.

kāhē kono kali otukru, (two than one high), higher.

mainiū kono kali otukru, (all than one high), highest.

PRONOUNS.

The **Personal** Pronouns are *yi*, I; *ni*, thou; and *hana* or *po* (as in Angāmi) he, she, it.

First Person.—The nominative is *yi* before intransitive verbs. Thus, *yi māē* or *yi-ū māutē*, I sinned. Before Transitive verbs, the form is *yi-nā*. This pronoun has a form *āi*, which is used as an oblique form. Thus, *āi dāi*, beats me, I am beaten. *Āi pikorosa*, to be received by me. *Āhā kūā*, is translated 'with me.' The genitive is *a*, which is used as a prefix. Thus *a-pū*, my father; *a-nā*, my wealth; *annā*, my son. In the last example (as in *unnā* referred to under the head of prefixes) the initial *n* of *nā* is doubled after the prefix.

The plural is *i-kru* (-*nā*). 'We Māo people' is *im-mēmē*. In the list of words are the following:—

ā-chu pēwā, my.

yi, mine.

ikro-chu, of us.

inilē-kru, our.

I have not come across examples of their use.

Second Person,—The nominative is *ni* or *nē* before intransitive verbs, as *ni-ū āhā kūā chithiūchikro-bōē*, thou dwellest ever with me. Before transitive verbs we have *nē-nā*, as *nēnā koto koso pūwē*, thou gavest a feast. Sometimes we find *nē-no* instead of *nē-nā*, as in Nos. 186 and 196 in the list of words. In *ni pimoē*, thou didst not give, the suffix *nā* is not used, though a transitive verb follows.

So we have in an interrogative sentence *nē ti thē-hino hrālī-nā*, from whom did you buy that? The oblique form of this pronoun, which is also used as a genitive prefix, is *ni*. Thus we have—

ni-jū, your name.

ni-pū, your father.

ninnā (with the *n* of *nā* doubled), your son.

ni-nā, your wealth.

ni-thēhū, your brother.

ni-wā, your service.

ni-chū, your word.

ni-hē, (I have sinned) to you.

ni-hēū, (I have sinned) before you.

A genitive absolute is *nilo*, yours, in *a-nā inūi kabbūsa nilo pītē*, whatever is mine is thine. With this are connected most of the following forms taken from the list of words:—

ni-et (nom.), thou.

ni-chu, thy.

ni-yē, thine (? it is thine).

ailē-kru, you, your.

nilē-kru-chu, of you.

The suffix *ū* added to these pronouns gives definiteness, as in *yi-ū mozu thinobūdē*, whereas I die of hunger; *ni-ū āhā kūā chithiūchikro-bōē*, you on the one hand dwell with me (while your brother, etc.).

Third Person,—This is *hana* or *po*. The nominative is *hana*(-*nā*), as in *hana-nā annoē*, he asked. The accusative is *hana*, as in *hana matāa*, sent him. So we have for the genitive *hana thihā*, his sister; *hana kēnā*, his wife; but the most usual word for 'his' is the prefix *u*, as in *u-pū-nā u-nā*, his father (divided) his wealth. So (with doubled *n* as usual) *unnā*, his son. This *u* has in many cases become quite otiose. See the remarks on prefixes. *Hana-chu* is 'of him.'

From the base *po*, we have *po-hino polo*, take from him; *poē fulo*, bind him; *po-hē kākē*, from among those two; *poilē-kru*, they; *poilē-kru*, their; *poilē-kru-chu*, of them.

The following are examples of **Demonstrative** pronouns:—

This,—*kuri-hē*, this horse; *anna hēva-hē*, this my son; *kasha-hē*, this rupec.

Ila-dono, sa-dono, for this reason; *sa-chū* (hearing) this word; *sa-thēcha*, therefore.

That,—*kasha ti*, those rupees; *nē ti thē-hino hrāli-nā*, from whom did you buy that? *iniū lē ti*, in that country (note the position of the demonstrative after the case suffix).

Mai chi-nā, that man (sent him); *sato ka-chi-thē*, at that time; *mai cha-nū chowāsoā būli sē*, that man can live happily.

Interrogatives are,—*nēthiyē*, who? *thē-hino*, from whom (did you buy that)? *adē*, what? *ni-jū thētē*, what is your name? *ada-soē*, what is (this)? *ada-lē*, why? *chivōē*, how many (years) are there? *chia boē*, how many (sons) are there (in your father's house)?

The only instance of a **Reflexive** pronoun is *hana-nā alliā pēē*, he said to himself.

VERBS.

The verb substantive is *so*, be.

The following forms have been noted :—

yi soē, I am.
yi soē, I was.
yi nolē, I shall be.
yi solisē, I may be.

ni-nā so, (fit) to be your son; *ido-lē cho-ē* (alternate spelling for *so-ē*), he was in the field. We have also, *nilo pitē*, is thine, and (a compound with *bū* or *bō*, to remain) *so-bū-lē*, let us remain.

An example of the negative Verb Substantive is *mai-mo-ē*, (I) am not (fit).

As in other cognate languages, the sense of time in the Finite Verb is very loosely felt. Once a tense base is formed, it does not seem to change for number or person. In the list of words the second person singular is shown as regularly ending in *wā*, but this is misleading. An examination of the specimens shows that *wā* is not always used with this person, and can be added to other persons without changing the meaning.

Thus, while we have *nē-nā dā-wā*, thou strikest, we have also *niū āhā kūā chithiū-chikro-bōē*, thou dwellest with me; *hana tālē-wā*, he goes.

In order to show how loosely the temporal suffixes are used, I here give (a) the future of the verb *dā*, strike, and (b) the present of the verb *tā*, go. It will be seen that, as given in the list of words, the conjugations are practically identical.

(a) I shall strike, etc.

(b) I go, etc.

Sing.	Plur.	Sing.	Plur.
<i>dā-lē</i>	<i>dā-lē.</i>	<i>tā-lē</i>	<i>tā-lē.</i>
<i>dā-lēwā</i>	<i>dā-lē.</i>	<i>tā-lēwā</i>	<i>tā-lē.</i>
<i>dā-lē</i>	<i>dā-lē.</i>	<i>tā-lēwā</i>	<i>tā-lē.</i>

The following is the way in which the various tenses are formed :—

Present.—The suffix is *ē* (Angāmi *wē*), sometimes written *i*. Thus, *bōē*, (he) lives; *khoē*, (he) is pasturing; *toē*, (they) eat; *poē*, (we) hold (spears in our hands); *dāi*, (he) strikes; after vowels, a euphonic *w* is sometimes inserted, as *dā-w-ē*, (I) am striking. Sometimes the suffix *dē* of the past is used, as in *bū-dē* (he) remains (serving the God); *khai-dē*, (he) is kept (like a slave). So *thi-no bū-dē*, am about to die, literally, am in a condition to die.

We also find the future form used, as in *tā-lē*, (I) go; *ni-lē* (he) is found.

Imperfect,—The only example is *dā-khē*, (I) was striking.

Past,—The usual suffix is *ē* (Angāmi *wē*),—the same as in the present; thus following cognate languages. Examples are *pē-ē*, or (with euphonic *w*) *pē-w-ē*, (he) said; *pi-ē*, *pi-w-ē*, (he) gave (compare *koj-ū-piē*, (he) divided); *mohoē*, (he) wasted; *mami-y-ē* (euphonic *y*), (he) became wretched; *koazil-ē*, (he) went and joined; *wēl-ē*, (he) came; *mā-ē*, (I) have sinned; *chol-ē*, (he) heard; *annoē*, he asked; *khē-w-ē*, (he) has returned; *lobbo-ē*, he refused; *za-w-ē*, (he) entreated; *tā-w-ē*, (we) went; *hral-ē*, (I) bought. The forms of the past of *tā*, go, are very instructive:—we have, *tā-w-ē*, (we, they) went; *tāwē-wā*, (you) went; *tī-tāwē* (I) went; *tā-lēwā*, (and *tā-dē*), (he) went; *tī-tālēwā*, thou wentest. The verb *dā*, strike, inserts *bb*. Thus *dā-bb-ē*, (I) struck; *dā-bb-ēwe*, (thou) struckest; but *dāi*, (he, we, you, they) struck.

The syllable *dē* (Angāmi *te*) is also used to form the past, as in *tā-dē*, (he) went (to a far country); *dā-u-dē* (with inserted *u*) (I) have struck (his son). With the last compare *mā-u-tē* or *mā-ē* (I) have sinned.

Other forms of the Past are *mono*, (two sons) were born; *matā-a*, he caused to go, sent; *maki*, he kissed.

Perfect,—The only true perfect which I have met is formed by compounding the verb with the auxiliary, as in *tā-so-e*, (I) have walked (a long way to-day).

Pluperfect,—This is the same as the Past.

Future,—The suffix is *lē*, as in *dā-lē*, (I) shall strike; *no-lē*, (I) shall be; *pē-lē*, (I) shall say; *so-bū-lē*, let (us) remain.

Present Subjunctive,—*Yi so-li-sē*, is translated 'I may be,' and *yī-nā dā-sē*, I may strike.

Imperative,—The following forms occur,—*pi-yo*, *pi-yū*, give; *tho-piyū*, place; *pol-o*, take; *ful-o*, bind; *sithēpal-ō*, draw water; *dāo*, strike; *tāo*, go; *kot-o*, eat; *hebb-ū*, sit; *hēk-o*, come; *ālāch-o*, stand; *mos-o*, take (me for a servant). Other forms are *thiyē*, die; *tū*, run; *ponobā*, cause to wear.

Verbal Nouns, etc.,—Suffix *ā*,—*ho-ā*, (rice) being dear (he became wretched); *bū-ā* (a man) who lived (in that country); *ichū tā-ā*, arising (up going) (he went to his father); *pū-w-ā*, bringing (the best garment clothe him); *to-ā so-lā*, eating drinking (let us remain) (compare *koto koso* below); *thi-ā* having died (is alive again); *kulē-ā*, calling (a servant); *sa-chol-ā*, hearing (this); *pi-ā*, giving (to harlots has wasted).

Suffix *li-ā*,—*ni-li-ā*, having found (him, they rejoiced); (*thē-li-ā*) (?*thi-li-ā*), when-dead (we hold two spears).

Suffix *li-ē*,—*dā-li-ē*, striking, having struck; *ka-li-ē*, after (some days) remaining.

Suffix *o*,—*pō-tā-di-y-o*, having gone (he wasted his substance); *ichapē-li-y-o*, becoming sensible (he said to himself); *chol-o*, embracing (he kissed him).

Suffix *lē*,—*poi-lē*, carrying (his wealth to a far country).

Suffix *thē*,—*woi-thē*, at the time of coming; *ho-ka-ti-thē*, when (all) had been wasted; *tā-kochi-thē*, gone.

Other forms,—*tū-ko*, running (he kissed him); *kho-to*, (he sent him) to pasture (swine); *tū-no*, going; *thi-no bū-dē*, I am about to die; *ko-to*, food, rice; *ko-to ko-so* (compare *to-ā so-lā* above) *pi-ic-ē*, gave food and drink.

Passive Voice,—This does not occur. The force of the passive is thus expressed,—*āi dāi*, beats me, *i.e.*, I am beaten.

Causal Verbs,—The following are probably causals:—*mo-ho-ē*, he caused to waste, he wasted; *ma-lā-a*, he caused (him) to go, he sent (him to the field); *mo-so*, cause to be, make.

Interrogative Sentences,—The interrogative particle is *nā*, corresponding to the Kachchā Nāgā *mē*, and the Angāmi *gā*, *ro*, or *mā*. Thus, *hral-i-nā* (from whom) did you buy (that)?

Negative Sentences,—The negative particle is *mo*, as in Angāmi. Examples are *pi-mo-ē*, (anyone), gave not; *ni* (not *nē-nā*) *pi-mo-ē*, thou gavest not, *pēthōki-mo* (I) did not disobey; *fa-pi-mo*, he is not released. Note that the negative *follows* the word qualified.

adasono mathiwē,' annoē. 'Maina kososi miya to mima to.
why are-killed,' asked. 'Men chillies old eat unripe-also eat.
Mai thēfrā yā ochū mai nolo mai hai fūē,' sata
Man following I-also old man young man also catch,' saying
Orāmē hananā pē-ē.
God that said.

FREE TRANSLATION OF THE FOREGOING.

When any one of us Māo people dies, two spears are put into his hand. These are for piercing the God Pēkujikhē. If the dead man can pierce him, he is allowed to live happily in the God's country. If he cannot pierce him, he has to become a servant to Pēkujikhē. He is kept like a slave, and is never released.

This God's head is very big, and he has a beard. His wife once asked him why he killed young people as well as old. He replied, 'men cut chillies both unripe and ripe, and after their example I catch both young men and old men.'

MARĀM.

To the south of the Māos lie the Marāms, inhabiting one large village, with a population of perhaps 2,500. The two tribes claim to have a common origin, but are perpetually at feud with each other. They are nevertheless closely allied by intermarriage.

I have not obtained any specimen of their language, but have inserted as many words as I could in the list of standard words and sentences. The source of these words is partly McCulloch's and partly Brown's vocabulary.

The following are the authorities which I have noted as dealing with Marām :—

BROWN, THE REV. N.,—*Comparison of Indo-Chinese Languages*. *Journal of the Asiatic Society of Bengal*. Vol. vi, 1837, pp. 1023 and ff. On 1034 and ff. a 'Marām' Vocabulary.

McCULLOCH, MAJOR W.,—As quoted under Sopvoma. On p. 69 an account of the tribe. In App. I pp. vi and ff. a 'Muram' Vocabulary.

DAMANT, G. H.,—As quoted under ditto: on p. 224 an account of the tribe. On p. 256 a brief vocabulary taken from McCulloch.

No materials are available for making even an imperfect sketch of the grammar of this language.

MIYĀNGKHĀNG.

I only mention this tribe here, because Damant classes them with Māo and Marām. Nothing is known about their language. They live in the State of Manipur south of the Marāms, and are said to occupy nine small villages and to have a language of their own. Damant estimates their number at 5,000 or rather more. They are mentioned on p. 70 of McCulloch's Munnipore already quoted under Māo, and by Damant on p. 244 of his article quoted in the same place.

KWOIRENG OR LĪYĀNG.

The Kwoireng or Līyāng inhabit the country north of Manipur lying between the Kachchā and the Kabui Nāgā, as far as the Angāmis, from whom they have suffered much. They are a considerable tribe, possessed of much energy, which develops itself in trade with the Angāmis and our frontier districts. Damant estimates their number at five or six thousand.

Their language appears to be an intermediate one between the Nāgā-Bodo and the Nāgā-Kuki Group. The pronouns agree best with the latter, and so I class it here, though its geographical position would incline one to put it with the former set of languages. Very little is known about their language. The only trustworthy source of information is a vocabulary by McCulloch, from which I have inserted as many vocabularies as possible in the list of standard words and sentences. The language is to be distinguished from Koireng, which belongs to the Kuki Group, and of which specimens will be found later on. It is an altogether different language.

AUTHORITIES—

BROWN, REV. N.,—*Comparison of Indo-Chinese Languages*. *Journal of the Asiatic Society of Bengal*. Vol. vi, 1837, pp. 1023 and ff. On p. 1034 a short 'Koreng' vocabulary, which comparison shows to be Kwoireng.

McCULLOCH, MAJOR W.,—*Account of the Valley of Munnipore*, etc. as quoted under Sopvoma. On p. 54 an account of the tribe. Appendix I, pp. 7 and ff. a Quoireng or Leeyang Vocabulary.

DAMANT, G. H.,—*Notes on the Locality*, etc., as quoted under Sopvoma. A reference to the tribe on p. 244. Short Vocabulary on p. 27.

LUHŪPĀ OR LUPPĀ.

Several Manipur tribes are included under this head. The only one of them with whose language we are acquainted is the Tāngkhul Nāgā. The number of dialects spoken by these tribes is very great, almost every village being said to have a distinct one. Three,—Tāngkhul, Phadāng, and Khangoi have been recorded.

A general account of the Luhūpā will be found on p. 66 of McCulloch's *Munnipore*, and on p. 246 of Damant's *Note*, both of which are quoted in full under the authorities on Sopvomā.

The tribe is a large and important one.

TĀNGKHUL.

This is the best known of the Luhūpā tribes. They were described by Brown in 1837 and subsequently by McCulloch and Damant. They inhabit the hills to the north-east of the Manipur valley, and have their head-quarters at Ukhrul about 40 miles in that direction from the Manipur town, and the same distance to the south-east of the Māo tract. They are estimated to number 25,000. Brown has given three short vocabularies of what he calls 'North Tāngkhul,' 'Central Tāngkhul,' and 'South Tāngkhul.' None of them agrees with the specimens here given, which is unfortunate, as there is no other vocabulary of the language in existence. Brown's vocabularies are so short, and the words common to them and the list of words here given are so few, that it is not worth while publishing them.

AUTHORITIES—

BROWN, THE REV. N.,—*Comparison of Indo-Chinese Languages*. *Journal of the Asiatic Society of Bengal*, Vol. vi, 1837, pp. 1023 and ff. Three Tāngkhul vocabularies on p. 1035.

MCCULLOCH, MAJOR W.,—*Account of the Valley of Munnipore*, etc., as quoted under Sopvomā. On p. 66 an account of the Tangkool Tribe. (1859.)

DAMANT, G. H.,—*Note* etc., as quoted under Sopvomā. On p. 246 a brief account of the Tankhuls. (1880.)

The following incomplete account of Tāngkhul Grammar is based on the specimens annexed, which I owe to the kindness of the Rev. W. Pettigrew, and on further notes which the same gentleman has been good enough to supply :—

Prefixes.—The otiose prefix *ka* (also pronounced *kha*) is used before adjectives, as in Sopvomā and other cognate languages. It is also used to form verbal nouns, like the Mikir *ke*. The prefix *ā* or *ū* does not seem to be so common as in Sopvomā. *Ā* frequently does occur, but generally in the meaning of 'his,' or as a prefix to the verb when the pronoun in the objective case comes before it, as in *ā-pharurwa*, threw at him.

Articles.—The indefinite article is *āka* which follows the noun it qualifies as in *mī āka-na*, a certain man (had two sons). Strictly speaking there is no definite article. Its place is supplied by the demonstrative pronoun *chi*, that, as in *āgato chi-na*, the younger brother (said).

Nouns.—*Gender.*—The usual rule is followed for human relations. Thus,—

<i>ā-vā</i> , father (<i>or</i> his father).	<i>ā-va</i> , mother (<i>or</i> his mother).
<i>ā-gato</i> , brother (<i>or</i> his brother).	<i>ā-gatuiva</i> , sister (<i>or</i> his sister).
<i>mayārno</i> , man.	<i>shano</i> , woman.
<i>noshino</i> , child.	
<i>noshino mayārno</i> , son.	<i>noshino ngalāra</i> , daughter.

Male and female animals are indicated as follows :—

<i>sigui</i> , horse.	<i>sigui ālā</i> , mare.
<i>simuk āvā</i> , bull.	<i>simuk ālā</i> , cow. •
<i>fā</i> , dog.	<i>fā ālā</i> , a bitch. ¹
<i>me-vā</i> , he-goat.	<i>me ālā</i> , nanny-goat.
<i>sāngāi āvā</i> , male deer.	<i>sāngāi ālā</i> , female deer.
<i>har-vā</i> , cock.	<i>har-va</i> , hen.

Number—is only indicated when the context renders it necessary. I find in that case *bing* used with human beings. Thus, *āvā-bing*, fathers. *Tārāka*, many, and *sāikora*, all, are used to indicate plurality of the lower animals and of inanimate things. Thus, *sigui ālā tārāka*, mares ; *silui sāikora homlu*, look after (all) the buffaloes.

Case.—As usual, the *Nominative* can optionally take the suffix *na*. It always does so before transitive verbs. Thus, *mi āka-na*, a certain man (had two sons) ; *āno mayāra khorara chi-na lui-li laisāi*, the elder son was in the field.

The *Accusative* usually has no termination, but sometimes takes the Dative termination *li*, as in *ā-wui no-mayāra-li* (I have beaten) his son.

The *Instrumental* has the usual suffix *na*, as in *kithāi-na thi-kijur-a* (I) am nearly dying by hunger.

The *Dative* takes *li*, as in *āvā-li* (said) to his father ; *lui-li*, (sent him) to the field.

The *Ablative* appends *aina* to the genitive, as in *rakhong-wui-aina*, (draw water) from the well.

The *Genitive* takes *wui*, as in—

nashā-vā-wui	shim-li,
<i>your-father-of</i>	<i>house-in, i.e., in your-father's house.</i>

The *Locative*, like the *Dative*, has *li*, as in *shim-li*, in the house.

Adjectives.—These usually follow the noun they qualify, and do not change for gender. The adjectival prefix is *ka* or *kha*. Examples,—

<i>mi ka-phā āka-na</i> , a good man.
<i>mi ka-phā-bing-wui</i> , of good men.
<i>shano ka-phā-bing</i> , good women.
<i>noshino mayārno ma-kaphā āka-na</i> , a bad (not good) son.
<i>sigui ka-chara chi-wui</i> , of the white horse.
<i>shim ka-teo chi-li</i> , in that small house.
<i>kha-nang</i> , wretched.

¹The pronunciation of the letter *a* is explained in the note preceding the first specimen.

When an adjective is inflected for comparison, or is treated as a verb, verbal noun, or adjective, the prefix *ka* is dropped. The following are examples of *Comparison* :—

ka-phā, good.

phā-ka-mai, better.

phā-mai-kapa, best.

sāikora-wui phā-ka-matāiya, the best (garment) of all.

ka-chui, high.

chui-ka-mai, higher.

chui-mai-kapa, highest.

āgato-na āgatuiva-li āsān sāngmai, his brother is taller than his sister.

When making a simple statement, the adjective may precede the noun, as in *ā-na kathema mi-na*, he wise man-is, he is a wise man. When used as a predicate the adjective may be conjugated as if it were a verb, as in *mi hi kathema-na*, man this wise-is, this man is wise.

Pronouns.—The *Personal* Pronouns are,—

i, I

i-thum, we.

na, thou

na, na-thum, ye.

ā, he

ā-thum, them.

With *thum*, the sign of the plural, compare the Āo Nāgā *tam* and the Mikir *tum*. These are all declined regularly. Thus Nom. *i* or *i-na*; and Acc. *i-li*, and-so on.

The only irregularity is that, besides the regular genitives *i-wui*, *na-wui*, *ā-wui*, etc., the termination *wui* may be dropped, as in *na-ming*, your name; *ā-vā*, his father. So also for other cases as in *ā-pharuwā*, struck at him, where *ā* is for *ā-li*. The first and second persons sometimes insert *shā* or *shi*, as in *i-shā-vā-uui*, my father's servants; *na-shā-vā-wui*, your father's (house). We even have *ishi-wui*, my, in *ishi-wui āwo-wui* (the son) of my uncle. The insertion of *shā* or *shi* in this connexion refers to direct relationship, and is used, Mr. Pettigrew supposes, to distinguish between real relations, and those who are not, but who are called by the same name without the use of *shā* or *shi*. Another form to note is *ā-vāva*, his father, beside *ā-vā*.

The *Demonstrative* pronouns are *hi*, this, as in *signi hi*, this horse; and *chi*, that, as in *lupā chi*, those rupees. The same forms are in Khairāo.

The *Interrogative* pronouns are *kapākala* or *khipākala*, who? *khi*, what? *khi-sūta* or *khi-sākala*, why?

As usual, participles supply the place of the *Relative*,—as in *morai kaphunga mi chi-na thi-ra*, sin committer man he will die, the man who hath committed sin will die.

Verbs.—When a verbal root ends in a vowel, it often inserts a euphonic *w* or *y* before the termination. Thus, *sho-w-a*, strikes or struck; *tho-ngāi-y-a*, craved.

For the *Verb Substantive*, the root is *lai*, be or possess; but, for the present, it is usual to simply add the suffix *na* to the object or subject. Thus *sāikora na-wui-na*, all is yours; *i-na*, I am. The past is *lai-sāi*, which is translated both 'possessed' and 'was.' Thus *mi āka-na laisāi*, a certain man possessed (two sons) (*i.e.*, to a certain man there were two sons): *ā-no-mayāra kharara chi-na lui-li lai-sāi*, the elder son was in the field. The root *sā*, which properly means 'do,' is also used as a verb substantive.

It is impossible to give a complete conspectus of the conjugation of the *Finite Verb*. There are in the specimens a number of forms the exact meaning of which I am not certain about. It will be sufficient to note the following, bearing in mind the loose way in which tense suffixes are used in all these languages. As usual there is no distinction between Present and Past time, the sense being left to be discovered from the context. The only real distinction is between future and non-future time.

Present,—Suffix *a*, as in *sho-w-a*, beats; *thi-kijur-a*, am nearly dying; *pam-a*, dwells; *chat-a*, goes. When the root ends in the vowel *ā* or *ḡ*, *i* is substituted for *a* as in *sā-i*, did.

The present participle is sometimes used for this tense, as in *hāng-da*, (they) say (what they have heard from their forefathers).

Present Definite,—The suffix *li* is added to the root, or the suffix *lai-li* (the present definite tense of the verb substantive) is added to the present participle. Thus, *sho-li* or *sho-da lai-li*, is striking; *khāng-mi-zā-da lai-li*, is giving to eat; *chat-li* or *chat-ta lai-li*, is going; *sā-li* or *sā-da lai-li*, is doing.

Imperfect,—The suffix *sāi* is added to the root or *lai-sāi* (the imperfect tense of the verb substantive) is added to the present participle. Thus *sho-sāi* or *sho-da lai-sāi*, was striking; *chat-sāi* or *chat-ta lai-sāi*, was going; *sā-sāi* or *sā-da lai-sāi*, was doing. *Sāi* itself is the present or past of the root *sā*, do.

Past,—As in the present, the suffix is *a* after consonants, and *i* after the vowels *ā* or *ḡ*. Thus *sho-w-a*, struck; *chat-ḡ*, went; *hāng-a*, said; *tho-ngāi-y-a*, craved; *mashī-tu-w-a*, joined; *chat-tu-w-a*, went; *phaning-ung-a*, remembered. For roots in *ā* or *ḡ*, we have *sāi*, did; *ngahān-kā-i*, replied; *lumashen-vā-i*, had compassion; *mayā-i*, kissed.

Perfect,—The suffixes are *hāi*, *hāira*, *hōwa*, or *hora*. Thus, *chat-hāi*, *chat-hāira*, *chat-hōwa*, or *chat-hora*, has gone; *sā-hāi*, *sā-hāira*, *sā-hōwa*, *sā-hora*, has done. Similarly, *chī-ho-hāi*, sent (him to the field); *kānsar-hōwa*, spent; *saklāk-hōwa*, became dear; *khanang-hōwa*, became wretched; *ngaphit-hōwa*, have beaten. It will be observed that in many cases these forms have the power of the simple past.

Pluperfect,—The suffix is *hāira-sāi*. Thus, *sho-hāira-sāi*, had struck; *chat-hāira-sāi*, had gone; *sā-hāira-sāi*, had done.

Future,—As in Mikir, this tense takes two suffixes. It takes *ra* to form a distant future, and *ga* to form an immediate future. After a hard consonant, *ga* becomes *ka*. Thus, *sho-ra* or *sho-ga*, will strike; *sā-ra* or *sā-ga*, will do or will be; *chat-ra* or *chat-ka*, will go; *ung-hāng-ga* returning (I) shall say; *sho-that-ka*, (I) shall kill.

Continuative Future,—This is formed by suffixing the future of the verb *sā* to root, as in *chat sā-ra*, shall be going; *sā sā-ra*, shall be doing.

Future Perfect,—This is formed by suffixing *sā-ra* to the perfect, as in *chat-hāira sā-ra*, shall have gone; *sā-hāira sā-ra*, shall have done.

Present Subjunctive,—The forms given are *sā-pāi*, may be or do; *sho-pāi*, may strike.

Imperative,—The suffix is *lu*, as in *sho-lu*, strike; *chat-lu*, go; *mi-ho-lu*, give (this rupee); *sā-ngasak-mi-lu*, cause me to be (thy servant); *kui-tu-lu*, take (those

rupees); *sok-kui-lu*, draw (water). The syllable *ka* or *kha* prefixed makes a polite imperative. Thus, *ka-mi-lu*, please to give; *kha-la-phā-lu*, please to bind. In *ithum ngarum-zā-sa*, we have a kind of permissive compound, equivalent to a first person plural imperative 'let us eat.' Similarly in *ma-rālākaranu*, we have a negative permissive compound, 'let him not come here,' the root *rā* meaning to come, and a permissive form in *unguranu*, let him return. In forms like *ung-u-lu*, return, a euphonic *u* seems to have been inserted before the termination.

Verbal Noun or Infinitive,—Formed by the prefix *ka* or *kha*, as in *ka-sho*, to strike; *ka-chat*, to go; *ka-sā*, to do or to be; *ka-shak ka-zā*, food; *ka-maya*, kissing; *kha-rā*, to come.

Present Participle,—The suffix is *da* or, after a hard consonant, *ta*. Thus, *sho-da*, striking; *zā-ngāi-da*, wishing to eat; *angkar-thui-da*, rising; *thai-da*, seeing; *chat-ta*, going, and many others.

Past Participle,—The suffix is *hāi-ra-da*, as in *sā-hāirada*, having been or done; *sho-hāirada*, having struck.

Adverbial Participle,—The following are examples:—*Kān-kahāi aina*, on being spent; *khanang-kahāi aina*, on becoming wretched.

Other Participial forms are *chat-laga*, going; *chat-mamān-laga*, continuing to go; *ung-mamān-laga*, as he was returning.

Causal Verbs are formed by suffixing *ngasak*, as in *sā-ngasak-a*, caused to do. The verb *mi*, give, is also used in this connexion, as in *sā-ngasak-mi-lu*, cause to be.

As in other cognate languages, there is no *Passive*. 'I am struck' is rendered 'struck me,' *i-li sho-sāi*.

Negative Verb,—The Negative particle is *ma* as in *ma-ka-phā*, not good, bad. Other examples are *kikha-na ma-mi-zā-ma-na*, anyone did not give to eat; *ma-mi*, not giving; *ma-kā-ma-na*, (I) have not risen; *ma-lai-la-da*, not finding (illness); *ma-kā-ngāi*, did not wish to go; *ma-thi-mana*, (I) am not dead; and others. Note that the negative *precedes* the word qualified.

The only example of a negative imperative is *ma-rālākaranu*, let him not come here, mentioned above.

Interrogative,—The Interrogative particle *kala* is placed at the end of the sentence, as in *chi ka-li lola-kala*, from whom did you buy that?

Compound Verbs,—There are numerous compound verbs, most of which I am unable to analyze. The following are *Desideratives*, *zā-ngāi-da*, wishing to eat; *tho-ngāi-y-a*, craved; *ma-kā-ngāi*, did not wish to go. Other examples, *sho-that-la-da*, (he) kills (from *sho*, strike); *thi-kijur-a*, (I) am nearly dying (*thi*, die); *ung-hāng-ga*, returning (*ung*) will say (*hāng-ga*). Compare *ma-thi-mana*, I am not dead, and *ma-thi-lāk-mana*, I have not died.

let-him-not-come-here,” said. I have-not-died, me the-wind blew-away.’

FREE TRANSLATION OF THE FOREGOING.

A piece of Folklore taken from the lips of a Tāngkhul Nāgā, dealing with their belief in the immortality of the soul.

Medicine men tell us by tradition from their forefathers that we men do not die, and that, when our bodies are buried in the earth, our spirits remain with the

Death-king. My friends, a madman once heard this and said, 'He kills us, so when I am dead I will kill the Death-king.' A year afterwards he died, and he ascended to the Death-king. The madman threw a spear at the Death-king, but it did not touch him. Then said the Death-king, 'This is a bad man. Send him back, and never let him come here. Why did he die?' Then the Death-king blew him back to earth in a puff of wind. Men were standing round his grave. He said to them, 'what are you doing?' 'You are dead,' said they, 'and we are making your grave.' 'I am not dead. I am alive. I went to the Death-king, and threw a spear at him, but it did not touch him. "Return," said he. "This is a bad man. Do not let him come here." I have not died. The wind blew me back here.'

PHADĀNG.

This dialect of Tāngkhul closely agrees with that spoken at Ukhrul, from which the village of Phadāng is only a few hours to the west. We have a vocabulary by McCulloch. Damant estimates the number of speakers at about 500. I have inserted in the list of standard words and sentences all the vocables which I could find therein.

The authorities on Phadāng are McCulloch and Damant, as quoted under Sopvomā. McCulloch (1859) gives a "Phudang" vocabulary on pp. vi and ff. of App. I. Damant gives a short account of the tribe on p. 246, and a short vocabulary taken from McCulloch on p. 256 of his *Note*.

KHANGOI.

This is the third village of the Tāngkhul Nāgās regarding whose language we have any information. It is a few hours' journey to the east of Ukhrul. Damant estimates the number of speakers at 300. McCulloch has given us a vocabulary of it, which partly agrees with Brown's Northern Tāngkhul.

So far as can be judged from this vocabulary, this language has much more of a Kuki complexion than the Tāngkhul of Ukhrul. It and Maring occupy the Kuki end of the chain connecting the Kuki with the Nāgā Languages. I have inserted in the list of standard words and sentences all the vocables which I could collect from McCulloch's vocabulary.

The following are the authorities dealing with Khangoi:—

BROWN, REV. N.—*Comparison of Indo-Chinese languages*, as quoted under Tāngkhul. Northern Tāngkhul Vocabulary on p. 1035. (1837).

MCCULLOCH, MAJOR W.—*Account of the Valley of Manipore*, as quoted under Sopvomā. App. I. pp. v. and ff., a Khoongooe Vocabulary. (1859).

DAMANT, G. H.—*Note*, etc., as quoted under Sopvomā. On p. 246 a brief account of the tribe. (1880.)

As already stated, Phadāng and Khangoi are only two of many dialects of Tāngkhul. Almost every village of the tribe has its own form of speech.

MARING.

Regarding this tribe Mr. Damant says:—

This tribe, which is generally called Nāgā, inhabit a few small villages on the Hlrok range of hills which separates Manipur from Burma. They have 300 houses and a population of about 1,500. They are divided into two branches known as Khoibū¹ and Maring. They are said to have been formerly much more numerous than at present.

There is also a Maring colony at Lai Ching, in the Manipur valley, about 25 miles south of Manipur town.

¹ The original has *Saiba*, which is a misprint.

Brown gives vocabularies of both Khoibū and Maring, from which it is evident that they are closely related dialects.

Maring is the one of the Nāgā-Kuki languages, which most nearly approaches the languages of the Kuki-Chin group. The pronoun of the first person is the same as in Kuki.

The following are the authorities on the language of this tribe:—

BROWN, THE REV. N.,—*Comparison of Indo-Chinese Languages. Journal of the Asiatic Society of Bengal.* Vol. vi, 1837, pp. 1023 and ff. On p. 1035 a Khoibū and a Maring Vocabulary.

McCULLOCH, MAJOR W.,—*Account of the Valley of Munnipore and of the Hill Tribes, with a Comparative Vocabulary of the Munnipore and other Languages.* Selections from the Records of the Government of India (Foreign Department). No. 27. Calcutta, 1859. Account of the Tribe on p. 65. 'Murring' vocabulary on pp. vii and ff. of Appendix I.

DAMANT, G. H.,—*Notes on the Locality and Population of the Tribes dwelling between the Brahmaputra and Ningthi Rivers. Journal of the Royal Asiatic Society, Vol. xii, 1880, pp. 228 and ff.* On p. 242 an account of the tribe. On p. 255 a vocabulary taken from McCulloch. Damant classes Maring as a Kuki language.

The following sketch of Maring grammar is based on the specimens and list of words and sentences:—

Pronunciation,—The letters *r* and *l* are freely interchanged, the former being used after a vowel, as in Kabui. Thus *lal*, wealth, but *nai-ral*, your wealth. The vowels *o* and *āu* are interchangeable. Thus *ro* or *raū*, the suffix of the Locative case.

Prefixes and Suffixes,—As elsewhere the otiose prefix *ā*, properly meaning 'his,' but often with no meaning, is common. Thus *ā-chā*, a son; or *kai-chā*, my son, *nai-chā*, thy son, *ā-chā*, his son. Indeed *kai* and *nai* also appear to frequently lose their meanings, as *nai-pā*, your father or a father; *kai-nāū*, my brother or a brother.

The suffix *bā*, meaning 'he who is,' which also occurs in Meithei, Chutiya, Kwoireng and Khoirāo, and which corresponds in force to the Angami *u* and the Ṃo *er* is very common, especially at the end of adjectives. It is freely dropped. It is sometimes pronounced *wā*. Thus we have *ādong-bā*, (the son) who was the younger; *napāwa thangāi-bā*, the man who is good; but *nai-machal thangāi*, your conduct (was) good; *nai-pā*, *pā-bā* or *pā-wā*, all meaning 'father.' It occurs in Tibetan under the form *pa*.

There is a suffix *ri* added to the nominative and accusative of nouns and pronouns, which does not appear to affect the sense. Perhaps it gives a definitive force. Thus *kai-pā-ri*, my father (lives); *ānāi-ri* (my father's) servants (are eating); *lūpā kai-ri*, (give) this rupee. *Hai-ri*, this (my son has become alive); *sapūk ā-ri*, (how old is) this horse? In No. 96 of the List of the Standard Words *ri* is given as meaning 'but'.

In one instance *di* seems to be used in much the same way, viz. *nang-di*, you, on the one hand, (are always with me, while your brother, etc.)

Nouns.—*Gender*,—There is the usual rule about human beings. Thus,—

<i>nai-pā</i> , father.	<i>nai-pūi</i> , mother.
<i>kai-nāū</i> , brother.	<i>kai-chā</i> , sister.
<i>na-pāwā</i> or <i>thami</i> , man.	<i>na-pūiyā</i> , woman.
<i>kai-chā</i> , child.	
<i>kai-chā na-pāwā</i> , son.	<i>kai-chā na-pūiyā</i> , daughter.

For other animals the suffixes are (*ā*-)*pā*, male, and (*ā*-)*pūi*, female, as in Khoirāo.

Thus,—

<i>sapūk ā-pā</i> , horse.	<i>sapūk ā-pūi</i> , mare.
<i>ūi pā</i> , dog.	<i>ūi pūi</i> , bitch.

Number.—The Plural, as usual, is only indicated when this is rendered necessary by the context. The suffix for the plural of human beings is *ānām* (meaning 'all') and of other animals (*ka-*)*chūng*. Thus,—

<i>nai-pā</i> , father.	<i>nai-pā ānām</i> , fathers.
<i>sapūk</i> , horse.	<i>sapūk ka-chūng</i> , horses.
<i>āi</i> , dog.	<i>āi chūng</i> , dogs.

The pronouns form their plurals differently.

Case.—The *Nominative* takes the suffix *na* or *ni* before transitive verbs. Thus *kai-na ūm-lē*, I strike; *nang-ni chāk khāng-lā*, thou gavest a feast; *a-chā-ni sūn-lā*, his son said; but *kai chā-wā*, I go; *ā nang-orā*, he was distressed. *Ni* is, however, sometimes used before intransitive verbs also, as in *ā-ni tong-bai lai-lē*, he is sitting (on a horse).

The termination of the *Accusative* is *yā*, as in *chā-yā ūm-lā*, (I) have beaten the son.

I have not come across any occurrence of the *Instrumental* case.

The suffix of the *Dative* is *nūng*, as in *pābā-nūng*, (he said) to the father. Motion towards is indicated by *rā*, as in *lāu-rā*, (he sent him) to the field. There is also *tānā laipāk khat dā chā-orā*, went to a far country.

The suffix of the *Ablative* is *ro-wē* or *nūngai*. Thus, *naipā khat-ro-wē*, from a father; *napū-wā thangāi-bā khat-nūngai*, from a good man; *ā-nūngai*, from him.

The *Genitive* takes the suffix *dai*, as in *thami khat-dai*, of a man (there were two sons). This *dai* sometimes combines with the noun to which it is attached, with elision of the *d*. Thus *nai-pā anām-ai*, of fathers; *nai-pā-i* (in the house) of your father. More usually, however, the genitive has no termination, but is simply prefixed to the noun indicating the thing possessed. Thus *kai-pā ānāi-ri*, my father's servants.

The suffix of the *Locative* is *ro*, sometimes pronounced *raū* or *laū*. Thus, *chim-laū*, in the house; *hai-raū*, thereupon; *hai-ro*, in that (country); *tāng-nā-ro*, on becoming dear; *ngak-sam-ro*, on (his) neck. Another suffix is *lā* or *rā*, as in *chim-lā* (would not go) into the house; *laū-rā*, (was) in the field; also, (sent) him to the field. In No. 226 of the list of words and sentences, *chim-airā*, is 'in the house.'

Adjectives.—These usually, but not always, follow the noun they qualify. We have *tānā laipāk*, a far country, in which *tānā* is the adjective. They do not change for gender, number or case, but freely drop the suffix *lā* mentioned under prefixes and suffixes.

Examples of *Comparison* are,—

<i>thangāi-bā</i> , good.	
<i>ānē thangāi</i> , better.	
<i>nāmē-raū ānē thangāi</i> , better than all, best.	
<i>kachaū-wā</i> , high.	
<i>ānē kachaū-wā</i> , higher.	
<i>nāmē-raū ānē kachaū-wā</i> , highest.	
<i>ā-char yā-ri ā-naū-ni ānē kachaū</i> , his brother is taller than his sister.	

Pronouns.—The following are the *Personal Pronouns*.—

<i>kai</i> , I.	<i>kai-yē</i> , we.
<i>nang</i> , thou.	<i>nā-ri-yō</i> , you.
<i>ā</i> , he.	<i>ā-ri-yō</i> , they.

These as a rule are declined regularly, but there are some abnormal forms.

A genitive is formed by suffixing *klaū*, as in,—

kai-yē klaū, of me, of us.

nai klaū, of thee.

nā klaū, of you.

ā klaū, of him, of them.

More usually, however, the simple pronoun is prefixed, as in *kai-pā*, my father; *nai-min*, your name; *ā-chā*, his son.

A genitive is also formed by suffixing *yē*, as in *kai-yē klaimakhai nai-yē*, whatever (is) mine (is) yours. In the third person we have *ā-yē* or *āi-yē*.

The *Demonstrative Pronoun* is *hai*, this or that. It takes the suffix *bā*, and has a genitive in *yē*. Examples are,—

laipāk hai-ro, in that country.

napāwā hai-bā-ni, that man (sent him).

hai-yē āmandi, the price of that.

lūpā hai-ri, this rupee.

The pronoun of the third person is also used as a demonstrative, as in *sapūk ā-ri*, this horse. In one case we have *yā-ri* meaning 'the,' viz., in *ā-char yā-ri*, his sister, literally, 'the his sister.' In the parable, *yā-rau* is translated 'among them'.

Interrogative Pronouns are,—*Hū(-wē)*, who? as in *hū-yē chā napāwā*, whose son? *kaū(-wē)*, what, as *nai-min kaū-si taū*, what is your name? *taū-hori kaū-taū-wo*, what is the matter? *kaū-ngat*, is 'how many?' Compare *ā-ngat*, so many.

Verbs.—The conjugation of the Maring verb is on the whole more definite than that in the other members of the group. Each tense has its own suffix, and the general scheme of conjugation is adhered to very fairly.

The *Verb Substantive* has two forms *oi* and *lai*, both of which are conjugated quite regularly.

The following is the conjugation of the *Finite Verb* :—

Present,—Suffix *lē*, as *ūm-lē*, strikes; *chā-lē*, eats; *chā-lē*, goes.

The suffix *wā* is also used as in *kai chā-wā*, I go. The suffix *lē* sometimes takes a final *i*, and the verb the prefix *ki*, as in *nang ki-chā-lēi*, thou goest.

Present Definite,—I have found one instance of a periphrastic present with the verb substantive *lai*, viz., *khāng-lai*, is giving (a feast).

Future,—The suffix is *ro*, as *ūm-ro*, will strike; *sūn-ro*, will say. Compare Tāngkhul *ra*.

N.B.—*ro*, also written *raū*, is also the suffix of the locative case.

Imperfect,
Past,
Perfect,
Pluperfect, } —Suffix *lā*,—*ūm-lā*, struck; *yel-pi-lā*, divided and gave; *ma chūp-lā*,
kissed; *mi-yēk-lā*, heard.

Suffix *khaū*,—*oi-khaū*, was; *lai-khaū*, were.

Suffix *khaū-lā*,—*chā-khaū-lā*, went.

Suffix *orā*,—*chā-orā*, went; *chā-orā*, sent (see causal verbs); *nang-orā*, was distressed; *māng-orā*, wasted.

Other forms,—*hūng-til-nā-wā*, joined; *nūng-āiyā-wā*, rejoiced; *hūng-ā*, came back; *kangāi*, asked.

Imperative,—Suffix *lak*,—*ūm-lak*, strike; *khlāk-lak*, put; *pi-lak*, give; *fan-lak*, bind; *yūsūk-lak*, draw (water); *ūp-yē-lak*, cause to wear; *na-yē-lak*, put on; *tūng-yē-lak*, cause to ride; *thi-lak*, look. So (with final *ā*) *pi-lak-ā*, give (my share).

Suffix *wā*,—*chā-wā*, go; *laū-chā-wā*, walk; *oi-ra-wā*, make (me one of your servants).

Suffix *yā-si*,—*lai-yā-si*, let us remain.

Verbal Nouns, etc.,—Suffix *nū*; Dative, *um-nū-nūng*, to beat; *oi-nū-nūng*, to be.

Locative, *tāng-nū-ro*, on becoming dear.

Suffix *bi*,—*ūm-bi*, striking; *oi-bi*, being; *chā-bi*, going, and many others.

Suffix *bai*,—*chā-bai*, having gone or having eaten; *kan-thaū-bai*, having arisen; *mū-bai*, having seen, and many others.

Prefix *ka*,—*ka-lai*, one who exists or remains, a resident.

Passive Voice,—As usual does not exist. 'I was struck' is rendered 'struck me,' *kai-yā ūm-lā*.

Negative Verb,—The negative particle is *mak*, as *thangāi*, good; *thangāi-mak*, bad. So *pi-mak-ā*, gave not; *ni-mak-ā*, am not (compare Tāngkhul verb substantive); *yā-mak*, refused; *khā-thūt-mak*, did not disobey. Note that the negative follows the word negated.

Causal Verb,—The use of the suffix *ni*, added to the nominative, seems to change an intransitive verb to a transitive one. Thus *chā-orā*, (he) went; but *napāwa hai-bā-ni chā-orā*, that man sent (him). Causal verbs are also formed by adding *yē* to the root. Thus, *ūp-yē-lak*, cause to wear; *na-yē-lak*, put on; *tūng-yē-lak*, cause to ride.

Interrogative Verb,—I have not traced any interrogative particle which is suffixed to verbs.

233. My father lives in that small house.	Uchi katē nēhē apūnā boē	Ishāvāna shim kateo chili pama.
234. Give this rupee to him	Kasha hō lēnāhē piyo	Lupā hi āli miholu . . .
235. Take those rupees from him.	Pohino kasha ti polo	Lupā chi āwui aina kuitulu
236. Beat him well and bind him with ropes.	Poē dādāpiyo urēnā fulo	Āli tārāka sholaga khara aina khalaphālu.
237. Draw water from the well.	Ubbālētino ūza sithēpalo	Rakhongwui aina tara sekkulu.
238. Walk before me . . .	Ājino tāo	Hi rida chatlu
239. Whose boy comes be- hind you ?	Nithē thēnāno lēnā ?	Nakharangli khara noshino mayār chili kachipāwui- kala ?
240. From whom did you buy that ?	Nē ti thēhino hralina ?	Chi kali lolakala ? . . .
241. From a shopkeeper of the village.	Perumai chino trekālō kājiū hino hralē.	Khawui dukān akali loi .

Phadāng (McCulloch).	Khangoi Khoongoe of McCulloch).	Maring Nāgā.	English.
...	...	Nā chākhaulā . . .	215. You went.
...	Ā chākhaulā . . .	216. They went.
Ngē rēt-lō . . .	Nā rē-tō-mā . . .	Chāwā . . .	217. Go.
...	...	Chābi . . .	218. Going.
...	Chāorā . . .	219. Gone.
.....	Naimin kau si tau ? . . .	220. What is your name ?
...	...	Sapūk āri chahi kau ngat dā ?	221. How old is this horse ?
...	Ārauwē Kāshmir fāi kau ngat lā ?	222. How far is it from here to Kashmir ?
.....	...	Naipāi chimlāu naichā napāwā kaungat lai ?	223. How many sons are there in your father's house ?
...	...	Kai angtū kat lāni chā khaulā.	224. I have walked a long way to-day.
.....	Pātulai āchāni āchar wālaulā.	225. The son of my uncle is married to his sister.
...	Sapūk khangāu sāpal chimāirā lailē.	226. In the house is the saddle of the white horse.
.....	Namkal lā sāpal khlāklak .	227. Put the saddle upon his back.
.....	Āiyē chāyā kaina chaini chūngnē ūmlā.	228. I have beaten his son with many stripes.
.....	Āni chinglā halchāk pisaile	229. He is grazing cattle on the top of the hill.
.....	Āni hing haidāk lao sapūk tongbai lailē.	230. He is sitting on a horse under that tree.
.....	...	Āchar yāri ānāuni ānē kachāu.	231. His brother is taller than his sister.
...	Haiyē āmandi lūpā khani makhāi.	232. The price of that is two rupees and a half.
.....	Kaipāri chim chāchārao lailē.	233. My father lives in that small house.
.....	...	Lūpā hairi ānung pilak .	234. Give this rupee to him.
...	...	Ānungai lūpā kachūng wālaū haiyā.	235. Take those rupees from him.
.....	...	Āyā kannā ūmbi rūini fanlak.	236. Beat him well and bind him with ropes.
.....	Kūhārē yui yū-ūklak .	237. Draw water from the well.
.....	...	Kaimāibanglā lauchāwā .	238. Walk before me.
...	Nahinlā hūyē chā napāwā hinglai ?	239. Whose boy comes behind you ?
.....	Hū nang laiklo ? .	240. From whom did you buy that ?
.....	...	Kūyūl tūkālē klo .	241. From a shopkeeper of the village.

Map of the

DIALECTS OF THE KACHIN GROUP OF THE TIBETO-BURMAN FAMILY.

Scale 1 Inch = 32 Miles.

THE KACHIN GROUP.

The Singphōs or Kachins are a numerous race, covering a large area, from Upper Assam across Northern Burma beyond the Chinese boundary into Yünnan. In Burma they presently extend as far south as 22° 30' N. L. Their villages are scattered throughout the hills and mountains, and they have, to quote Mr. George, 'a horror for the plains, and but rarely come down to settle.' Only a small portion of them live within the territory included in the Linguistic Survey, in the Lakhimpur district of Assam, chiefly on the Buri Dihing, Noa Dihing, and Tengapani. A few Singphōs are also returned from Sibsagar. They are here called Doāniyās, from the Assamese *doān*, language, foreign language. The Doāniyās are said to be half-breeds begotten by Singphōs on Assamese slaves.

The numbers of Singphō speakers returned from Assam are :—

[illegible]

The number of Singphōs outside Assam cannot be estimated. At the Census of 1891 2,684 were numbered in Burma, but their chief places of residence lay outside of the territory included in the census operations. The following account of their gradual spread is taken from the Rev. J. N. Cushing's Grammatical Sketch of the Kakhyen Language:—

The time of the appearance of the Kakhyen in the mountainous region of the extreme north of Burma is uncertain. Their advent in Assam, and their advance southward and south-eastward in Burma, are comparatively recent. Dalton, evidently depending on Hannay, fixes the date of their appearance in Assam about 1793. A linguistic fact shows that they entered Assam after a long contact with the Burman. The Assamese Kakhyen have in common with those of Burma certain words of Burman origin which must have been the result of considerable intercourse with the Burman. Thus, in Bronson's Singpho Spelling Book, we find *sanat*, 'a gun', *apet*, 'sin', *ugrai*, 'hell', *hprah*, 'god', which were manifestly obtained from the Burman.

The Kakhien made their first advances among the mountains between Bhamo and China, and began to displace the Shan population about two centuries ago. A Chinese Shan prince told me, that less than two hundred years ago there was not a Kakhien village between Bhamo and Sanda. Now, the mountains are occupied by a large Kakhien population . . . The Kakhien are still pressing slowly southward and eastward, and displacing the Shan and Burman. In 1868 the writer was prevented from reaching the town of Theinni because the mountains were held by a strong force of Kakhien at war with the Shan prince. Anxious reference was made to the fact, that they were increasing in number in the district. In such thinly-peopled regions, where the indigenous population is constantly diminishing, the Burman and Shan still cling to the banks of the rivers, while the Kakhien cease to confine themselves altogether to the mountains.'

Though several writers had formerly mentioned this tribe, it was not till the annexation of Upper Burma that we became closely acquainted with them. In Burma they are called Kachins. The Burmese word *chin* is applicable to any hill tribe of barbarous habits. Thus, the Chins are called so by the Burmans, but they have nothing to do with the Kachins. The spelling Kakhyen represents the older form, which still lives in the mouth of the people in Lower Burma. In Upper Burma *khy* and *ky* are pronounced *ch*, though the older form is written. The Kachins call themselves Ching-pâ or, dialectically, Sing-phō. In the western dialect this word is said to mean 'man,' but not so, according to Dr. Cushing, on the Burman side, where it only means a Singpho.

The Tai call the Kachins Kang; the Chinese call them Yê-jên, wild men, or when they choose to be polite, Shan-teo, heads of the hills.

According to Mr. George, 'the Kachin, taken generally, is a small man, averaging 5 feet 4, while the woman averages 3 or 4 inches less . . . The number of types met with is bewildering. The prevailing feature among all Kachins is the oblique eye and a tendency to high cheek-bones.' Logan describes the Assam Singphôs as 'indolent, fickle, and so improvident that, although possessed of a fertile portion of the province and in the vicinity of markets, they do not produce enough of the materials of food to place themselves above want. Nationally they are rapacious, cruel, revengeful, crafty and treacherous.' The following extracts are taken from Mr. George's interesting account in the Burma Census Report:—

'As a rule the Kachin cannot be said to be courageous. He generally resorts to ambuscade, and will not attack unless in what he considers overwhelming force and by surprise . . . Slavery is prevalent . . . Cannibalism is unknown among the true Chinpaws, though Captain Fenton, speaking of the Kalangs, Kanôns, or Kamans, says their chief peculiarity seems to be that they eat their elderly relations when they (not the elderly relations) think they have lived long enough . . . The most common and universal form of agriculture is *taungya* or hill-clearing . . . The method employed is to select a virgin site on a hillside and fell the jungle about March, and let it lie on the ground till thoroughly dry. This is set fire to in June and July, and the surface of the earth broken up by hand with a rude hoe, the ashes being thus mixed therewith. The sowing is of the roughest description. As the worker dabbles away with the hoe in his right hand, he throws in a grain or two with his left . . . They possess no knowledge of writing, the legend being that the *Nats* gave all nations writing, but unfortunately that given to the Kachins was written on hide, which, they being hungry and ignorant of the value of what they were destroying, cooked and ate . . . The Kachins worship "*Nats* or spirits", of whom the numbers are endless, for any one may become a *Nat* after his death . . .

The Kachins divide themselves into two great divisions, the Kakhus, *i.e.*, Kachins of the river sources [of the Chindwin and the Irrawaddy], and the Zinpyaw (or Jân-piaw) or eastern Kachins, including generally all Kachins to the south of the confluence, and who are found of course in the greatest numbers to the east of the Irrawaddy, distinguished from each other by dress and dialectic differences.

There is a constant tendency, as Lieutenant Elliott has observed, on the part of the Kachins, to disintegrate and reform themselves into minor clans, which, after a short time, become independent of the parent stock.'

The division into Kakhus and Zinpya is only a geographical one and does not imply difference in race or language.

The Kachins are also divided into Kamsa Kachins and Kumlao Kachins. The Kamsa Kachins are those who have a *Duwa*, or ruler. The word *kumlao* is said to mean 'rebel.' The Kumlaos are said to consist of rebels from the various Kachin tribes. They did not elect a *Duwa* because the members of one tribe would not have recognised a ruler belonging to another.

The traditions of the race point to the head-waters of the Irrawaddy as their original home. Their first ancestor lived on the hill Majaw-shingrâ-pum, from which they think that the Irrawaddy rises. The Singphôs or Kachins proper are derived from his eldest son, while his younger sons became the progenitors of several tribes which are now practically assimilated to the Kachins.

The Kachins themselves are divided into five tribes, which all claim to be descended from the grandson of the first ancestor. These tribes are the Marips, Lathawngs, Lepais, 'Nkhums, and Marams.

The **Marips** are found west of the Mali Kha in the Hukawng valley, and north of this up to the Kakhu country; round the jade and amber mines; and also to the west of lake Indawgyi. East of the Irrawaddy there are only a few scattered villages belonging to the tribe.

There are numerous sub-tribes :—

- | | |
|----------------|--------------|
| 1. Singdonkha. | 9. Tingrum. |
| 2. Om. | 10. Singlwi. |
| 3. Ningrong. | 11. N'ding. |
| 4. Lema. | 12. Lasum. |
| 5. N'kang. | 13. P'howlu. |
| 6. Demao. | 14. Waja. |
| 7. Gawlu. | 15. Maraw. |
| 8. Lakang. | |

The **Lathawngs** are supposed to have come from the country between Mali Kha and N'mai Kha. They have spread southwards over all the country north of the upper defile of the Irrawaddy; from the Mali Kha west to the Kuman range; along both banks of the N'mai Kha for some distance above the confluence; along the right bank of the Irrawaddy nearly as far south as Myitkyina; west of this to the Shwedaunggyi range of hills; on the Chinese frontier just below the head-waters of the Molè and into North Hsenwi and Mōng Mit.

The following sub-tribes are said to exist :—

- | | |
|-------------|----------------------|
| 1. Tabor. | 10. Kaddaw. |
| 2. Salor. | 11. Tingut. |
| 3. Sana. | 12. Waga. |
| 4. Tingra. | 13. Ninglaw. |
| 5. Malu. | 14. Selawng Ngawn. |
| 6. Lawkhum. | 15. Thinmut Selawng. |
| 7. Kashu. | 16. Lamun Selawng. |
| 8. Paochan. | 17. Tingsa Selawng. |
| 9. Nawkhum. | 18. Phaoyan Selawng. |

The **Lepais** are said to be the largest and most powerful of the Kachin tribes. They are found in the Shwedaunggyi hills to the north and north-east of Mogaung; in the tract of country between the two arms of the Irrawaddy; along the right bank of that river about Myitkyina; and in the Pōnkan Hills south-east of Bhamo. But they are also found scattered about all over the Kachin country and in north Hsenwi and Mōng Mit.

The following sub-tribes are known :—

- | | |
|------------------------|-------------|
| 1. Thama. | 10. Singma. |
| 2. Kaori. | 11. Lakhum. |
| 3. Sampawng. | 12. Paran. |
| 4. Szi or Asi or Ithi. | 13. Khunro. |
| 5. Samkha. | 14. Krawn. |
| 6. Lassa. | 15. Kara. |
| 7. Wawang. | 16. Tingsa. |
| 8. Phunkan. | 17. Mōngsi. |
| 9. Sadan. | |

Of these the Kaoris and Szis are said to have distinct dialects of their own.

The Kaori Lepais live in the hills to the east and south-east of Bhamo. Their dialect has been described by the Rev. J. N. Cushing: see **Authorities**.

The Szi Lepais are found all along the frontier from a point east and south-east of the head-waters of the Nantabet and south of Sadōn. They also hold the hills west of the Namyin, south of Mogaung as far as lake Indawgyi. A few seem also to be found in Möng Mit and Tawng Peng. They are said to have lived originally near Myitkyina. A vocabulary by Captain H. R. Davies has been published in the Upper Burma Gazetteer. The dialect differs from other Kachin languages, and the Szis must no doubt be considered as half-breeds.

The 'Nkhums seem to have come from the country south of Khāmti Lōng and west of the Mali Kha. They are found on the east bank of the Irrawaddy, north of Maingna, and also on both banks of the N'mai Kha some way from the confluence and near the head-waters of the Natmyin stream, which enters the Irrawaddy from the east near the village of Ywapaw (situated in latitude $25^{\circ} 17'$). There are a few scattered villages of the tribe along the frontier, and south of the Taping river the 'Nkhums inhabit the tract of country on the borders of the Shān-Chinese States of Ho-Hsa and La-Hsa. The principal sub-tribes are :—

- | | |
|-------------|---------------|
| 1. Mashan. | 5. Panma. |
| 2. Chikyet. | 6. Nawgo. |
| 3. Shirè. | 7. Wurung. |
| 4. Watao. | 8. Kalangcha. |

The Marans are found all along the frontier in scattered villages, though north of the sources of the Molè river they seem to extend further into British territory. They are also found west of Sinbo, and in the Kauk-kwe valley; and to the west of the Mali Kha north of the Shwedaunggyi range and about the Amber mines. They have also spread southwards as far as Möng Mit on the east of the Irrawaddy and Mohuyin in the Katha district on the west, and also south-east into Tawng Peng and North Hsen Wi.

The principal sub-tribes are :—

1. Lana.
2. Laika.
3. N'ting or Ningting.
4. Makan Ningting.

Several other tribes are regarded by the Kachins as probably descended from the same ancestor. The chief of these are the Sassans, the Marus, the Lashis, and the Yawyins or Lihsaws. Their dialects differ, so far as we know, widely from Kachin, and their alleged connection with them does not seem to have any foundation. Some of them, such as the Marus and Lashis, are apparently half-breeds, and they seem to have intermarried with the Kachins.

Besides these tribes the Kachins regard several others as connected with them. They are found between 25° and 28° north latitude. They are the Khangs, the Kaphawks, the Kaluns, the Tarens or Tarengs, also called Maingthas, the Khenungs, the Khunnongs, the Murus, the Sōns and Bilus. All these tribes seem, however, to be quite distinct from the Kachins.*

The Rev. O. Hanson divides the Kachin dialects into three classes, the Northern, Kaori, and the Southern Kachin. They differ, to some extent, in vocabulary. But

* The preceding notes on the Kachin tribes have been taken from the Upper Burma Gazetteer, quoted under authority.

most points of disagreement are due to different pronunciation and the use of different prefixes. The whole structure of the language is, on the other hand, the same in all these dialects.

The Southern Kachin, spoken in the Bhamo district, has been described by Messrs. Hertz and Hanson; the Kaori dialect is the foundation of the grammatical sketch by the Rev. J. N. Cushing; and the Assamese Singphō is known through the grammars of Messrs. Logan, Macgregor, and Needham. The last named dialect is the only one which falls within the limits of this Linguistic Survey.

The Kachin dialects have many points of resemblance with the Kuki-Chin languages, especially Meithei, and with the Nāgā and Bodo languages. Thus, the numerals and personal pronouns correspond to forms found in those dialects. A few instances will show this :—

	<i>Kachin.</i>		<i>Other languages.</i>
One	<i>ai, ngai</i>	Meithei	<i>a-mā</i>
Two	<i>n'khong, ni</i>	„	<i>a-ni</i>
Three	<i>ma-sūm</i>	Kwoireng	<i>sum, Kuki-Chin thum.</i>
Four	<i>ma-li</i>	Meithei	<i>ma-ri</i>
Five	<i>ma-ngā</i>	„	<i>ma-ngā</i>
Six	<i>khrū</i>	Gārō	<i>krok, Rāngkhōl ga-rūk.</i>
Seven	<i>sinit</i>	Bârâ	<i>sni</i>
Eight	<i>ma-sat</i>	Ēmpēo	<i>da-sāt</i>
Nine	<i>cha-khū</i>	Kabui, Khoirāo	<i>cha-kū</i>
Ten	<i>sī</i>	Namsangiā	<i>ichhi</i>
Hundred	<i>la-chū</i>	Meithei	<i>chā-mā</i>
I	<i>ngai</i>	Tamlu	<i>ngai</i>
Thou	<i>nāng</i>	Kuki-Chin, Bodo, Nāgā-Bodo, and Eastern Nāgā groups	<i>nang</i>
He	<i>khī, shī</i>	Banparā, Kwoireng	<i>si</i> ; Lai <i>khī</i> , this ; Meithei <i>a-si</i> , this.

Similar forms occur in many other languages of the groups in question. With regard to the vocabulary there are many points of correspondence. Mr. Gait, in the Assam Census report, compared 22 common Singphō words with the corresponding words in other Tibeto-Assamese languages, and found that half of them were identical with the forms occurring in some of the dialects compared. A greater number of words have been compared in the introduction to the Kuki-Chin group, with the same result. There are, however, so many points of difference that the Kachin dialects must be considered as quite independent forms of speech.

A comparison of the grammatical features of Kachin and other Tibeto-Burman languages shows the same relation. The general tendencies and the whole structure is identical in all. We even find the same prefixes and suffixes used in Kachin and in other Tibeto-Burman dialects. Thus, the prefix *ga* or *ka*, which is used in the formation of nouns and adjectives in Kachin, has the same function in Bodo and Nāgā languages. The Kachin plural suffix *ni* is used to form the plural of personal pronouns in the Central Chin and the old Kuki dialects; and the plural suffix *thē* in Southern Kachin apparently corresponds to the suffix *tē* in Lushēi and connected languages.

But there are also many points of difference. More especially, Kachin has developed a copious system of verbal suffixes, which is more akin to Burmese than to the dialects mentioned above. It also agrees with Burmese in the use of the prefix *a* to form nouns and adjectives, though the same prefix is perhaps also used in the Nāgā and Kuki languages. It is of importance that Kachin uses a prefixed negative in the Burmese way. Āo, Lhōtā, and Tamlu, however, have the same principle for the formation of the negative verb.

In one essential point, Kachin differs from Burmese and from the neighbouring dialects in the west. The Kachin system of tones is quite peculiar to itself. The best description of the Kachin tones is given by the Rev. O. Hanson. He mentions five, while the Rev. J. N. Cushing knows of six. He describes them as follows:—

‘The first tone is the natural pitch of the voice, with a slight rising inflection at the end. It may be called the *natural* tone.

The second is a bass tone; it may be called the *grave* tone.

The third is a slightly higher tone than the second, being pronounced with an even prolonged sound: it may be called the *rising* tone.

The fourth tone is very short and abrupt; it may be called the *abrupt* tone.

The fifth tone is somewhat higher than the third and is uttered with more emphasis; it may be called the *emphatic* tone.’

This richness in tones shows that Kachin is more closely connected with Tibetan, and that it must be classed as a link between that language in the north, the Nāgā and Kuki-Chin languages in the west, and Burmese in the south.

The following is a list of the authorities dealing with Singphōs which I have come across:—

- BROWN, N.—*Comparison of Indo-Chinese languages*, *Journal of the Asiatic Society of Bengal* Vol. VI, 1837, pp. 1023 and ff. Contains a Singpho Vocabulary on p. 1033.
- PEMBERTON, CAPTAIN R. BOILEAU.—*Abstract of the Journal of a Route travelled by Captain S. F. Hannay . . . from the Capital of Ava to the Amber Mines of the Hukong Valley on the south-east frontier of Assam*. *Journal of the Asiatic Society of Bengal*, Vol. VI, 1837, pp. 245 and ff.
- HANNAY, MAJOR S. F.—*Sketch of the Singphos, or the Kakhyens of Burma: the position of this tribe as regards Burma, and the inland trade of the valley of the Irrawaddy with Yunnan, and their connection with the North-Eastern Frontier of Assam*. Calcutta, 1847.
- ROBINSON, WILLIAM.—*Notes on the Languages spoken by the various tribes inhabiting the Valley of Assam and its mountain confines*. *Journal of the Asiatic Society of Bengal*, Vol. XVIII, p. i, 1849, pp. 183 and ff., and 310 and ff. Contains a grammatical sketch on pp. 315 and ff. and a comparative vocabulary of Singpho, etc., on pp. 342 and ff.
- HODGSON, B. H.—*On the Aborigines of the Eastern Frontier*. *Journal of the Asiatic Society of Bengal* Vol. XVIII, 1849, pp. 967 and ff. Reprinted in *Miscellaneous Essays relating to Indian subjects*, Vol. II, pp. 19 and ff. London, 1880. Contains a Singpho Vocabulary by Bronson.
- HODGSON, B. H.—*On the Mongolian Affinities of the Comasians*. *Journal of the Asiatic Society of Bengal*, Vol. XXII, 1853, pp. 26 and ff. Reprinted in *Miscellaneous Essays relating to Indian Subjects*, Vol. II, pp. 51 and ff. London, 1880. Contains vocabularies of Singpho, etc.
- BIGANDET, RIGHT REV. PAUL.—*A Comparative Vocabulary of Shan, Kaching and Pa-Lawng*. *Journal of the Indian Archipelago and Eastern Asia*. New Series, Vol. II, 1858, pp. 221 and ff.
- LOGAN, J. R.—*The West Himalaic or Tibetan Tribes of Assam, Burma and Pegu*. *Journal of the Indian Archipelago and Eastern Asia*. New Series, Vol. II, 1853, pp. 637 and ff. Contains account of the Singpho, grammatical sketch, and vocabulary.
- YCLE, H.—*A Narrative of the Mission to the Court of Ava in 1855, with notices of the country, government and people*. London, 1858. Contains in Appendix M. Bronson's Singpho Vocabulary.
- BEANES, J.—*Outlines of Indian philology, with a map showing the distribution of Indian languages*. Calcutta, 1861. Appendix A contains numerals in Kakhien etc.

- HUNTER, W. W.,—*A Comparative Dictionary of the Languages of India and High Asia*. London, 1868.
- ANDERSON, J.,—*A Report on the Expedition to Western Yunan viâ Bhamô*. Calcutta, 1871. Contains vocabularies, Kakhyin, etc. The vocabulary is reprinted, and a sketch of the people is given in Anderson's *Mandalay to Momien. A Narrative of the two Expeditions to Western China of 1868 and 1876 under Colonel E. B. Sladen and Colonel Horace Browne*. London, 1876.
- DALTON, EDWARD TUITE,—*Descriptive Ethnology of Bengal*. Calcutta, 1872. Contains notes on the Singphos, pp. 9 and ff., and a vocabulary, pp. 69 and ff.
- CAMPBELL, SIR G.,—*Specimens of Languages of India, including those of the aboriginal Tribes of Bengal, the Central Provinces, and the Eastern Frontier*. Calcutta, 1874. Singpho Vocabulary, pp. 221 and ff.
- STRETTELL, G. W.,—*The ficus elastica in Burma proper or a narrative of my journey in search of it*. Rangoon, 1876. Contains account of the Kakhyens pp. 67 and ff., pp. 89 and ff., pp. 107 and ff.
- FORBES, C. J. F. S.,—*On Tibeto Burman Languages*. *Journal of the Royal Asiatic Society*, Vol. X, 1878, pp. 210 and ff. Contains Singpho, etc., vocabularies, pp. 226 and ff.
- FORBES, CAPT. C. J. F. S.,—*Comparative Grammar of the Languages of Further India. A Fragment. And other Essays*. London, 1881. Contains comparative vocabularies of Singpho, etc., p. 75.
- CUSHING, REV. J. N.,—*Grammatical Sketch of the Kakhyen Language*. *Journal of the Royal Asiatic Society*, New Series, Vol. XII, 1880, pp. 359 and ff.
- NEEDHAM, J. F.,—*Outline Grammar of the Singpho Language as spoken by the Singphos, Dowanniyas, and others residing in the neighbourhood of Sadiya, with illustrative sentences, phrase-book, and vocabulary*. Shillong, 1889.
- GAIT, E. A.,—*Report on the Census of Assam for 1891*. Shillong, 1892. Contains abstract of Singpho Grammar, p. 185; Note on the Doāniās, p. 287.
- EALES, H. L.,—*Report on the Census of Burma*. Rangoon, 1892. Contains a note on "The Kachin Naga group," p. 164; note on the Kachins, Appendix A, pp. v and ff.; Memorandum on the Kachins on our frontier, by E. C. S. George, Appendix A, pp. x and ff.
- SYMINGTON, A.,—*Kachin Vocabulary*. Edinburgh, 1892.
- BAINES, J. A.,—*Census of India, 1891. General Report*. London, 1893. Note on the Kakhyin or Chingpau, p. 129, and on the Nāga-Kākhyin group, p. 150.
- HANSON, O.,—*Kachin Spelling Book*. Edinburgh, 1895.
- HERTZ, H. F.,—*Handbook of the Kachin or Ching-paw Language containing the grammatical principles and peculiarities of the language, colloquial exercises, and a vocabulary*. Rangoon, 1895.

- MACGREGOR, MAJOR C. R.,—*Grammatical Notes on the Singpho Language*. Shillong, 1896.
- MACGREGOR, MAJOR, C. R.,—*Outline Singpho Grammar*. Contains also a list of words, Singpho and Khámpti. No date or imprint.
- SCOTT, J. GEORGE, assisted by J. P. HARDIMAN,—*Gazetteer of Upper Burma and the Shan States*, Vol. I, Part I. Rangoon, 1900. Account of the Kachin Hills and the Chingpaw on pp. 331 and ff.; Kachin vocabulary on pp. 660 and ff.
- SYMINGTON, ANDREW,—*Kachin Vocabulary*, Rangoon. Amer. Bapt. Miss. Press, 1901.

The following sketch of the Assamese Singphō is based on Mr. Needham's grammar, to which the student is referred for further details :—

Pronunciation.—The system of transliteration adopted for the survey suits the phonetical system of Singphō fairly well. *ā* is the sound of *a* in 'all', and *ui* the French *ui* in 'huit.' The vowels *a* and *e* are often interchangeable, thus *kashā* and *keshā*, young; *ai* sometimes becomes *a*, thus *rai*, thing, matter, *makhai-mā ra-dai*, what is the matter. The consonants *d* and *t* are often interchangeable, thus *deng* and *teng*, then. In the same way we find eastern *k* corresponding to western *g* in *k'wah*=*ga-wā*, father, etc. The sounds *ch*, *ts*, and *s*, seem to be confounded, thus *ka-chī*, *ka-tsī*, and *ka-sī*, cold; *Sing-phō*, *Tsin-pō*, and *Ching-pā*, man; *ning-sāng-ī* and *ning-tsāng-ī*, upon, etc. The accent generally rests on the penultimate, but on the last syllable in adjectives beginning with *ga*; thus, *ga-jā*, good; *ga-bā*, great. Compound verbs carry the accent on the last root, thus *bai-lū*, find again. Many words have the suppressed sound of *m* or *n*

before them; thus, *m'phū*, approximately; *n'tā*, a house; *n'khong*, two. Only the smallest stress is required on such initial consonants, but they can be distinctly heard while the word is being uttered. Singphō is rich in tones. Cushing mentions six in Eastern Singphō. Needham seems not to know more than four, and no attempt has been made to note these tones in writing.

Prefixes and suffixes.—There are in Singphō, as in other cognate languages, many prefixes and suffixes used to express the various meanings which a root can assume. The most important of them will be explained in the following pages. But there are also several prefixes which seem to have no longer any special meaning of their own, and are frequently dropped. Such prefixes are:—

chi, *ga*, *gi*, *gū*, *ka*, *ke*, *la*, *li*, *m'*, *ma*, *mo*, *n'*, *ning*, *si*, *sī*, etc.

Thus, *chi-krong*, mosquito; *ga-jā*, good; *gi-gin* or *gū-gin*, ant; *ka-tūn*, short; *ke-shā*, son; *la-gōng*, foot; *li-ning*, year; *m'bā*, cloth; *ma-nau*, dance; *mo-gui*, elephant; *n'tā*, house; *ning-sā*, old; *si-ban*, flower; *sī-rōng*, tiger, etc.

The prefix *ga*, especially, besides being used in the formation of adjectives, must be added to nouns expressing relationship, when no pronoun is prefixed, thus *ga-wā*, father.

Articles.—The numeral *ai-mā*, one, is used as an indefinite article; thus, *sing-phō ai-mā*, one man. Sometimes *mā* is used alone; thus, *li-ning mā*, one year. But often no article is used. There is no definite article. Definiteness is indicated by demonstrative pronouns and relative participles.

Nouns.

Gender.—This is only apparent in the case of animate nouns. In the case of nouns of relationship it is indicated (a) by the use of different words; (b) by prefixing *lā-shā*, male, and *nūm-shā*, female; (c) by suffixing *wā*, male, and *jan*, female. Thus *wā*, father; *nū*, mother; *sa-brāng*, young man; *ma-khon*, young woman; *lā-shā māng*, son; *nūm-shā māng*, daughter; *nūm-dū wā*, master; *nūm-dū jan*, mistress. Where no ambiguity arises the same word may be used for both genders; thus, *nau*, brother and sister, in the specimens.

In the case of inferior animals the suffixes are *lā*, male, and *vī* or *wī*, female. Sometimes the noun or, if it is dissyllabic, its last syllable, is reduplicated. Thus *gui-lā* (or *gui-gui-lā*), dog; *gui-vī*, bitch. In the case of birds *rāng* may be substituted for *lā*, thus *wū-rāng* or *wū-lā*, a cock.

Number.—Number is only marked when it is not evident from the context. The plural is indicated by adding some word meaning heap, crowd, etc., such as *nī*, *bok*, *theng*, *yōng*. Thus *m'bā-nī*, clothes; *rai-bok*, goods; *n'dai sing-phō-theng*, these men; *rai-yōng*, all goods, etc.

Case.—Cases are formed by suffixes.

The genitive always precedes the noun on which it is dependent. The nominative generally, and the accusative often takes no suffix. The suffix *ī*, denoting the agent, is usually added to the subject of a transitive verb. The vocative is expressed by the simple stem, or by adding the particle *ē*. The suffix of the genitive is often dropped. The usual suffixes are:—

fē, dative or accusative;

nan, *goi-nan*, ablative;

nā, genitive;

goi, *ī*, locative

Examples of the various cases are the following:—

Nominative,— miyam wā-dai.

the-servant says.

ke-shā-ī ga-wāfē ngū-dai . . . ga-wā-ī miyam-bok-fē
the-son his-father-to says the-father the-servants-to
 ngū-dai.
says.

Accusative,— lākchop jō-ū.

a-ring give.

ngai khi-nā n'tā n'sā.
I his house-to not-went.

khi miyam ai-mā-fē shī-gā-dai.
he slave one calls.

Dative,— sī-dai-fē nāng peyen jō.
him-to you feast give.

Ablative,— ngai nam-(goi-)nan lū-hā.
I jungle-from got.

Genitive,— ga-nau-nā giyā.
his-sister's shame.

sī-rōng li-min ma-dai.
tiger's claws sharp-are.

Locative,— n'tā-goi makhai-mā ra-dai.
house-in what matter-is.
 ma-nāp-ī wū goi-dai.
dawn-at cocks crow.

Vocative,— wā-ē, O father.

Other suffixes are: *dē*, in the direction of; *sī-rá* (or *tsī-rá*) and *da-pham-ī*, with, by means of; *tha-rá*, *tha-rá-ī*, together with; *tagui*, into; *tagui-ī*, inside; *mason*, near, etc.

Often more than one suffix is added. Thus in the ablative the locative suffix *goi* generally precedes the ablative suffix *nan*. Further we find combinations like *mūng sī-dai-goi-nā*, of (the men) in that country, and so forth. When an adjective, pronoun or numeral follows a noun, the suffixes are added to the former, thus *sing-phō ai-mā-nā*, man one-of.

Adjectives.—Comparison is expressed by putting the noun in the ablative case, or by adding *n'lō*, than. The adjective may be repeated with *mang*, and, also, and *gran*, very, exceedingly, may be added. Thus—

gūm-rāng nan (or n'lō) ga-bā.
a-horse than large

ōrā m'bā n'lo n'dai m'bā ning-nān mang ning-nān.
that cloth than this cloth new and new.

The superlative degree is expressed in the same way, with *yōng-a*, all, thus,—

yōng-a n'lō m'bā ga-jā.
all than cloth good.

The comparative is expressed by the use of different words in *ka-shā*, young; *yut*, younger; *dīnglā* old; *lāt*, older.

Numerals.—The numerals are given in the list of words. Singphōs can count up to 10,000; above that they use terms such as 'very many.' There are no ordinals. The suffix *mā*, which is always added to *ai*, one, is often used to denote an approximate number, thus *khṛū-mā*, about six. *M'phū* is also used in the same way.

Pronouns.—The following are the *personal pronouns* :—

Singular,—*ngai*, I; *nāng*, thou; *khī*, he, she, it; *ngai-nā*, *nyē-nā*, *nyē*, my; *nā-nā*, *nā*, thy; *khī-nā*, his, her.

Plural,—*ī*, we; *nī*, you; *khī-nī*, they.

Pronouns are inflected in the same way as substantives. The suffix of the agent is *gā*. It is sometimes added to the nominative. Thus *ngai-gā kāsī-dī sī-dai*, I starving, am dying. When a word denoting relationship governs the genitive of the second person, it is preceded by *n'* or *ning*, thus *nā ning-shā*, your son; *nā n'nan*, your brother.

The *reflexive pronoun* is *tingnāng*; thus, *ngai tingnāng dī-gā*, I myself will do it.

The *demonstrative pronouns* are *n'dai*, this; *sī-dai*, that; *ōrā-wā*, that, yonder. The plural is formed by adding *nī*. Instead of *sī-dai* we also find *dai*, thus *Sing-phō dai*, that man.

There is no *relative pronoun*. The participle ending in *dai* is used as a relative participle. Thus *Dhonirām-goi marī-dai kinsū*, the cow which was bought from Dhanirām. Sometimes also the interrogative pronoun is used as a relative. Thus,—

ga-dai nāng-ī ma-sū-dī mang sī-dai-fē dūp rā
what boy lying even that beat necessary,

the boy that has told a lie, must be beaten.

The *interrogative pronouns* are *da-mā*, who? *makhai*, what? *ga-dē-na-wā*, which? *ga-dē-mā*, how much? how many? The interrogative particle *mā* is also often added to *makhai*. Thus *n'tā-goi makhai-mā ra-dai*, what is the matter in the house?

Verbs.—The roots *ngā* and *rai* are used to perform the office of a verb substantive; *tai* is 'to become', and the particle *rē* is used in the meaning 'is indeed.'

Verbs do not change for gender, number, or person. The mere root is freely used to denote the different tenses. Thus *nāng phū-mang n'dī*, you anything not-do, you do nothing; *khī makhai-mā sū*, what did he say; *dainī ngai n'sā*, to-day I will not go. But the different tenses are also formed by suffixes, as follows :—

The suffix of the *present* tense is *dai*, in form identical with the demonstrative pronoun, thus *dī-dai*, does; *ngā-dai*, is. This form is also commonly used as a historical present, thus *kinsū māt-dai*, the cow was lost.

The suffix of the *past* tenses is *hā*, to which *dai* may be added. Thus *hai-lā-hā*, brought back; *sū-hā-dai*, told. The past tenses of *ngā* and *rai*, to be, are also formed irregularly *ngāng-dai*, *rēng-dai*.

The suffix of the *future* tense is *ā*, in the first person also *gā*; thus, *khī sā ā*, he will go; *ngai wā-ā* (or *wā-gā*), I will say.

The suffix of the *imperative* is *ū*, thus *jō-ū*, give. *Gá* may be added as in *sā-ū-gá*, let him go. When a pronoun of the first person is dependent on the imperative, the suffix *ī* may be used, thus *ngai-fē yā-ī*, give me. The prohibitive form is made by placing *khūm* or *phūng* before the imperative. See below, Negative particle.

The suffix of the *conditional* is *yāng*; thus, *māng dūp-yāng-gá*, if I beat the child. This tense is really an adverbial participle. A past conditional may be formed from the participle in *dī*, with *gá* added. Thus *ngai khī-fē mū-dī-gá*, if I had seen him.

The *infinitive* is formed without a suffix; thus, *ngai ngā mit-dai*, I wish to remain. The suffix of the infinitive of purpose is *a-joi*, thus *magap-a-joi*, in order to conceal.

The suffix *yāng* is also used in the sense of an *Adverbial participle*, thus *Dihong khā rap-yāng*, on crossing the river Dihong. The *Conjunctive participle* ends in *dī*; thus, *ngai sā-dī wā-gá*, I having gone will say. To denote continuance of an action this participle is repeated, and *krai* is then sometimes substituted for the first *dī*; thus, *tam-dī* (or *tam-krai*) *tam-dī*, having continually searched. The participle in *dī*, or the root of the verb, is very frequently used in the formation of compound tenses, thus *khī yūp-dī* (or *yūp*) *ngā-dai*, he is sleeping.

The suffix of the *Relative participle* is *dai*. See above Relative pronouns.

Potentiality is indicated by the word *ngūt*, thus *ngai pōn ngūt-ā*, I will be able to lift.

Causatives are formed by adding the verb *sī-nūn* (*tsī-nūn*) to the root, thus *Sing-phō dai khī-fē wā yā-sī-nūn-dai*, that man causes him to tend pigs. Transitives are formed by prefixing *sī* (*tsī*) to a root, thus *sī-krá*, to dry; *sī-krit*, to frighten.

Compound verbs are very extensively used. Compounds with *ngūt*, *sī-nūn*, and others have already been mentioned. Other instances are *bai-lū*, to get again; *yū-sā-dai*, he comes to see (*yū*), etc.

The *Negative particle* is a suppressed *n'* prefixed to the word, or, in compound verbs, to the second part of the compound; thus, *n'lū-dai*, does not get; *shā-n'sī-nūn-dai*, to eat not cause. For *n'ngā-dai*, is not, *ka-tā*, without, destitute, may be substituted. Thus, *nyē-nā yām ka-tā*, to me powder is not. With imperatives the particles *khūm* and *phūng* are used; thus, *khūm dūp-ū*, don't beat; *phūng sā-ū*, don't go.

The *Interrogative particles* are *ī*, *mā*, and *khā*; thus, *nāng ká-sī-dai-ī*, are you hungry? *Sāheb-fē mū-hā-khā*, did you see the Sahib? In alternative questions the particle *kūm* is used; thus, *nāng khī-fē dūp kūn n'dūp*, did you strike him or not? *khī nāng-goi dū kūn-ī*, did he arrive here?

Any word may be treated as a verbal root and conjugated throughout; thus, *rai*, thing, matter, *rai-dai*, is; *māsū-dai*, is false; *ka-chī-hā*, it was cold. A noun, or, if dissyllabic, its last syllable, is occasionally repeated in the verb; thus, *manau-nau-dī*, dancing.

Order of Words.—The usual order of words is subject, direct object, indirect object, verb. In interrogative sentences the indirect object usually precedes the direct. Adjectives and numerals generally follow, but occasionally precede the noun. Adverbs generally precede adjectives and verbs.

The particles *nā* and *lō* are often added at the end of a sentence.

Nā is apparently a sort of persuasive particle, though often a mere expletive, and *lō* is apparently an emphatic, pure and simple.

Concerning other Singphō dialects we are acquainted with Southern Kachin and Kaori.¹ The differences to be found in the latter dialect are of relatively small importance. We have seen that even within the Assamese Singphō, soft and hard consonants are, to some extent, interchangeable. This fact accounts for a good deal of the dialectic differences between Eastern and Western Singphō. Thus Eastern *tūng*, Western *dūng*, to sit; Eastern *n'tai*, Western *n'dai*, that; Eastern *k'wā*, Western *ga-wā*, father. Or we find different prefixes used, thus Eastern *tūm-sū*, Western *kin-sū*, cow.

In the declension of nouns we find the following suffixes peculiar to Eastern Singphō:—

jan, nominative, Western *ī*;
phai, jai, dative, Western *yē*;
nai, dē-nai, ablative, Western *nan, goi-nan*;
eh, genitive, Western *nā*;
ū-ai, vocative, Western *ē*.

The comparative particle is *thā-krau*, compare Western *grau*. The noun seems not to be inflected.

The Eastern numerals are the following:—

1, *l'ngai*; 2, *l'khaung*; 3, *m'hsūm*; 4, *m'li*; 5, *m'ngū*; 6, *krū*; 7, *hsa-nit*; 8, *m'sat*; 9, *ja-khū*; 10, *shi*; 11, *shi l'ngai*; 20, *khūm*; 30, *hsūm-shi*; 40, *m'li shi*; 100, *lā-sā*; 200, *mi-sā*; 300, *m'hsūm sā*; 1000, *khing-mi*. The only difference from Western Singphō is *l'ngai*, one, Western *ai*.

In the conjugation of verbs we may note the following suffixes:—

present tenses *ai*, Western *dai*;
 past tenses *hsa*, Western *hā*;
 „ „ *ngūt-hsa*, Western *hā-dai*;
 future *nā*, Western *ā*;
 imperative *mū*, Western *ū*.

All these points are relatively unimportant, and Cushing is quite right when he says: 'Considering the extent of the region occupied by this people, and the fact that they have been without books, the dialectic differences are less than might be expected. Many words are identical in all the dialects, while some words are peculiar to a single dialect. A large class of words exists, which have been subject to more or less dialectic change of form, but show clearly their original identity.'

The Kaori dialect forms a link between Northern Singphō and the Southern Dialect of Burma. The latter has been described by Messrs. Hertz and Hanson, and the student is referred to these handbooks for further information. I have added a translation of the Parable of the Prodigal Son in the Southern Dialect. It has been taken from the Rev. O. Hanson's translation of the Gospel according to St. Luke, and an interlinear translation has been added.

¹ In the following I have altered Cushing's transliteration so as to accord with the system used in the Survey. I have retained *hs* for aspirated *s*; *kh* German *ch*.

[No. 1.]

TIBETO-BURMAN FAMILY.

KACHIN GROUP.

SINGPHŌ OR KACHIN.

SPECIMEN I.

NOTE.—The apostrophe in words like *n'khong* indicates a very slight pause after the *n*, and before the rest of the word is spoken.

(F. J. Needham, Esq., 1896.)

(DISTRICT, LAKHIMPUR.)

Singphō aimā-nā keshā n'khong ngā-dai. Keshā kachī ga-wā
Man a-of sons two were.¹ Son (the)-younger (his)-father
 fē ngā-dai, 'nyē-nā man gadē-mā-ngā-dī-mang² jō-ū.' Deng ga-wā gam-dī
to says, 'my share whatever give.' Then father dividing

gives. Father property having-divided after son the-younger many
 yā n'kring-dī num chān goi dām⁴ sā-hā-dai. Khī mūng sīdai goi
days not-staying country a-far in to-visit has-gone. He country that in
 khī-nā rai-bok⁵ kām-mō-kām-rūm-shā-thūm-hā-dai. Rai-bok⁵ yōng rūm-shā-thūm
his goods has-wasted. Goods all wasting
 n'thomī mūng sīdai goi khū gabā rai-hā-dai. Khī shā-phā n'ngā-
after country that in famine a-great has-occurred. He food not-been-
 hā-dai khī mūng-sīdai-goi-nā singphō aimā goi mūnglī-dī sā-dai. Singphō
has he country-that-on-of man a with work-to-do goes. Man
 dai khī-fē nā goi wā yā-sinūn-dai. Khī wā-nā 'ngām mang
that him the-fields in swine to-tend-orders. He pigs' husks even
 lū-dī-mang shā-phā dai-dī shā n'lū-dai. Khī mit
getting-even (would-have)-eaten-(them) but food (he)-not-gets. He coming-to-himself
 n'thomī wā-dai, 'nyē wā-nā miyam lō-lō shā lū-dī chandi ngai-gā
after says, 'my father's slaves heaps to-eat getting to-spare I
 kāsī-dī⁶ sī-dai. Ngai wā goi sā-dī wā-gā, "wāē, ngai niyon
hungering dying-am. I father to going will-say, "father, I against
 Phrā-goi dai-n'thomī nāng-goi phit-hā; nā-nā ningshā dai-n'thēkā;
God-to also you-to sinned; your son am-not-fit(to-be);
 ngai-fē miyam sitai lau-ū." Deng khī wā-fē-goi sā-dai. Ga-wā-wā
me a-slave as take"" Then he father-in-to goes. His-father

¹ Here, as elsewhere, the present tense is used instead of the past. Singphōs are very careless in their use of tenses, especially when the past meaning can be gathered from the context.

² *Gadē-mā* = as many as, *ngā-dī* = being (*ngā* substantive verb, to be, with past participial suffix *dī* added), so that *gadē-mā-ngā-dī-mang* means 'as many as being even' (*mang* = even, and).

³ *Gam-jō-dī* is a compound verb: *gam*, to divide; *jō*, to give.

⁴ *Dām* means to stroll, visit, etc.

⁵ *Bok* is the plural suffix.

Kāsī = hunger; *dī* = past participial suffix, *sī* = *dī*, with present tense suffix *dī* attached; so that *kāsī-dī sī-dai* means 'Lung-ering am dying.'

khī-fē chān-da-goi mū-dī n'gā-hā lagat-sā-dī dū jūm-dī pūp-dai.
him a-distance-at seeing pitied-(him)-(and) run-going (his)-neck falling kisses.

The-son his-father-to says, 'Father, I against God-to also yourself-to
mang phit-hā, ngai nā-nā ningshā n'thēkā.' Deng-ī khī-nā ga-wā-ī
also sinned, I your son am-not-fit-(to-be).' Then his his-father
 miyam-bok-fē ngū-dai, 'yōnga n'lō m'bā gajā lau-dī, khī-fē
slave-company-to says, 'all than cloth good having-brought him-to
cha-fūn-ū;² latā goi lākchop jō-ū, lagōng goi lēvē
put-(it)-(upon); (his)-finger upon a-ring give, (his)-feet upon shoes
 degrā-jō-ū; Ī-bok lū-shā sipiō-gā, n'dai-ning-khānī nyē shā
put; We drink-eat (and)-be-merry-will, for my son
 sī-dai, yā krūng-dī-ngā-dai; khī māt-dī, bai-prū-lū-dai.' Deng-ī
dead-that-was, now alive-is; he lost-being, again-found-is.' Then
 khī-nī piō-dī-ngā-hā.
they merry-made.

Deng keshā gabā nā goi ngā-dai. Khī wā-dī³
At-that-time son the-elder the-fields in is. He on-returning
 n'tā mason dū-dai ning-chin-dai manau-nau-dī nang-dai. Khī
(the)-house near on-arriving singing (and)-dancing hears. He
 miyam aimā-fē⁴ shīgā-dī san-dai, 'n'tā goi makhai-mā-ra-dai?' Miyam
slave a-to calling asks (him), '(our) house in what-is-the-matter?' The-slave
 wā-dai, 'nā ning-nau-fē gajā-dī bai-lū; sīdai-ning-khānī nā ning-wā
says, 'your your-brother well-being recovered; this-reason-for your your-father
 lū-shā jō-dai.' Deng-ī khī pot-dī n'tā tagui n'shāng-dai.
drinking-eating giving-is.' Then he angering (the)-house inside not-enter-does.
 Deng-ī ga-wā sing-ganī dū-dī keshā-fē pom-dī shīgā-dī. Keshā gabā
Then his-father outside coming the-son-to entreating called. Son the-elder
 nyē wā-fē wā-dai, 'wāē, ngai n'theng-ning nā mūnglī dī-dai, galoi-yang
my father-to says, 'father, I many-years your work doing-am, ever
 mang nā gā n'makau-dai.⁵ Dai-dī-mang, nāng ngai-fē bainam-keshā⁶
and your commands not-transgressed. Notwithstanding, you me-to kid
 aimā mang nūmnang tharā-ī shā-n'sinūn-dai.⁷ Nā ning-shā kachī
one even my-friends with to-eat-do-not-order. Your son younger

¹ The *ī* in *keshā-ī* is merely the nominative particle.

² *Cha-fūn* means 'to put on' clothes.

³ *Wā-dī dū-dai* is a compound verb. *Wā* = return, *dū* = arrive.

⁴ *Fē* = dative case suffix.

⁵ *Makau* means to throw away, abandon, etc.

⁶ *Bainam* = great, *keshā* = young, *bainam-keshā* = kid.

⁷ *Sinūn* is a causal imperative verb. The literal rendering of the passage being *you-to-eat-do-not-order* = nevertheless, *nang* = you, *ngai-fē* = me-to, *bainam-keshā* = a kid, *mang* = even, *nūmnang* = with friends, *shā-n'sinūn-dai* = to eat do not order.

rai yōng shā-simā-dī mang sīdai-fē nāng peyen jō.' Deng-ī khī khī-nā
(his)-goods all having-wasted although to-him you a-feast give.' Then he his
 ke-shā-fē ngū-dai, 'ke-shāē, nāng-gá' nong ngai-tharā ngā-dai; nyē-nā rai yōng
son-to says, 'son, you always me-with are; my property all
 nā-nā rē. Ī ong-phā, dai-ning-khānī nā ning-nau sī-dī,
yours is-indeed. We should-be-merry for your your-brother being-dead,
 yā krūng-dī ngā-dai; khī māt-dī, bai-lū-hā-dai.'
now living is; he lost-being, found-has-been.'

¹ *Gá* is here an emphatic personal pronoun suffix.

 Dhonirām tharā sā-dī ngai-fē garūn-dī wā, 'nāng Malotī yū sā-dai.'
Dhanirām with coming me seizing said, 'you Mālatī to-see come.'

¹ Lagū is root of the verb 'to steal.' Sā is root of verb 'to go.' The infinitive suffix of the former, and the past tense suffix of the latter, are omitted, as is common in Singphō.

² Rē is a verb of emphatic assertion equivalent to the Bengali বরু.

³ Phrong-dī-ngā-dai is a compound verb meaning, literally, 'having fled is.'

⁴ Kūn is a particle denoting uncertainty. Sā-dī-kūn is 'gone whether,' ngā-dī, saying; like the Assamese গুণিচুলি.

⁵ Gā is used here as an emphatic personal pronoun suffix.
